The department has been directed to provide copies of all records in our possession related to the Flint water matter to the Governor's office. You are receiving this email because you have been identified as an individual who may have records that must be produced. If there are any department members who you think may be in possession of records related to Flint water, please forward this message to those members.

Records include memos, handwritten notes, emails and attachments, and text messages in your possession, regardless of who produced the record. Be sure when you search your email messages that you look in your inbox, sent box, and trash. In preparation for the production, you must estimate the number of records you have in your possession and provide that estimate to Ms. Lori Hinkley no later than **2:00 PM on Friday, February 12, 2016.**

You must then provide a copy of each record in your possession to the Legislative and Legal Resources Section no later than close of business on **Thursday, February 18, 2016.**

Members who work at Headquarters must provide paper copies to F/Lt. Chris Hawkins in the Office of the Director. Members who work at the State Secondary Complex must provide a paper copies Ms. Lori Hinkley. Ms. Hinkley is located on the second floor of the new Headquarters building. Department members who work outside of these worksites may send copies of records in their possession via e-mail to MSP-FOIAProject@michigan.gov.

In addition to this initial production of records, the department is required to provide copies of newly created records on an ongoing basis. Until further notice, copies of all newly created records shall be forwarded to MSP-FOIAProject@michigan.gov.

REMINDER: Public records can only be disposed of consistent with an approved retention schedule. As it applies to emails and text messages related to the Flint water matter, please use the retention schedule in place for general correspondence which is **two years**. Please save all emails and text messages for at least two years. Prior to expiration of the two year period you will have an opportunity to re-evaluate the content of the messages to determine if an additional retention period is necessary. If you have issues with accommodating emails based on your mailbox size, please archive them. Do not print and file them as the metadata must be retained as well.

If you have any questions with these instructions, please contact Ms. Lori Hinkley.

VIDEO: How volunteers are helping Flint

Volunteers at the Food Bank of Eastern Michigan are working hard to collect donations in order to help the families of Flint. Last Thursday, Governor Snyder visited with the many dedicated volunteers and helped sort cans of food.

Good nutrition is critically important for Flint's children. Foods that are high in calcium, vitamin C, and iron can help limit the effects of lead exposure. To donate or volunteer at the Food Bank of Eastern Michigan, visit www.fbem.org.

Click here to watch the video and learn more about how the Food Bank of Eastern Michigan is helping Flint's families.

Gov. Rick Snyder: Process under way to locate and replace lead water pipes in Flint

Flint-based engineering firm to track service lines, identify high-priority areas

FLINT, Mich. – Work on replacing high-risk lead service lines in Flint is under way as state and city leaders collaboratively focus on removing pipes in priority areas while analyzing the city's water pipe network to maximize efficiency, Gov. Rick Snyder said.

The state today came to an agreement with Rowe Professional Services, a Flint-based engineering firm, to update recent analysis of water pipes in the city and boost efforts to protect the health and safety of city residents.

"We're committed to the people of Flint, and the top priority is ensuring people have access to safe water," Snyder said. "We need to make sure people will be able to once again turn on the tap and be able to use what comes from it. We're immediately targeting high-risk, high-hazard homes to help those families. Together, we can focus on longer-term solutions."

Retired National Guard Brig. General Michael McDaniel is assisting in coordinating the efforts between the city of Flint, the Lansing Board of Water and Light, state and federal agencies and other stakeholders.

"Flint Mayor Karen Weaver wants this work to be completed as quickly as possible to protect Flint residents," McDaniel said. "We've been working in partnership to identify the areas that need to be addressed immediately and remove lead pipes, bringing peace of mind to Flint families and make sure this never happens again."

Snyder said a supplemental budget request approved unanimously in the Legislature last month includes money for utilities and can be used to survey Flint's underground network of pipes. Ongoing water testing is revealing where there are high-risk, high-priority areas that should be addressed most quickly. Teams are moving with great urgency to locate where lead water pipes are located and focus on high-risk areas.

"We need to find out which of the city's pipes are made of lead and have lead soldering, and are the most critical to address immediately," he said. "We're hiring Flint residents and training them to assist with that process, working together to make the community safer."

A supplemental budget request to the Legislature includes $25 million that can be used for water infrastructure. Snyder said other resources can potentially be tapped for additional funds to replace pipes.

The $25 million was included in a $195 million package of immediate and long-term support for Flint and its families that Snyder unveiled as part of Wednesday's budget presentation, focusing on health, education and infrastructure.

The budget request includes money for other infrastructure needs, including water testing, inspecting and replacing fixtures in schools and daycare facilities, prioritizing infrastructure repairs and staying connected with Detroit water.

Also included is money for food and nutritional programs, health-related programs and funds to bring relief to residents who had been paying for water they could not use.

FOR IMMEDIATE RELEASE
Sunday, Feb. 14, 2016

Editor's note: See attached for official letter and waiver request.

Gov. Rick Snyder seeks federal waiver to expand Medicaid services in Flint to people under age 21, pregnant women

Request would ensure access to needed health services

LANSING, Mich. – Gov. Rick Snyder is seeking to expand Medicaid for those up to age 21 and pregnant women who have been served by the city of Flint's water system, and today submitted a request to the Centers for Medicare and Medicaid Services.

"Children, teens and young adults exposed to lead need more coverage to get testing and the treatment they need," Gov. Rick Snyder said. "Expanding these services and lead abatement efforts

will mitigate the risks of lead exposure and result in better identifying any long-term health challenges, including behavioral issues."

Approval of the waiver request would mean an expansion of Medicaid and Children's Health Insurance Program services to about 15,000 more Flint residents.

In his letter, Gov. Snyder said the state of Michigan would dedicate case managers to help individuals with:

- Coordinating primary care physicians and behavioral health providers, Medicaid health plans and others to ensure access to all necessary health services;
- Providing nutrition support;
- Improving access to educational and social supports and services that may be available in the community to assist them with their individual needs.

The program would meet the needs of Flint's children, in addition to many other forms of aid being provided by the state of Michigan, the city of Flint and others. Medicaid and CHIP now are primarily income-based aid programs.

Those eligible for coverage include anyone up to the age of 21 and are being served, or who were served, by Flint's water system between April 2014 and a future date when the water system is deemed safe. Pregnant women and their future children will also be made eligible. Coverage is available to all incomes. Individuals with income over 400 percent of the federal poverty level - which is *$47,520 for one person or $97,200 for a family of four - will have the* option to buy into the program for full Medicaid benefits.

The state of Michigan continues to coordinate response efforts in partnership with the all federal, state, and local levels of government and community organizations.

Additional information about water response efforts is available at www.michigan.gov/flintwater, by calling United Way's 2-1-1 or visiting www.helpforflint.com.

Gov. Rick Snyder releases departmental emails produced regarding Flint water crisis

LANSING, Mich. - Gov. Rick Snyder's office today posted emails and corresponding documents that have been made available to requesting entities from state departments regarding the Flint water crisis. The documentation represents requests fulfilled to date by the Department of Environmental Quality, Department of Health and Human Services, Department of Treasury, Department of Technology, Management and Budget, and Department of Agriculture and Rural Development regarding Flint water.

"All levels of government failed the people of Flint," Snyder said. "This crisis should never have happened, but we are making progress each day to meet the needs of residents.

"By making the information easily accessible, everyone can review it and take what they need, and then we can all focus and work together on solutions, healing and moving Flint forward."

NOTE: All emails and attachments can be accessed using the below links. Documents are large and will take time to download. Viewing on a mobile device is not recommended.

LEGAL NOTICE

- The release of these documents is not a waiver of any legal privilege. Gov. Snyder thanks Flint residents for progress on establishing 'sentinel sites' to check water

402 households to help determine when city's water is safe to drink

FLINT, Mich. – Gov. Rick Snyder is thanking 402 households from across Flint who will provide water test data to help determine when the city's water is safe to drink.

The "sentinel sites" will be visited by teams made up of Michigan Departments of Environmental Quality employees and licensed plumbers. They'll teach homeowners how to test their water in a scientifically accurate manner and submit samples on a regular basis for the state to test.

"I want to thank the homeowners participating in this sentinel site program," said Gov. Rick Snyder. "Their diligence in taking scientific samples from their home's water system is crucial in helping us decide the right time to declare when Flint neighborhoods have safe drinking water."

Also launching today is a more streamlined system of addressing homes that test high for lead or copper in their water. This new process will provide residents with more efficient in-home follow-up for environmental and

health wrap-around services coordinated by the Michigan Department of Health and Human Services.

"We want to provide the quickest response possible when we see that a home's water tests high for lead or copper," Snyder said. "We've provided outreach in Flint since October and continue to improve our processes for getting residents the help they need. Streamlined coordination of services between the DHHS, DEQ, Genesee County Health Department and the Flint Local 370 Plumbers Union is yet another step in that direction."

Homes with higher lead levels will receive health and wellness information, blood test referrals, transportation to appointments if necessary and additional bottled water, filters and water sample kits. The homes will also be inspected for possible sources of lead in the water.

Additional information about the Flint water emergency is available at www.michigan.gov/flintwater, by calling United Way 211 or visiting www.helpforflint.com.

For your situational awareness --

The USSS Saginaw Office contacted me last night to advise that Senator Sanders is tentatively scheduled to visit both Detroit and Flint on 2/14 and 2/15. As of now, he is scheduled to land and overnight in Detroit on 2/14. On 2/15 he has a short trip (less than 3 hours, travel included) planned for one site in Flint in the early afternoon hours. Following that, his Detail is advising he plans to return to Detroit for several meetings into the afternoon and evening of the 15th, and then departing via charter jet from Detroit that same night.

Again, the above is tentative and subject to change. As Monday is a Holiday, I wanted to give everyone a heads up for staffing purposes. I will provide updates as they are made available to me.

Gov. Rick Snyder: State partners with Flint human service groups to hire 50 Flint residents to assist with water testing

Additional residents to be hired as more work is identified

FLINT, Mich. –Flint residents will be hired to assist with water testing under a new partnership forged Friday between the state and Flint human service groups, Gov. Rick Snyder announced today.

The partnership with Orchards Children's Services and Flint YMCA's Safe Places Program will help hire and train 50 residents this month to fill jobs on teams helping conduct water tests across the city.

"The people of Flint deserve timely action on emergency efforts to help the city move toward recovery," Snyder said. "We realize our water testing teams need more manpower to get the job done. There is no one better suited to help the city bounce back than Flint residents themselves and we appreciate Orchards Children's Services and the YMCA for helping connect Flint talent with this important positions."

Snyder said this hiring is part of a larger and ongoing effort to ensure Flint residents benefit from opportunities created by relief efforts in response to the water crisis.

"Orchards Children's Services and the YMCA are committed to serving children and families in Flint as we have done long before this crisis and will do long after," said Michael Williams, president of Orchards Children's Services. "The solution to this situation should involve the people of Flint and that is why we are partnering with the state to strengthen our community for the future."

Details on how to apply are available at http://www.orchards.org.

Gov. Rick Snyder: Flint businesses can seek assistance through Small Business Administration disaster loans

SBA approved Snyder's Thursday request

LANSING, Mich. – The Small Business Administration today approved Gov. Rick Snyder's request for low-interest disaster loans for businesses in Genesee County and the city of Flint.

"Approval of economic injury disaster loans will help business owners and nonprofits in Flint recover from any damages as a result of the water crisis," Snyder said. "We will continue to seek resources from all levels of government to help the people of Flint and appreciate the SBA's partnership in our efforts."

The approval provides access to federal Economic Injury Disaster Loans, which are working capital loans to small businesses, small

agricultural cooperatives, small businesses engaged in aquaculture and most private, non-profit organizations that meet their ordinary and necessary financial obligations that cannot be met as a direct result of the disaster. Business owners seeking these loans must apply by Nov. 7, 2016.

Repayment of disaster loans is tailored by the SBA to the borrower's financial capacity.

More information and criteria for SBA disaster loans is available atwww.sba.gov/disaster. Eligible Flint business owners can apply online via SBA's website at https://disasterloan.sba.gov/ela.

Gov. Rick Snyder: Swift Senate approval of $30 million for water bills shows strong commitment to Flint residents

If approved by House, supplemental funding for Flint totals $67.3 this fiscal year

LANSING, Mich. – The proposal announced yesterday by Gov. Rick Snyder to aid the city of Flint with credits to be applied to the portion of residents' water and sewer bills for water used for drinking, bathing and cooking is one step closer to enactment after the state Senate voted unanimously today for passage of the $30 million dollar funding request.

"We want to provide relief to Flint residents who were paying for water they could not drink," Snyder said. "The entire state continues to demonstrate unity in coming together for the residents of Flint, and I greatly appreciate the acts of cooperation, bipartisanship and good will that are advancing Flint's recovery."

If approved by both chambers and signed into law, the Consumption and Consumer Use Credit would aid the city of Flint in applying these credits to residents' water portion of their water and sewer bills until state and federal officials certify the water is safe to consume. Under the plan, the city would credit residential bills going back to April 2014 for water used for drinking, bathing and cooking - about 65 percent of the water portion of residential water and sewer bills. Residents would still be responsible for covering sewer costs

as well as water not used for consumption - such as flushing toilets, hot water boilers and outside water use.

Last Friday, Snyder signed a supplemental budget bill for Flint for $28 million to supply free bottled water, faucet filters, and testing kits for Flint residents, put nurses in local schools to monitor student health and well-being, provide better nutrition for students and infants through WIC and in-school nutrition programs and fund other health care and follow-up services for children with high lead levels.

The $28 million is in addition to $9.3 million appropriated in Oct. 2015 to move back to Detroit's water system, test drinking water and provide wraparound services for children. If this $30 million is approved by the House, state funding for Flint's water crisis for this Fiscal Year will total $67.3 million.

The supplemental spending now heads to the House for consideration, where it will be held for 5 days according to the Constitution before it can be voted on.

The governor will formally present his Fiscal Year 2016-2017 budget recommendation on Feb. 10 in Lansing.

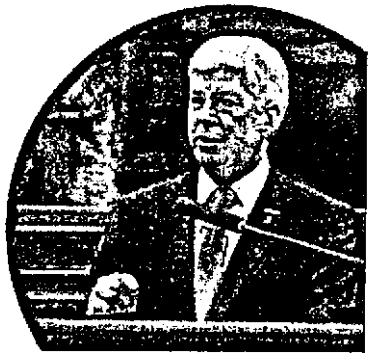
Budget recommendation will include $30 million request for Flint water bill repayments

"I agree with Flint residents, that they should not have to pay for water they cannot drink.

My budget recommendation will include the request for the state to make payments to the city's water system for residential bills going back to April 2014."

— Rick Snyder



www.mi.gov/FlintWater | www.HelpForFlint.com

When Governor Rick Snyder presents his budget recommendation next Wednesday, Feb. 10, he will include a $30 million request for the residents of Flint to keep their water service on and eliminate the need to pay for water they cannot completely trust to drink.

Under the governor's ask, the funding would enable the city of Flint to apply credits for customers on future bills. Estimates show water is roughly 47 percent of billing and sewer costs are around 53 percent. The credit would be applied to consumption usage (roughly 65 percent) of a resident's water portion of the bill, such as for bathing, drinking,

cooking, and washing your hands. Residents still would be responsible for paying the sewer portion of their water bills.

Professor Marc Edwards of Virginia Tech said, "This essentially refunds all the money associated with consumption or consumer use. I think it's an amazing gesture of common sense and good will and it corrects an injustice. I don't think there's a precedent for this. I feel so encouraged by the direction this is going."

Click here to learn more about the budget request.

Importance: High

Please check with Ops and the FEMA liaison to see if these points are correct ASAP.

- The Michigan State Police, Emergency Management and Homeland Security Division requested three FEMA liasions as a part of the standard emergency management process, as well as due to the uniqueness of the Flint water event. These liaisons provide guidance and recommendations during emergencies and disasters. They also exchange information with the FEMA Region V Office in Chicago.

- At this time, there is no request for a Joint Preliminary Damage Assessment with FEMA or a presidential declaration. This is an ongoing incident and we are using all possible resources available to help Flint residents during this emergency.

Water resource sites established in Flint with bottled water, filters and testing kits
State and local officials coordinating resource distribution

FOR IMMEDIATE RELEASE
January 9, 2016
Release #: 02
For more information contact: Joint Information Center: 888-EMD-TODAY (888-363-8632)

LANSING, Mich. – The State of Michigan has partnered with local officials in a coordinated approach to establish five water resource sites in Flint where residents can pick-up bottled water, water filters, replacement cartridges and home water testing kits.

The water resource sites are now open and will be open seven days a week from 9 a.m. to 4 p.m. at Flint fire stations located at:

Fire Station #1
310 East 5th St.
Flint, MI 48502

Fire Station #3
1525 Martin Luther King Ave.
Flint, MI 48503

Fire Station #5
3402 Western Rd.
Flint, MI 48506

Fire Station #6
716 West Pierson Rd.
Flint, MI 48505

Fire Station #8

202 East Atherton Rd.
Flint, MI 48507

"The water resource sites serve as a one-stop location where residents can pick-up all of the resources they need to ensure their drinking water is safe, including bottled water, water filters, replacement cartridges and water testing kits," said Capt. Chris Kelenske, Deputy State Director of Emergency Management and Homeland Security and commander of the Michigan State Police Emergency Management & Homeland Security Division. "The state continues to work in coordination with local officials to ensure the daily needs of residents are met."

Water filters and replacement cartridges continue to be available Monday through Friday, between 9 a.m. and 4 p.m. at the following locations:

Michigan Department of Health and Human Services office
125 E. Union St.
Flint, MI 48502

Michigan Department of Health and Human Services office
4809 Clio Road
Flint, MI 48504

Genesee County Community Action Resource Department office
2727 Lippincott
Flint, MI 48507

Genesee County Community Action Resource Department office
601 N. Saginaw
Flint, MI 48502

Flint City Hall
1101 S. Saginaw St.
Flint, MI 48502

Residents who need transportation or any other assistance can call 211.

Residents are urged to use filtered water for drinking, food preparation, brushing teeth and watering pets. Unfiltered water may be used for bathing and cleaning.

In addition to the water resource sites, home water testing kits are available at Flint City Hall, the Flint Water Treatment Plant or Flint Fire Department locations.

Visit www.michigan.gov/flintwater or call 2-1-1 for more information.

###

NOTE:

A media availability is being planned for later today in Flint. Additional details will be provided once confirmed.

ALL MEDIA INQUIRIES ARE BEING HANDLED BY THE JOINT INFORMATION CENTER AT 888-EMD-TODAY (888-363-8632) or JICNews@michigan.gov.

State of Michigan Joint Information Center Now Operational

FOR IMMEDIATE RELEASE
January 6, 2016; 4:50 p.m.
Release #: 01
For more information contact: Joint Information Center: 888-EMD-TODAY (888-363-8632)

LANSING, Mich. – Today the State of Michigan launched its Joint Information Center (JIC) to coordinate public information from the State Emergency Operations Center, set up to help with health and safety issues caused by lead in the city of Flint's drinking water. The emergency operations center was activated after Gov. Rick Snyder declared a state of emergency for Genesee County on Jan. 5.

Public information and updates, including resources for residents such as how to obtain free water filters and lead testing, are available at www.michigan.gov/FlintWater.

The JIC will serve as the state's central communications hub for this emergency and is staffed by public information officers (PIO) from several state agencies. Hours of operation will be 9 a.m. – 5 p.m., Monday – Friday, until further notice.

It is operating out of the Michigan State Police Emergency Management and Homeland Security Division in Lansing. State officials have been in contact with Flint and Genesee County officials to move the JIC to the city of Flint to better partner and coordinate with local agencies.

The declaration makes available all state resources in cooperation with local response and recovery operations.

Genesee County declared a "local state of emergency" on Jan. 4, activating local emergency response and recovery plans. By requesting a governor's declaration, the county has determined local resources are insufficient to address the situation and state assistance is required to protect public health, safety and property to lessen or avert the threat of a crisis.

The city of Flint has been under a local emergency declaration since Dec. 14, 2015.

Subject: RE: Water PSAs

Hi Ron and Jen,

Before I send this to MAB for them to record, I'm sending you the draft PSA script for the JIC's review. It's at an 8th grade reading level, trying to keep it down:

If you live in Flint, you can help to keep yourself and your family healthy and safe from lead poisoning. You can get FREE water filters, bottled water, home water testing, and blood testing. And there are efforts underway to help you access these things as quickly and as easily as possible. To learn more about where to go and what you can do, visit www.michigan.gov/flintwater or call 211 today.

Once the JIC has approved it, I'll send it to MAB to record and work with them on placement/air dates within Flint. I know there are pieces of this that the SEOC may still be working out but we can always have this ready to air once we're ready to announce it.

Thank you,

Angela

Happy to.

Hi Denise,

Thank you so much for offering MAB's support. I've only been given the high level details that MAB is offering to help with a PSA. We don't have anything developed at this time. Would you be able to assist with production if we can provide a message?

Thank you again! We so appreciate your offer.

Angela

Angela and Denise,

If you two could work together to create the PSAs about Flint water, that would be great.

Thanks,

Ron

FOR IMMEDIATE RELEASE

Relief Effort Expands: Filters, Bottled Water Now Available at Flint Fire Stations

Flint, MI—January 9, 2016— The relief effort in the Flint water crisis continues to expand as Flint Fire Stations become distribution points for filters and water. All five Flint Fire Stations

will be open Saturday from 11am to 4pm dispensing free water filters, replacement cartridges, and bottled water to Flint residents and water customers. Flint Fire Stations will continue this effort every weekday, starting Monday, January 11. Red Cross volunteers are serving in these stations to make this operation possible.

This is a joint effort between the City of Flint, Genesee County, and the State of Michigan to address the ongoing water emergency in the city. Genesee County Declared a State of Emergency on Monday, January 4, 2016. The State of Michigan followed with a declaration on Tuesday, January 5, 2016.

State and local officials are continuing to work to make the water safe again after elevated lead levels were reported in the water system throughout 2015. In October the City switched back to the Detroit Water and Sewerage Department as its water source, following with additional corrosion control additives in December. It will take additional time and effort before the water is drinkable again. **Until that time, residents and water customers are urged to continue using water filters and bottled water.**

Water Filters are also available at Flint City Hall, Monday through Friday 8am to 5pm. Both Brita and Pur filters and their replacement cartridges are available. The Zero brand water pitchers are also available, which are a good option for individuals who are experiencing difficulty affixing the filters to their faucets.

Residents should call 211 for questions about how to obtain a water filter, a replacement cartridge, and bottled water.

Subject: SEOC Update 1/8/16 - Flint Water - Limited Distribution

INTERNAL USE ONLY – LIMIT DISTRIBUTION TO GOVERNOR'S OFFICE

Update 1/8/16

SitRep 3 attached.

There is a significant difference in what is being presented by the media and what the local EOC is relaying to us at the SEOC. It is also being driven by the media that this is a state versus local response (who is providing more and quicker versus a coordinated effort between all). That said, I advised SEOC personnel that perception is reality in some eyes and we are to move forward to address items that typically are addressed at the local level. I have ordered the SEOC open all weekend due to make the quick wins that we need and continue to get the coordination and collaboration in place that is needed (but make gains on our own as needed).

Items to Note

- Two FEMA LNO's arrived today and are in the SEOC. A third LNO was requested from FEMA due to some unique issues with this event to include having to deploy more or my staff to the local EOC to get more structure and/or find out why there is an issue with the message the media is showing versus what we are hearing from the local EOC.

- We finally received from the local EOC 8 locations (we were told originally early in the week they had 80-90) that are their Points of Distribution (PODs) for water in conjunction with the local food bank. The PODs are not getting water from the food bank even though the food bank has water. We are going to resolve this issue as we can help deliver the water to the PODs but we were

not aware of this. 8 PODs is not enough locations if water needs to be distributed to citizens. Speaking with the ARC Regional Administrator later today, I believe ARC got water to those locations but I need to confirm that in the morning. The food bank reported they had 376 cases of water.

- We have learned that a low number of residents are testing their water when DEQ can test 400 kits per day. This is an added focus that we believe can be increased through dissemination of test kits with the filters and any water.

- I found out the Mayor was okay with using fire stations as distribution points for water, filters, and water test kits. While this did not come to me through the local EOC, I advised we needed to get water, filters, and test kits to these locations for tomorrow. The distribution at 5 Flint Fire Department stations has been coordinated to be in place by 10:00 am tomorrow morning.

    - DTMB has provided a truck and driver to pick up water test kits from DEQ lab in Lansing, water from the Food Bank and water filters and replacement cartridges from GCARD in Genesee County.
    - 10 American Red Cross (ARC) volunteers will meet the DTMB truck at GCARD at 9:00 am to be provided information about filters. Instructions will be included in water test kits. They will then report to the 5 fire stations to assist in distribution of resources to the public and track addresses of same.
    - Residents will be told where they can drop off their water test kits, or that they can return them to the fire station the next day. Coordination will occur on pick up of water test kits daily to be taken to the Flint City Hall, who will then delivery them to the DEQ testing lab.

- STILL FINALIZING - We have made available 2,000 Filters for distribution on Sunday as parishioners leave mass/services. This will be 200 filters for 10 churches in Flint. While this is a small number of churches, we do not want to waste an opportunity to hand out filters and this seems like a quick way to so. The filters will be put on the DTMB truck on Saturday for delivery to TBD locations for distribution. Logistics remain undetermined as I am still waiting on a list of the churches, pastors/reverends/hours or services/etc. The DTMB truck will be returning to Lansing approximately 11:00 a.m. so we need to finalize this quickly on Saturday. We may utilize ARC to assist with this.

- The Recovery branch is working with the JIC to develop a door hanger card. DTMB is working on the printing portion of the hanger card. Recovery will also be finalizing logistics over the weekend for neighborhood canvasing to occur early next week. 40 volunteers have signed up to attend training on Monday afternoon to complete this task. The mission will be to deliver water sample kits along with water filters/replacement cartridges, and water.

- It appears that 211 has become overloaded. DHHS is researching ways to increase capacity for calls.

- A Volunteer Management Coordinator is in the Genesee County EOC as of today.

- A Donations Management Coordinator has been requested and she will be in the Genesee County EOC Saturday.

- DHHS had a conference call with GM today; they indicated they can provide cash, and supplies, but primarily manpower. No commitments were made at this point. We inquired as to availability of warehouse space and trucks. It was left as GM being a major resource pool that we can tap into as we determine missions. Further conversations will occur, but primarily GM just wanted us to know they are there if needed.

- An additional EMHSD staff member was sent to the Genesee County EOC to act as Operations Section Chief and obtain awareness of the situation there.

- GIS staff met with various parts of Genesee County/Flint personnel to try to get a handle on data available.

- GIS continues to work with local GIS personnel with three GIS staff going to Flint today to work with them. GIS staff is working with U of M on how best to proceed with digitizing water lines for long term recovery.

Chris

UPDATE 1/7/16

A summary of some of today's SEOC activities is provided below. Attached is the following:

- Today's SitRep which contains more information than below.
- The resource request/task assignment sheet for your situational awareness. This is how locals request resources as well as how we track resources and any assignments and/or tasks that are to be completed.
- JIC Task Tracking – for your situational awareness on how we are tracking requests and assignments. Once someone is assigned a task or resource request it allows them to document what work has been or will be done as shown at the bottom of the document.

Items to note:

- I received a document this evening from Genesee County which appears to be damage assessment information. Analysis of this will occur tomorrow. It appears to be infrastructure and costs to fix it and no other impacts.
- I spoke with Jamie Curtis, Genesee County Commissioner, this evening. A very good relationship is in place with him, especially with our District Coordinator (DC). I also have our DC working on developing stronger relationships with the Mayor/Mayor's office.
- GIS staff continue to obtain data and work with County and City personnel to get a picture of where resources have been provided, need to be provided, as well as infrastructure locations (pipes) that could be affected.
- Personnel and agencies have been tasked with developing a plan to get people in the community to deliver information, hand out filters, etc. This would target those areas we are showing minimal or no filter distribution based on the data we are collecting. The plan is to get them in the field by Tuesday and the plan will be provided to me tomorrow.
- Filters can be obtained at the following locations:
  - Michigan Department of Health and Human Services office, 125 E. Union St., Flint, MI 48502
  - Michigan Department of Health and Human Services office, 4809 Clio Road, Flint, MI 48504
  - Genesee County Community Action Resource Department office, 2727 Lippincott, Flint, MI 48507
  - Genesee County Community Action Resource Department office, 601 N. Saginaw, Flint, MI 48502
- Conducted briefing with local EOC and county executive.

- Conducted briefing with state agencies (daily updates).
- Began work to schedule legislative/congressional conference calls. Tentatively scheduled for 2 p.m. Friday.
- JIC continued to develop messaging.
- Provided input to local EOC regarding best methods of identifying health and non-structural impacts for damage assessment process.
- Deployed two EMHSD/SEOC liaisons to assist the local EOC.
- Published the Incident Action Plan and continued assignment of objectives/tasks.
- FEMA Liaison Officers just arrived in Lansing to assist command and general staff.
- I spoke with Harvey a few times and he should have talking points later tonight or tomorrow a.m. for his use and also for others who may speak to media outside of state government who may benefit from our messaging.
- We held a media round table at 1 P.M. at the SEOC. Dr. Wells and I spoke and answered questions to numerous media outlets.
- Local agencies and NGOs continue to provide water and filters to citizens.
- The website, www.michigan.gov/flintwater, was update with information and links to assistance to include 211. Additional recommendations were provided to include information on the testing water in homes.

EMHSD GIS:

Accomplished Today:

- Reproduced Socio-Economic Status Map
- Reproduced Predicted Affected Populations Map
- Cleansed old data and reports for water filter distributions
- Created draft map of water filter distributions (Refinement needed before releasing final product)
- Scheduled on-site visit with Flint GIS Department and Genesee County GIS Department
- Formatted databases to host content
- Researched service line database creation and scheduled meeting with U of M Flint to discuss timelines and resource needs
- Generated water infrastructure map (does not include building service lines)

Tasks for Tomorrow:

- Meet with Flint City GIS
- Meet with Genesee County GIS
- Meet with U of M Flint GIS
- Finalize water filter distributions map
- Finalize plan for data distribution methods

Chris

UPDATE 1/6/16

A summary of today's SEOC activities is provided below. I tried to distill this as best I could but there has been a lot of activity and discussion to get an accurate assessment of the situation. Attached is the final draft of objectives and tactics for the operational period and agency situation report (SitRep) which has more SEOC agency information. I have implemented weekly operational periods.

Advise if you want anyone else copied or off this distribution.

Daily Update

- Set goals for SEOC and identified response/recovery emphasis
- Requested FEMA liaison officers (LNO) from FEMA Region V. Two LNOs will be on site by ~3 p.m. 1/7/16. *Both are known contacts to me and some staff and one has worked extensively* with me during the SE MI flooding in a command and control position. These personnel have been specifically tasked with this mission. **THEY ARE NOT HERE TO ASSIST WITH A PRESIDENTIAL DECLARATION REQUEST BUT TO ASSIST ME.**
- PIOs from multiple agencies were here and established the Joint Information Center (JIC). News released pushed out on this. I am very happy with the PIO work and movement toward coordinated messaging.
- Held briefing for State Agency Emergency Management Coordinators, which included presentations from DEQ and DHHS subject matter experts to ensure situational awareness and to develop a common operating picture.
    - I opened the briefing by identifying our initial goals, items to think about while subject matter experts were briefing us, and how we are to move forward, find quick wins, and regain trust.
    - **MDHHS – Elevated Blood Lead Levels**
        - Dr. Elizabeth Wells gave an in depth summary of lead poisoning and what has occurred in terms of health monitoring throughout the Flint crisis.
    - **MDEQ – Water Testing Protocols**
        - Mr. George Krisztian of MDEQ gave an in depth summary of the testing protocols and summary results that as they have developed throughout the emerging crisis.
- Developed Incident objectives, strategy and tactics (see attached)
- Identified SEOC and state agency staff positions
- Assigned work tasks for SEOC operation period from 0800 January 6, 2016 to 1700 January 8, 2016
- Reviewed planned actions, prepared final draft Incident Action Plan
- **Made contact with the Genesee County Emergency Manager first thing in the morning and held a conference call mid-day to discuss roles. Daily 0830 command conference calls with local EOC command staff starts tomorrow. Tomorrows call will include the County Commissioner and the City Administrator (both invited). Topics include the incident action plan objectives and establishing better local coordination, command and control to facilitate integration with the SEOC. The local EOC is not functioning as it needs to with personnel and local coordination and we are working on that issue.**
- I will be in Flint tomorrow for a 2 p.m. media round table with local officials that was set up by the JIC.
- The attached initial objectives will be updated at least every operational period and as needed. I listed the objectives below but the tactics to accomplish them is in the attached if you want further information.
    1. Activate the State Recovery Task Force (SRTF).
    2. Establish and maintain coordination between the City of Flint, Genesee County, state and federal agencies, and appropriate medical experts.
    3. Obtain and maintain situational awareness and common operating picture of all activities.
    4. Establish SEOC operational period and hours of operations.
    5. Investigate and identify all available programs for assistance with direct or related impacts, including the federal Lead Pipe Replacement Program.
    6. Develop a comprehensive GIS strategy.
    7. Coordinate response and recovery activities with MIVOAD and identify potential mission areas.

8. Establish and coordinate routine communication between SMEs and coordinate technical assistance among state agencies and to local agencies.
9. Provide technical assistance to the local Damage Assessment process.
10. Establish a Joint Information Center (JIC) and develop a public information strategy.
11. Monitor MI CIMS for resource requests and address as appropriate.
12. Establish and disseminate cost center information for the incident.

- Additional tasks include:
  - Determine what federal agencies are already involved and their status
  - Identify potential water supplies
  - Determine where affected homes are located, where filters/pitchers (and replacements) were installed/provided, and determine who needs filters, etc.
  - *Determine how filter distribution is handled, and if it can be handled more efficiently* and effectively
  - Determine what mechanisms are in place for nutrition supplementation

EMHSD GIS Accomplishments:

- Hosted a conference call to begin coordination with Flint City and Genesee County GIS departments and the SEOC
- Established a daily call with county and city GIS personnel to synchronize GIS efforts in support of the Flint water crisis at 8:30 A.M.
- Began consolidating local data from local GIS practitioners into a consolidated database, to include:
  - Water Pipeline Locations
  - *Filter Distribution Locations*
  - November 25, 2015 Water Monitoring Results (Partial, some data remains to be digitized)
  - Affected School Locations
  - Predictive analysis of blood lead levels for affected area
  - Updated Parcels
  - *Demographics*
  - Block Groups
- Produced a map for the filter distribution locations
- Began contacting specialists who developed historic maps depicting the Flint Water Crisis to obtain the data

Subject: Update - Genesee County Declaration

Below are some key points for your situational awareness (FYSA) that have taken place or will take place within the next 15 hours.

- I was on the phone with Sean Kammer, Assistant to the Flint City Administrator, when the declaration hit the news so I advised him immediately. He was going to let the City Administrator know.
- I contacted MSP Lt. Roach, 3rd District Coordinator, who was at the Genesee County EOC and advised her to let the County EM know the declaration status.
- State Emergency Management Coordinators (SEMCs) were notified via our notification system with additional information in an email.
    - This included information on the SEOC activation and a 0900 briefing for SEMCs.
    - Some subject matter experts will provide us an update to establish a common operating picture.
- We have been in contact with FEMA Region V watch desk ... they will be on the call tomorrow and continue to monitor the situation.
- I have been in contact with the FEMA Region V Administrator to keep him updated.
- Operational period for the SEOC will be M-F, 0800 to 1700 at this time.
- Situation Reports (SitReps) will be provided in the evenings.
- An Incident Action Plan will be developed tomorrow.

Call me with any concerns or questions.

Subject: RE: State Department of Education response to Flint water crisis

Martin,
Is the state Department of Education developing a response to the Flint water crisis and its potential fallout? Numerous studies detail the significant negative consequences of lead toxicity on learning and educational attainment.
I have a number of related questions:

- Is the state preparing for the possibility of increased special education enrollment in the Flint Community Schools, and charter schools in the city, for developmentally delayed students and the costs that would come along with that?
- Will the state provide support to the Flint Community Schools, and charter in the city, as they work to identify children suffering from developmental disabilities due to high levels of lead in their blood? If so, will the support come in the form of professional development or grant funding?
- Does the department know of other districts, past or present, in the state that face similar challenges with a potentially high number of children with levels of lead in their blood entering or already enrolled in the school system?
- Will the state provide extra funding to the Flint Community Schools for water purification systems, or offer some other type of assistance to help allay fears that parents and students may have?

Ron,

Thanks for the heads up about the move to collocate at the Joint Information Center in Flint. I'm copying Jennie Pollak, director of the Central Michigan 2-1-1 program so she can let you know if they need any additional information about accessing bottled water and filters.

One resource to help you track 2-1-1 referrals for water assistance is our 211Counts web site at http://mi211.211counts.org/. You can use the drop boxes to see the data by zip code, county and legislative district during a customizable date range.

Let us know if there is anything 2-1-1 can do to support you efforts in Flint.

Happy New Year!

Great – and we can get that up on the web site asap with some intro paragraph explaining here's what these locations are and here are next steps. Maybe someone can start writing that now.....

Thanks Ron!

1) *We need to get a graphic on our website like the one we have for water filters, that screams:* Here are locations for bottled water. Looping John Estill in. John, as soon as we confirm the eight bottled water locations, we will get them to you, plus a graphic.
2) click on the image for the water filter information. Up pops up a sheet that says NOTHING except the four locations. It's kind of confusing. Let's have an informational paragraph atop that that says something like:

"Here are the locations where you can get water filters. We hope to have more soon, and we hope to start distributing them house to house as soon as possible."

Ron – please let me know ASAP when those changes are made. I want to get them out on social media asap. This is a battle, isn't it?!?

We're working with Flint to expand the location where people can get water. There are eight now, but there will be more soon.

Lots of dedicated state and local folks are working together to improve #flintwater. Michigan.gov/flintwater

We're getting water filters to Flint residents so they won't need bottled water. Info: http://michigan.gov/documents/deq/deq-Flint-Water-free-water-filters_506372_7.pdf

Damage Assessment and Emergency Status Report

Incident: 2015-10-01-City of Flint-Water Contamination / Shortage

Operational Period

Operational Period Begin:	01/19/2016 08:00:00
Operational Period End:	01/26/2016 08:00:00
Situation Report No.	13
SEOC Status:	Full
SEOC Hours of Operation Begin:	01/18/2016 08:00:00
SEOC Hours of Operation End:	*01/18/2016 20:00:00*

Executive Summary

SEOC Update:
Accomplished today (January 18):

The SEOC continues to provide:
- Situational awareness.
- Common operating picture/objectives.
- Coordination with city/county.
- Potential coordination with federal agencies.
- Incident prioritization.
- Coordination of life/health safety measures.
- Resources.
- Public Information Control.

- Logistics:
o Secured email and phone booster for warehouse.
o Worked with FEMA to order water and filter cartridges.
o Worked with DHHS to order filter pitchers for distribution.
o Meetings with FEMA and ARC
o Coordinated resources and needs with donations management.
o Working with Red Cross to provide relief teams for warehouse manager.
o Continuing inventory monitoring and hot shots tracking.
o Projecting future orders of water resources and commodities.

- JIC:
o ARC news release concerning the Volunteer Reception Center (VRC) sent out today.
o Media availability conducted today at 3pm at the VRC.
o News release with daily numbers released this evening.
o Social media covered state and local volunteers in the field today.
o FEMA external affairs in JIC today.

- Recovery Branch:
o Sent out 12 type 3 and 10 type 5 teams to canvass today.
o Data is for 1/18/16 as of 5:00 pm:
o Total homes visited
❑ 11,841 (total)
❑ 5,040 (today)
o Door Hangers
❑ 8,452 (total)
❑ 2,083 (today)
o Water Cases
❑ 5,008 (total)
❑ 1,411 (today)
o Replacement Cartridges
❑ 3,468 (total)
❑ 529 (today)
o Faucet Filters
❑ 6,441 (total)
❑ 1,866 (today)

- Planning Section:
o Lead morning and afternoon state agency conference call.
o Coordinated logistics of resource tracking.
o Developed projections based off of reporting and trend analysis.
o Published Sit Rep # 13.
o Published IAP #6
o Participated in distribution process meetings.
o Participated and facilitated tactics meeting.

- Operations Section:
o Resource request sent for MIANG assistance to deliver water, filters, test kits, and replacement filters to residents.
o Cost analysis to investigate if it would be more cost effective for FEMA to purchase water vs the SOM.
o Arabic version of the palm card was reviewed and approved by command.
o 62 American Red Cross Volunteer active across incident today.

o Warehouse Numbers:
❑ Clio St Warehouse (6pm inventory)
• Replacement Cartridges.
o 60,636
• Filters (faucet)
o 70,855
• Water (cases)
o 149,760
• Testing Kits
o 800
o Point of Distribution (as of 6 pm)
❑ Contacts
• 1249
❑ Water (cases)
• 8355
❑ Filters (faucet)
• 1388
❑ Replacement Cartridges
• 378
❑ Filters (pitcher)
• 53
❑ Test kits
• 1773

• Finance Section:
o Assisting MIANG with hotel logistics for possible deployment to Flint.
o Continue developing spend plans.
o Work with FEMA to determine costs for possible reimbursement for Flint emergency.
o Meet with FEMA IMAT about Public Assistance.

• GIS Branch Updates:
o Continued producing maps of lead service lines (40% complete with primary effected area)
o Developed a map of comparative activity for the JIC from pre-response to post-response.
o Established metrics to measure percent completion of resource distribution. The following two are from today:
o Active Water Subscribers confirmed as Having a Filter: 13164 of 29994 total subscribers (44% coverage)
o Total parcels confirmed as having a filter: 15364.
o Multi-tenant home status: Cannot be completed now, planned to be researched and established tomorrow.
o Fixed data from apps and paper copies of field team reports and PODS.

DTMB:
• Additional 30 iPads will be sent to the teams for tomorrow.
• 2 cell phones procured for DHHS donations management.
• Working to secure space in Flint for FEMA staff.
• 2 port-a-johns procured for warehouse staff.

DHHS-CH:
• The CDC Agency for Toxic Substances and Disease Registry (ATSDR) will deploy to Michigan.
• Continue to work on items for procurement of DBH.

DEQ:
• 7200 sample bottles scheduled for delivery tomorrow.
• Pushed up delivery of 20,000 bottles to meet demands.

Local EOC Update:
• Continuing to work with faith based organization to distribute resources.
• Working with colleges to obtain volunteers for canvassing.

Incident Response/Recovery Priorities/Objectives

1. Ensure all households within impacted community have required resources.
2. Ensure accurate tracking and accounting of all commodities.
3. Improve and maintain public information strategy and process.
4. Develop a long term public health and services plan.
5. Ensure adequate staffing to support operational requirements.
6. Identify possible assistance programs.
7. Maintain GIS strategy.
8. Maintain coordination between partner agencies and organizations to include FEMA IMAT.
9. Enhance situational awareness and common operating picture of all activities.
10. Develop a comprehensive Recovery Plan.

Damage Assessment Summary

Agency Summaries

Joint Information Center / Public Information Officer

The Joint Information Center (JIC) was operational in Flint from 8 a.m. to 8 p.m. on Jan. 18.

State agencies at the JIC included the Governor's Office, Departments of Health and Human Services, Agriculture and Rural Development, and Technology and Management and Budget, Natural Resources, Environmental Quality, Licensing and Regulatory Affairs, Military and Veterans Affairs and Michigan State Police. The Genesee County Sheriff's Office was also present.

Tasks Completed:

• Updated internal talking points to include updated information and activity.
• Arranged a media availability event at the Volunteer Reception Center located at the American Red Cross office on Grand Traverse St. Event. The event was staffed by the United Way of Genesee County, the Michigan Community Service Commission and the American Red Cross of East Central Bay-Michigan.
• Sent out a news release for the American Red Cross about volunteer efforts.
• Arranged to have a section for a photo gallery on the Flint water website.
• Updated the ICS204 form.
• Sent an email to the State PIOs for staffing the JIC for this weekend through next week.
• Planning to send out nightly news release with updated information about today's activity. The release will also include the flint water response team activity map.

Agriculture and Rural Development (MDARD)

Monday Jan 18th update: monitoring mode; planning for field activities this coming week.

American Red Cross (ARC)

The assembly of water test kits at ARC headquarters was postponed until product is available.
We deployed and supported 10 teams for neighborhood canvassing (Water Response). 10-14 teams are planned for tomorrow.
We supplied lunches for all of the Water Response Teams today, and will feed all of the teams again tomorrow.
The volunteer reception center (VRC) was in full operation today. The VRC will be in operation on Tuesday.
We continued warehouse and inventory management efforts.

Civil Rights (MDCR)

Continue to review activities to provide support and assistance to assigned Human Services branch and other SEOC activities. Also monitoring media and coverage of rallies and events.

Community Health (MDCH)

Communications have been maintained between the SEOC and the CHECC, which remains activated at a level 2.

The CHECC was notified that the CDC Agency for Toxic Substances & Disease Registry will have a team of 3-5 people in MI as early as Wednesday this week. This team is coming to MI to provide technical assistance as part of their regular mission. Details are still being worked out with the MDHHS Division of Environmental Health. FEMA and SEOC Incident Command have been made aware.

The CHECC provided an update from the Midwest Kidney Network (ERSD Network 11. "At this time, no dialysis related ramifications have been identified or reported to Network 11" for this at-risk population. The information was shared with LARA as the licensing agency for dialysis centers.

EMpower data has been received which identifies individuals who are dependent on electrical medical equipment in the home. The data is being cleaned for redundancies and will be able to be compared with other data sets to ensure that those at-risk individuals are not missed by the Flint Water Resource Teams that are distributing resources door to door.

The CHECC continues to work with the Behavioral Health and Developmental Disabilities Administration (BHDDA) to address behavioral health needs associated with this incident in collaboration with CMH and SAMHSA.

Corrections (MDOC)

Brent Travelbee and Todd Bechler on duty SEOC today. All previous requests for vehicles, personnel and warehouse equipment have been filled and continue to be on site to assist with water distribution; additional request's today for re-allocation of hand jacks, a replacement electric jack, an additional box truck and 2 more transportation vans have either been filled or are in progress set for Monday morning delivery. MDOC Director Heidi Washington is providing full support to our assistance efforts. We will continue to staff the SEOC as a full-time partner as we have assets deployed into the field. All resources are documented on the appropriate forms and shared with the SEOC staff. Additional resource requests are coming in frequently and we are working hard to locate the requested resources while still maintaining minimal local facility operational requirements from the providing facility.

The MDOC is dedicating a considerable amount of resources and staff to this effort. We are working closely with the Logistics Chief to locate needed resources and fulfill resource requests in a timely manner. All MDOC resources will be reporting tomorrow Sunday January 17, 2016 as requested.

MDOC RESOURCES PENDING DEPLOYMENT: Monday, January 18, 2016

Vehicles with Drivers

(2) – 18' Box Trucks
(4) – 20' Box Trucks
(2) - 24' Box Trucks
(1) - 30' Box Truck (Lift gate broken but truck still on site, DTMB repairing)

Box Trucks have power lift gates

(1) – F250 Pick Up Quad Cab with Cap
(1) – 5 Passenger Handicapped Capable Van

(1) – 15 Passenger Van with 10' Enclosed Trailer
(1) – Pick-up Truck

(6) – 10/15 Passenger Vans

(1) – 20 Person Shuttle Bus (Sent to Red Cross Volunteer Sight)

(1) - 53' Refrigerated Semi-Trailer

(3) - Electric Pallet Jacks (This includes one that is broken and will be returning to Ionia tomorrow night for repair)

(7) – Hand Pallet Jacks

(5) 6-10 Passenger Vans

All vehicles drivers have 800 MHz Radio Operability (G EVENT 9)

Staffing

There will be 24 staff members on site 23 drivers and an assistant for the Red Cross Transportation Van (w/trailer).

Education (MDE)

MDE is monitoring the situation and coordinating as necessary with other state agencies.

English Language Learners report from Flint Public School District (Flint Community Schools). Results show 338 total with 83% Spanish speakers; 6% Arabic; all others report less than 1%.

Environmental Quality (MDEQ)

The Department of Environmental Quality (DEQ) completed the following activities today:
- Another 21,600 bottles for test kits ordered. This totals 50,400 bottles expected to ship in variable allotment beginning tomorrow.
- Participated in SEOC activities to include the daily state agency briefing and the Distribution Process meetings.
- Responded to 211 calls regarding ZeroWater, TDS Meter testing of canned water and facilitated pick up of cans and resupply of bottle water to concerned parties.

Human Services (MDHS)

Looking for availability of Zero Water pitchers per resource request.
Received two cell phones for MCSC to assist with their donation management processes.
Looking to provide a conference room at MDHHS Clio Rd for MDARD inspector training on Wednesday.

CHECC continues to maintain a Level 2 Activation

Licensing and Regulatory Affairs (LARA)

Updated the LARA Executive Team.

DTMB reordered two additional bubbler for the Freeman Elementary faucet replacement pilot project. These bubblers are expected to arrive tomorrow (Tuesday, Jan. 19). LARA will then coordinate with Freeman Elementary to finish the construction work. After that work is complete, LARA will coordinate with DEQ to conduct water re-testing at Freeman Elementary.

LARA is continuing to work with DEQ to establish a schedule, for the next several weekends, to complete school water testing.

LARA communicated with the DEQ LARA's resource availability to assist with water testing.

Military and Veterans Affairs (DMVA)

Last 24 hours:
Distributed water, water filters, water test kits and collected water samples for analysis at five points of distribution. Coordinated efforts with Genesee County EOC and Joint Information Center. In-Processed 33 Soldiers to augment distribution operations at 1800 S. outer Dirve, Saginaw, MI on 17 January 2016 at 1300. Conducted lodging and operations orientation following in-processing. Total of 67 Soldiers on State Active Duty on 17 January 2016. All PODS received pallet jacks for off-loading water pallets. Coordination between FEMA and Selfridge Air Base (SANGB) taking place. Exact terms of agreement of FEMA using SANGB for staging operations have not been identified at this time.

Total of 67 Soldiers on State Active Duty:
1 at Genesee County EOC

1 at Joint Information Center
32 at PODS
33 Soldiers In-processing

Next 48 hours:
Distribute water, water filters, and water test kits and collect water samples for analysis at five points of distribution. Coordinate efforts with Genesee County EOC and Joint Information Center. Relieve Red Cross at PODS, assuming their role of distributing filters. Total of 67 Soldiers on State Active Duty on 17 January 2016. Additional Soldiers will conduct first full day of distribution operation on 18 January 2016. Continue coordination between FEMA and SANGB, a 0800 meeting will be conducted on 18JAN16.

National Weather Service (NWS)

Jim Maczko from NWS Grand Rapids will participate in SEOC morning briefings via phone call and will coordinate support with local forecast office that serves Flint - NWS Detroit/Pontiac. Participation in afternoon SEOC briefings is planned only if significant changes in the forecast occur.

NWS support beyond this weekend being coordinated between NWS Grand Rapids and NWS Detroit. Hand off to NWS Detroit for morning conference call weather forecast likely before the end of January.

Natural Resources (MDNR)

MDNR LED continues to support its GOL partners with staffing at the SEOC.

Department POC's include:
Chief Gary Hagler, F/Lt. Jennifer Wolf, F/Lt. Steven B. Burton.

Services to the Aging (OSA)

Valley Area Agency on Aging - Region 5 (VAAA), in partnership with other local community agencies such as the Genesee County Health Department and MDHHS, has helped organize local meetings and distribute water and water filters. VAAA is an access point for receiving calls from homebound seniors who are not able to pick up water filters or need assistance installing water filters. VAAA reports they continue to receive calls from seniors who need assistance.

Contact info for VAAA Executive Director is:

Valley Area Agency on Aging
225 E. Fifth Street, Suite 200
Flint, MI 48502
(810) 239-7671
(810) 239-8869 fax

VAAA has distributed 2 bottles of water with each home delivered meal to each HDM client within the City of Flint. Water. VAAA also provided water to homebound seniors who needed water to prepare food as they had limited support to pick up bottled water. Congregate meal participants also have access to water and filters as needed. Once water filters were installed, VAAA *discontinued including water with home delivered meals.*

VAAA also contacted the Grandparents Raising Grandchildren program to ensure that they were aware of educational efforts and confirm the program had received water filters to distribute to program participants.

On 1/11/16 AASA forwarded to MSP/GIS over 1,400+ NAPIS addresses of Flint seniors who received in-home services in FY15. The NAPIS file was sent encrypted and did not include client names. The NAPIS file included 1,029 HDM, 138 CM, and 30 CCS clients.

VAAA continues to operate as a call center and referral point for area seniors concerned about their drinking water. They've noticed this week that seniors who've had filters installed are beginning to request bottled water again.

AASA's State LTC Ombudsman has checked in with the local Ombudsman in Flint. Local Ombudsman reports Flint area nursing homes have been taking precautions using bottled water for cooking and drinking. The local Ombudsman remains concern about Nursing Homes' long term need to replace old facility plumbing that may be leaching lead.

State Police (MSP)

Teams have been distributing water all day. 5075 homes have been visited today.

12:43 p.m. - *The SEOC may be requesting additional 20 – 30 Troopers/County or Local Officers along with marked patrol vehicles* to assist with the Door to Door Operations with the National Guard starting tomorrow (1-19-16). The SEOC is still waiting for the Governor to approve the use of National Guard personnel.

5:13 p.m.- The Governor has approved the use of the National Guard for the Door to Door Operations in Flint. The Local EOC was advised to proceed with the planning process for obtaining the additional Troopers/County and or Local Officers with marked patrol vehicles to assist the National Guard. As stated below, they plan on deploying 20 teams on Wednesday 1-20-16.

There will be 200 National Guard personnel arriving on Wednesday (1-20-16). One hundred and eighty (180) of the National Guard personnel will be boots on the ground assisting with the Door to Door Operations and 20 will be National Guard Command Officers. Upon arrival the National Guard personnel will report to the local EOC for briefing and will be deployed into the field using Michigan Department of Corrections transport vehicles.

The ICS 208 was created for 1-19-16 thru 1-26-16 to include updated weather information provided by the National Weather Service.

We had 12 Teams that were deployed today, utilizing 16 trucks (four were utilized for replenishing the team trucks) 110 volunteers, of which 103 were confirmed to be State Agency volunteers.

Supreme Court

08:50 - State Judiciary EMC John Ort reported to the SEOC regarding the Flint water emergency. Nothing to report from the Judiciary regarding the emergency. DEQ website resources shared with our State Court Administrative Office (attn: Region II) in case our Genesee County courts have any questions regarding the emergency.

Technology, Management and Budget (MDTMB)

Provided management briefing and information on emergency declaration.

DTMB Mail Services has seven drivers with trucks assisting in transporting supplies to support point of distribution centers and Flint Water Resource Teams. Drivers have agreed to work through the end of day Tuesday, January 19.

DTMB assisted in procuring 72 truck loads of water, 8 trucks per day until Wednesday, January 20.
91 tablets have been provided to the Flint Water Response Teams to record supplies being delivered in the field.
Provided 450 credentialing badges for volunteers and 4 temporary fuel cards for the MSP officers driving rented U-Haul trucks.
Warehouse space was procured for 80,000 square feet to hold water, water filters, cartridges and water test kits.
Procured 500 rain ponchos for volunteers and a 40 yard dumpster for use at the warehouse.
Providing printing needs for agencies for volunteers to distribute to city residents.
Provided armed security for Clio Rd. warehouse.
Providing server monitoring of MiCIMS servers.
Provided wireless router and printer for FEMA staff at SEOC.
Acquired a Verizon Wireless booster for the Clio Road warehouse.
Procured hand warmers for Water Response Teams.
Provided 2 cell phones to DHHS Michigan Community Service Commission to your for donation management.
Contacted Penske Truck Rental and acquired 23 donated trucks for use through Friday for water response teams.
Provided 2 portable bathrooms for use at the Clio warehouse.

Transportation (MDOT)

MDOT continues to maintain situational awareness and respond to issues regarding equipment and road conditions.

Executive Summary

SEOC Update:
Accomplished today (January 16):

The SEOC continues to provide:
- Situational awareness.
- Common operating picture/objectives.
- Coordination with city/county.
- Potential coordination with federal agencies.
- Incident prioritization.
- Coordination of life/health safety measures.
- Provide resources.
- Public Information Control.

•Logistics
o Fielded questions about whether to open the multi-pack filter replacement kit and give only one away or keep as a pack. Decision is no, otherwise we are accused of tampering. Request no multi-packs be ordered.
o Hashed out test kit assembly process with DEQ and ARC.
o Hashed out lunch process for the weekend.
o Moved out of GGCard, consolidated to Clio Rd. warehouse.
o Donation deliveries – 10 a.m. – 7 p.m.
o Update ICS 204's.
o Site visits in Flint to local EOC. Warehouse, ARC, and POC's.
o Observed warehouse operations to determine challenges.
o Provided the JIC with one of each filters.
o Discussed volunteer management coordination with MCSC and ARC.
o Requested Verizon boosters for warehouse.
o Requested 100 traffic cones for warehouse to direct traffic.
o Requested MICIMS access for state volunteer coordinator.
o Requested 10,000 nutritional pamphlets from FEMA.

•JIC
o JIC will be requesting daily numbers from the SEOC from the activities of the field teams and PODs.
o Working the emergency declaration and talking points for congressional/legislative conference call.
o FEMA External affairs FEMA will be on site soon.
o Working on inaccuracies from media on the declaration.

• Recovery Branch
o MSP coordinated 11 Flint Water Response Teams with 62 state employees today.
o Continued coordination with Red Cross on volunteers for Sunday and Monday.
o Confirmed team typing for Flint Water Resource Teams.
o Data is for 1/16/16 as of 5:00 pm.

Water Response Teams TOTALS 1/16/2016		
Occupied Homes	6,034	2,387
Vacant Homes	2,161	554
Unknown	3,129	909
Total Homes Visited	11,324	3,850
Resources Provided		
Door Hangers	4,384	1,745
Water - Cases	2,062	1,253
Water - Gallons (Jugs)	97	9
Filters-Faucet	2,973	1,247
Replacement Filter	2,040	770
Filter Pitchers	29	2
Water test kits	420	102

Total Resources Dispersed 12,005
Future sample test site 453 301

•Planning Section
o Lead morning and afternoon state agency conference call.
o Coordinated logistics of resource tracking.
o Developed projections based off of reporting and trend analysis.

o Published Sit Rep # 11.
o Participated in distribution process meetings.

• Operations Section
o Conducted SEOC Briefing and IAP Tactics meeting
o Worked with local EOC to fix trash issue at the stations.
o Worked with local EOC and SEOC logistics to clean up distribution quantities at sites to individuals.
o 91 American Red Cross volunteers are active across operation today.
o ARC processed 45 volunteers through the Volunteer Reception Center.
o warehouse Numbers:
❑ Clio St Warehouse (current stock)
-Replacement Cartridges 63,866
-Filters (faucet) 63,003
-Water (cases) 38,232
o point of Distribution (as of 7 pm)
❑ Contacts 1047
❑ Water (cases) 625
❑ Filters (faucet) 772
❑ Replacement Cartridges 486
❑ Filters (pitcher) 14
❑ Test kits 3

•Finance Section.
o Continuing to track personnel resources located in the SEOC and local EOC for use in spend plan development.
o Monitoring resource request board and Pipeline Collaboration Document for costs incurred by state agencies for inclusion in spend plan.
o Booked additional 18 hotel rooms for National Guard.

•GIS Branch Updates.
o Created a GeoForm and Feature Service to handle data from paper forms used in the field and forms used prior to our involvement.
o Gave training to Red Cross and Sheriff's Office teams on iPad data collection.
o Gave train-the-trainer training to National Guard on iPad data collection within the Points of Distribution(PODS)
o Created maps for ARC and MSP of individual team assignment areas.
o Created map of Residential Water Sampling Results from data provided by MDEQ.
o Created Precinct/Ward wall map
o Created Daily Team Progress map

DTMB:
• Provided management briefing and information on emergency declaration.
• 60 tablets have been provided to the Flint Water Response Teams to record supplies being delivered in the field.
• Provided 450 credentialing badges for volunteers and 4 temporary fuel cards for the MSP officers driving rented U-Haul trucks.

DHHS-CH
• Maintained coordination and information sharing with CHECC leadership by holding twice daily scheduled calls to report activities and updates.
• A resource request was submitted in the SEOC to logistics to order 10,000 of the EPA provided nutritional pamphlet.
• Discussions took place with the JIC Manager, MDHHS PIOs, and CHECC Disaster Behavioral Health Subject Matter Experts regarding the method for providing Disaster Distress support (i.e. a helpline) for the public and responders.

DEQ
• All available water test kits assembled and available for distribution.
• Provided guidance to City personnel for water sample collection sites.
• GIS map developed for water sampling sites.

Local EOC Update:
• Toured facility and discussed EOC operations with Lt. Governor Calley.
• Provided direction to Operations and Logistics Sections to initiate water sample collection at Fire Station PODs.
• Attended conference call with SEOC and ARC logistics management to clarify supply level tracking and receive further instruction on the issue.

Agency Summaries

Joint Information Center / Public Information Officer

• *Held a media availability at Fire Station #5 where Major General Vadnais announced Michigan* National Guard efforts will be doubled to approximately 70 personnel by Monday to assist at water resource sites.
• Governor's Office issued a new release announcing the Presidential emergency declaration approval.
• Answered media calls about the state's resource distribution and activity efforts to date.
• Updated daily talking points to include the state's activity efforts to date and the Presidential emergency declaration.
• Coordinating with FEMA External Affairs to plan a Congressional call on January 17, in additional to a legislative call regarding the Presidential emergency declaration. Preparing talking points for the Congressional and legislative conference calls.
• Issued a news release with today's activity for the water resource sites and water distribution teams, as well as the increase in National Guard personnel.
• Preparing a news release by the American Red Cross and United Way regarding the volunteer resource center and how individuals can volunteer to help.

Agriculture and Rural Development (MDARD)

Saturday Jan 16th update: Primary activities today: coordination with FDA Detroit District on their and MDARD's upcoming activities related to food, inquiry into a possible animal facility requiring follow up; draft of a document outlining federal resources that may be available to assist with broader recovery issues.

American Red Cross (ARC)

Again today, the American Red Cross supplied reduced staffing at the fire station POD's supporting the National Guard mission.
The assembly of water test kits at ARC headquarters resumed today.
We deployed and supported additional teams for neighborhood canvassing (Water Response).
We supplied lunches for the Water Response Teams.
The volunteer reception center (VRC) was in full operation today. The VRC will be in operation from Noon to 5pm on Sunday, and Monday through Friday will operate from 11am to 6:30pm.
We continued warehouse and inventory management efforts.

Civil Rights (MDCR)

Continue to review activities to provide support and assistance to assigned Human Services branch and other SEOC activities.

Community Health (MDCH)

Coordinated with the CHECC to continue working on various projects to include developing a timeline of MDHHS activities as they relate to the Flint Water situation, the ordering of necessary nutritional information materials to be sent to the local health department, identifying a MDHHS representative to serve on the Public Health Group meeting on Tuesday (1/19), and staffing the CHECC hotline for health-related calls the 2-1-1 is unable to answer (since the LHD is closed for the weekend).

Maintained coordination and information sharing with CHECC leadership by holding twice daily scheduled calls to report activities and updates. Will also provide a daily update email to MDHHS Executive Leadership. This update will include the announcement of the Presidential Emergency Declaration issued this afternoon.

In alignment with the ongoing nutritional planning being lead by staff in the CHECC, a resource request was submitted in the SEOC to logistics to order 10,000 of the EPA provided nutritional pamphlet called, "Flight Lead Poisoning with a Healthy Diet," to be shipped directly to the Genesee County Local Health Department. Additional orders for these pamphlets are anticipated; however, the necessary quantity has not yet been determined.

Discussions took place with the JIC Manager, MDHHS PIOs, and CHECC Disaster Behavioral Health Subject Matter Experts regarding the method for providing Disaster Distress support (i.e. a helpline) for the public and responders. This will be discussed further on Tuesday when SMEs are in the CHECC and reach-out to SAMHSA to coordinate.

Updated ICS 204 forms with new and updated tactics and work assignments. Participated in SEOC tactics and planning meeting.

Corrections (MDOC)

Brent Travelbee and Todd Bechler on duty SEOC today. We have filled all requests for vehicles, personnel and warehouse equipment to assist with water distribution; additional request for Hand Operated Pallet Jacks have also been filled. MDOC Director Heidi Washington is providing full support to our assistance efforts. We will continue to staff the SEOC as a full-time partner as we have assets deployed into the field. All resources are documented on the appropriate forms and shared with the SEOC staff. Additional resource requests are coming in frequently and we are working hard to locate the requested resources while still maintaining minimal local facility operational requirements from the providing facility.

The MDOC is dedicating a considerable amount of resources and staff to this effort. We are working closely with the Logistics Chief to locate needed resources and fulfill resource requests in a timely manner. All MDOC resources will be reporting tomorrow Sunday January 17, 2016 as requested.

MDOC RESOURCES PENDING DEPLOYMENT: Sunday, January 17, 2016

Vehicles with Drivers

(2) – 18' Box Trucks
(3) – 20' Box Trucks
(2) - 24' Box Trucks
(1) - 30' Box Truck (Lift gate broken but truck still on site, DTMB repairing)

Box Trucks have power lift gates

(1) – F250 Pick Up Quad Cab with Cap
(1) – 5 Passenger Handicapped Capable Van

(1) – 15 Passenger Van with 10' Enclosed Trailer
(1) – Pick-up Truck with 20' Enclosed Trailer

(4) – 10/15 Passenger Vans

(1) – 20 Person Shuttle Bus (Sent to Red Cross Volunteer Sight)

(1) - 53' Refrigerated Semi-Trailer

(2) - Electric Pallet Jacks

(7) – Hand Pallet Jacks

(5) 6-10 Passenger Vans

All vehicles drivers have 800 MHz Radio Operability (G EVENT 9)

Staffing

There will be 22 staff members on site 21 drivers and an assistant for the Red Cross Transportation Van (w/trailer).

Education (MDE)

School enrollment and staffing spreadsheet added to Mi-CIMS.

MDE is monitoring the situation and coordinating as necessary with other state agencies.

Environmental Quality (MDEQ)

The Department of Environmental Quality (DEQ) completed the following activities:
- Sampling of Manley Head Start and Eagles Nest School
- All available water test kits assembled and available for distribution
- Provided guidance to City personnel for water sample collection sites
- GIS map developed for water sampling sites
- Water heater information provided to Department of Labor and Regulatory Affairs and agency Public Information Officer's

Human Services (MDHS)

Staying in communication with 211, addressing human service concerns and delivery of resources to the elderly and disabled.

Review and provide regular 211 updates to SEOC Ops.

Continue to receive water filtration devices and assist in replenishment.

CHECC continues to maintain a Level 2 Activation

Licensing and Regulatory Affairs (LARA)

Manley School, where some DEQ testing was done today, is actually "Manley Early Childhood Center". The facility is a Head Start program and is captured under LARA's licensed Child Care Homes/Centers, it is not a school. DEQ is aware of this

Two bubblers that were supposed to be overnighted and delivered to a Flint area Home Depot today did not arrive. Without these bubblers the Freeman School faucet replacement pilot cannot be completed; all other scheduled work was completed there today. DEQ testing will not be done at Freeman tomorrow, 1/17. DEQ is aware of this. Install could possibly be finished on 1/17 if parts arrive; with testing then being done on Monday since school is not in.

LARA is currently working with DEQ to create a schedule for LARA's Plumbing Division to help DEQ with testing of additional schools in the Flint area.

Military and Veterans Affairs (DMVA)

Last 24 hours:
Distributed water, water filters, and water test kits and collected water samples for analysis at five points of distribution. Coordinated efforts with Genesee County EOC and Joint Information Center.

Total of Soldiers on State Active Duty:
at Genesee County EOC
at Joint Information Center
! at PODS

Next 48 hours:
Distribute water, water filters, and water test kits and collect water samples for analysis at five points of distribution. Coordinate efforts with Genesee County EOC and Joint Information Center. In-Process 38 Soldiers to augment distribution operations at 1800 S. outer Dirve, Saginaw, MI on 17 January 2016 at 1300. Conduct lodging and operations orientation following in-processing. Total of Soldiers on State Active Duty on 17 January 2016. Additional Soldiers will conduct first full day of distribution operation on 18 January 2016.

Raymond Stemitz
I TC. IN. USA

National Weather Service (NWS)

Jim Maczko from NWS Grand Rapids will participate in SEOC morning briefings via phone call and will coordinate support with local forecast office that serves Flint - NWS Detroit/Pontiac. Participation in afternoon SEOC briefings in planned only if significant changes in the forecast occur.

NWS support beyond this weekend being coordinated between NWS Grand Rapids and NWS Detroit. Hand off to NWS Detroit for morning conference call weather forecast likely before the end of January.

Natural Resources (MDNR)

MDNR is fully participating in all SEOC activities. Situational awareness is being maintained and the department stands ready to assist as needed.
Department POC's include:
Chief Gary Hagler, F/Lt. Jennifer Wolf, F/Lt. Steven B. Burton.

Services to the Aging (OSA)

Valley Area Agency on Aging - Region 5 (VAAA), in partnership with other local community agencies such as the Genesee County Health Department and MDHHS, has helped organize local meetings and distribute water and water filters. VAAA is an access point for receiving calls from homebound seniors who are not able to pick up water filters or need assistance installing water filters. VAAA reports they continue to receive calls from seniors who need assistance.

VAAA continues to operate as a call center and referral point for area seniors concerned about their drinking water. They've noticed this week that seniors who've had filters installed are beginning to request bottled water again.

AASA's State LTC Ombudsman has checked in with the local Ombudsman in Flint. Local Ombudsman reports Flint area nursing homes have been taking precautions using bottled water for cooking and drinking. The local Ombudsman remains concern about Nursing Homes' long term need to replace old facility plumbing that may be leaching lead.

State Police (MSP)

Teams have been distributing water all day. 3902 homes have been visited today.

The EOC in Flint advised that Genesee County Sheriff Department did not have the resources to provide security for the resource warehouses in the evening. Lt. Pummill was notified at 9:19 a.m. regarding this issue. Lt. Pummill did not believe this would be an issue because the warehouses are fenced in.

10:24 a.m. - Lt. Pummill advised that Sgt. Keith Sparks, MSP Safety Officer is currently evaluating the security at the resource warehouses for this evening.

1241 p.m. - Sgt. Sparks has completed his assessment of the resource warehouse and he responded with the following; My assessment of the facility is that it is adequate to secure the Red Cross vehicles as long as the vehicles are locked up and the gate is closed and locked. It will also be beneficial for the security of the vehicles when the outdoor lights are brought back into working order. Note: Personnel are currently working on the lights issue. They will know if the light are in working order at the facility by 5:00 p.m. today. I contacted Lt. Pummill at 6:06 p.m. for status on lights at warehouse. Lt. Pummill is having MSP personnel check to see if the lights were repaired. 6:37 p.m. - There are now lights on the south side of the warehouse, per Lt. Pummill. The south side of the building are where the delivery trucks are parked.

1:35 p.m. - MSP was asked for the exact number or state agency volunteers that reported today (Saturday 1-16-16) and to also confirm they went out in 10 teams. This information was forwarded to Lt. Pummill at 1:41 p.m.

2:06 p.m. Lt. Pummill advised 62 volunteers were utilized on 11 teams today.

ICS 208 created for 1/17/16-1/18/16 to include updated weather information provided by the National Weather Service.

We have 114 state of Michigan employee volunteers scheduled for Sunday Jan 17th and 125 scheduled for Monday Jan 18th.

Supreme Court

08:50 - State Judiciary EMC John Ort reported to the SEOC regarding the Flint water emergency. Nothing to report from the Judiciary regarding the emergency. DEQ website resources shared with our State Court Administrative Office (attn: Region II) in case our Genesee County courts have any questions regarding the emergency.

Technology, Management and Budget (MDTMB)

Provided management briefing and information on emergency declaration.

DTMB Mail Services has seven drivers with trucks assisting in transporting supplies to support point of distribution centers and Flint Water Resource Teams. Drivers have agreed to work through the end of day Tuesday, January 19.

DTMB assisted in procuring 72 truck loads of water, 8 trucks per day until Wednesday, January 20.
60 tablets have been provided to the Flint Water Response Teams to record supplies being delivered in the field.
Provided 450 credentialing badges for volunteers and 4 temporary fuel cards for the MSP officers driving rented U-Haul trucks.
Warehouse space was procured for 80,000 square feet to hold water, water filters, cartridges and water test kits.
Procured 500 rain ponchos for volunteers and a 40 yard dumpster for use at the warehouse.
Providing printing needs for agencies for volunteers to distribute to city residents.

TAKING ACTION ON FLINT WATER

"We are working closely with Genesee County and the Flint community, taking actions to immediately improve the water situation in Flint. Currently, we are focused on water testing, lead testing for children, and ensuring every home has water filters. We are also at work on long-term solutions, including follow-up care for affected residents."

State Teams to Distribute Water Resources Across Flint

State working to get needed supplies to residents

DATE: Tuesday, Jan. 12, 2016

TIME: 8:15 a.m.

WHERE: Genesee County Community Action Resource Department
2727 Lippincott Boulevard
Flint, MI 48507

WHO: Water resource teams, comprised of state personnel and Michigan State Police (MSP) troopers

WHAT: At 8:15 a.m. MSP Spl/F/Lt. Dave Kaiser will provide a brief overview of the role of the water resource teams.

At 8:30 a.m., media will have an opportunity to get footage and photos of the water resource teams as they go door-to-door to distribute free bottled water, water filters, water filter replacement cartridges and water testing kits to residents throughout the city.

Public information and updates can be found at www.michigan.gov/flintwater. Efforts are being coordinated by the State of Michigan in partnership with the City of Flint, Genesee County and local community organizations.

###

ALL MEDIA INQUIRIES ARE BEING HANDLED BY THE JOINT INFORMATION CENTER AT 888-EMD-TODAY (888-363-8632) or JICNews@michigan.gov.

EXECUTIVE ORDER
No. 2016 – 02

ACTIVATION OF THE NATIONAL GUARD TO ASSIST IN RESPONDING TO THE EMERGENCY RELATING TO THE CITY OF FLINT'S WATER SYSTEM

WHEREAS, Section 1 of Article V of the Michigan Constitution of 1963 vests the executive power of the State of Michigan in the Governor; and

WHEREAS, Under Section 12 of Article V of the Michigan Constitution of 1963 the Governor is the Commander-in-Chief of the state armed forces and may call them out to execute the laws; and

WHEREAS, Section 151 of the Michigan Military Act, MCL 32.551, authorizes the Governor to order any members of the organized militia to active state service in the aid of the civil authority in times of public danger, disaster, crisis, catastrophe, or other public emergency within the State; and

WHEREAS, municipal water in the City of Flint showed elevated lead levels after the City of Flint changed its water source from the Detroit water system to its own treatment plant drawing from the Flint River; and

WHEREAS, by Executive Proclamation issued on January 5, 2016, the Governor declared a State of Emergency in the City of Flint and Genesee County; and

WHEREAS, lead can be introduced to humans through water, and elevated lead levels can result in significant health impacts, particularly for children, pregnant women, and the elderly; and

WHEREAS, the State's first priority in addressing this emergency is to limit potential exposure to lead in drinking and cooking water by limiting potential exposure to lead in the City's water system; and

WHEREAS, other priorities include: (1) directly informing as many Flint residents as possible that filters, bottled water, information on lead, water testing kits, and other resources are available; and (2) directly providing resources to Flint residents and following up with those residents to ensure that they have access to safe water, are fully informed, and have their water supply tested. These tasks will require that personnel go door-to-door in large areas of the City of Flint; and

WHEREAS, due to the significant level of human and other resources required for these tasks, additional assistance is needed to supplement existing personnel and equipment; and

WHEREAS, by the Executive Proclamation of Emergency issued on January 5, 2016, the Governor directed that the Emergency Management and Homeland Security Division of the Department of State Police, coordinate and maximize all state efforts, and call upon all state departments and agencies to utilize available resources to assist the City of Flint and Genesee County pursuant to the Michigan Emergency Management Plan;

NOW, THEREFORE, in consequence of the above, I, Richard D. Snyder, Governor of the State of Michigan, pursuant to the Michigan Constitution of 1963, the Michigan Military Act, 1967 PA 150, MCL 32.501 et seq., and the Emergency Management Act, 1976 PA 390, MCL 30.401 et seq., order the following:

1. The Adjutant General of the Michigan National Guard is directed to order to active state service units and individuals of the Michigan National Guard that, in his discretion, he deems appropriate to meet general mission assignments as determined by the Director of the Department of State Police, or her designee.

2. The Director of the Department of State Police, or her designee, shall coordinate and maximize all state efforts, including such units and individuals of the Michigan National Guard that may be activated to state service to assist the City of Flint and Genesee County in accordance with the Michigan Emergency Management Plan.

3. The Michigan National Guard is activated until such time as determined by the Adjutant General, after consultation with the Director of Department of State Police, or her designee.

The Executive Order shall become effective upon filing.

Given under my hand and the Great Seal of the state of Michigan this 12th day of January, in the year of our Lord, Two Thousand Sixteen

EXECUTIVE ORDER
No. 2016 – 1

CREATION OF
FLINT WATER INTERAGENCY COORDINATING COMMITTEE

MICHIGAN DEPARTMENT OF STATE POLICE

WHEREAS, Section 1 of Article V of the Michigan Constitution of 1963 vests the executive power of the state of Michigan in the Governor; and

WHEREAS, Section 2 of Article V of the Michigan Constitution of 1963 empowers the Governor to make changes in the organization of the Executive Branch or in the assignment of functions among its units that he considers necessary for efficient administration; and

WHEREAS, municipal water in the City of Flint showed elevated lead levels after the City of Flint switched its water source to the Flint River; and

WHEREAS, the County of Genesee and the City of Flint have taken actions to cope with the situation, including but not limited to, switching back to the Detroit water system on October 16, 2016, declaring local states of emergency, activating the emergency response and recovery aspects of their emergency operations plan, marshaling and distributing required resources on a city-wide level, and issuing emergency public information and bulletins; and

WHEREAS, the Flint Water Advisory Task Force was formed as an independent advisory task force charged with reviewing actions regarding water use and testing in Flint; and

WHEREAS, the Flint Water Advisory Task Force has made an interim recommendation that the state government should coordinate a sustained, public-health focused response to remedy, to the fullest extent possible, the impacts on the Flint community; and

WHEREAS, on January 5, 2016, the Governor issued a proclamation declaring a state of emergency in the County of Genesee and the City of Flint; and

WHEREAS, multiple state departments and local authorities share the responsibility for ensuring safe drinking water and the coordination of efforts to address the consequences resulting from the presence of elevated lead levels in drinking water; and

WHEREAS, ensuring safe drinking water and addressing the consequences of elevated lead levels in drinking water will require collaboration and communication between state departments, local governments, and subject matter experts; and

WHEREAS, the establishment of a Flint Water Interagency Coordinating Committee within the Michigan Department of State Police will facilitate the collaboration and

communication between state departments, local governments, and subject matter experts necessary to effectively coordinate a response and recovery effort;

NOW, THEREFORE, I, Richard D. Snyder, Governor of the state of Michigan, by virtue of the power and authority vested in the Governor by the Michigan Constitution of 1963 and Michigan law, order the following:

I. CREATION OF THE FLINT WATER INTERAGENCY COORDINATING COMMITTEE

A. The Flint Water Interagency Coordinating Committee ("Coordinating Committee") is created as an advisory body within the Michigan Department of State Police (the "Department").

B. The Coordinating Committee shall be composed of the following seventeen (17) members who shall serve an initial term expiring on December 31, 2018.

- The Director of Office of Urban Initiatives within the Executive Office of the Governor;
- The Deputy State Director of Emergency Management and Homeland Security within the Michigan Department of State Police;
- The Director of the Department of Environmental Quality, or his or her designee;
- The Director of the Department of Health and Human Services, or his or her designee;
- The Director of the Department of Licensing and Regulatory Affairs, or his or her designee;
- The State Treasurer, or his or her designee;
- The Superintendent of Public Instruction, or his or her designee;
- The elected Mayor of the City of Flint who shall be appointed to the Coordinating Committee by the Governor;
- Three (3) additional representatives of the City of Flint who shall be submitted by the Mayor of the City of Flint and appointed to the Coordinating Committee by the Governor;
- Three (3) representatives of Genesee County who shall be submitted by the Genesee County Board of Commissioners and appointed to the Coordinating Committee by the Governor; and
- Three (3) subject matter experts who shall be appointed to the Coordinating Committee by the Governor.

After the initial appointments, members of the Coordinating Committee appointed under this subsection shall serve terms of three years.

C. A vacancy on the Coordinating Committee occurring other than by expiration of a term shall be filled in the same manner as the original appointment for the balance of the unexpired term. A member may continue serving until his or her successor is appointed. A member may serve successive terms if reappointed.

II. CHARGE TO THE COORDINATING COMMITTEE

A. The Coordinating Committee shall act in an advisory capacity to the Governor and subject to the Governor's review and approval, shall do all of the following:

1. Create an incident action plan designed to assist state and local authorities in ensuring safe drinking water for the residents of the City of Flint and addressing the consequences of elevated lead levels in drinking water.

2. Review recommendations made by the Flint Water Advisory Task Force and propose statutory, regulatory, or contractual actions necessary for implementation of such recommendations.

3. Identify staff with competencies in emergency planning, operations, logistics, and finance as outlined under the National Incident Management System (NIMS) to work with the Coordinating Committee to track resource requests and document progress on the incident action plan.

4. Establish a standard process for sharing pertinent information between all members including use of the NIMS and Unified/Incident Command as appropriate.

5. Establish routine communications protocols at the local, executive, and legislative levels as appropriate.

6. Establish a public information protocol to effectively inform the community.

7. Make recommendations for acceptable standards for potable water.

8. Make recommendations regarding the health impacts for the affected population.

9. Assess the status of infrastructure and determine feasible actions to upgrade the water system.

10. Establish subcommittees among its members to specifically address, at a minimum, each of the three following topic areas: Water Quality, Community Health, and Education.

11. Assist the Governor and the Department in implementing appropriate operations permitted under the Michigan Emergency Management Act or the federal Stafford Disaster Relief and Emergency Assistance Act, including local emergency operations plans and guides.

12. Explore any avenues of funding for response and recovery efforts including federal grants, legislative appropriations, and private partners.

B. The Coordinating Committee shall provide other information or advice as requested by the Governor or the Department.

III. OPERATIONS OF THE COORDINATING COMMITTEE

A. The Coordinating Committee shall be staffed and assisted by personnel from the Department as directed by the Department Director. Any budgeting, procurement, and related management functions of the Coordinating Committee shall be performed under the direction and supervision of the Department Director.

B. The Director of Office of Urban Initiatives within the Executive Office of the Governor and the Deputy State Director of Emergency Management and Homeland Security shall together serve as the Statewide Coordinators responsible for the administrative functions of the Coordinating Committee.

C. The Coordinating Committee may utilize subcommittees and advisory panels composed of its members to assist in completing the functions of the Coordinating Committee. The Coordinating Committee may request public participation on advisory panels as the Coordinating Committee deems necessary.

D. When making recommendations to the Governor, a majority of the serving members of the Coordinating Committee must concur.

E. The Coordinating Committee shall meet at the call of either of the Statewide Coordinators and as may be provided in procedures adopted by the Coordinating Committee.

F. The Coordinating Committee may, as appropriate to perform its duties, make inquiries, conduct studies, consult with outside experts and federal agencies, and receive comments from the public.

G. Members of the Coordinating Committee shall serve without compensation but may receive reimbursement for necessary travel and expenses according to relevant statutes and the rules and procedures of the Civil Service Commission, and the Department of Technology, Management and Budget, subject to available funding.

H. The Coordinating Committee may accept donations of labor, services, or other items of value from any public or private agency or person. Any donations shall be expended in accordance with applicable laws, rules, and procedures.

I. Members of the Coordinating Committee shall refer all legal, legislative, and media contacts to the Department.

J. A writing prepared, owned, used, in the possession of, or retained by the Coordinating Committee in the performance of an official function is subject to the Freedom of Information Act, 1976 PA 442, as amended, MCL 15.231 to 15.246.

IV. MISCELLANEOUS

A. All departments, committees, commissioners, or officers of this state or of any political subdivision of this state may give to the Coordinating Committee, or to any member or representative of the Coordinating Committee, any necessary assistance required by the

Coordinating Committee, or any member or representative of the Coordinating Committee, in the performance of the duties of the Coordinating Committee so far as is compatible with its, his or her duties.

B. Any suit, action, or other proceeding lawfully commenced by, against, or before any entity affected under this Order shall not abate by reason of the taking effect of this Order.

C. The invalidity of any portion of this Order shall not affect the validity of the remainder of the Order.

The Executive Order shall become effective upon filing.

Given under my hand and the Great Seal of the state of Michigan this 11th day of January, in the year of our Lord, Two Thousand Sixteen

Damage Assessment and Emergency Status Report

Incident: 2015-10-01-City of Flint-Water Contamination / Shortage

Operational Period

Operational Period Begin:	01/11/2016 08:00:00
Operational Period End:	01/13/2016 08:00:00
Situation Report No.	5
SEOC Status:	Full
SEOC Hours of Operation Begin:	01/10/2016 08:00:00
SEOC Hours of Operation End:	01/10/2016 17:00:00

Executive Summary

By early May 2014, the City of Flint switched from the Detroit Water and Sewerage Department (DWSD) to water from its own water treatment plant drawn from the Flint River as its primary water source. The different characteristics of the water resulted in leaching of lead from lead pipes in the city's water infrastructure into the water supply. Increased exposure to lead can cause immediate negative health effects. However, the main health concerns are long-term effects in children such as developmental and cognitive delays, and behavioral disorders. Increased water lead levels and elevated blood lead levels in young children were observed in the City of Flint and confirmed by the State Chief Medical Officer.

On October 1, 2015 the Genesee County Health Department declared a Public Health Emergency due to the elevated blood lead levels in citizens. In response to this the City of Flint declared a local State of Emergency on December 15, 2015 and activated their Emergency Operations Center.

To mitigate the effects of the new source of water on the infrastructure in the City of Flint, the city switched back to DWSD water on October 16, 2015. Funding to reconnect to DWSD was provided from the City of Flint, the Charles Stewart Mott Foundation, and the State of Michigan. Water is now treated with a supplemental phosphate addition to rebuild the protective layer in the distribution system and reduce the leaching of lead into the water supply.

For the mitigation of potential health effects, over 24,000 water filters and replacement cartridges have been distributed to residents in the City of Flint. Approximately 13,000 water filters, water pitchers and replacement cartridges were distributed by the Michigan Department of Health and Human Services (MDHHS) in the timeframe of October 1 to December 31, 2015 alone.

MDHHS has increased surveillance of blood lead levels in children and is addressing water issues in environmental investigations to identify lead sources in the environment of affected children and provide health education and information to residents, health care providers, and daycare/educational institutions.

Local nonprofit organizations have provided potable water to Flint residents. MSP/EMHSD GIS staff is supporting county and local GIS staff by consolidating data from local sources into comprehensive databases and providing mapping services to support incident analysis and forecasting. Data and maps regarding the location of water pipes, affected schools, filter distribution locations, water monitoring results, and predictive blood lead levels for affected areas will be made available with demographics.
Before December 16, 2015, $9.35 million was provided by the State of Michigan and $6 million by local agencies and nonprofit partners to manage the effects of the corroded pipes. While the source water has been switched back to DWSD, water in the City of Flint is still not safe to drink, unless specifically filtered.

On January 5, 2016, Governor Snyder declared a State of Emergency for the City of Flint and Genesee County. Genesee County requested the Governor's declaration on January 5, 2016, following the declaration of a State of Emergency in the county in response to the presence of lead in the public water supply and the detection of elevated blood lead levels exceeding governmental standards.

Since the declaration by the Governor on January 5th, the State Emergency Operations Center (SEOC) has been fully activated and working with local and state agencies to ensure a coordinated response to the incident. Since the activation, the SEOC has activated command staff, state agency EMC's, and implemented the Recovery Branch under the Operations Section.

SEOC Update:
Accomplished today (January 10):

• Logistics
o Worked on figuring out a long-term storage option. Because GCCard is large enough, centrally located and comes staffed, we are going to use this for a while until a logical long-term storage option can be found. GCCard has 75,000 sq. ft. and has warehouse managers to assist with tracking resources coming in and out.
o Requested an inventory of what has been distributed so far. Determined that the local health department wouldn't staff anyone during the weekend, so the only numbers we could obtain have not been updated since 1/8/16.
o Assigned someone at the local EOC to find anyone to enter the address cards collected from all the distribution sites. In order to determine what areas are in greater need, these address cards are essential for the GIS tracking and reporting.
o Determine water quantities in Flint.
o Worked with recovery on needs for door-to-door operation.
o Completed 204's for 3 objectives.
• Assigned requests:
o Extra volunteers for the added fire department hours. (MDHHS – Thelen)
o There was an extra church that was added. A request went through to ensure they received supplies and volunteers. (Local EOC)
o Flyers were created, printed and distributed to the 9 churches. (JIC, DTMB and Local EOC)
o Gate Operations for the broken SEOC Gates. (MSP)
o More cards for churches & FD's. (Logistics)
o Locate replacement filters in the Flint area. (Local EOC)
o Deliver 6 pallets of donated water to GCard. (ARC)
o Develop re-stock plan for distribution sites. (local EOC)

o Box trucks to assist with the door-to-door operation.
o Purchasing more replacement filters.
o Door hangers.
o Extra staffing for Brianna needed and assigned to begin Monday morning.

• JIC
o Flyer for churches approved.
o Door hanger's ready for teams tomorrow – may need to be picked up.
o Media availability went very well, great coverage.
o Sheriff still operating the strike team and coordinating with local EOC.
o Requested PSA on the radio. Media has been approved and working with MAB.
o Received good press on PODs.
o Working on developing signage for PODs.
o 211 advised about influx of calls – let JIC know if issues arise.
o Social media messaging continuing.
o Finalizing JIC Battle Rhythm.
o News release likely going out tomorrow regarding canvassing in neighborhoods.
o Tuesday – embed state PIO with one of the canvassing teams to liaison with media.
o Google PR offered any available assistance, mapping-warehousing-transportation.
o JIC moving tomorrow to Flint, likely need hotels, media room requirements to DTMB.
o Materials being transferred into bi-lingual (Spanish) using Civil Rights resources.
o Planning media avail tomorrow.

• Recovery Branch
o *Expanded operational hours for canvassing.*
o Working with the EOC to find most impacted areas for canvassing.
o Working with F/Lt. Mike Johnson for developing a strategy for teams in the field Tuesday.
o Training tomorrow will provide training on filters, strategy, safety, and water testing kits.
o Getting additional staffing tomorrow.

• Planning Section
o Objectives have been updated and SitRep will be distributed today.
o Facilitated three SEOC agency and local EOC briefs.
o Worked with FEMA LNOs on planning cycle and draft objectives.
o Completed Sit Rep and draft IAP and summary bullets for command.
o Completed draft ICS forms for branch chiefs to use to track tasks.

• Operations Section
o Ensured the delivery of water and filters to the 9 churches in the Flint area.
o Discussed strategies for community outreach (door to door).
o Worked on facility safety at Collins Road (gate issues/lighting).
o Manage Task assignments for the SEOC (Press avail/door hangers/rules for water pickup).
o Requested a second DC to assist in Region 3 (Lt. Russo), start time TBD.
o Requested product information required to design signs for the fire stations to make it visibly apparent to the public. Awaiting feedback from *fire stations (through Lt. Roach).*
o Developed Branch Directors within the SEOC to reduce span of control (specifically Human Services Branch Richard Thelen) and Health and Environmental Branch (Jennifer Lixey-Terrill).
o Worked to identify a storage location within the City of Flint for water and supplies. G-CARD is identified as temporary location.
❑ GCCard is large enough, centrally located and comes staffed. We will use this sight temporarily until a logical long-term storage option can be found. GCCard has 75,000 sq. ft. with warehouse managers to assist with tracking resources coming in and out.
o Distributed to date (1/8/16). Logistics has asked GIS to provide us daily updates of how much was distributed each day.
❑ 12,386 filters
❑ 1,985 replacement filters
❑ 354 Pitchers
❑ 2500 Lead Testing Kits
o Local EOC was asked to identify someone to enter the information collected on address cards from all the distribution sites as essential for the GIS tracking and reporting.
o Fire stations were initially established for 9am-4pm operations; this has been extended to 9am-9pm operation. Volunteers were located to accommodate these operations. This will continue as long as the need is realized.
o Logistics is in process of locating additional replacement filters.
o Establishing and tracking of resources is a priority. Staffing has been assigned to get a good handle on these to ensure distribution sites maintain an appropriate level of inventory.

• Finance Section
o *Continuing to track personnel resources located in the SEOC and local EOC for use in spend plan development;*
o Located hotel in the Flint area for staff on travel status to stay and have bill send directly to SEOC.
❑ Holiday Inn – Flint
5353 Gateway Centre Drive
Flint, MI
810-232-5300
❑ Contact Finance Group Chief or appropriate State EM to set up initial stay and billing information.
o Monitoring resource request board for costs incurred by state agencies for inclusion in spend plan.

The SEOC continues to provide:
• Situational awareness.
• Common operating picture/objectives.
• Coordination with city/county.
• Potential coordination with federal agencies.
• Incident prioritization.
• Coordination of life/health safety measures.
• Provide resources.
• Public Information Control.

MSP/EMHSD GIS Section Updates
Accomplished Today (January 10):
• Submitted report on total number of filters, pitchers, and replacement cartridges to Logistics.
• Printed map of wards for the City of Flint with Points of Distribution overlaid.
• LARA maps of Health Facilities and Active Facilities in progress.
• Geocoding water filter distribution addresses.
• Devise a method for measuring water filter distributions throughout the city. We will sum filter distribution by city block and produce distribution maps by block.
• DDACS Crime map overlay onto distribution map.

DTMB:
• Jeanette Doll at SEOC. Spoke to driver who is in Flint at first delivery church.
• Obtaining 3 quotes for printing of flyers for the churches this morning.
• Sent flyer to printer, provided Michelle with pickup information. Should be ready within the hour.
• DEQ requesting assistance with water bottle contract as vendor is running out of bottles and money ran out on contract. DTMB procurement director will work with DEQ on solution.
• Flyer ready for pickup shared information with logistics and Michelle.
• Spoke with DTMB Telecom director who confirmed that phones in co-located JIC will be ready in the larger room for Monday morning.
• Spoke with DTMB Mail Services on truck availability. Four trucks with drivers are available beginning Monday morning if needed.
• Coordinated contact with U of M Flint for use of media rooms.
• 4 cube trucks and drivers are available Tuesday.

DHHS-CH
• Appointed as Health Branch Director in the SEOC. Branch consists of MDEQ, MDARD, and MDHHS (health side only).
• Confirmed with the JIC and the LEOC in Genesee County that updates to 2-1-1 on water resource sites being listed on the pre-recorded 2-1-1 message will be provided to 2-1-1 daily by the JIC.
• Confirmed with Tom Page, Executive Director of 211, that the 211 pre-recorded messages for Monday, January 11, 2016, will include a listing of the water resource sites by zip code in Genesee County.

DEQ
• DTMB contacted to advise of POTENTIAL vendor / contract issues. Contingencies are currently being developed.
• Requested water kits be palletized and pre-staged on loading dock for pick up tomorrow to lab director.
• Update on water test tubes.
• MDARD- 500 1/11/16
• Sent out- 1000 1/8/16
• On hand- 500 1/11/16
• Lab to order 3,000 on 1/11/16. Lab ordered 1,000 on 1/8/16.
• Location secured for shipment of additional test bottles as the GCCARD. Info relayed to Lab Director.

Local EOC Update:

• Working to coordinate resources at the local level to maintain distribution of supplies at all PODs.
• Seeing supplies rapidly disappear from PODs today. Working to make sure POD managers are notifying us when they start running low.
• Working to establish a warehouse for local resource storage.
• Deploying additional District Coordinator tomorrow (Lt. Mark Russo).
• Working to establish minimum trigger points for resources at PODs.

Request/Task Assignment Definitions
• Assigned: Currently waiting for review by Logistics Group Chief and designation to appropriate agency.
• Cancelled: Item or task is no longer requested.
• Complete: Resource or task assignment has been fulfilled.
• In Progress: Being reviewed by appropriate agency.
• Mobilized: Resource is currently being delivered to local area.
• Need Additional Information: Agency is working with requestor to obtain further information on task or resource.
• On-Scene: Resource is currently on site for use/distribution.

Resource Requests

• Assigned: 1
o Box trucks for water resource teams.

• In progress: 13
o Additional water filter resources (7 requests total).
□ 30,000 additional filters.
□ 20,000 bottles of water.
o Long term storage.
o Truck transport.
o Environmental Testing and Consulting (ETC) Lead Investigator.
o Data Collection Cards.
o MDARD sampling kits- 500 requested.

• Cancelled: None

• Complete: 5
o JIC Set Up.
o 1,000 Water Filters/Cartridges.
o Water supply at Fire Department.
o Water Filters for Churches.

• On-Scene: 4
o Genesee County Section Chief.

o Genesee County IMT Coordinator.
o Genesee County Planning Section Chief.
o Genesee County Logistic Section Chief.

• Need Additional Information: 0

Task Assignments

• Assigned: 5
o Establish and coordinate routine communication between SMEs and coordinate technical assistance among state agencies and to local agencies.
o Activate JIC plans.
o Create GovDelivery topic for public information.
o Establish method for routine communication of resource inventories and distribution amounts.

• Cancelled: 2
o Activate the State Recovery Task Force (2 requests).

• Complete: 16
o Volunteer Management Team.
o GIS Support Staff.
o Research West Virginia Emergency Recycling.
o Genesee County Healthcare Provider Contact Information.
o JIC Email Accounts.
o Provide technical assistance to the local Damage Assessment process.
o Establish SEOC operational period and hours of operations.
o Safety Officer.
o Activate donations Management Team.
o Coordinate response and recovery activities with MIVOAD and identify potential mission areas.

• In Progress: 26
o Monitor MI CIMS (2 assignments).
o Establish and maintain coordination between city, county, state, federal and subject matter experts.
o Obtain and maintain situational awareness and common operating picture of all activities (2 assignments).
o Technical assistance for local damage assessment.
o Volunteer assignment to assist at churches.
o Development of four Recovery Teams.
o Identify a collocated facility for JIC.
o Coordinate response and recovery activities with MIVOAD and identify potential mission areas.
o Investigate and identify all available programs for assistance with direct or related impacts, including the federal Lead Pipe Replacement Program.
o Develop a comprehensive GIS strategy.
o Establish and disseminate cost center information for the incident.
o Two additional positions for JIC.

• Mobilized: 1
Establish and maintain coordination between city, county, state, federal and subject matter experts.

Incident Response/Recovery Priorities/Objectives

1. Ensure all households within impacted community have required resources.
2. Ensure accurate tracking and accounting of all commodities.
3. Improve and maintain public information strategy.
4. Develop a long term public health and services plan.
5. Ensure adequate staffing to support operational requirements.
6. Identify possible assistance programs.
7. Develop an approved GIS strategy.
8. Maintain coordination between partner agencies and organizations.
9. Enhance situational awareness and common operating picture of all activities.
10. Develop a comprehensive Recovery Plan.

Upcoming Forecast

-Forecast Update for Flint, MI Area: January 10, 2016
- Break from significant snow Sunday afternoon through Monday late afternoon.
- Snow returns Monday night and continues through Tuesday with very hazardous travel expected.
- Very cold temperatures expected through the entire week. The cold could limit ability to remove ice from road surfaces.
- Time to frostbite from exposed skin will be 15 to 30 minutes all week
- Bottled water stored outside or not in temperature controlled locations will freeze due to temperatures well below freezing through the week.

-Sunday (Jan 10):
- Heaviest snow coming to an end around 12pm. Around 1 inch of additional accumulation possible before snow ends. Some periodic light snow after 12pm, no significant additional accumulation expected. Hazardous travel likely with icy roads and blowing snow.

-Sunday afternoon (Jan 10) through Monday evening (Jan 12):
- On and off light snow with no significant accumulation expected. Icy roads likely for Monday morning and Monday evening commutes.

-Monday evening (Jan 11) through Tuesday (Jan 12)
- Snow and blowing snow will create hazardous driving conditions, very low visibility, and icy road surfaces. Could see 2-4 inches of accumulation in the Flint area. This snow event will impact all of the Lower Peninsula, so transportation to and from the Flint area will be very hazardous Monday night through Tuesday.

-Wednesday (Jan 12) through Saturday (Jan 16):
- Very cold with a few snow showers. High temperatures around 20-25 degrees, low temperatures around 10-15 degrees.

Damage Assessment Summary

Agency Summaries

Joint Information Center / Public Information Officer

The Joint Information Center (JIC) was operational from 8 a.m. to 5 p.m. on Jan. 10. State agencies at the JIC included the Governor's Office, Health and Human Services, and Michigan State Police.

Tasks accomplished during the operational period included:
- Finished coordinating and held a media event for Sunday, Jan. 10 at Flint Fire Station No. 1.
- Sent a media advisory for the Sunday, Jan. 10, media event at Fire Station No. 1.
- Drafted and sent JIC News Release No. 3 about deploying water resource teams in the city of Flint.
- Created social media posts about the water distribution sites and the Flint water website.
- Continued development of a door hanger for the community outreach efforts beginning next week.

- Continued developing a public service announcement.
- Updated the www.michigan.gov/flintwater website.
- *Staffed for the next operational period.*
- Conducted a media monitoring report.

Agriculture and Rural Development (MDARD)

Jan 10th - 1/10/16 - Briefed Director Clover Adams after a.m. call. MDARD goals over the next few days: 1) Food - identification and prioritization of food service and food retail businesses and coordination with Genesee Co. Health Department on notification and inspection related to water usage; 2) Animals - continue outreach and education to animal facilities, in coordination with Genesee Co. Animal Control; 3) Review history and look at opportunities for assistance/guidance related to nutrition, including possible support through donations management.

American Red Cross (ARC)

Today the American Red Cross provided volunteers to staff 14 distribution sites (5 fire stations, 9 churches). The church sites distributed water and water filters while the fire station sites additionally distributed filter cartridge replacements and water testing kits.
To facilitate distribution the ARC delivered water filters and bottled water to the church distribution sites. Throughout the day we have maintained representation at both the Genesee County EOC and Michigan's SEOC.

Early in the day we noted that there had been no instructions with the water testing kits delivered to Fire Station #6. Our plan to fix this by making photo-copies from instruction sheets delivered to another station were delayed due to some logistical issues which have been resolved. Copies are now in progress for both station #6 and station #8 (station #8 ran out of instructions today).

ARC headquarters has made plans and assignments to assure that we continue to staff the distribution sites at the 5 fire stations from 9 am. to 9 pm. each day through next Sunday (1-17-16). We are committed to deliver 6 pallets of bottled water, supplied by our Grand Rapids office, to G-CARD tomorrow (Monday, 1-11-16).

Civil Rights (MDCR)

Monitor and support agencies with issues surrounding outreach and engagement of marginalized populations within the City of Flint impacted by the current water crisis. Provide background on LEP/Bi-lingual and bi-cultural needs and resource obligations as well as resource and referral list qualification.

Community Health (MDCH)

Spoke to MDHHS PIO regarding the issue of water sampling test kit instructions not being provided with the test kits given out on 1/09/16 at one resource site location. DEQ confirmed with American Red Cross that local volunteers are making photocopies of the instructions to ensure adequate supply going forward.

Spoke to LEOC logistics regarding potential state facility resources available via MOUs between the private sector and MDHHS. The status of this resource request is on hold.

MDHHS EMC for ESF#8 was appointed as Health Branch Director in the SEOC. Branch consists of MDEQ, MDARD, and MDHHS (health side only).

Spoke with the JIC and MDHHS leadership to determine the need for a 24/7 phone line for questions regarding health and Flint water. It was determined by MDHHS, the JIC, and LHD that the message would instead be to call 2-1-1 or contact their primary care provider, rather than setting up a separate toll free number.

Confirmed with the JIC and the LEOC in Genesee County that updates to 2-1-1 on water resource sites that are listed on the pre-recorded 2-1-1 message will be provided to 2-1-1 daily by the JIC.

Confirmed with Tom Page, Executive Director of 211, that the 211 pre-recorded message for Monday, January 11, 2016, will include a listing of the water resource sites by zip code in Genesee County.

Held a conference call with CHECC leadership and MDHHS ESF#6 EMC to discuss the CHECC level of activation.

Corrections (MDOC)

January 8, 2015:

Administration for the MDOC has been notified and is updated on current situation. There are approximately 75 staff members working in the affected area. Potable water has been provided to the offices in the affected area since the beginning of this situation and will continue to be provided. This water is available for people working there and those that have been required to go the office. We will continue to monitor this situation for any developing issues.

Education (MDE)

MDE is monitoring the situation and coordinating as necessary with other state agencies.

Kyle Guerrant, Deputy Superintendent, was on-site at the SEOC; January 10, 0915-1425.

Environmental Quality (MDEQ)

The Department of Environmental Quality (DEQ) Laboratory (lab) provided 1000 water test kits for stock at Flint points of distribution. 500 kits have been prepared for MDARD inspectors for pickup Monday morning. 1000 additional kits will be prepared for pickup Monday for supply for the teams scheduled to begin on Tuesday. 3000 kits are being ordered Monday morning to supplement stock. DEQ lab staff are scheduled to provide training to the teams in Flint on Monday afternoon. Contracts are being identified and examined to possibly expand vendor capabilities for providing additional resources.

DEQ staff are coordinating with Licensing and Regulatory Affairs (LARA) for the implementation of the Freeman Elementary faucet

replacement plan.

DEQ and DNR staff are supporting state and local activities where needed.

Human Services (MDHS)

Participated in AM & PM State Agency briefings,
Updated resource requests.
Volunteer Coordinator at local level coordinated with ARC on FD staffing for extended hours of 9:00 - 21:00
Confirmed filter allocation is still at adequate level for estimated resource requests.
Worked with Recovery on Door to Door plan. Confirmed MDHHS will have volunteers next T- F for door to door work.
Late last night ordered 30,000 additional filters and replacement cartridges. ETAs coming
Ordered 93 pallets of water from South Carolina. ETAs coming
Appointed Human Services Branch Director, Branch includes MDHHS including Aging & Adult Services, MDE, MDCR,& ARC
Brought in Human Services EMC backup.
CHECC remains at Level 1 Activation - Normal Operations

Licensing and Regulatory Affairs (LARA)

LARA's proposal for a pilot faucet replacement program for Freeman Elementary School was approved.

Working on putting together a list of what the next steps are with tasks to be completed.

Coordinating with DEQ to complete additional testing at Flint schools.

National Weather Service (NWS)

Jim Maczko from NWS Grand Rapids will staff SEOC Monday, Jan 11. Otherwise, will participate in SEOC briefings via phone call and will coordinate support with local forecast office that serves Flint - NWS Detroit/Pontiac.

Natural Resources (MDNR)

MDNR is fully participating in all SEOC activities. Situational awareness is being maintained and the department stands ready to assist as needed.
Department POC's include:
Chief Gary Hagler, F/Lt. Jennifer Wolf, F/Lt. Steven B. Burton.

Services to the Aging (OSA)

Valley Area Agency on Aging - Region 5 (VAAA), in partnership with other local community agencies such as the Genesee County Health Department and MDHHS, has helped organize local meetings and distribute water and water filters. VAAA is an access point for receiving calls from homebound seniors who are not able to pick up water filters or need assistance installing water filters. VAAA reports they continue to receive calls from seniors who need assistance.

VAAA has distributed 2 bottles of water with each home delivered meal to each HDM client within the City of Flint. Water. VAAA also provided water to homebound seniors who needed water to prepare food as they had limited support to pick up bottled water. Congregate meal participants also have access to water and filters as needed. Once water filters were installed, VAAA discontinued including water with home delivered meals.

VAAA also contacted the Grandparents Raising Grandchildren program to ensure that they were aware of educational efforts and confirm the program had received water filters to distribute to program participants.

State Police (MSP)

A resource request was received to staff a Capitol Security Officer at the Collins Rd. facility from 0730 hrs until 1800 hrs on 1/10/16 only. An officer arrived at 1025 hrs and the facility will be staffed until 1800 hrs. This request was fulfilled.

A resource request was made to determine if the door to door operational hours should be expanded. Based on information received from Lt. Dehner it was determined the hours would remain 8:30 AM - 5 PM. Additionally, the Troopers assisting on this detail are to be used for security only.

A resource request was received to provide a security/safety briefing to the Water Resource Teams during the training scheduled at 1 p.m. on Monday, Jan 11 at DHHS Office. Specific items to include would be team safety, weather concerns, and any items determined important by MSP. Daily deployment briefings will be needed at 0830 at the GCCARD facility for all teams to include safety, security, and daily work assignments. The Recovery Branch Director will provide the daily work assignment to Lt. Dehner by 0800 hrs. Lt. Dehner will be responsible to assign one of the field personnel assisting the door to door operations to brief the group at the GCARD facility each morning. This resource request was assigned to the MSP REP.

The ICS 208 Safety Message/Plan was reviewed and driving information was added.

A safety briefing was provided to EOC and SEOC personnel during the briefing meetings.

Technology, Management and Budget (MDTMB)

Worked with University of Michigan Flint PIO for an area on the campus to conduct press briefings. Chancellor contacted and onboard with the state using their facilities as needed. Provided contact information to the JIC.

DTMB Real Estate Division located a warehouse facility within the city with 100,000 square feet that may be used.

DTMB Mail and Delivery Services drivers delivered water filters to drop off sites within the city. Drivers remained in the city and assisted with transporting of water throughout the day. DTMB has a driver and truck scheduled on Monday to pick-up additional

1,000 water test kits in Lansing and deliver to Flint. Mail and Delivery Services has four trucks/drivers available on

DTMB Telecom assisted in moving joint information center in the Flint Office Building telephones to larger room.

Printed 2,000 water informational flyers on Sunday morning to provide to churches. Purchased filters and replacement cartridges to ensure availability until large order arrives.

Water resource sites established in Flint with bottled water, filters and testing kits
State and local officials coordinating resource distribution

LANSING, Mich. – The State of Michigan has partnered with local officials in a coordinated approach to establish five water resource sites in Flint where residents can pick-up bottled water, water filters, replacement cartridges and home water testing kits.

The water resource sites are now open and will be open seven days a week from 9 a.m. to 4 p.m. at Flint fire stations located at:

Fire Station #1
310 East 5th St.
Flint, MI 48502

Fire Station #3
1525 Martin Luther King Ave.
Flint, MI 48503

Fire Station #5
3402 Western Rd.
Flint, MI 48506

Fire Station #6
716 West Pierson Rd.
Flint, MI 48505

Fire Station #8
202 East Atherton Rd.
Flint, MI 48507

"The water resource sites serve as a one-stop location where residents can pick-up all of the resources they need to ensure their drinking water is safe, including bottled water, water filters, replacement cartridges and water testing kits," said Capt. Chris Kelenske, Deputy State Director of Emergency Management and Homeland Security and commander of the Michigan State Police Emergency Management & Homeland Security Division. "The state continues to work in coordination with local officials to ensure the daily needs of residents are met."

MORE

Water filters and replacement cartridges continue to be available Monday through Friday, between 9 a.m. and 4 p.m. at the following locations:

Michigan Department of Health and Human Services office
125 E. Union St.
Flint, MI 48502

Michigan Department of Health and Human Services office
4809 Clio Road
Flint, MI 48504

Genesee County Community Action Resource Department office
2727 Lippincott
Flint, MI 48507

Genesee County Community Action Resource Department office
601 N. Saginaw
Flint, MI 48502

Flint City Hall
1101 S. Saginaw St.
Flint, MI 48502

Residents who need transportation or any other assistance can call 211.

Residents are urged to use filtered water for drinking, food preparation, brushing teeth and watering pets. Unfiltered water may be used for bathing and cleaning.

In addition to the water resource sites, home water testing kits are available at Flint City Hall, the Flint Water Treatment Plant or Flint Fire Department locations.

Visit www.michigan.gov/flintwater or call 2-1-1 for more information.

State of Michigan Joint Information Center Now Operational

LANSING, Mich. – Today the State of Michigan launched its Joint Information Center (JIC) to coordinate public information from the State Emergency Operations Center, set up to help with health and safety issues caused by lead in the city of Flint's drinking water. The emergency operations center was activated after Gov. Rick Snyder declared a state of emergency for Genesee County on Jan. 5.

Public information and updates, including resources for residents such as how to obtain free water filters and lead testing, are available at www.michigan.gov/FlintWater.

The JIC will serve as the state's central communications hub for this emergency and is staffed by public information officers (PIO) from several state agencies. Hours of operation will be 9 a.m. – 5 p.m., Monday – Friday, until further notice.

It is operating out of the Michigan State Police Emergency Management and Homeland Security Division in Lansing. State officials have been in contact with Flint and Genesee County officials to move the JIC to the city of Flint to better partner and coordinate with local agencies.

The declaration makes available all state resources in cooperation with local response and recovery operations.

Genesee County declared a "local state of emergency" on Jan. 4, activating local emergency response and recovery plans. By requesting a governor's declaration, the county has determined local resources are insufficient to address the situation and state assistance is required to protect public health, safety and property to lessen or avert the threat of a crisis.

The city of Flint has been under a local emergency declaration since Dec. 14, 2015.

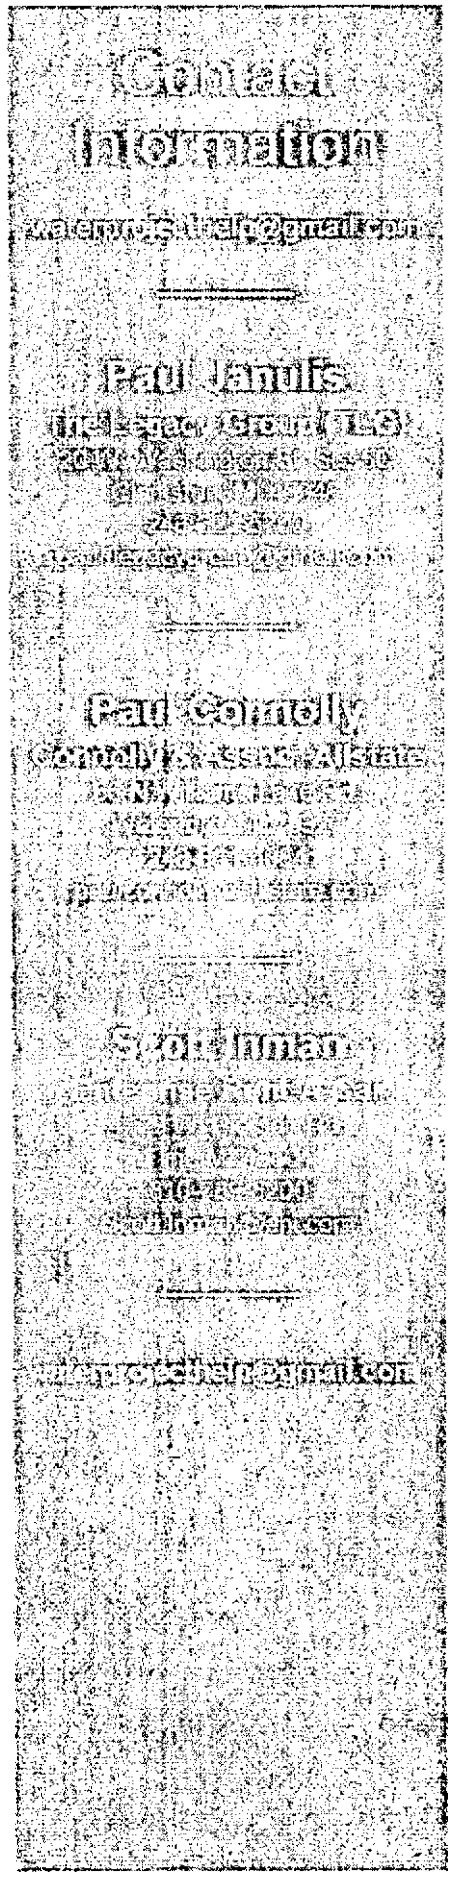
JANUARY 16TH, 2016 FROM 1 PM – 4 PM
ENTERPRISE RENT-A-CAR
4128 W. PIERSON RD.
FLINT, MI 48504

Due to the current water, Enterprise Rent-A-Car and Allstate have partnered together to distribute water to Flint residents in need of clean water. If you are in need of clean water:

- Pick up a case of water at the Enterprise location listed above by just providing proof that you are a Flint resident.
- Contact us if you are in need of water but require assistance. We will contact you to arrange delivery.
- Tell your neighbors who may need our help.



Damage Assessment and Emergency Status Report

Incident: 2015-10-01-City of Flint-Water Contamination / Shortage

Operational Period

Operational Period Begin:	01/11/2016 08:00:00
Operational Period End:	01/13/2016 08:00:00
Situation Report No.	6
SEOC Status:	Full
SEOC Hours of Operation Begin:	01/11/2016 08:00:00
SEOC Hours of Operation End:	01/11/2016 20:00:00

Executive Summary

SEOC Update:
Accomplished today (January 10):

The SEOC continues to provide:
- Situational awareness.
- Common operating picture/objectives.
- Coordination with city/county.
- Potential coordination with federal agencies.
- Incident prioritization.
- Coordination of life/health safety measures.
- Provide resources.
- Public Information Control.

- Logistics
o Worked on maintaining supplies and track resources at each of the local PODs.
o Worked to establish a Red Cross warehousing/logistics team to assist GCCARD.

- JIC
o Media event at the Genesee County Office Building.
o Governor and Capt. Kelenske spoke.
o Video for distribution will be filmed today
o MDHHS is working on radio PSA information
o Working on getting Comcast and Dish Network to provide channel for looped information and POC for Google.

- Recovery Branch
o Working with MSP to develop areas for canvassing and trained staff.
o Working with JIC to make sure PIO is connected with the team they will shadow.

- Planning Section
o Worked with the local EOC to get accurate inventory information.
o Supported logistics by reaching out to local and regional businesses to establish a steady water supply.
o Worked with GIS branch to refine strategy

- Operations Section
o SEOC has expanded hours of operation to be from 8am-8pm.
o Fire stations up and running today and providing resources to the citizens.
o Tomorrow will be a planning day for the SEOC for the next operational period.
o Tasked planning section with assisting logistics with water resource investigation and procurement.
o The State Deputy Director and FEMA LNO contacted governmental agencies for possible water procurement.
o Internal resources for bulk water delivery have been identified.
o Some water donations have been attained to supplement supply and will begin distribution periodically over the next two weeks.
o An ongoing purchase of bottled water that been established through Home Depot to deliver 8,000 cases of water per day. The first delivery will occur tomorrow.

- Finance Section
o Established direct billing accounts with three food establishments that can deliver lunch to staff in the Local EOC and JIC.
o Continuing to track SEOC staff and provide guidance on procurement and tracking SEOC costs. Task in progress as it is long term and continuing.

- GIS Branch Updates
o Updated distribution sites map.
o Submitted a request to ESRI (GIS Vendor) to supplement our technology and provide professional services in support of the incident.
o Updated Flint DDACTS (crime analysis) hotspots.
o Setup ArcGIS in conjunction with Flint GIS staff.
o Configured mobile app for field data collection during MSP neighborhood visits.
o Began mapping lead service lines (anticipate having draft of lead service lines Friday).
o Coordinated with local IT managers overseeing filter tracking system to streamline data collection.

DTMB:
- Cards were printed for churches and fire stations by 11:30am. Two additional trucks for distribution will be in the City all week. Trucks are available to deliver resources until 9 pm.
- Two trucks are being deployed to assist with supply distributions in the neighborhood.
- Contacted Home Depot; starting Tuesday they will deliver 4 truckloads of water to GCCARD for the next 5 days.

DHHS-CH
• The Community Health Emergency Coordination Center (CHECC) has officially elevated its level of activation to "Level 2 - Partial Activation." Currently the CHECC is staffed with BETP leadership and Section Chiefs only. SMEs will be brought in as necessary.
• Coordinating with MDE and MDARD on nutritional planning communications.
• Coordinating with the CHECC to determine status of Environmental Testing and Consulting Lead Investigator(s) request.

DEQ
• DTMB will pick up a shipment from the lab at 3pm today. The lab will have as much as they can have ready on the loading lock at 3pm.
• Simplified sampling form that has gone to DTMB to print and will be there tomorrow.
• There were 1,382 bottles picked up today, Monday afternoon. There are approximately 3,200 bottles remaining in Lansing. These will all be ready to ship tomorrow afternoon.

Local EOC Update:
• Local EOC operational hours are from 8am-9pm.
• Working to coordinate resources at the local level to maintain adequate supplies at all PODs.
• Demand has exceeded supplies and supplies are moving rapidly from PODs today. Working to make sure POD managers notify us when they start running low.
• Working to establish a warehouse for local resource storage.
• *Additional DC Mark Russo*
• Established trigger points for resources at PODs and hourly inventory reporting from the PODs.
• Discussed potential long-term water sources between local EOC and SEOC.
• Established planning cycle/meeting scheduled for 1/12/16.
• Developed Sit Rep #1.
• Met with Natasha Henderson to request deployment of City representative at local EOC.

Incident Response/Recovery Priorities/Objectives

1. Ensure all households within impacted community have required resources.
2. Ensure accurate tracking and accounting of all commodities.
3. Improve and maintain public information strategy.
4. Develop a long term public health and services plan.
5. Ensure adequate staffing to support operational requirements.
6. *Identify possible assistance programs.*
7. Develop an approved GIS strategy.
8. Maintain coordination between partner agencies and organizations.
9. Enhance situational awareness and common operating picture of all activities.
10. Develop a comprehensive Recovery Plan.

Upcoming Forecast
Forecast Update for Flint, MI Area: Posted 845am January 11, 2016

• Snow and wind will return after 5pm Monday (Jan 11) and will continue through Tuesday (Jan 12) with very hazardous travel expected.
• Very cold through the entire week. The cold could limit ability to remove ice from road surfaces
• Frostbite time for exposed skin will be 15 to 30 minutes all week.
• Bottled water stored outside or not in temperature controlled locations will freeze due to temperatures well below freezing through the week

-Until around 5pm Monday (Jan 11):
• Periodic light snow with limited accumulation expected today. Icy roads are expected for Monday evening commute.

-Monday 5pm (Jan 11) through Tuesday Night (Jan 12)
• Snow and blowing snow will create hazardous driving conditions, very low visibility, and icy road surfaces. Could see 2-4 inches of accumulation in the Flint area. This snow/blowing snow will impact all of the Lower Peninsula, so transportation to and from the Flint area will be very hazardous Monday night through Tuesday.
• Snow will blow back on to treated roads. Rapid Changes in visibility and road conditions are likely. This type of weather is typical when Michigan has some road closures and larger multi-car accidents.

-Wednesday (Jan 13) through Saturday (Jan 16):
• Very cold with a few snow showers. High Temperatures around 20-25 degrees, Low temperatures around 10-15 degrees.

Agency Summaries

Joint Information Center / Public Information Officer

The Joint Information Center (JIC) was operational for the first time in Flint from 8 a.m. to 5 p.m. on Jan. 11. State agencies at the JIC included the Governor's Office, Health and Human Services, Michigan Department of Agriculture and Rural Development, and Department of Technology and Management and Budget, and Michigan State Police.

Tasks accomplished during the operational period included:
• Coordinated with the Governor's Office for a 2:30 p.m. press conference in the city of Flint. This action item included multi-agency collaboration and the development of talking points under a very tight timeframe.
• Created a script for a Comcast video PSA.
• Finalizing radio PSA with the Michigan Association of Broadcasters.
• Secured a field PIO and state videographer and photographer for embedding during water resource team operations.
• Drafted a media advisory announcing the water resource teams, including a media opportunity.
• Looking into Comcast/Dish Network dedicated video.
• Continued to monitor media and social media.
• Issued and drafted social media posts about the ongoing situation.
• Worked with DTMB and facilities to ensure a functioning Flint JIC.

Agriculture and Rural Development (MDARD)

Jan 11th - 1/11/16 - MDARD Activities: Have updated the guidance document to be a regulatory document for water in retail food and restaurants/food service; document is going through the approval process including the JIC. MDARD is making plans for distribution and then follow up. On animals - we expect to get a list of kennels, clinics, rescue organizations, etc., by the end of the day for additional outreach. Any materials will be coordinated through the JIC. MDARD provided information on water companies in the State as potential contacts for supplies of water.

MDARD goals over the next few days: 1) Food - identification and prioritization of food service and food retail businesses and coordination with Genesee Co. Health Department on notification and inspection related to water usage; 2) Animals - continue outreach and education to animal facilities, in coordination with Genesee Co. Animal Control; 3) Review history and look at opportunities for assistance/guidance related to nutrition, including possible support through donations management.

American Red Cross (ARC)

Today the American Red Cross provided volunteers to 5 fire stations to distribute water, filter, replacement cartridges, and water test kits. Inventory reports from these distribution sites are now being made hourly. Throughout the day we have maintained representation at both the Genesee County EOC and Michigan's SEOC.

Early in the day we noted that DEQ was hoping to find volunteers to assemble water test kits prior to distribution. The Red cross indicates it is ready to secure such volunteers once we have a formal request.

We have also been notified that a request for a warehousing team will be coming to the ARC. Our Flint headquarters has been made aware of this pending request and expects to be able to activate a team once we have the details.

We will be staffing the 5 fire station distribution sites again tomorrow from 9am to 9pm.
Our headquarters will also be participating in two meetings convening an expanded group of community partners on Tuesday.

Civil Rights (MDCR)

Continued to provide support and assistance to assigned Human Services branch assignment and other SEOC activities. Briefed MDCR Community Relations Division staff; sourced non-Christian places of worship.

Community Health (MDCH)

Coordinating with MDE and MDARD on nutritional planning communications.

Coordinating with the CHECC to determine status of ETC lead investigator(s) request.

Requested that the Human Services EMC have visibility of CHECC Activity Logs.

Task assignment for IMATS support has been re-assigned to the CHECC.

Requested that the CHECC research the availability of volunteer support for the door-to-door operations.

Spoke to the Local Health Department Emergency Preparedness Coordinator regarding the data entry of distributed filters. She is currently collecting all of the information cards from various locations and working with American Red Cross volunteers to get that data entered into the database as quickly as possible.

CHECC will be looking into the nutritional planning for MDHHS.

Held a conference call with CHECC leadership staff to discuss activities. Reassigned the request for information from the Bureau of Epidemiology to the CHECC to facilitate.

The Community Health Emergency Coordination Center (CHECC) has officially elevated it's level of activation to "Level 2 - Partial Activation." Currently the CHECC is staffed with BETP leadership and Section Chiefs only. SMEs will be brought in as necessary.

Corrections (MDOC)

The MDOC continues to monitor the situation and our staff as well as our clients in the community. Water will remain available at the office for both staff and clients to use whil at the Parole and Probation offices in the area. EM staff from the MDOC will contiue to monitor MiCIMS and attend briefings. We remain available to assist in addressing this situation.

Education (MDE)

MDE is distributing nutrition guidelines for "Help Fight Lead Poisoning with a Healthy Diet" handout. Additional MDE staff trained for SEOC. (1/11)

MDE is monitoring the situation and coordinating as necessary with other state agencies.

Kyle Guerrant, Deputy Superintendent, was on-site at the SEOC; January 10, 0915-1425.

Environmental Quality (MDEQ)

The Department of Environmental Quality (DEQ) completed the following activities:
- Delivery of 1500 water test kits to MCCARD
- 10,000 water test bottles ordered
- Sampling form developed in collaboration with the City. 20,000 printed.
- SEOC Staffed
- DEQ personnel supporting local needs

Human Services (MDHS)

Participated in AM & PM State Agency briefings,
Updated resource requests.
Training was completed for the Door to Door Distribution plan at our Clio Road office.
Received a reach out from Meijer and Walmart on how they can help. Held conference call with Meijer, they will be delivering water today to GCCARD. Walmart information sent to logistics.
We have received a schedule for water deliveries.
CHECC was upgraded to Level 2 Activation

Licensing and Regulatory Affairs (LARA)

LARA Excutive Staff met and was updated on the situation in Flint. This will be a weekly meeting.

Spoke with the Flint Superintendent of Schools, Mr. Tawwab regarding the faucet pilot program. He has approved us to move forward with this program.

Joe Madziar, LARA's Plumbing Division Chief, will be going to Freeman Elementary to develop a material list.

We are working with Tony Sitko, building manager for Flint, to coordinate a schedule for the Plumbing Division to be able to get into the school to complete the work.

I am communicating with the DEQ to schedule re-testing for Freeman Elementary pilot project.

National Weather Service (NWS)

Jim Maczko from NWS Grand Rapids will participate in SEOC briefings via phone call and will coordinate support with local forecast office that serves Flint - NWS Detroit/Pontiac.

Natural Resources (MDNR)

MDNR is fully participating in all SEOC activities. Situational awareness is being maintained and the department stands ready to assist as needed.
Department POC's include:
Chief Gary Hagler, F/Lt. Jennifer Wolf, F/Lt. Steven B. Burton.

Services to the Aging (OSA)

Valley Area Agency on Aging - Region 5 (VAAA), in partnership with other local community agencies such as the Genesee County Health Department and MDHHS, has helped organize local meetings and distribute water and water filters. VAAA is an access point for receiving calls from homebound seniors who are not able to pick up water filters or need assistance installing water filters. VAAA reports they continue to receive calls from seniors who need assistance.

VAAA has distributed 2 bottles of water with each home delivered meal to each HDM client within the City of Flint. Water. VAAA also provided water to homebound seniors who needed water to prepare food as they had limited support to pick up bottled water. Congregate meal participants also have access to water and filters as needed. Once water filters were installed, VAAA discontinued including water with home delivered meals.

VAAA also contacted the Grandparents Raising Grandchildren program to ensure that they were aware of educational efforts and confirm the program had received water filters to distribute to program participants.

State Police (MSP)

Request received to determine who is leading the deployment efforts for this project (location for distribution, etc.). Lt. Dehner will provide coordination of distribution from the local EOC.

GIS maps with dots where distribution or pick-up has already been made and been provided to Lt. Dehner in both email and printed form.

Resource request has been submitted for 8 iPads that are loaded with GIS information, so that those working on distribution can just enter it on-scene, rather than keeping paper logs.

We are trying to determine if someone has walk routes previously identified to reduce backtracking and provide a good way to make sure we hit all locations. US Postal Service delivery routes will not work for this purpose as some homes do not get home delivery and use a PO Box instead. Inquiry has been made to Flint Water Department for their meter reading routes to determine if this will meet this need.

Supreme Court

08:50 - State Judiciary EMC John Ort reported to the SEOC regarding the Flint water emergency. Nothing to report from the Judiciary regarding the emergency. DEQ website resources shared with our State Court Administrative Office (attn: Region II) in case our Genesee County courts have any questions regarding the emergency.

Technology, Management and Budget (MDTMB)

DTMB Mail Services provided two drivers to assist with supply deliveries in the city for the week. Two additional drivers will be onsite Tuesday to assist with door-to-door supply needs. Additional drivers are available if needed.

DTMB Print and Graphic Services provided expedited service on water-testing English and Spanish cards, information cards for churches and fire departments, water sampling billing return sheet and bathing information.

Provided access to the facility and parking structure for the PIOs working out of the Flint State Office Building. DTMB providing additional security personnel at the building.

Procurement office assisted in a conference call with vendor on acquiring additional water testing kits as well as other contracts as needed to fulfill resource requests.

SEOC Hours of Operation End:	01/11/2016 20:00:00

Executive Summary

On January 6, 2016, Governor Snyder declared a State of Emergency for the City of Flint and Genesee County. Genesee County requested the Governor's declaration on January 5, 2016, following the declaration of a State of Emergency in the county in response to the presence of lead in the public water supply, and the detection of elevated blood lead levels exceeding governmental standards. These conditions exist in the City of Flint, which declared a local State of Emergency and activated local response plans and their Emergency Operations Center on December 15, 2015. A public health emergency was declared by the Genesee County Health Department on October 1, 2015.

By early May 2014, the City of Flint switched from the Detroit Water and Sewerage Department (DWSD) to the Flint River as their primary water source. The corrosive river water caused the leaching of lead from lead pipes into the water supply. Increased exposure to lead can cause immediate negative health effects. However, the main health concerns are long-term effects in children such as developmental and cognitive delays, and behavioral disorders. Elevated blood lead levels were observed in a significant sampling of young children in the City of Flint, and confirmed by the State Chief Medical Officer.

To mitigate the negative effects of corrosive river water on the water infrastructure in the City of Flint, the city switched back to DSWD as their primary water source on October 16, 2015. Funding to reconnect to DWSD was provided from the City of Flint, the Charles Stewart Mott Foundation, and the State of Michigan. Water is treated with a supplemental phosphate addition to rebuild the protective layer in the distribution system and reduce the leaching of lead into the water supply.

For the mitigation of negative health effects, over 24,000 water filters and replacement cartridges have been distributed to residents in the City of Flint. Approximately 13,000 water filters, water pitchers and replacement cartridges were distributed by the Michigan Department of Health and Human Services (MDHHS) in the timeframe of October 1 to December 31, 2015 alone. MDHHS has increased surveillance of blood lead levels in children, addresses water issues in environmental investigations facilitated to identify lead sources in the environment of affected children, and provide health education and information to residents, health care providers and daycare/educational institutions. Local nonprofit organizations have provided potable water to Flint residents. MSP/EMHSD GIS staff is supporting county and local GIS staff, consolidate data from local sources into comprehensive databases, and providing mapping services that support incident analysis and forecasting. Data and maps will be made available regarding the location of water pipes, affected schools, filter distribution locations, water monitoring results, predictive blood lead levels for affected areas, demographics, etc.

Before December 16, 2015, $8.35 million were provided by the State of Michigan, and $6 million by local agencies and nonprofit partners to manage the effects of the corroded pipes. While drops in lead levels have been observed since reconnecting to the DWSD system, water in the City of Flint is still not safe to drink, unless specifically filtered.

Upcoming Forecast
Forecast Update for Flint, MI Area: Posted 945am January 11, 2016

* Break from significant snow through around 8pm Monday (Jan 11)
* Snow and Wind return after 8pm Monday (Jan 11) continues through Tuesday (Jan 12) with very hazardous travel expected
* Very cold through the entire week. The cold could limit ability to remove ice from road surfaces
* Time to Frostbite from exposed skin will be 15 to 30 minutes all week
* Bottled water stored outside or not in temperature controlled locations will freeze due to temperatures well below freezing through the week

Through around 8pm Monday (Jan 11):
On and off light snow with no significant accumulation expected. Icy roads expected for Monday evening commute.

Monday 8pm (Jan 11) through Tuesday Night (Jan 12)
Snow and Blowing Snow will create hazardous driving conditions in very low visibility and icy road surfaces. Could see 2-4 inches of accumulation in the Flint area. This snow/blowing snow will impact all of the lower peninsula, so transportation to and from the Flint area will be very hazardous Monday night through Tuesday.

Snow will blow back on to treated roads. Rapid Changes in visibility and road conditions are likely. This type of weather is typical of the weather that occurs when Michigan has some road closures and larger multi-car accidents.

Wednesday (Jan 13) through Saturday (Jan 16):
Very Cold with a Few Snow Showers. High Temperatures around 20-25 degrees, Low Temperatures around 10-15 degrees.

Agency Summaries

Joint Information Center / Public Information Officer

The Joint Information Center (JIC) was operational for the first time in Flint from 8 a.m. to 5 p.m. on Jan. 11. State agencies at the JIC included the Governor's Office, Health and Human Services, Michigan Department of Agriculture and Rural Development, and Department of Technology and Management and Budget, and Michigan State Police.

Tasks accomplished during the operational period included:
• Coordinated with the Governor's Office for a 2:30 p.m. press conference in the city of Flint. This action item included multi-agency collaboration and the development of talking points under a very tight timeframe.

- Created a script for a Comcast video PSA.
- Finalizing radio PSA with the Michigan Association of Broadcasters.
- Secured a field PIO and state videographer and photographer for embedding during water resource team operations.
- Drafted a media advisory announcing the water resource teams, including a media opportunity.
- Looking into Comcast/Dish Network dedicated video.
- Continued to monitor media and social media.
- Issued and drafted social media posts about the ongoing situation.
- Worked with DTMB and facilities to ensure a functioning Flint JIC.

Agriculture and Rural Development (MDARD)

Jan 11th - 1/11/16 - MDARD Activities: Have updated the guidance document to be a regulatory document for water in retail food and restaurants/food service; document is going through the approval process including the JIC. MDARD is making plans for distribution and then follow up. On animals - we expect to get a list of kennels, clinics, rescue organizations, etc., by the end of the day for additional outreach. SEOC Hours of Operation End:	01/12/2016 20:00:00

Executive Summary

SEOC Update:
Accomplished today (January 12):

The SEOC continues to provide:
- Situational awareness.
- Common operating picture/objectives.
- Coordination with city/county.
- Potential coordination with federal agencies.
- Incident prioritization.
- Coordination of life/health safety measures.
- Provide resources.
- Public Information Control.

- Logistics
o Worked on maintaining supplies and track resources at each of the local PODs.
o Worked to establish a Red Cross warehousing team to assist at two new warehouse locations.
o 50,000 sq. ft. warehouse facility established and will begin accepting resources Wednesday January 13, 2016.
o Working with DTMB to locate vehicles needed for Water Resource Canvassing on Thursday, January 14, 2016.

- JIC
o Media was imbedded with a canvassing team today.
o Media coverage on the canvassing was very positive.
o Approved a MDARD fact sheet for distribution.
o The Governor's office has pushed out a video PSA lead by Capt. Chris Kelenske.

- Recovery Branch
o Working with MSP SEMC to expand door to door teams this week. Expanded canvassing scheduled for Thursday January 14, 2016.
o Canvassing today was successful and put 4 teams of 6 in the field.
o Totals resources distributed in canvassing operation for 1/12/16:
- 217 Door hangars.
- 117 Water (cases).
- 112 Faucet filters.
- 3 Pitchers.
- 48 Water test kits.

- Planning Section
o Developed real time tracking system for local resources.
o Working with GIS to include local POD numbers in live GIS distribution map.
o Completed IAP for the next operational period and the Situation Report for daily activities.

- Operations Section
o Fire stations up and running today and providing resources to the citizens.
o Water resources have been scheduled to fill the designated warehouses.
o Filter resources have been procured and will be delivered over the week to fill the warehouse.
o Second warehouse 100,000 sq. ft. has been procured.
o American Red Cross warehouse management team on site at GCCARD.
o Daily Numbers:
- Filters.
- 2,000 delivered.
- 64,700 ordered.
- Replacement Cartridges.
- 10,400 delivered.
- 184,300 ordered.
- Water (cases).
- 7,824 delivered.
- 19,152 ordered.
- Test Kits.
- 6,601 kits delivered.
- 1,000 ordered.
- Finance Section.
o Continuing to monitor SEOC staffing and costs incurred on a daily basis.
o Develop projection of anticipated costs for response and short-term recovery.

• GIS Branch Updates.
o Today we began migrating content to ArcGIS Online to streamline resource management operations.
o Deployed ArcGIS Online Collector App to field teams and tracked resources and site visits. Building a similar tracker for PODs to track the status of resources distributed.
o We continued to work on updating old mapping products to include newer infrastructure. Lead analysis is ongoing and is at 10% of the city lines.
o We have coordinated with local partners to develop a draft map of lead service lines to prioritize resources deployment. Finalized map will be developed by U of M Flint in mid-February.

DTMB:
• Procured additional filters/cartridges to maintain field supply and build supply in warehouse.
• DTMB real estate is finalizing lease of 100,000 sq. ft. warehouse for supplies.
• Incoming supplies by end of week.
o 39,500 faucet filters.
o 41,600 replacement filters.

DHHS-CH
• The Community Health Emergency Coordination Center (CHECC) has officially elevated its level of activation to "Level 2 - Partial Activation." Currently the CHECC is staffed with BETP leadership and Section Chiefs only. SMEs will be brought in as necessary.
• Coordinating with MDE and MDARD on nutritional planning communications.
• Coordinating with the CHECC to determine status of Environmental Testing and Consulting Lead Investigator(s) request.
DEQ
• 10,000 additional water testing kits have been ordered.
• Arranged for DEQ staff to deploy to GCCARD to supervise water kit assembly.
• Arranged for DEQ staff to deploy as a field observer to assist in tracking water kit supplies and samples.

Local EOC Update:
• Requested Red Cross warehouse teams for both warehouses.
• Working to establish a warehouse for local resource storage.
• Worked with SEOC to better track resource distribution and levels.
• Secured assistance for inventory management at GCCARD warehouse.
• 2-1-1 is rerouting calls for homebound seniors to Sheriff's office, resulting in approximately 100 home deliveries.
• Red Cross warehouse team on site at GCCARD today.

Incident Response/Recovery Priorities/Objectives

1. Ensure all households within impacted community have required resources.
2. Ensure accurate tracking and accounting of all commodities.
3. Improve and maintain public information strategy.
4. Develop a long term public health and services plan.
5. Ensure adequate staffing to support operational requirements.
6. Identify possible assistance programs.
7. Develop an approved GIS strategy.
8. Maintain coordination between partner agencies and organizations.
9. Enhance situational awareness and common operating picture of all activities.
10. Develop a comprehensive Recovery Plan.

Forecast Update for Flint, MI Area: Posted 1030 am January 12, 2016

• Snow and blowing snow to continue off and on into Wednesday night (January 13). Hazardous travel expected at times.
• Very cold through Wednesday night (January 13). The cold could limit ability to remove ice from road surfaces.
• Time to frostbite from exposed skin will be 15 to 30 minutes through Wednesday (January 13)
• Bottled water stored outside or not in temperature controlled locations will freeze due to temperatures well below freezing through the week

Through Tuesday Night (Jan 12)
• Snow and blowing snow will create hazardous driving conditions in very low visibility and icy road surfaces. Up to an additional 2 inches of accumulation possible in the Flint area. Could see long periods without snow, or a long period of continuous snow.
• Snow will blow back on to treated roads. Rapid changes in visibility and road conditions are likely. This type of weather is typical of the weather that occurs when Michigan has some road closures and larger multi-car accidents.

Wednesday through Wednesday night (January 13)
• On and off snow showers. Less snow expected than Tuesday. Could see an additional inch of accumulation. Gusty winds continue through

Wednesday evening. Very cold air will remain in the area.

Thursday (January 14) through Saturday (January 16):
• Slight warming of temperatures to near 30 degrees during the day. Temperatures in the teens still expected at night. Off and on snow showers to continue into the weekend. Best chance for additional accumulating snow looks to be Friday afternoon (January 15) through Saturday night (January 16).

Damage Assessment Summary

Agency Summaries

Joint Information Center / Public Information Officer

The Joint Information Center (JIC) was operational in Flint from 8 a.m. to 5 p.m. on Jan. 12. State agencies at the JIC included the Governor's Office, Health and Human Services, Michigan Department of Agriculture and Rural Development, and Department of Technology and Management and Budget, Natural Resources, and Michigan State Police.

Tasks accomplished during the operational period included:
• Held an 8:15 a.m. media event where media members had an opportunity to get footage and photos of the water resource teams as they go door-to-door to distribute free bottled water, water filters, water filter replacement cartridges and water testing kits to residents throughout Flint. A photographer/videographer was embedded with the team.
• Collaborated on a Governor's news release about a Public Service Announcement featuring Capt. Chris Kelenske from the Michigan State Police. The PSA provided information about the resources currently available for free to all Flint residents, including water filters, replacement filters, bottled water, water testing kits, and blood testing.
• Issued Web and social media content about the water resource teams.
• Reached out to local and nonprofit PIOs to become active participants in the JIC.
• Finalized MDARD letter and fact sheets to food establishments.
• Sent water filtration video to Comcast. Working to get a Dish Network contact.
• Arranged for an interview with the New York Times, including directors from DEQ and MDHHS.
• Began preparing a news release to include numbers, including teams, sites, local and American Red Cross.
• Monitored traditional and social media.
• Received 17 calls from the news media on the JIC media hotline.
• Expanded JIC staffing and roles.
• Confirmed digital billboard to encourage residents to call 211 for water resources and information.

Agriculture and Rural Development (MDARD)

Jan 12th - 1/12/16 - MDARD Activities: Food Safety: The updated guidance document for water in retail food and restaurants/food service is done and awaiting final ok in the JIC/SEOC; could go out in US Mail as early as Wed. MDARD Food staff will start scheduling water sampling and inspections for next week. MDARD has requested a map overlaying food facilities with the known areas most impacted to help prioritize follow up.
Animal health update: notifications to potentially impacted facilities are nearly complete. After further coordination with Genesee County Animal Control, the three animal shelters in the Flint area are not on City water. The Michigan Veterinary Medical Association notified all veterinarians in the region last week; MDARD will be individually following up with the two clinics. There are no kennels or pet grooming facilities in the City. Genesee Animal Control will be contacting pet stores and the known households that serve as animal rescue operations and does not need MDARD assistance.
MDARD is also looking at opportunities for assistance/guidance related to nutrition, including possible support through donations management.

American Red Cross (ARC)

Again today the American Red Cross provided volunteers to operate the distribution sites at the 5 fire stations. We added staff to this effort to be better able to manage inventory at those sites. We also brought in a warehousing team to manage inventory at the G-CARD site. Additionally ARC put together a team to work on assembling water test kits at the G-CARD site before the kits go out to the distribution sites. A logistics planner has now been deployed from the ARC national headquarters to assist the SEOC logistics Group Chief.
Tomorrow we expect to continue staffing the 5 fire station distribution sites, and will be standing up a volunteer reception center to process event-based volunteers. Assembly of the water testing kits will continue as needed.

Civil Rights (MDCR)

Continue to review activities to provide support and assistance to assigned Human Services branch and other SEOC activities.

Community Health (MDCH)

Provided lead health impact information requested to planning section for presidential letter.

Tasked CHECC with coordinating with Sue Kangas and Farrah Hanley to track financial expenditures.

CHECC is working to ensure that contact lists are current in the MI-Volunteer Registry, should volunteers from the registry be needed. Tracking responses from MI-Volunteer Registry query.

Received confirmation from MDHHS Environmental Health regarding NSF certification requirement for filtering lead from water.

CHECC is coordinating with HHS to obtain EMPower data regarding medically dependent individuals in Flint.

Requested that the CHECC contact Lowes regarding the ability to purchase Brita faucet filters.

Confirmed that +100,000 sq. ft. is available in Lansing through MDHHS MOU with private sector partner. On standby if these resources are necessary.

"Enhanced Lead Testing Guidelines Recommended for Children in Flint, MI," developed by Dr. Wells, was sent to healthcare providers via Medscape - WebMD at 0700 today.

Community Health Emergency Coordination Center (CHECC) is activated at a Level 2 - Partial Activation, consisting of BETP leadership staff and CHECC Section Chiefs.

Corrections (MDOC)

The MDOC continues to monitor the situation and our staff as well as our clients in the community. Water will remain available at the office for both staff and clients to use whil at the Parole and Probation offices in the area. EM staff from the MDOC will contiue to monitor MiCIMS and attend briefings. We remain available to assist in addressing this situation.

Education (MDE)

MDE is distributing nutrition guidelines for "Help Fight Lead Poisoning with a Healthy Diet" handout. Additional MDE staff trained for SEOC. (1/11)

MDE is monitoring the situation and coordinating as necessary with other state agencies.

Kyle Guerrant, Deputy Superintendent, was on-site at the SEOC; January 10, 0915-1425.

Environmental Quality (MDEQ)

The Department of Environmental Quality (DEQ) completed the following activities:
- Delivery of 6101 water test kits to GCCARD
- Verification of NSF/ANSI 53 certified filters for future ordering
- Arranged for DEQ staff deployment to supervise volunteers assembling water kits at GCCARD
- Arranged for DEQ staff deployment as a field observer to assist in tracking water kit supplies and samples
- Established additional vendors for supply of water test bottles

Human Services (MDHS)

Participated in AM & PM State Agency briefings,

Updated resource requests.
Confirmed delivery to GCCARD versus Home Depot to complete the delivery of 2000 filters, 18,400 replacement cartridges.
Arranged for DTMB to pick up around 700 (23) cup pitchers from schools surplus. Plan is to split these up between the FDs.
Made contact with Menards to identify filters and replacement cartridges and relayed that information to DTMB for procuring options.
Had conference call with MDHHS finance. They have concerns of the accountability of our purchases and who's driving the ordering. I explained the urgency and the process. They understand now and said carry on.
Identified 16 MDHHS staff volunteers who will be assisting in the door to door distribution operation for Wednesday, Thursday, and Friday.
16 local MDHHS staff participated in the mission of the Water Resource Teams today.
CHECC continues to maintain a Level 2 Activation

Licensing and Regulatory Affairs (LARA)

LARA Excutive Staff met and was updated on the situation in Flint. This will be a weekly meeting.

Spoke with the Flint Superintendent of Schools, Mr. Tawwab regarding the faucet pilot program. He has approved us to move forward with this program.

Joe Madziar, LARA's Plumbing Division Chief, has provided a material list for Freeman Elementary. The list was provided to DTMB for procurement. We are awaiting an ETA from DTMB on the materials.

We are working with Tony Sitko, building manager for Flint, to coordinate a schedule for the Plumbing Division to be able to get into the school to complete the work.

I am communicating with the DEQ to schedule re-testing for Freeman Elementary pilot project.

National Weather Service (NWS)

Jim Maczko from NWS Grand Rapids will participate in SEOC briefings via phone call and will coordinate support with local forecast office that serves Flint - NWS Detroit/Pontiac.

Natural Resources (MDNR)

January 8, 2016
MDNR is fully participating in all SEOC activities. Situational awareness is being maintained and the department stands ready to assist as needed.
Department POC's include:
Chief Gary Hagler, F/Lt. Jennifer Wolf, F/Lt. Steven B. Burton.

Services to the Aging (OSA)

Valley Area Agency on Aging - Region 5 (VAAA), in partnership with other local community agencies such as the Genesee County Health Department and MDHHS, has helped organize local meetings and distribute water and water filters. VAAA is an access point for receiving calls from homebound seniors who are not able to pick up water filters or need assistance installing water filters. VAAA reports they continue to receive calls from seniors who need assistance.

Contact info for VAAA Executive Director is:

Kathryn C. Boles
President, CEO
Valley Area Agency on Aging
225 E. Fifth Street, Suite 200
Flint, MI 48502
(810) 239-7671
(810) 239-8869 fax

VAAA has distributed 2 bottles of water with each home delivered meal to each HDM client within the City of Flint. Water. VAAA also provided water to homebound seniors who needed water to prepare food as they had limited support to pick up bottled water. Congregate meal participants also have access to water and filters as needed. Once water filters were installed, VAAA discontinued including water with home delivered meals.

VAAA also contacted the Grandparents Raising Grandchildren program to ensure that they were aware of educational efforts and confirm the program had received water filters to distribute to program participants.

On 1/11/16 AASA forwarded to MSP/GIS over 1,400+ NAPIS addresses of Flint seniors who received In-home services in FY15. The NAPIS file was sent encrypted and did not include client names. The NAPIS file included 1,029 HDM, 138 CM, and 30 CCS clients.

VAAA continues to operate as a call center and referral point for area seniors concerned about their drinking water. They've noticed this week that seniors who've had filters installed are beginning to request bottled water again.

AASA's State LTC Ombudsman has checked in with the local Ombudsman in Flint. Local Ombudsman reports Flint area nursing homes have been taking precautions using bottled water for cooking and drinking. The local Ombudsman remains concern about Nursing Homes' long term need to replace old facility plumbing that may be leaching lead.

State Police (MSP)

Lt. Pummill, local EOC, has requested 3 additional box trucks for neighborhood delivery. Request has been sent to logistics, Request # SEOC - 1378446.

Resource request received for 4 additional MSP personnel to assist with distribution on Wednesday 1/13/16. Request has been forwarded to Lt. Pummill at the Local EOC. Staff has been identified and the personnel list has been provided to Recovery.

Task assignment has been submitted to Logistics to determine how many 5 person distribution teams can be supported on Thursday and Friday. Support would need to include filters, replacement filters, water, test kits, pamphlets, and trucks to transport.

MSP is in the process of identifying available staff to support this effort with the plan to staff up to the level that can be supported by logistics.

A request has been submitted to SEOC Logistics, DTMB, for approximately 20 smart devices that are network enabled that we can install the GIS application onto so that they activity can be tracked real time. These devices do not need to be connected to the state network.

Technology, Management and Budget (MDTMB)

DTMB Mail Services provided three additional drivers and trucks to assist with door-to-door supplies, this is in addition to the four drivers and trucks already working in the city. Also picked up additional water test kits in Lansing and delivered to Flint this afternoon to ensure kits were available at the distribution sites.

DTMB Real Estate assisted in procuring 100,000 feet of warehouse space and writing the rental agreement.
Procurement office acquired additional water filters and refill cartridges that will be delivered on Thursday to the warehouse for distribution.

Twelve trucks of water will be delivered tomorrow and water filters and replacement cartridges will be delivered on Thursday.

Working on resource request to acquire 20 tablets to send out with MSP personnel to help record supplies being delivered in the field.

USE FILTERED TAP WATER

- Drinking, cooking
- Brushing teeth
- Washing fruits and vegetables
- Pet water bowls

USE UNFILTERED TAP WATER

- Cleaning
- Bathing

BLOOD LEAD LEVEL TESTING

All Flint children less than six years of age should have their blood lead levels tested. Contact your primary care provider or call 2-1-1.

NUTRITION

Did you know that some foods will help keep lead from being stored in a child's body? These are foods with a lot of calcium, vitamin C and iron.

FREE WATER TESTING

Flint residents who are concerned about their water can obtain free water testing kits at the water resource sites.

USE WATER FILTERS & CARTRIDGES

Water filters can reduce lead and other contaminants by 99 percent when installed correctly. Free water filters are available at the water resource sites.

SEOC Hours of Operation End:	01/13/2016 20:00:00

Executive Summary

SEOC Update:
Accomplished today (January 13):

The SEOC continues to provide:
- Situational awareness.
- Common operating picture/objectives.
- Coordination with city/county.
- Potential coordination with federal agencies.
- Incident prioritization.
- Coordination of life/health safety measures.
- Provide resources.
- Public Information Control.

- Logistics
o Working with DTMB and MDOC to secure vehicles and/or trailers for door-to-door campaign beginning Thursday morning.
o Work with MSP Ops Chief to build a mission ready package for a volunteer team in the case other cities offer volunteer assistance for door-to-door.
o Work with DTMB to secure 80,000 square foot warehouse to store water resource supplies.

- JIC
o PIO from 2-1-1 and Genesee County Sheriff's office were in JIC today.
o We held a media avail at Fire Station #3 and the event was well attended by media.
o Managed and corrected misinformation from media about National Guard Presence.
o City buses adding water resource centers to route.

- Recovery Branch
o Coordinating with Red Cross on volunteers for weekend
o Ordered 15 passenger vans to transport teams 1/14-1/15
o Contacted Comcast to coordinate volunteer opportunities- awaiting response of number of potential volunteers.
o Coordinated trucks and drivers with Corrections to deploy on 1/14-1/15
o Coordinated tracking numbers with GIS:
Overall Numbers: 1/12 1/13
Occupied Homes 533 291
Vacant Homes 238 86
Total Homes 771 377
Resources
Door Hangars 473 256
Water 265 148
Filters 235 123
Pitchers 9 6
Water test kits 92 44
Replacement Filter 93 93
Total Resources Dispersed 1167
Future sample test site 62 34

- Planning Section
o Developed real time tracking system for local resources.
o Working with GIS to include local POD numbers in live GIS distribution map.
o Developed and published Situation Report #8.

- Operations Section
o Fire stations up and running today and providing resources to the citizens.
o Coordinated trucks and drivers with Corrections to deploy on 1/14-1/15.
o SEOC chiefs along with American Red Cross Logistics liaison deployed to local EOC and warehouse to further develop distribution plan and coordination between all entities.
o Daily Numbers:
- Replacement Cartridges.
- 30,700 delivered.
- Water (cases).
- 19,152 cases delivered.

- Finance Section.
o Gather related costs to date to build projection to submit to SBO.

• GIS Branch Updates.
• Map products have been updated with new information. Created a franchise water customer map for MDARD.
• Continued with mapping of lead service line locations, 20% completed at this time.
• Upgraded ArcGIS Online Collector App to field teams and tracked resources and site visits and procured 30 additional tablets for tomorrows field teams.
• Updating EOC dashboards to track more detailed metrics and track team locations.
• Implementing a POD tracker for tomorrow that can be used to monitor distributions in real time.
Current focus is optimizing the dashboards to include triggers that notify staff when inventory limits are exceeded to better manage the ordering process for new supplies.

DTMB:
• Secured warehouse today for storage of bulk supplies.
• Secured 30 tablets for field data entry.

DHHS-CH
• The Community Health Emergency Coordination Center (CHECC) is working on a nutrition plan.
o They are working with local, regional, and state agencies.
o Looking at short term and long term benefits.
• Working with local health department to provide additional support.
• Working on developing a community assessment for disaster behavioral health services.

DEQ
• Additional staff reported to the GCCARD today to supervise assembly of the water testing kits.
• Field observer working to get inventory of kits returning.

Local EOC Update:
• Evaluation of need to engage further public health/medical professionals.
• Continuing to identify appropriate agencies that need to be represented in EOC, and discuss strategies to engage them.
• Addressed lack of distribution of supplies to undocumented populations.
• Worked to enhance coordination of financial control to educate county finance staff.
• Coordinated with Flint Mass Transportation Authority (MTA) to include Fire Station PODs on bus routes.
• Secured adequate warehouse space for incoming supplies.

Agency Summaries

Joint Information Center / Public Information Officer

The Joint Information Center (JIC) was operational in Flint from 8 a.m. to 5 p.m. on Jan. 12. State agencies at the JIC included the Governor's Office, Health and Human Services, Michigan Department of Agriculture and Rural Development, and Department of Technology and Management and Budget, Natural Resources, and Michigan State Police.

Tasks accomplished during the operational period included:
- *Held an 8:15 a.m. media event where media members had an opportunity to get footage and photos of the water resource teams* as they go door-to-door to distribute free bottled water, water filters, water filter replacement cartridges and water testing kits to residents throughout Flint. A photographer/videographer was embedded with the team.
- Collaborated on a Governor's news release about a Public Service Announcement featuring Capt. Chris Kelenske from the Michigan State Police. The PSA provided information about the resources currently available for free to all Flint residents, including water filters, replacement filters, bottled water, water testing kits, and blood testing.
- Issued Web and social media content about the water resource teams.
- Reached out to local and nonprofit PIOs to become active participants in the JIC.
- Finalized MDARD letter and fact sheets to food establishments.
- Sent water filtration video to Comcast. Working to get a Dish Network contact.
- Arranged for an interview with the New York Times, including directors from DEQ and MDHHS.
- Began preparing a news release to include numbers, including teams, sites, local and American Red Cross.
- Monitored traditional and social media.
- Received 17 calls from the news media on the JIC media hotline.
- Expanded JIC staffing and roles.
- Confirmed digital billboard to encourage residents to call 211 for water resources and information.

Agriculture and Rural Development (MDARD)

Jan 13th - 1/13/16 - MDARD Activities: Food Safety: The updated guidance document for water in retail food and restaurants/food service is done and is going out via US Mail, and attached here. MDARD Food staff will start scheduling water sampling and inspections for next week. Verified that the warehouses storing water do not need MDARD Food Licenses.

MDARD's Agriculture Development Division provided background on historical grants to the Flint Farmers' Market and Food Bank of Eastern Michigan and will be contacting those organizations to ask about barriers and potential opportunities to help strengthen the food system.

American Red Cross (ARC)

The American Red Cross staffed the points of distribution (POD) at the 5 fire stations today, and will do so again tomorrow.
The assembly of water test kits continued, today we moved the operation from G-CARD to ARC headquarters.
Although the acquisition of warehouse space has been an issue, delivery trucks have been off-loaded throughout the day.

The ARC did stand up a volunteer reception center (VRC) today. It will be in operation daily (including weekends) from 9am to 7pm.

Civil Rights (MDCR)

Continue to review activities to provide support and assistance to assigned Human Services branch and other SEOC activities. Conducted background on swimming pool water/licensing and researched best practices in community engagement.

Community Health (MDCH)

Communications have been maintained between the CHECC and the SEOC throughout this operational period. MDHHS, MDE, LARA and MDARD have collaborated on the beginnings of a nutritional plan that includes educational components, consistent messaging across agencies, short term and longer term goals to address the "food desert" that exists in Flint. Information obtained was provided to the CHECC and a lead has been assigned to further develop this multi agency the nutritional plan .

The CHECC began to assess needs and resources to address disaster behavioral health needs for citizens and responders associated with this response. Contact was initiated with the Substance Abuse and Mental Health Services Administration Disaster Technical Assistance team. Discussed disaster behavioral health resources with FEMA V Disaster Recovery Coordinator.

CHECC Continued communication with LHD EPC to determine additional support that may be required.

The CHECC continues to track responses to volunteer availability through the MI Volunteer Registry.

Corrections (MDOC)

Brent Travelbee and Mike Farmer reported to the SEOC at 0750 hours on 1/13/2016. We have filled all requests for vehicles, personnel and warehouse equipment to assist with water distribution. MDOC Director Heidi Washington is providing full support to our assistance efforts. We will continue to staff the SEOC as a full-time partner as we have assets deployed into the field. All resources are documented on the appropriate forms and shared with the SEOC staff. Additional resource requests are coming in frequently and we are working hard to locate the requested resources while still maintaining minimal local facility operational requirements from the providing facility.

The MDOC is dedicating a considerable amount of resources and staff to this effort. We are working closely with the Logistics Chief to locate needed resources and fulfill resource requests in a timely manner.

Currently we have 25 staff and 18 vehicles dedicated (on site) to the response for Thursday, January 14, 2016, additionally we have 4 pallet jacks, one refrigerated semi-trailer and two MDOC staff assigned to the SEOC location.

Information is as follows:

(4) Large Box trucks

(4) 15 passenger vans

(4) Ford F-250 trucks

(3) enclosed trailers

(1)Handicap Van

(1)20 passenger Van

The MDOC continues to monitor the situation and its affect on our staff as well as our clients in the community.

Education (MDE)

MDE is distributing nutrition guidelines for "Help Fight Lead Poisoning with a Healthy Diet" handout. Additional MDE staff trained for SEOC. (1/11)

MDE is monitoring the situation and coordinating as necessary with other state agencies.

Kyle Guerrant, Deputy Superintendent, was on-site at the SEOC; January 10, 0915-1425.

Environmental Quality (MDEQ)

The Department of Environmental Quality (DEQ) completed the following activities:
- DEQ staff deployment as a field observer to assist in tracking water kit supplies and samples
- Coordination of DEQ and LARA personnel for Freeman School Faucet Replacement plan and school testing over the weekend

Human Services (MDHS)

On the Human Services side, two representatives worked the SEOC during our operation hours of 0800 to 2000 today.

Updated resource requests with water filtration products delivered today.

Participated in numerous briefs and conference calls, related to the response.

Genesee Co. MDHHS staff participated in the Flint Water Resource Teams again today. Genesee MDHHS staff have been identified for Thursday, and Friday.

Staying in communication with 211, addressing human service concerns and delivery of resources to the elderly and disabled. Review and provide regular 211 updates to SEOC Ops.

CHECC continues to maintain a Level 2 Activation

Licensing and Regulatory Affairs (LARA)

LARA has offered to assist with lab testing utilizing the MIOSHA Lab and Scientists as appropriate in coordination with DEQ. We have 3 scientists and the lab manage available. LARA staff are also available for assisting with collection of testing materials or as needed..

LARA Bureau of Community and Health Services is in contact with licensed facilities to ensure they are receiving appropriate assistance if needed. The Center for Medicaid and Medicare Services has contacted us regarding any potential issues.

National Weather Service (NWS)

Jim Maczko from NWS Grand Rapids will participate in SEOC briefings via phone call and will coordinate support with local forecast office that serves Flint - NWS Detroit/Pontiac.

Natural Resources (MDNR)

MDNR is fully participating in all SEOC activities. Situational awareness is being maintained and the department stands ready to assist as needed.
Department POC's include:
Chief Gary Hagler, F/Lt. Jennifer Wolf, F/Lt. Steven B. Burton.

Services to the Aging (OSA)

Valley Area Agency on Aging - Region 5 (VAAA), in partnership with other local community agencies such as the Genesee County Health Department and MDHHS, has helped organize local meetings and distribute water and water filters. VAAA is an access point for receiving calls from homebound seniors who are not able to pick up water filters or need assistance installing water filters. VAAA reports they continue to receive calls from seniors who need assistance.

Contact info for VAAA Executive Director is:

225 E. Fifth Street, Suite 200
Flint, MI 48502
(810) 239-7671
(810) 239-8869 fax

VAAA has distributed 2 bottles of water with each home delivered meal to each HDM client within the City of Flint. Water. VAAA also provided water to homebound seniors who needed water to prepare food as they had limited support to pick up bottled water. Congregate meal participants also have access to water and filters as needed. Once water filters were installed, VAAA discontinued including water with home delivered meals.

VAAA *also contacted the Grandparents Raising Grandchildren program to ensure that they were aware of educational efforts and* confirm the program had received water filters to distribute to program participants.

On 1/11/16 AASA forwarded to MSP/GIS over 1,400+ NAPIS addresses of Flint seniors who received in-home services in FY15. The NAPIS file was sent encrypted and did not include client names. The NAPIS file included 1,029 HDM, 138 CM, and 30 CCS clients.

VAAA continues to operate as a call center and referral point for area seniors concerned about their drinking water. They've noticed this week that seniors who've had filters installed are beginning to request bottled water again.

AASA's State LTC Ombudsman has checked in with the local Ombudsman in Flint. Local Ombudsman reports Flint area nursing homes have been taking precautions using bottled water for cooking and drinking. The local Ombudsman remains concern about Nursing Homes' long term need to replace old facility plumbing that may be leaching lead.

State Police (MSP)

Teams have been distributing water all day. 771 homes have been visited as of the end of this operational period.

Logistically, we can support 15 teams consisting of 60-75 MSP volunteers beginning on Thursday, 1/14. We will fold these personnel into multi agency teams with local volunteers, other state agencies, the county, etc.

To run this operation, we will need a minimum of 15 enlisted uniform troopers and sergeants (to lead the teams) in marked vehicles, plus any need command and control staff.

Muster location is the Local EOC, 1101 Beach St., Flint. Parking is Available at the Trinity Church, located at the intersection of Beach and 8th St. Operational period is 0900-1600 on Thursday and Friday. (with 0800-0900 and 1600-1700 being travel to and from)

Supreme Court

08:50 - State Judiciary EMC John Ort reported to the SEOC regarding the Flint water emergency. Nothing to report from the Judiciary regarding the emergency. DEQ website resources shared with our State Court Administrative Office (attn: Region II) in case our Genesee County courts have any questions regarding the emergency.

Technology, Management and Budget (MDTMB)

DTMB Mail Services has seven drivers with trucks assisting in transporting supplies to support point of distribution centers and Flint Water Resource Teams.

DTMB Real Estate assisted in procuring 80,000 feet of warehouse space and writing the rental agreement.

Eight trucks carrying 12,768 cases of water will be delivered Thursday, along with two trucks carrying 117,000 water filters and 39,000 faucet mounts.

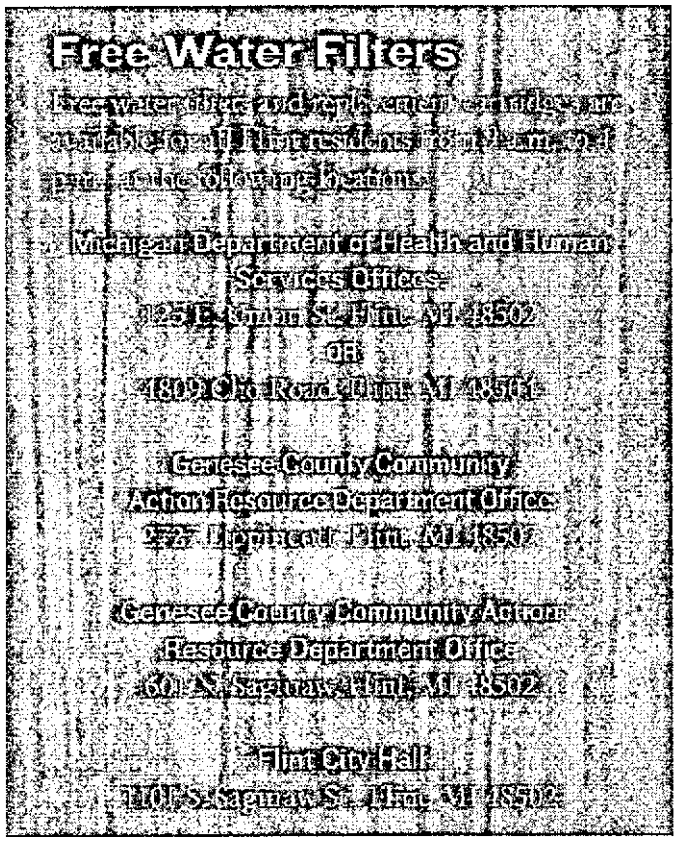
Filled resource request for 20 tablets to send out with the Flint Water Response Teams to record supplies being delivered in the field.

Incident Related Images

Keeping Your Apartment Lead-Safe

If you live in an apartment, it's likely that you can't replace pipes and faucets. In this case, use an NSF-approved filter for all water that you drink or cook with. You can get a filter that attaches to your sink faucet or you can use a pitcher with a filter inside it.

TAKING ACTION ON FLINT WATER
www.mi.gov/FlintWater



Use FILTERED tap water for:

- Drinking (including making coffee, drink mixes, juice and baby formula)
- Cooking (lead will stay in water and food even after boiling)
- Washing fruits and vegetables
- Brushing kids' teeth
- In pets' water bowls

Use UNFILTERED tap water for:

- Washing your hands
- Showers
- Brushing adult teeth
- Washing dishes
- Wiping down countertops
- Baths (don't let kids drink the water as they play in the tub)

Visit: www.michigan.gov/FlintWater

for public information and updates, including resources for Flint residents such as how to obtain free water filters and lead testing

Follow #FlintWater on Facebook and Twitter for updates and information.

Did You Know?

- Lead will not cause rashes or other skin problems. However, if chlorine levels or other cleaners are high in the water, it may cause itchy or dry skin (similar to what can happen when you swim in a pool).
- Buildings built before 1978 could have lead paint. Use wet paper towels to clean up paint chips and dust.

Damage Assessment and Emergency Status Report

Incident: 2015-10-01-City of Flint-Water Contamination / Shortage

Operational Period

Operational Period Begin:	01/06/2016 08:00:00
Operational Period End:	01/08/2016 17:00:00
Situation Report No.	3
SEOC Status:	Full
SEOC Hours of Operation Begin:	01/8/2016 08:00:00
SEOC Hours of Operation End:	01/8/2016 17:00:00

Executive Summary

By early May 2014, the City of Flint switched from the Detroit Water and Sewerage Department (DWSD) to water from its own water treatment plant drawn from the Flint River as its primary water source. The different characteristics of the water resulted in leaching of lead from lead pipes in the city's water infrastructure into the water supply. Increased exposure to lead can cause immediate negative health effects. However, the main health concerns are long-term effects in children such as developmental and cognitive delays, and behavioral disorders. Increased water lead levels and elevated blood lead levels in young children were observed in the City of Flint and confirmed by the State Chief Medical Officer.

On October 1, 2015 the Genesee County Health Department declared a Public Health Emergency due to the elevated blood lead levels in citizens. In response to this the City of Flint declared a local State of Emergency on December 15, 2015 and activated their Emergency Operations Center.

To mitigate the effects of the new source of water on the infrastructure in the City of Flint, the city switched back to DWSD water on October 16, 2015. Funding to reconnect to DWSD was provided from the City of Flint, the Charles Stewart Mott Foundation, and the State of Michigan. Water is now treated with a supplemental phosphate addition to rebuild the protective layer in the distribution system and reduce the leaching of lead into the water supply.

For the mitigation of negative health effects, over 24,000 water filters and replacement cartridges have been distributed to residents in the City of Flint. Approximately 13,000 water filters, water pitchers and replacement cartridges were distributed by the Michigan Department of Health and Human Services (MDHHS) in the timeframe of October 1 to December 31, 2015 alone.

MDHHS has increased surveillance of blood lead levels in children and is addressing water issues in environmental investigations to identify lead sources in the environment of affected children and provide health education and information to residents, health care providers, and daycare/educational institutions.

Local nonprofit organizations have provided potable water to Flint residents. MSP/EMHSD GIS staff is supporting county and local GIS staff by consolidating data from local sources into comprehensive databases and providing mapping services to support incident analysis and forecasting. Data and maps regarding the location of water pipes, affected schools, filter distribution locations, water monitoring results, and predictive blood lead levels for affected areas will be made available with demographics.
Before December 16, 2015, $9.35 million was provided by the State of Michigan and $6 million by local agencies and nonprofit partners to manage the effects of the corroded pipes. While the source water has been switched back to DWSD, water in the City of Flint is still not safe to drink, unless specifically filtered.

On January 5, 2016, Governor Snyder declared a State of Emergency for the City of Flint and Genesee County. Genesee County requested the Governor's declaration on January 5, 2016, following the declaration of a State of Emergency in the county in response to the presence of lead in the public water supply and the detection of elevated blood lead levels exceeding governmental standards.

Since the declaration by the Governor on January 5th, the State Emergency Operations Center (SEOC) has been fully activated and working with local and state agencies to ensure a coordinated response to the incident. Since the activation, the SEOC has activated command staff, state agency EMC's, and implemented the Recovery Branch under the Operations Section.

SEOC Update:
Accomplished today (January 8):
- Recovery Branch is working to develop a enhanced method for outreach to all individuals.
- DHHS is working to develop a method for distribution of water.
- Conducted briefing with local EOC and county executive.
- Conducted briefing with state agencies (daily updates).
- Held first legislative call today.
- JIC continued to develop messaging and has implemented a co-located JIC in the City of Flint.
- SEOC staff provided input to local EOC regarding best methods of identifying health and non-structural impacts for damage assessment process.
- Deployed 3 EMHSD/SEOC liaisons to assist the local EOC.
- Worked on developing incident objectives for the next operational period.
- FEMA Liaison Officers are on site at the SEOC and are assisting and providing technical expertise as needed.

The SEOC continues to provide:
- Situational awareness.
- Common operating picture/objectives.
- Coordination with city/county.
- Potential coordination with federal agencies.
- Incident prioritization.
- Coordination of life/health safety measures.
- Provide resources.
- Public Information Control.

MSP/EMHSD GIS Section Updates
Accomplished Today (January 8):
- Produced Water Point of Distribution Map (POD).
- Produced Filter Point of Distribution Map (POD).
- Met with Genesee County Emergency Manager to discuss POD locations, and hours of operation. He will also be sending us data on new facilities serving as POD's with hours of operations.
- Attempted to geocode list of properties that have received a water filtration system. Geocoding encountered a problem due to original database format. We continue to clean up the database.
- Attempted to get data on the zip codes; local contact has not yet responded.
- Met with GIS from Flint to discuss data and methods.
- U of M contacted us to set up a meeting on how best to proceed with digitizing water lines
- Received account from City of Flint for their ArcGIS online.

Tasks for Tomorrow (January 9):
- Finalize updated list on water filter distributions map.
- Update Water and Filter POD's with updated information from Genesee County Emergency Manager.
- Establish time to meet with U of M.
- Finalize water filter distributions map.
- Finalize plan for data distribution methods.

Volunteer and Donations Management:
- SEOC staff, Local EOC, and local organizations had a call with General Motors about possible donations.

Local EOC Update:
The following actions have been coordinated and supported through the Genesee County EOC since activation:

Genesee County Sheriff's Office:
- Distribute filter and water to affected population (172 attempted contacts with 27 personnel on 01/07/2016).
- Provide security at EOC and incident facilities.
- Sheriff Pickell is serving as the PIO for Genesee County.
- Operate EOC and manage incident through Emergency Management & Homeland Security Office.

Genesee County Health Department:
- Developing messaging (health education) for affected population.
- Provide nutritional counseling.
- Elevated blood level case management.
- Provide IT support for filter distribution database and GIS mapping.
- Developing Lead Poison Prevention Plan.

Genesee County Equalization Department:
- Provide addresses, demographic, socioeconomic data for incident planning and forecasting.
- Provide GIS mapping services.
- Preliminary assessed damages on public and private infrastructure impacts in coordination with City of Flint.

Genesee County Community Action Resource Department (GCARD):
- Warehousing/staging of filters for distribution to affected population.
- Distribution of filters to affected population from two locations in the City of Flint.

City of Flint Fire Department:
- 5 Fire stations will serve as PODs for water and filter equipment on Saturday, 01/08/2016, 0900AM to 1600PM.

Flint Community Schools:
- Nothing reported at this time.

Michigan Department of Health and Human Services:
- Filter distribution at one location in the City of Flint.

United Way of Genesee County:
- Receive and manage donations (cash and goods).
- Public information through 211.
- Facilitating coordination and control among local agencies.

Foodbank of Eastern Michigan:
- Warehousing/staging of water for distribution to affected populations.
- Identify and operate PODs for water (8 sites identified by 12:00 noon, 01/08/2016).
- Water inventory by end of day, 01/07/2015: Food bank has 376 cases of water.

Hurley Medical Center:
- Nothing reported at this time.

The county EOC has issued five resource requests to the SEOC (all in progress) by 12:00 noon on 01/08/2016.

Upcoming Forecast
Forecast Update for Flint, MI area: Saturday 1/9 through Thursday 1/14:

* Saturday (Jan 9): rain with mild temperatures
* Sunday (Jan 10): snow, cold, wind and hazardous travel
* Monday (Jan 11) through Thursday (Jan 14): very cold with a few snow showers

Rain will occur on and off through Saturday evening. Saturday will see high temperatures around 45 degrees. Temperatures will fall quickly overnight Saturday night, with temperatures in the mid 20s by noon Sunday and in the teens by Sunday evening. Strong winds Sunday will result in wind chill values near zero and time to frostbite from exposure of 30 minutes or less.

Snow is expected to develop around or just before sunrise Sunday. Around 2 to 4 inches of snow will be possible in the Flint area Sunday with the heaviest snow expected Sunday late morning/early afternoon.

Snow and cold will result in icy roads and hazardous travel conditions Sunday. Wet roads may ice up in the middle of the night Saturday night before snow begins on Sunday. A few power outages due to snow and wind may be possible Sunday.

Monday (1/11) through Thursday (1/14): On and off snow showers. Very cold air will be in place. Daytime high temperatures will only climb to around 20 degrees with overnight low temperatures around 10 or colder. Wind chill values Monday (1/11) through Thursday (1/14) will be in the teens and single digits above zero with time to frostbite from exposure of 15 to 30 minutes.

Agency Summaries

Joint Information Center / Public Information Officer

Jan 7, 2016

The Joint Information Center (JIC) was operational at 1 p.m. on Jan. 6 and operational from 8 a.m. to 5 p.m. on Jan. 7. State agencies at the JIC included the Departments of Licensing and Regulatory Affairs, Health and Human Services, Agriculture and Rural Development, Environmental Quality, and Michigan State Police.

During the 8 a.m. to 5 p.m. operational period, Gov. Rick Snyder held a press availability with Flint Mayor Karen Weaver. In addition, a round-table press briefing occurred at 1 p.m. at the 4000 Collins Road facility.

Objectives included:

- Oversaw and managed the state of Michigan public information duties due to emergency declaration.
- Held a 4 p.m. conference call with Genesee County PIO Sheriff Robert Pickell and city of Flint PIO Lead Sean Kammer.

Information Gathering
- Created media monitoring reports about the disaster as needed.
- Crafted talking points about the ongoing disaster, including a better description of the emergency declaration process.
- Crafted social media posts about state efforts underway during the disaster recovery process.
- Created graphics for social media efforts.

Information Dissemination
- Answered phones and manage media inquiries in regards to the Flint Water situation.
- Worked to establish a GovDelivery account; post link of website to sign up.
- Finalized details, media invite list and host a media roundtable.

External Affairs
- Worked on planing a conference call between command staff and affected state legislators and congressional Jan. 8, 2015.

Administrative
- Worked on filling staffing for the next operational period.

Logistics
- Worked on fixing email accounts.
- Worked to established a location with Genesee County and the city of Flint for a Unified Joint Information Center by the end of the week.
- Established a conference call line for the media roundtable.

Agriculture and Rural Development (MDARD)

Two areas MDARD is monitoring:
1). Water usage in food processing, food retail, and food service (restaurants). Guidance document has been available since October; MDARD surveyed food processors in October and did not find issues.
2). Water consumption by pets / animals. There has been some evidence of lead toxicity in dogs, and there has been guidance about pets & water included in the Q & A.
Jan 7th 2016 4pm update:
MDARD and Genesee Local Health Dept. agreed to move guidance on water to a regulatory requirement. New language (after JIC approval) will be going out to retail food establishments and restaurants with follow up inspections and sampling. Planning will continue on logistics for sampling.
Jan 8th 2016 4pm update:
Animals - Shelter Director Paul Wallace has obtained some documents to help ascertain what entities (that are not tracked via licensing and registration) that would be housing animals: 1) All the City of Flint street (physical) addresses that are on City of Flint water, 2) All the "Out-County" (physical) addresses that are on City of Flint water. The Shelter Director is also pulling the possible animal holding/gathering facilities in reference to that listing which will provide the rest of the contacts. MDARD will be getting copies of all of these lists soon. Other shelters are not on City of Flint water.

American Red Cross (ARC)

The American Red Cross will be standing up a 'limited' Disaster Relief Operation by the end of today. This will enable us to provide a more comprehensive response to community needs in Flint as they are made known. We will now be more readily able to bring in resources from outside the Flint area.

Civil Rights (MDCR)

Monitor and support agencies with issues surrounding outreach and engagement of marginalized populations within the City of Flint impacted by the current water crisis.

Community Health (MDCH)

MDHHS is collaborating with the MDHHS PIO in the JIC to provide health related information for the document that will be delivered to all homes in Flint.

Collaborated with LARA to obtain a contact list of all health professionals in Genesee County for distribution of Guidelines for Lead Testing in Children.

Per Genesee County Health Department, all inquiries about lead testing are being referred to 211 or their individual healthcare provider.

Dr. Eden Wells, Chief Medical Executive, participated in the Congressional Briefing.

Corrections (MDOC)

Administration for the MDOC has been notified and is updated on current situation. There are approximately 75 staff members working in the affected area. Potable water has been provided to the offices in the affected area since the beginning of this situation and will continue to be provided. This water is available for people working there and those that have been required to go the office. We will continue to monitor this situation for any developing issues.

Environmental Quality (MDEQ)

The DEQ laboratory is prepared to accept and process 400 water samples pre day, 7 days a week. DEQ Incident Management Team staff are supporting the local Emergency Operations Center with personnel in Incident Command positions.

Human Services (MDHS)

Participated in 9:30 State Agency briefing.
Updated resource requests.
Local MDHHS staff active in local EOC.
Sent MCSC to Genesee Co to coordinate various volunteer efforts.
Helping with donation management efforts at the local level.
Gathering information on water filter acquisition, distribution, installation, life span and replacement.
CHECC remains at Level 1 Activation - Normal Operations

Licensing and Regulatory Affairs (LARA)

Communicating with DEQ regarding additional water testing in Flint schools.

Gathering information from the Plumbing Division regarding plumbing authority within the city of Flint.

National Weather Service (NWS)

Jim Maczko from NWS Grand Rapids participating in morning SEOC briefings via phone call and will coordinate support with local forecast office that serves Flint - NWS Detroit/Pontiac.

Natural Resources (MDNR)

MDNR is fully participating in all SEOC activities. Situational awareness is being maintained and the department stands ready to assist as needed.
Department POC's include:
Chief Gary Hagler, F/Lt. Jennifer Wolf, F/Lt. Steven B. Burton.

Services to the Aging (OSA)

Valley Area Agency on Aging - Region 5 (VAAA), in partnership with other local community agencies such as the Genesee County Health Department and MDHHS, has helped organize local meetings and distribute water and water filters. VAAA is an access point for receiving calls from homebound seniors who are not able to pick up water filters or need assistance installing water filters. VAAA reports they continue to receive calls from seniors who need assistance.

VAAA has distributed 2 bottles of water with each home delivered meal to each HDM client within the City of Flint. Water. VAAA also provided water to homebound seniors who needed water to prepare food as they had limited support to pick up bottled water. Congregate meal participants also have access to water and filters as needed. Once water filters were installed, VAAA discontinued including water with home delivered meals.

VAAA also contacted the Grandparents Raising Grandchildren program to ensure that they were aware of educational efforts and confirm the program had received water filters to distribute to program participants.

State Police (MSP)

Insp. Bolger is monitoring the incident via MICIMS and participating in State Agency Briefings.

Supreme Court

08:50 - State Judiciary EMC John Ort reported to the SEOC regarding the Flint water emergency. Nothing to report from the Judiciary regarding the emergency. DEQ website resources shared with our State Court Administrative Office (attn: Region II) in case our Genesee County courts have any questions regarding the emergency.

Technology, Management and Budget (MDTMB)

Provided update to management on morning briefing.
Co-located JIC has been setup for the public information officers, along with a media meeting room. Facilities supervisor assisted with unloading and equipment setup.
Received list of agency public information officers to have access to the Flint Office Building added to their ID cards.
Resource request received for a truck and driver needed to pick-up pallets of water and cartridges within the city and deliver them to five city fire stations on Saturday.
Resource request received to locate warehouse space within the city to act as a distribution and intake site for donated water, cartridges and filters. DTMB Real Estate Division contacting resources within the city for available locations.

Subject: SEOC Update 1/8/16 - Flint Water - Limited Distribution

INTERNAL USE ONLY – LIMIT DISTRIBUTION TO GOVERNOR'S OFFICE

Update 1/8/16

SitRep 3 attached.

There is a significant difference in what is being presented by the media and what the local EOC is relaying to us at the SEOC. It is also being driven by the media that this is a state versus local response (who is providing more and quicker versus a coordinated effort between all). That said, I advised SEOC personnel that perception is reality in some eyes and we are to move forward to address items that typically are addressed at the local level. I have ordered the SEOC open all weekend due to make the quick wins that we need and continue to get the coordination and collaboration in place that is needed (but make gains on our own as needed).

Items to Note

- Two FEMA LNO's arrived today and are in the SEOC. A third LNO was requested from FEMA due to some unique issues with this event to include having to deploy more or my staff to the local EOC to get more structure and/or find out why there is an issue with the message the media is showing versus what we are hearing from the local EOC.

- We finally received from the local EOC 8 locations (we were told originally early in the week they had 80-90) that are their Points of Distribution (PODs) for water in conjunction with the local food bank. The PODs are not getting water from the food bank even though the food bank has water. We are going to resolve this issue as we can help deliver the water to the PODs but we were

not aware of this. 8 PODs is not enough locations if water needs to be distributed to citizens. Speaking with the ARC Regional Administrator later today, I believe ARC got water to those locations but I need to confirm that in the morning. The food bank reported they had 376 cases of water.

- We have learned that a low number of residents are testing their water when DEQ can test 400 kits per day. This is an added focus that we believe can be increased through dissemination of test kits with the filters and any water.

- I found out the Mayor was okay with using fire stations as distribution points for water, filters, and water test kits. While this did not come to me through the local EOC, I advised we needed to get water, filters, and test kits to these locations for tomorrow. The distribution at 5 Flint Fire Department stations has been coordinated to be in place by 10:00 am tomorrow morning.

    - DTMB has provided a truck and driver to pick up water test kits from DEQ lab in Lansing, water from the Food Bank and water filters and replacement cartridges from GCARD in Genesee County.
    - 10 American Red Cross (ARC) volunteers will meet the DTMB truck at GCARD at 9:00 am to be provided information about filters. Instructions will be included in water test kits. They will then report to the 5 fire stations to assist in distribution of resources to the public and track addresses of same.
    - Residents will be told where they can drop off their water test kits, or that they can return them to the fire station the next day. Coordination will occur on pick up of water test kits daily to be taken to the Flint City Hall, who will then delivery them to the DEQ testing lab.

- STILL FINALIZING - We have made available 2,000 Filters for distribution on Sunday as parishioners leave mass/services. This will be 200 filters for 10 churches in Flint. While this is a small number of churches, we do not want to waste an opportunity to hand out filters and this seems like a quick way to so. The filters will be put on the DTMB truck on Saturday for delivery to TBD locations for distribution. Logistics remain undetermined as I am still waiting on a list of the churches, pastors/reverends/hours or services/etc. The DTMB truck will be returning to Lansing approximately 11:00 a.m. so we need to finalize this quickly on Saturday. We may utilize ARC to assist with this.

- The Recovery branch is working with the JIC to develop a door hanger card. DTMB is working on the printing portion of the hanger card. Recovery will also be finalizing logistics over the weekend for neighborhood canvasing to occur early next week. 40 volunteers have signed up to attend training on Monday afternoon to complete this task. The mission will be to deliver water sample kits along with water filters/replacement cartridges, and water.

- It appears that 211 has become overloaded. DHHS is researching ways to increase capacity for calls.

- A Volunteer Management Coordinator is in the Genesee County EOC as of today.

- A Donations Management Coordinator has been requested and she will be in the Genesee County EOC Saturday.

- DHHS had a conference call with GM today; they indicated they can provide cash, and supplies, but primarily manpower. No commitments were made at this point. We inquired as to availability of warehouse space and trucks. It was left as GM being a major resource pool that we can tap into as we determine missions. Further conversations will occur, but primarily GM just wanted us to know they are there if needed.

- An additional EMHSD staff member was sent to the Genesee County EOC to act as Operations Section Chief and obtain awareness of the situation there.

- GIS staff met with various parts of Genesee County/Flint personnel to try to get a handle on data available.

- GIS continues to work with local GIS personnel with three GIS staff going to Flint today to work with them. GIS staff is working with U of M on how best to proceed with digitizing water lines for long term recovery.

Chris

UPDATE 1/7/16

A summary of some of today's SEOC activities is provided below. Attached is the following:

- Today's SitRep which contains more information than below.
- *The resource request/task assignment sheet for your situational awareness.* This is how locals request resources as well as how we track resources and any assignments and/or tasks that are to be completed.
- JIC Task Tracking – for your situational awareness on how we are tracking requests and assignments. Once someone is assigned a task or resource request it allows them to document what work has been or will be done as shown at the bottom of the document.

Items to note:

- I received a document this evening from Genesee County which appears to be damage assessment information. Analysis of this will occur tomorrow. It appears to be infrastructure and costs to fix it and no other impacts.
- I spoke with Jamie Curtis, Genesee County Commissioner, this evening. A very good relationship is in place with him, especially with our District Coordinator (DC). I also have our DC working on developing stronger relationships with the Mayor/Mayor's office.
- GIS staff continue to obtain data and work with County and City personnel to get a picture of where resources have been provided, need to be provided, as well as infrastructure locations (pipes) that could be affected.
- Personnel and agencies have been tasked with developing a plan to get people in the community to deliver information, hand out filters, etc. This would target those areas we are showing minimal or no filter distribution based on the data we are collecting. The plan is to get them in the field by Tuesday and the plan will be provided to me tomorrow.
- Filters can be obtained at the following locations:
  - Michigan Department of Health and Human Services office, 125 E. Union St., Flint, MI 48502
  - Michigan Department of Health and Human Services office, 4809 Clio Road, Flint, MI 48504
  - Genesee County Community Action Resource Department office, 2727 Lippincott, Flint, MI 48507
  - Genesee County Community Action Resource Department office, 601 N. Saginaw, Flint, MI 48502
- Conducted briefing with local EOC and county executive.

- Conducted briefing with state agencies (daily updates).
- Began work to schedule legislative/congressional conference calls. Tentatively scheduled for 2 p.m. Friday.
- JIC continued to develop messaging.
- Provided input to local EOC regarding best methods of identifying health and non-structural impacts for damage assessment process.
- Deployed two EMHSD/SEOC liaisons to assist the local EOC.
- Published the Incident Action Plan and continued assignment of objectives/tasks.
- FEMA Liaison Officers just arrived in Lansing to assist command and general staff.
- I spoke with Harvey a few times and he should have talking points later tonight or tomorrow a.m. for his use and also for others who may speak to media outside of state government who may benefit from our messaging.
- We held a media round table at 1 P.M. at the SEOC. Dr. Wells and I spoke and answered questions to numerous media outlets.
- Local agencies and NGOs continue to provide water and filters to citizens.
- The website, www.michigan.gov/flintwater, was update with information and links to assistance to include 211. Additional recommendations were provided to include information on the testing water in homes.

EMHSD GIS:

Accomplished Today:

- Reproduced Socio-Economic Status Map
- Reproduced Predicted Affected Populations Map
- Cleansed old data and reports for water filter distributions
- Created draft map of water filter distributions (Refinement needed before releasing final product)
- Scheduled on-site visit with Flint GIS Department and Genesee County GIS Department
- Formatted databases to host content
- Researched service line database creation and scheduled meeting with U of M Flint to discuss timelines and resource needs
- Generated water infrastructure map (does not include building service lines)

Tasks for Tomorrow:

- Meet with Flint City GIS
- Meet with Genesee County GIS
- Meet with U of M Flint GIS
- Finalize water filter distributions map
- Finalize plan for data distribution methods

Chris

UPDATE 1/6/16

A summary of today's SEOC activities is provided below. I tried to distill this as best I could but there has been a lot of activity and discussion to get an accurate assessment of the situation. Attached is the final draft of objectives and tactics for the operational period and agency situation report (SitRep) which has more SEOC agency information. I have implemented weekly operational periods.

Advise if you want anyone else copied or off this distribution.

Daily Update

- Set goals for SEOC and identified response/recovery emphasis
- Requested FEMA liaison officers (LNO) from FEMA Region V. Two LNOs will be on site by ~3 p.m. 1/7/16. Both are known contacts to me and some staff and one has worked extensively with me during the SE MI flooding in a command and control position. These personnel have been specifically tasked with this mission. **THEY ARE NOT HERE TO ASSIST WITH A PRESIDENTIAL DECLARATION REQUEST BUT TO ASSIST ME.**
- PIOs from multiple agencies were here and established the Joint Information Center (JIC). News released pushed out on this. I am very happy with the PIO work and movement toward coordinated messaging.
- Held briefing for State Agency Emergency Management Coordinators, which included presentations from DEQ and DHHS subject matter experts to ensure situational awareness and to develop a common operating picture.
    - I opened the briefing by identifying our initial goals, items to think about while subject matter experts were briefing us, and how we are to move forward, find quick wins, and regain trust.
    - **MDHHS – Elevated Blood Lead Levels**
        - Dr. Elizabeth Wells gave an in depth summary of lead poisoning and what has occurred in terms of health monitoring throughout the Flint crisis.
    - **MDEQ – Water Testing Protocols**
        - Mr. George Krisztian of MDEQ gave an in depth summary of the testing protocols and summary results that as they have developed throughout the emerging crisis.
- Developed Incident objectives, strategy and tactics (see attached)
- Identified SEOC and state agency staff positions
- Assigned work tasks for SEOC operation period from 0800 January 6, 2016 to 1700 January 8, 2016
- Reviewed planned actions, prepared final draft Incident Action Plan
- **Made contact with the Genesee County Emergency Manager first thing in the morning and held a conference call mid-day to discuss roles. Daily 0830 command conference calls with local EOC command staff starts tomorrow. Tomorrows call will include the County Commissioner and the City Administrator (both invited). Topics include the incident action plan objectives and establishing better local coordination, command and control to facilitate integration with the SEOC. The local EOC is not functioning as it needs to with personnel and local coordination and we are working on that issue.**
- I will be in Flint tomorrow for a 2 p.m. media round table with local officials that was set up by the JIC.
- The attached initial objectives will be updated at least every operational period and as needed. I listed the objectives below but the tactics to accomplish them is in the attached if you want further information.
    1. Activate the State Recovery Task Force (SRTF).
    2. Establish and maintain coordination between the City of Flint, Genesee County, state and federal agencies, and appropriate medical experts.
    3. Obtain and maintain situational awareness and common operating picture of all activities.
    4. Establish SEOC operational period and hours of operations.
    5. Investigate and identify all available programs for assistance with direct or related impacts, including the federal Lead Pipe Replacement Program.
    6. Develop a comprehensive GIS strategy.
    7. Coordinate response and recovery activities with MIVOAD and identify potential mission areas.

8. Establish and coordinate routine communication between SMEs and coordinate technical assistance among state agencies and to local agencies.
9. Provide technical assistance to the local Damage Assessment process.
10. Establish a Joint Information Center (JIC) and develop a public information strategy.
11. Monitor MI CIMS for resource requests and address as appropriate.
12. Establish and disseminate cost center information for the incident.

- Additional tasks include:
  - Determine what federal agencies are already involved and their status
  - Identify potential water supplies
  - Determine where affected homes are located, where filters/pitchers (and replacements) were installed/provided, and determine who needs filters, etc.
  - Determine how filter distribution is handled, and if it can be handled more efficiently and effectively
  - Determine what mechanisms are in place for nutrition supplementation

EMHSD GIS Accomplishments:

- Hosted a conference call to begin coordination with Flint City and Genesee County GIS departments and the SEOC
- Established a daily call with county and city GIS personnel to synchronize GIS efforts in support of the Flint water crisis at 8:30 A.M.
- Began consolidating local data from local GIS practitioners into a consolidated database, to include:
  - Water Pipeline Locations
  - Filter Distribution Locations
  - November 25, 2015 Water Monitoring Results (Partial, some data remains to be digitized)
  - Affected School Locations
  - Predictive analysis of blood lead levels for affected area
  - Updated Parcels
  - Demographics
  - Block Groups
- Produced a map for the filter distribution locations
- Began contacting specialists who developed historic maps depicting the Flint Water Crisis to obtain the data

Subject: Update - Genesee County Declaration

Below are some key points for your situational awareness (FYSA) that have taken place or will take place within the next 15 hours.

- I was on the phone with Sean Kammer, Assistant to the Flint City Administrator, when the declaration hit the news so I advised him immediately. He was going to let the City Administrator know.
- I contacted MSP Lt. Roach, 3rd District Coordinator, who was at the Genesee County EOC and advised her to let the County EM know the declaration status.
- State Emergency Management Coordinators (SEMCs) were notified via our notification system with additional information in an email.
    - This included information on the SEOC activation and a 0900 briefing for SEMCs.
    - Some subject matter experts will provide us an update to establish a common operating picture.
- We have been in contact with FEMA Region V watch desk ... they will be on the call tomorrow and continue to monitor the situation.
- I have been in contact with the FEMA Region V Administrator to keep him updated.
- Operational period for the SEOC will be M-F, 0800 to 1700 at this time.
- Situation Reports (SitReps) will be provided in the evenings.
- An Incident Action Plan will be developed tomorrow.

Call me with any concerns or questions.

Subject: RE: State Department of Education response to Flint water crisis

Martin,
Is the state Department of Education developing a response to the Flint water crisis and its potential fallout? Numerous studies detail the significant negative consequences of lead toxicity on learning and educational attainment.
I have a number of related questions:

- Is the state preparing for the possibility of increased special education enrollment in the Flint Community Schools, and charter schools in the city, for developmentally delayed students and the costs that would come along with that?
- Will the state provide support to the Flint Community Schools, and charter in the city, as they work to identify children suffering from developmental disabilities due to high levels of lead in their blood? If so, will the support come in the form of professional development or grant funding?
- Does the department know of other districts, past or present, in the state that face similar challenges with a potentially high number of children with levels of lead in their blood entering or already enrolled in the school system?
- Will the state provide extra funding to the Flint Community Schools for water purification systems, or offer some other type of assistance to help allay fears that parents and students may have?

Ron,

Thanks for the heads up about the move to collocate at the Joint Information Center in Flint. I'm copying Jennie Pollak, director of the Central Michigan 2-1-1 program so she can let you know if they need any additional information about accessing bottled water and filters.

One resource to help you track 2-1-1 referrals for water assistance is our 211Counts web site at http://mi211.211counts.org/. You can use the drop boxes to see the data by zip code, county and legislative district during a customizable date range.

Let us know if there is anything 2-1-1 can do to support you efforts in Flint.

Happy New Year!

Still in meeting with mayor and administrator now, they just mentions that they are still asking for bottled water - and just got in donations of money for water from Florida and Grand Rapids...
So bottled water is still a need.

We're working with Flint to expand the location where people can get water. There are eight now, but there will be more soon.

Lots of dedicated state and local folks are working together to improve #flintwater. Michigan.gov/flintwater

We're getting water filters to Flint residents so they won't need bottled water. Info: http://michigan.gov/documents/deq/deq-Flint-Water-free-water-filters_506372_7.pdf

Subject: Re: Tweets we're about to put out

Still in meeting with mayor and administrator now, they just mentions that they are still asking for bottled water - and just got in donations of money for water from Florida and Grand Rapids...
So bottled water is still a need.

Subject: Tweets we're about to put out

We're working with Flint to expand the location where people can get water. There are eight now, but there will be more soon.

Lots of dedicated state and local folks are working together to improve #flintwater. Michigan.gov/flintwater

We're getting water filters to Flint residents so they won't need bottled water. Info:
http://michigan.gov/documents/deq/deq-Flint-Water-free-water-filters_506372_7.pdf

1) We need to get a graphic on our website like the one we have for water filters, that screams: Here are locations for bottled water. Looping John Estill in. John, as soon as we confirm the eight bottled water locations, we will get them to you, plus a graphic.
2) click on the image for the water filter information. Up pops up a sheet that says NOTHING except the four locations. It's kind of confusing. Let's have an informational paragraph atop that that says something like:

"Here are the locations where you can get water filters. We hope to have more soon, and we hope to start distributing them house to house as soon as possible."

Ron – please let me know ASAP when those changes are made. I want to get them out on social media asap. This is a battle, isn't it?!?

Subject: SEOC Update 1/7/16 - Flint Water - Limited Distribution

INTERNAL USE ONLY – LIMIT DISTRIBUTION TO GOVERNOR'S OFFICE

UPDATE 1/7/16

A summary of some of today's SEOC activities is provided below. Attached is the following:

- Today's SitRep which contains more information than below.
- The resource request/task assignment sheet for your situational awareness. This is how locals request resources as well as how we track resources and any assignments and/or tasks that are to be completed.
- JIC Task Tracking – for your situational awareness on how we are tracking requests and assignments. Once someone is assigned a task or resource request it allows them to document what work has been or will be done as shown at the bottom of the document.

Items to note:

- I received a document this evening from Genesee County which appears to be damage assessment information. Analysis of this will occur tomorrow. It appears to be infrastructure and costs to fix it and no other impacts.
- I spoke with Jamie Curtis, Genesee County Commissioner, this evening. A very good relationship is in place with him, especially with our District Coordinator (DC). I also have our DC working on developing stronger relationships with the Mayor/Mayor's office.
- GIS staff continue to obtain data and work with County and City personnel to get a picture of where resources have been provided, need to be provided, as well as infrastructure locations (pipes) that could be affected.
- Personnel and agencies have been tasked with developing a plan to get people in the community to deliver information, hand out filters, etc. This would target those areas we are showing minimal or no filter distribution based on the data we are collecting. The plan is to get them in the field by Tuesday and the plan will be provided to me tomorrow.
- Filters can be obtained at the following locations:
  - Michigan Department of Health and Human Services office, 125 E. Union St., Flint, MI 48502
  - Michigan Department of Health and Human Services office, 4809 Clio Road, Flint, MI 48504
  - Genesee County Community Action Resource Department office, 2727 Lippincott, Flint, MI 48507
  - Genesee County Community Action Resource Department office, 601 N. Saginaw, Flint, MI 48502
- Conducted briefing with local EOC and county executive.
- Conducted briefing with state agencies (daily updates).

- Began work to schedule legislative/congressional conference calls. Tentatively scheduled for 2 p.m. Friday.
- JIC continued to develop messaging.
- Provided input to local EOC regarding best methods of identifying health and non-structural impacts for damage assessment process.
- Deployed two EMHSD/SEOC liaisons to assist the local EOC.
- Published the Incident Action Plan and continued assignment of objectives/tasks.
- FEMA Liaison Officers just arrived in Lansing to assist command and general staff.
- I spoke with Harvey a few times and he should have talking points later tonight or tomorrow a.m. for his use and also for others who may speak to media outside of state government who may benefit from our messaging.
- We held a media round table at 1 P.M. at the SEOC. Dr. Wells and I spoke and answered questions to numerous media outlets.
- Local agencies and NGOs continue to provide water and filters to citizens.
- The website, www.michigan.gov/flintwater, was update with information and links to assistance to include 211. Additional recommendations were provided to include information on the testing water in homes.

EMHSD GIS:

Accomplished Today:

- Reproduced Socio-Economic Status Map
- Reproduced Predicted Affected Populations Map
- Cleansed old data and reports for water filter distributions
- Created draft map of water filter distributions (Refinement needed before releasing final product)
- Scheduled on-site visit with Flint GIS Department and Genesee County GIS Department
- Formatted databases to host content
- Researched service line database creation and scheduled meeting with U of M Flint to discuss timelines and resource needs
- Generated water infrastructure map (does not include building service lines)

Tasks for Tomorrow:

- Meet with Flint City GIS
- Meet with Genesee County GIS
- Meet with U of M Flint GIS
- Finalize water filter distributions map
- Finalize plan for data distribution methods

Chris

UPDATE 1/6/16

A summary of today's SEOC activities is provided below. I tried to distill this as best I could but there has been a lot of activity and discussion to get an accurate assessment of the situation. Attached is the final draft of objectives and tactics for the operational period and agency situation report (SitRep) which has more SEOC agency information. I have implemented weekly operational periods.

Advise if you want anyone else copied or off this distribution.

Daily Update

- Set goals for SEOC and identified response/recovery emphasis
- Requested FEMA liaison officers (LNO) from FEMA Region V. Two LNOs will be on site by ~3 p.m. 1/7/16. Both are known contacts to me and some staff and one has worked extensively with me during the SE MI flooding in a

command and control position. These personnel have been specifically tasked with this mission. **THEY ARE NOT HERE TO ASSIST WITH A PRESIDENTIAL DECLARATION REQUEST BUT TO ASSIST ME.**

- PIOs from multiple agencies were here and established the Joint Information Center (JIC). News released pushed out on this. I am very happy with the PIO work and movement toward coordinated messaging.
- Held briefing for State Agency Emergency Management Coordinators, which included presentations from DEQ and DHHS subject matter experts to ensure situational awareness and to develop a common operating picture.
    - I opened the briefing by identifying our initial goals, items to think about while subject matter experts were briefing us, and how we are to move forward, find quick wins, and regain trust.
    - **MDHHS – Elevated Blood Lead Levels**
        - Dr. Elizabeth Wells gave an in depth summary of lead poisoning and what has occurred in terms of health monitoring throughout the Flint crisis.
    - **MDEQ – Water Testing Protocols**
        - Mr. George Krisztian of MDEQ gave an in depth summary of the testing protocols and summary results that as they have developed throughout the emerging crisis.
- Developed Incident objectives, strategy and tactics (see attached)
- Identified SEOC and state agency staff positions
- Assigned work tasks for SEOC operation period from 0800 January 6, 2016 to 1700 January 8, 2016
- Reviewed planned actions, prepared final draft Incident Action Plan
- **Made contact with the Genesee County Emergency Manager first thing in the morning and held a conference call mid-day to discuss roles. Daily 0830 command conference calls with local EOC command staff starts tomorrow. Tomorrows call will include the County Commissioner and the City Administrator (both invited). Topics include the incident action plan objectives and establishing better local coordination, command and control to facilitate integration with the SEOC. The local EOC is not functioning as it needs to with personnel and local coordination and we are working on that issue.**
- I will be in Flint tomorrow for a 2 p.m. media round table with local officials that was set up by the JIC.
- The attached initial objectives will be updated at least every operational period and as needed. I listed the objectives below but the tactics to accomplish them is in the attached if you want further information.
    1. Activate the State Recovery Task Force (SRTF).
    2. Establish and maintain coordination between the City of Flint, Genesee County, state and federal agencies, and appropriate medical experts.
    3. Obtain and maintain situational awareness and common operating picture of all activities.
    4. Establish SEOC operational period and hours of operations.
    5. Investigate and identify all available programs for assistance with direct or related impacts, including the federal Lead Pipe Replacement Program.
    6. Develop a comprehensive GIS strategy.
    7. Coordinate response and recovery activities with MIVOAD and identify potential mission areas.
    8. Establish and coordinate routine communication between SMEs and coordinate technical assistance among state agencies and to local agencies.
    9. Provide technical assistance to the local Damage Assessment process.
    10. Establish a Joint Information Center (JIC) and develop a public information strategy.
    11. Monitor MI CIMS for resource requests and address as appropriate.
    12. Establish and disseminate cost center information for the incident.
- Additional tasks include:
    - Determine what federal agencies are already involved and their status
    - Identify potential water supplies
    - Determine where affected homes are located, where filters/pitchers (and replacements) were installed/provided, and determine who needs filters, etc.
    - Determine how filter distribution is handled, and if it can be handled more efficiently and effectively
    - Determine what mechanisms are in place for nutrition supplementation

EMHSD GIS Accomplishments:

- Hosted a conference call to begin coordination with Flint City and Genesee County GIS departments and the SEOC
- Established a daily call with county and city GIS personnel to synchronize GIS efforts in support of the Flint water crisis at 8:30 A.M.
- Began consolidating local data from local GIS practitioners into a consolidated database, to include:
    - Water Pipeline Locations
    - Filter Distribution Locations
    - November 25, 2015 Water Monitoring Results (Partial, some data remains to be digitized)
    - Affected School Locations
    - Predictive analysis of blood lead levels for affected area
    - Updated Parcels
    - Demographics
    - Block Groups
- Produced a map for the filter distribution locations
- Began contacting specialists who developed historic maps depicting the Flint Water Crisis to obtain the data

Subject: Update - Genesee County Declaration

Below are some key points for your situational awareness (FYSA) that have taken place or will take place within the next 15 hours.

- I was on the phone with Sean Kammer, Assistant to the Flint City Administrator, when the declaration hit the news so I advised him immediately. He was going to let the City Administrator know.
- I contacted MSP Lt. Roach, 3rd District Coordinator, who was at the Genesee County EOC and advised her to let the County EM know the declaration status.
- State Emergency Management Coordinators (SEMCs) were notified via our notification system with additional information in an email.
    - This included information on the SEOC activation and a 0900 briefing for SEMCs.
    - Some subject matter experts will provide us an update to establish a common operating picture.
- We have been in contact with FEMA Region V watch desk ... they will be on the call tomorrow and continue to monitor the situation.
- I have been in contact with the FEMA Region V Administrator to keep him updated.
- Operational period for the SEOC will be M-F, 0800 to 1700 at this time.
- Situation Reports (SitReps) will be provided in the evenings.
- An Incident Action Plan will be developed tomorrow.

Call me with any concerns or questions.

Hi Ron,

I echo Tom's appreciation for the communication! We are aware of the water filter and replacement cartridge distribution centers and I'm fairly certain we're updated on bottled water giveaways, though the bottled water giveaways seem to happen more irregularly. Please keep us posted of resources that may be activated since the emergency declaration was issued.

Let me know what we can do to help!

Subject: RE: JIC Operational

Ron,

Thanks for the heads up about the move to collocate at the Joint Information Center in Flint. I'm copying Jennie Pollak, director of the Central Michigan 2-1-1 program so she can let you know if they need any additional information about accessing bottled water and filters.

One resource to help you track 2-1-1 referrals for water assistance is our 211Counts web site at http://mi211.211counts.org/. You can use the drop boxes to see the data by zip code, county and legislative district during a customizable date range.

Let us know if there is anything 2-1-1 can do to support you efforts in Flint.

Happy New Year!

Tom Page | Executive Director
Michigan 2-1-1 |330 Marshall Street, Suite 211, Lansing, MI 48912

Conference call with State legislators tomorrow afternoon is Good to Go, Sen. Jim Ananich, Rep. Sheldon Neeley, Rep. Phil Phelps looks like 2P is best (still waiting on confirmation on the time).

Still working on U.S. Senate & Congressional side to come together..... more to come, I will attempt to set the Federal call up prior to the State call.

I'll most likely be working on this tonight, most times congressional staff doesn't call me back till evening, if anything changes doesn't hesitate to call

Our Director of the Office of School Support Services, Marla Moss, would like to send the following two communications out to the field. Her office is responsible for ALL the USDA child nutrition programs.

Would you please review them and give approval for their dissemination.
Our hope is to send them out today and request a response by COB tomorrow, January 8.

Thanks. -marty

For JIC approval to send to Schools, PSA, and non-public schools participating in School Nutrition Programs.
The Michigan Department of Education School Nutrition Programs (SNP) has questions for you in regards to the water supply in your area. As you know, Governor Snyder declared an Emergency Declaration due to the water situation in the City of Flint. We are asking for responses to the following questions:

Do you get your water from the City of Flint? If yes, please answer these questions:

* Did you have your water tested?
* If yes, what were the results?
* Are your students drinking any water from the City of Flint?
* Are you using any water from the City of Flint for food preparation?
* Are you serving "potable" water during meal times in the serving area, as required by the Healthy Hunger Free Kids Act of 2010? If so, what is the source of the potable water?

Please send your response to these questions by COB on January 8, 2016.

For your reference, I have included a link with information provided and approved by state:
http://www.michigan.gov/documents/deq/deq-flint-water-handout-pdf_503630_7.pdf?20160107094821

For JIC approval – to be sent to CACFP centers participating with MDE.
The Michigan Department of Education Child and Adult Care Food Program (CACFP) has questions for you in regards to the water supply in your area. State of Michigan Joint Information Center Now Operational

FOR IMMEDIATE RELEASE
January 6, 2016; 4:50 p.m.
Release #: 01
For more information contact: Joint Information Center: 888-EMD-TODAY (888-363-8632)

LANSING, Mich. – Today the State of Michigan launched its Joint Information Center (JIC) to coordinate public information from the State Emergency Operations Center, set up to help with health and safety issues caused by lead in the city of Flint's drinking water. The emergency operations center was activated after Gov. Rick Snyder declared a state of emergency for Genesee County on Jan. 5.

Public information and updates, including resources for residents such as how to obtain free water filters and lead testing, are available at www.michigan.gov/FlintWater.

The JIC will serve as the state's central communications hub for this emergency and is staffed by public information officers (PIO) from several state agencies. Hours of operation will be 9 a.m. – 5 p.m., Monday – Friday, until further notice.

It is operating out of the Michigan State Police Emergency Management and Homeland Security Division in Lansing. State officials have been in contact with Flint and Genesee County officials to move the JIC to the city of Flint to better partner and coordinate with local agencies.

The declaration makes available all state resources in cooperation with local response and recovery operations.

Genesee County declared a "local state of emergency" on Jan. 4, activating local emergency response and recovery plans. By requesting a governor's declaration, the county has determined local resources are insufficient to address the situation and state assistance is required to protect public health, safety and property to lessen or avert the threat of a crisis.

The city of Flint has been under a local emergency declaration since Dec. 14, 2015.

###

NOTE: ALL MEDIA INQUIRIES ARE BEING HANDLED BY THE JOINT INFORMATION CENTER AT 888-EMD-TODAY (888-363-8632).

State of Michigan Joint Information Center Now Operational

FOR IMMEDIATE RELEASE
January 6, 2016; 4:50 p.m.
Release #: 01
For more information contact: Joint Information Center: 888-EMD-TODAY (888-363-8632)

LANSING, Mich. – Today the State of Michigan launched its Joint Information Center (JIC) to coordinate public information from the State Emergency Operations Center, set up to help with health and safety issues caused by lead in the city of Flint's drinking water. The emergency operations center was activated after Gov. Rick Snyder declared a state of emergency for Genesee County on Jan. 5.

Public information and updates, including resources for residents such as how to obtain free water filters and lead testing, are available at www.michigan.gov/FlintWater.

The JIC will serve as the state's central communications hub for this emergency and is staffed by public information officers (PIO) from several state agencies. Hours of operation will be 9 a.m. – 5 p.m., Monday – Friday, until further notice.

It is operating out of the Michigan State Police Emergency Management and Homeland Security Division in Lansing. State officials have been in contact with Flint and Genesee County officials to move the JIC to the city of Flint to better partner and coordinate with local agencies.

The declaration makes available all state resources in cooperation with local response and recovery operations.

Genesee County declared a "local state of emergency" on Jan. 4, activating local emergency response and recovery plans. By requesting a governor's declaration, the county has determined local resources are insufficient to address the situation and state assistance is required to protect public health, safety and property to lessen or avert the threat of a crisis.

The city of Flint has been under a local emergency declaration since Dec. 14, 2015.

All,

This email has been sent to the individuals identified to receive information from the Flint/Genesee Joint Information Center (JIC) in regard to the recently declared emergency. This entity will soon merge into the State's JIC as the State's EOC activates as a result of the Governor's declaration. In the meantime, I have identified the recipients as those who stand to benefit or contribute valuable information to the community as we move forward. I have attached a CSV file of the email addresses of the JIC and have attached a recent press release for your information.

Our first joint task is to form a public information campaign to raise awareness about water filters, as well as dispell many of the rumors about their need, use, and availability. Please feel free to contribute to the conversation.

Thank you,

Sean Kammer

Gov. Snyder declares emergency for Genesee County

State Emergency Operations Center activated to assist with relief efforts

LANSING, Mich. – Gov. Rick Snyder today declared a state of emergency for Genesee County due to the ongoing health and safety issues caused by lead in the city of Flint's drinking water.

By declaring a state of emergency, Snyder has made available all state resources in cooperation with local response and recovery operations. The declaration authorizes the Michigan State Police, Emergency Management and Homeland Security Division (MSP/EMHSD) to coordinate state efforts.

"The health and welfare of Flint residents is a top priority and we're committed to a coordinated approach with resources from state agencies to address all aspects of this situation," Snyder said. "Working in full partnership with the Flint Water Advisory Task Force, all levels of government and water quality experts, we will find both short-term and long-term solutions to ensure the health and safety of Flint residents."

In addition to the emergency declaration, Snyder activated the State Emergency Operations Center to coordinate state response and recovery activities. State agencies will report to the center to coordinate resources, assess the situation and begin providing assets to assist with local relief operations.

"Our staff recognizes the urgency of this situation and is already working closely with local officials," said Capt. Chris A. Kelenske, Deputy State Director of Emergency Management and Homeland Security and commander of the MSP/EMHSD. "We will continue to collaborate with state, city and county leaders to coordinate relief efforts, streamline communication and use all available resources to help residents."

On Jan. 4, Genesee County declared a "local state of emergency," which activated local emergency response and recovery plans. By requesting a governor's declaration, the county has determined local resources are insufficient to address the situation and state assistance is required to protect public health, safety and property to lessen or avert the threat of a crisis.

The city of Flint has been under a local emergency declaration since Dec. 14, 2015.

The SEOC is the emergency operations center for the state of Michigan. Located in Lansing, the center is overseen by the MSP/EMHSD and coordinates response and recovery efforts by state agencies and local government. The SEOC is staffed by members of state agencies and other partners for decision making and information coordination during disasters or emergencies in the state of Michigan.

Subject: RE: Genesee County Health Department- EOC 1/5/16

This is an informational update and the Genesee County Health Department will provide these updates on a daily basis after 4 pm. We are asking all partners included in this email to provide any pertinent updates **DAILY** to Hilda McShane by 2:00pm. If you have nothing new to share, please inform Hilda that you have no updates at this time.

- Based on a recent abc12 news segment regarding Flint residents not using, or not knowing where to pick up a water filters prompted the idea of hosting a joint agency press conference. The press conference would cover the following information: where and when water filters can be picked up, dispel misinformation regarding the Detroit water, water filter usage, and nutrition information.

- Attached is a draft list of talking points for water donations developed by the United Way of Genesee County for review.

- If you would like to assist with the development of consistent messaging regarding the water situation, please contact Sean Kammer at 810.391.7771, or email Kristin Moore at kmoore@cityof flint.com.

- There are still plenty of 8 cup water pitchers for distribution. Please contact: **Anthony M. Sitko** – Director of Shared Services, Flint Community Schools, (810) 767-6030 or tsitko@flintschools.org or Matt Purcell at GCARD, MPurcell@co.genesee.mi.us.

- With regards to water filter distribution, it was suggested by Genesee County Health Department Community Health Director, Tamara Brickey that we as agencies need to go where residents congregate: churches, clubs, senior cents, etc. to distribute water filters.

*Please note that MDHHS did not buy the current PUR filters being distributed. Once these are exhausted if needed DHHS will purchase PUR replacements.

FOR IMMEDIATE RELEASE

GENESEE COUNTY COMMISSIONERS DECLARE EMERGENCY

Flint, MI -- January 4, 2016 – During their first board meeting of the year, Monday morning, Genesee County Commissioners declared a state of emergency in Genesee County. The move a sign that county leaders support Flint Mayor Dr. Karen Weaver and her efforts to get resources and relief to the residents suffering from the ongoing water situation in the city.

Mayor Weaver declared a state of emergency in Flint last month to raise awareness about the severity of the problems surrounding the water situation that continues to effect residents. The problems a result of the man-made disaster caused by the city switching to the Flint River as a water source in 2014.

Following the board's vote today, Genesee County Commission Chairperson, Jaime Curtis said, "This is a state, man-made disaster and we're going to ask the state to fix their disaster. Curtis also said, "Genesee County is the fifth largest county in Michigan and we will not be ignored."

Mayor Weaver hopes the county's show of support will convince the Governor to provide the City of Flint with financial support to help leaders address immediate infrastructure needs. Those needs include more than $45 million to replace every identified lead pipe in the city, reimbursement of the $2 million spent to switch back to the Detroit Water Sewerage Department, $6 million to help with the transfer to the Karegnondi pipeline and additional resources to support the city's Heath Initiative to assist affected adults and children in Flint who have consumed water contaminated with lead.

In an interview with media after the board's emergency declaration Mayor Weaver said, "It's a victory and a step in the right direction." The mayor plans to meet with Governor Snyder in Lansing Thursday of this week to discuss the state's response and next steps.

- The Food Bank of Eastern Michigan is supplying pantries, missions, soup kitchens and shelters with all the water they need for public distribution.

- If your agency would like an updated list of water distribution sites, please contact Dan at 396-0222 or dfilipovich@feedingamerica.org.

- Agencies can also direct everyone to fbem.org. Use the drop down tab that says FIND HELP. At this point your clients will be asked their zip code and then they will be directed to the nearest pantry that is an agency of the Food Bank.

- Today, Michigan Department of Health and Human Services (MDHHS) received approval from Department of Environmental Quality (DEQ) to allow the use and public display of the Bath Time Poster that was developed to address individuals' concerns about using the water to bathe their children (see attached). The Genesee County Health Department encourages all agencies to display the bath time poster.

- Hurley Children's Hospital with MSU extension will offer their first lead focused cooking class at the Farmers' Market this Saturday. Lead focused nutrition recipes and resource book will be distributed at the cooking class . Press release promoting the cooking class will go out tomorrow.

- Mott Children's Health Center continues to work with City of Flint to pick up PUR filters.

From Jamie Gaskin
Over the past 48 hours some additional support has started to surface given the National and regional media coverage. These are all developing streams of possible support and generally reflect organizations and business that got connected several months ago during our initial response. These are developing but I wanted to loop in all of you as this develops and also share some basic information:

1. MSP has again surfaced another source of bulk water that is Federal surplus. This water is free as long as we pay for shipping. I have looped in Bill Kerr at the foodbank as his team is really managing the logistics and understands the local demand and the ability of the local distribution system to handle storage etc.. These shipments come at the cost of shipping. This is about ½ the cost of buying the water and shipping ranges from between $1000-$2,000 per semi.

2. PUR – They have reached out to me again (Previously donated 2,000 faucet mount systems). I have directed them to consider donation of additional replacement filters and a financial donation. The financial donation would support shipping costs of more bottled water as well as possible prevention work.

3. ZeroWater – I am again working through some ideas with their CEO. He is very interested in the schools. I am not sure how this will develop.

*As we have shared in the past the distribution system currently has supplies of filter mount systems (PUR & Britta), replacement filters (PUR & Britta), and 8 cup pitchers (ZeroWater). If we get to levels below 500 available units for any system it is my understanding that this will serve as a trigger for us to resource more.

I also want to share that I have about $15,000 left of the more than $275k donated. As I get closer to expending all the funds the UW will continue to evaluate our own internal investment and make some adjustments. Please direct any possible financial investors to support the water fund either by calling me directly or making even small donations on our website. I will also be working with Isaiah Oliver at the Community Foundation around the MI Health Endowment Funds. Both the United Way and the Community Foundation are committed to working together and trying to maintain maximum flexibility as the situation develops.

I will follow-up though the normal Health Department updates moving forward but I just felt it necessary to try to bring everyone up to speed on developing work. If you have any questions for me please let me know. I will be available all through the Holiday period via cell phone and I will only be out of town from Christmas eve through the following Saturday. Please do not hesitate to call me for any reason.

- City of Flint picked up Two Hundred (200) ZeroWater 8-Cup Filter Pitchers from Flint Community Schools 12/14/15 for distribution.

- The Genesee County Health Department has a total of 1,650 Pur water filters for distribution.

- Mott Children's Center will give City of Flint 117 water filters from the first batch of filters distributed at U of M Flint.

- Department of Health and Human Services and GCCARD attended the Health Fair on Saturday, December 12 and distributed the following at Bethel United Methodist Church's health fair.
  - 12 Filters
  - 17 Replacement Cartridges
  - 2 PUR replacements
  - 1 Pitcher

- Between December 11 and December 14, 2015, Genesee County Community Action Resource Department and Department Health Human Services distributed the following:
  - 78 filters
  - 6 pitchers
  - 53 replacement filters

- Sheryl Thompson from Michigan Department Health Human Services will order replacement filters when the inventory level reaches 500. After replacement cartridge order is placed, it takes a few days for delivery.
  - The Zero Water Pitcher replacement filters have been delivered. All sites will begin giving out a pitcher replacement filter with every Zero Water pitcher given out.

Summary October through December 14, 2015

	Received	Distributed	Remaining
Water Filters	15,000	11,232	**3,768**
Water Pitchers	720	229	**491**
Replacement Cartridges	9,000	1,258	**7,742**

- Mott Children's Health Center distributed 117 PUR filters (that you attach to the faucet, [part of the batch that the United Way purchased and was distributed at U of M Flint).

- Mott Children's Health Center's leadership has put together a lead information packet. The intent of the packet is to distribute to patients. The packet includes information on appropriate filters and resources and how to obtain them. Genesee County Health Department will update Mott Children's Health Center as necessary with new distribution locations.

- As noted by Mott Children's Health Center, most parents of newborns continue to use bottled water to mix with formula.

- Genesee County Health Department continues to distributed water filters at its lead screening clinic in Burton.

- *After a complete inventory is taken at all water filter distribution sites of remaining water filter cartridges,* The State of Michigan has agreed to purchase additional PUR replacement filters.

- As of December 4, Michigan Department of Health and Human Services has distributed the following:

Water Filters	11,046
Water Pitchers	184
Replacement Cartridges	1,073

This is an informational update and the Genesee County Health Department will provide these updates on a daily basis after 4 pm. We are asking all partners included in this email to provide any pertinent updates **DAILY** to Hilda McShane by 2:00pm. If you have nothing new to share, please inform Hilda that you have no updates at this time.

- Michigan Department of Health and Human Services and Genesee County Community Action Resource Department have distributed the following in November: water filters 778, Zero Water Pitchers 63, and replacement filters 924. Total filter distribution as of October 1 is 10,951.

- The MDEQ and the City are coordinating the distribution and analysis of containers (bottles) for water testing. Bottles are available at City Hall and the water plant. Genesee County Health Department does not have bottles for distribution. Customers' name, phone, and address are required to be documented on a form when the water sample is submitted for analysis, not when the bottle is picked up. Analysis is conducted in Lansing at the MDEQ lab.

We are asking all partners included in this email to provide any pertinent updates **DAILY** to Hilda McShane by 2:00pm. If you have nothing new to share, please inform Hilda that you have no updates at this time.

- Genesee County Health Department (GCHD) will distribute an additional 100 water filters to the City of Flint for distribution at City of Hall.
- Besides all the water filter distribution occurring at the blood lead screening clinics and offsite exhibits by Genesee County Health Department's staff, the Health Department continues to distribute water filters at its Burton WIC clinic and continues to educate parents on lead in water issues. Distribution at the WIC clinic has been swift and additional inventory, another 100 water filters, will be added to the WIC distribution inventory.
- Genesee County Health Department will distribute a press release that supports Professor Marc Edwards, of Virginia Tech University's announcement that Flint residents do indeed need to continue to use water filters.
- After a through inventory of water filters, Michigan Department of Health and Human Services (MDHHS) will purchase more Pur replacement filters. As suggested by MDHHS staff, GCHD will inventory its supply of replacement filters and give inventory outcome to MDHHS.
- Genesee County Health Department will host blood lead screening clinics at Grace Emmanuel and Bethel United Methodist churches.

Genesee County Health Department is working with the CDC to develop phosphate educational materials.

United Way (UW) CEO, Jamie Gaskin and Genesee County Health Department Health Officer, Mark Valacak have been discussing the strategic use of Americore volunteers during this water crisis. Suggested volunteer work includes: distribution of filters, lead education, and assist at health fairs and at church exhibits. Volunteers may be available in February of 2016.

UW Jamie Gaskin reported that UW will giveaway 110 Thanksgiving baskets. The baskets will contain a water filter system.

For those who need 8oz - Zero cup water filters, please contact Tony Sitko at Flint Community Schools. His email address is:tsitko@flintschools.org.

Genesee County Health Department will give City of Flint 50 PUR water filters for distribution at City Hall.

Water filter distribution is well over 13,596.

BJ Roach from the State Police had nothing to report at this time.

Subject: State Emergency Operations Center Meeting Tomorrow
Importance: High

Fellow PIOs,

Gov. Rick Snyder today declared a state of emergency due to the ongoing health and safety issues caused by lead in the city of Flint's drinking water. The State Emergency Operations Center (SEOC) has also been activated to coordinate response and recovery efforts.

There will be a briefing about the this incident at the SEOC at 9 a.m. Wednesday, Jan. 6. I am asking a PIO from each key agency to attend the briefing.

Key agencies include:

- Department of Health and Human Services
- Department of Environmental Quality
- Michigan State Police
- Governor's Office

In addition, we will be also developing a public information strategy for coordinating messaging during this incident.

The SEOC is located at 4000 Collins Road in Lansing. Please enter through the north gate. When you get to the gate, please buzz in and tell the guard your name and that you're there for the briefing.

The SEOC opens at 8 a.m., so if you want to come earlier, you're more than welcome.

Please let me know if you have any questions.

Thanks,

Ron

Fellow PIOs,

Gov. Rick Snyder today declared a state of emergency due to the ongoing health and safety issues caused by lead in the city of Flint's drinking water. The State Emergency Operations Center (SEOC) has also been activated to coordinate response and recovery efforts.

There will be a briefing about the this incident at the SEOC at 9 a.m. Wednesday, Jan. 6. I am asking a PIO from each key agency to attend the briefing.

Key agencies include:

- Department of Health and Human Services
- Department of Environmental Quality
- Michigan State Police
- Governor's Office

In addition, we will be also developing a public information strategy for coordinating messaging during this incident.

The SEOC is located at 4000 Collins Road in Lansing. Please enter through the north gate. When you get to the gate, please buzz in and tell the guard your name and that you're there for the briefing.

The SEOC opens at 8 a.m., so if you want to come earlier, you're more than welcome.

Please let me know if you have any questions.

Thanks,

Ron

Gov. Snyder declares emergency for Genesee County

State Emergency Operations Center activated to assist with relief efforts

LANSING, Mich. – Gov. Rick Snyder today declared a state of emergency for Genesee County due to the ongoing health and safety issues caused by lead in the city of Flint's drinking water.

By declaring a state of emergency, Snyder has made available all state resources in cooperation with local response and recovery operations. The declaration authorizes the Michigan State Police, Emergency Management and Homeland Security Division (MSP/EMHSD) to coordinate state efforts.

"The health and welfare of Flint residents is a top priority and we're committed to a coordinated approach with resources from state agencies to address all aspects of this situation," Snyder said. "Working in full partnership with the Flint Water Advisory Task Force, all levels of government and water quality experts, we will find both short-term and long-term solutions to ensure the health and safety of Flint residents."

In addition to the emergency declaration, Snyder activated the State Emergency Operations Center to coordinate state response and recovery activities. State agencies will report to the center to coordinate resources, assess the situation and begin providing assets to assist with local relief operations.

"Our staff recognizes the urgency of this situation and is already working closely with local officials," said Capt. Chris A. Kelenske, Deputy State Director of Emergency Management and Homeland Security and commander of the MSP/EMHSD. "We will continue to collaborate with state, city and county leaders to coordinate relief efforts, streamline communication and use all available resources to help residents."

On Jan. 4, Genesee County declared a "local state of emergency," which activated local emergency response and recovery plans. By requesting a governor's declaration, the county has determined local resources are insufficient to address the situation and state assistance is required to protect public health, safety and property to lessen or avert the threat of a crisis.

The city of Flint has been under a local emergency declaration since Dec. 14, 2015.

The SEOC is the emergency operations center for the state of Michigan. Located in Lansing, the center is overseen by the MSP/EMHSD and coordinates response and recovery efforts by state agencies and local government. The SEOC is staffed by members of state agencies and other partners for decision making and information coordination during disasters or emergencies in the state of Michigan.

Dave and Meegan,

We have crafted the following news release for the Governor declaring a "state of emergency." Please see the attached.

A few things:

- When the proclamation is finalized, please double-check to ensure it syncs with the news release.
- The news release does not address a presidential disaster declaration. We anticipate there will be questions about whether the Governor will request one.
- Before this is issued, it may be worthwhile to make the appropriate legislative and local notifications.

Please let me know if you need anything else.

Thanks,

Ron

MEDIA MONITORING REPORT

1/5/2016

Issues:

- No issues to report.

Summary:

- Gov. Rick Snyder is considering whether to declare an emergency for Flint's contaminated water a week after apologizing to residents for the state's handling of Flint's water crisis.
- Gov. Rick Snyder is gathering the information needed to formally declare a state of emergency in Flint over the water contamination issue, but in the meantime is "already recognizing this as an emergency," spokesman Dave Murray said Monday.
- Keri Webber, summed up her feelings in as it relates to the city of Flint and its lead contaminated water: "We're terrified."
- A Genesee County judge has clarified a ruling made last month regarding water shutoff notices for Flint residents.
- The Genesee County Health department estimates 40 percent of homes have not yet installed the filters.
- About 1,200 workers are taking advantage of the relatively mild winter to build the final portion of a new pipeline to bring water from Lake Huron to communities including Flint.
- Bryn Mickle, Flint Journal/MLive editor, talks with Rachel Maddow about why his organization is calling for a federal investigation, including subpoena power, of what the Rick Snyder administration knew, and when, about the problems with lead and the new water supply to Flint.
- Nancy Kaffer opines about the state apology and that the resignation over Flint water is the first step.
- The recent scandal over lead-poisoning in the water in Flint prompted many of our communities to take a closer look at the issue. According to recent data, West Michigan neighborhoods are home to even higher levels of lead poisoning in kids than Flint.

- A former emergency management professional suspects levees are causing the Mississippi River to flood.
- With the country seemingly in a heightened state of alert, Michigan State Police are reminding local residents that they can play a critical role with the newly unveiled "If you see something, say something" campaign.

Analysis:

- Heavy coverage about Genesee County's request for a Governor's declaration.
- Concern about Flint residents obtaining the filters they need.
- Will continue to monitor the situation.

FLINT WATER

Snyder weighs declaring water emergency in Flint

The Detroit News, January 4, 2016

Gov. Rick Snyder is considering whether to declare an emergency for Flint's contaminated water a week after apologizing to residents for the state's handling of Flint's water crisis.

But Michigan faces hurdles to getting federal relief, including forgiveness for state loans to Flint involving drinking-water infrastructure improvements that are covered by federal rules.

Even before any official declaration can be made, Snyder's office said Monday that state officials "are recognizing this as an emergency and are working with city and county leaders to coordinate efforts, streamline communication and tap all available resources at the state's control."

Board declares state of emergency in Flint water crisis

Detroit Free Press, January 4, 2016

Gov. Rick Snyder is gathering the information needed to formally declare a state of emergency in Flint over the water contamination issue, but in the meantime is "already recognizing this as an emergency," spokesman Dave Murray said Monday.

Murray made his comment after the Flint Journal reported the Genesee County Board of Commissioners declared a state of emergency Monday in Flint.

The board's action follows an emergency declaration by Flint Mayor Karen Weaver, who said she plans to meet this week with Snyder.

Specifics of the request are being worked out, but plans call for dealing with causes and effects of lead contamination. It's also part of the process for requesting federal assistance.

Emergency declaration for Flint headed to Gov. Snyder's desk

WJRT-TV 12 in Flint, January 4, 2016

An emergency declaration is heading to the Governor's desk.

The Genesee County Board of Commissioners signed off on the order Monday morning to try to secure federal money for Flint's fight on lead.

By declaring a state of emergency, city and county officials hope to secure federal funding to assist with the water emergency. The number they're asking for right now is $45 million from Washington.

Mother concerned, angry over continuing water crisis

WNEM-TV 5, January 4, 2016

Keri Webber, summed up her feelings in as it relates to the city of Flint and its lead contaminated water: "We're terrified."

The mother of two daughters is fearful of what the future might bring.

"My girls are 15 and 20 and very close to their next birthday. We have no idea what this means long term for the reproduction," Webber said.

The emotions this family feels on a daily basis is over flowing

It started when experts discovered high levels of lead in the drinking water flowing from the tap at houses throughout this city. Webber said the added insult is paying for that water.

"Not even offended, I am angry. Our water bill last month was $240 for what?" Webber said.

Webber's youngest daughter is 15. Victoria has had extreme complications due to lead poisoning, while her oldest Stephanie, 20, appears lead free. At least for now.

As a mother she wonders what will happen to them in a few years after having consumed lead-laced water?

"I know. There aren't words. We have fought for these kids," Webber said. "We didn't have these kids easy, it took us five years, protected them at every turn and handed them poison in a glass."

Flint water customers with overdue water bills, will now get more notice before a shutoff

WJRT-TV 12 in Flint, January 4, 2016

A Genesee County judge has clarified a ruling made last month regarding water shutoff notices for Flint residents.

Circuit Judge Archie Hayman is NOT blocking the city from issuing them for customers delinquent in paying bills since September.

That's when lower water and sewer rates were put into place after his ruling that deemed a 35-percent increase, illegal.

It's all tied to a class-action lawsuit against the city - involving Flint residents who believe they were wrongly over-charged.

Attorney Val Washington, who is representing them in the case, says the Judge is instead, requiring customers be given MORE notice - 90 days - before the city takes action with stopping service.

Notices began going out again last month.

Flint water filter use is low

WJRT-TV 12 in Flint, January 4, 2016

There's disturbing information that three months after a campaign began to make free water filters available to fight lead in Flint, many homes still do not have them.

The Genesee County Health department estimates 40 percent of homes have not yet installed the filters.

Dr. Mona Hanna-Attisha is the Hurley Medical Center pediatrician who discovered high lead levels in Flint children. She says too many parents are not making the effort to install the filters that can block lead in drinking water.

Hanna-Attisha says last month, all 54 families checked through a health program related to lead said they didn't have water filters in their homes.

We checked with adults picking up students at a Flint elementary school to see if they had filters in their homes.

"We're planning on it today because we just recently got it. The majority of people I know don't have them hooked up. Maybe they're just lazy," said Sameika Clayton.

"Well, I kind of just got mine because everyone was getting theirs in a certain order, or I couldn't really take off from work to go get it, so I just got mine," said Queda Wright.

"I got one just to keep the water pure even though we still drink bottled water," said Lemeer Bell.

You can pick up free water filters and replacement cartridges at two GCCARD offices in Flint and at the DHS offices in downtown Flint.

Call 211 for information on how you can receive a free water filter

Work continues on new Michigan water pipeline

Detroit Free Press, January 5, 2016

OREGON TOWNSHIP, Mich. — About 1,200 workers are taking advantage of the relatively mild winter to build the final portion of a new pipeline to bring water from Lake Huron to communities including Flint.

The Flint Journal reports the $285 million Karegnondi Water Authority project is on track.

Crews are burying the 66-inch-diameter pipeline on a path that starts with an intake at Lake Huron. Sections under construction include parts of Sanilac and Lapeer counties. A $71 million water treatment plant is being built in Oregon Township.

Flint switched from Detroit's water system in 2014 to Flint River water in a cost-cutting move ahead of the Karegnondi project's completion. Residents complained about the taste, smell and appearance, and children were found to have elevated blood-lead levels. Flint returned to Detroit's system in October.

Kaffer: State apology, resignation over Flint water first step

Detroit Free Press, January 5, 2016

In the quiet week between Christmas and New Year's Day, Michigan Department of Environmental Quality chief Dan Wyant resigned, followed quickly by department spokesman Brad Wurfel.

And Gov. Rick Snyder — finally — apologized for what happened in Flint.

For 18 months, Flint residents were exposed to lead-contaminated drinking water, after the city — while under state oversight and with MDEQ approval — began to draw its drinking water from the Flint River. Since the switch, an increasing percentage of Flint kids have elevated blood-lead levels. Lead poisoning causes irreversible behavioral and developmental difficulties.

So this apology, and these resignations, represent a sea change. But it's not enough.

For months, Snyder and his MDEQ attempted to dodge the reality that state policy wrought in the City of Flint. As reports, based not only on data compiled or gathered by outside researchers and journalists but on the state's own information, began to explain what was happening, Snyder's spokespeople and MDEQ officials worked to deflect, discredit and deny.

State employees who intentionally distort data could face jail time under a proposed law

Michigan Radio, January 5, 2016

A state lawmaker wants to make it a felony for state employees to manipulate data in official reports.

State Representative Phil Phelps, D-Flushing, says there's no law on the books to punish state employees who intentionally distort data to change the outcome of an official report.

Critics claim that's what happened with state reports that downplayed problems with Flint's drinking water after the 2014 switch to the city's namesake river. If that's what happened, Phelps says that should be against the law.

"If that was proven to be manipulation of data or removing data that changed the outcome, it could be subject to a five year felony," says Phelps.

Video: New calls for federal probe of Snyder admin in Flint water fiasco

MSNBC (Rachel Maddow Show), January 4, 2016

Bryn Mickle, Flint Journal/MLive editor, talks with Rachel Maddow about why his organization is calling for a federal investigation, including subpoena power, of what the Rick Snyder administration knew, and when, about the problems with lead and the new water supply to Flint.

Data shows even higher lead poisoning in kids in West Michigan than Flint

Fox 17 in Grand Rapids, January 5, 2016

GRAND RAPIDS, Mich. – The recent scandal over lead-poisoning in the water in Flint prompted many of our communities to take a closer look at the issue. According to recent data, West Michigan neighborhoods are home to even higher levels of lead poisoning in kids than Flint.

The problem in Flint was so bad it forced the head of Michigan's Department of Environmental Quality to quit last week. Yet as this crisis continues, data shows the problem is broader than the Flint area.

In a recent report, The Center for Michigan, a think tank promoting awareness of public policy issues, cited evidence that among five Grand Rapids' zip codes alone, nearly one in 10 kids tested positive for lead poisoning.

"In Grand Rapids, it's collectively between those zip codes, it's 10 percent," said Paul Haan, executive director with the Healthy Homes Coalition of West Michigan. "We're four times the national level of kids with that low to moderate to even high level of lead poison."

EMERGENCY MANAGEMENT AND HOMELAND SECURITY

Weather spotters serve as eyes and ears for meteorologists

Port Huron Times Herald, January 4, 2016

Stan Arnett has been tracking severe weather for at least three decades.

The 70-year-old Marysville man is one of about 50 trained weather spotters in St. Clair County.

Arnett said it was something he started doing through his love of amateur radio.

"A long time ago I was interested in the magic of communicating around the world or even locally on two-way radios," he said.

Now he uses that hobby to talk to people around the world and help meteorologists determine if severe weather warnings need to be issued.

"Any severe weather ... anything that significantly impacts citizenry," is reported, Arnett said. "It's just something I can do."

Rich Pollman, the warning coordination meteorologist at the National Weather Service White Lake office, said about half of the 5,000 spotters in the 17-county region are ham radio operators.

Levees among possible cause of more frequent flooding

Associated Press, January 5, 2016

The Mississippi River floods more often than it used to, and at higher levels. Richard Knaup thinks he knows why.

The veteran emergency management director for southeast Missouri's Cape Girardeau County is fighting floods again, just as he did last year, and the year before that, and the year before that.

"Prior to levee building, the river was a wild thing and it spread out between the river bluffs," Knaup said Monday. "Now we've tried to tame it. Mother Nature and Old Man River will fight back."

Ex-Macomb County PR rep arrested in child porn case

Detroit Free Press, January 4, 2016

A former spokesman for Macomb County government, the Detroit International Bridge Co. and Cobo Center who is well-known in metro Detroit public relations and media circles has been arrested on child porn charges by the Macomb County Sheriff's Office.

Philip William Frame, 61, of Shelby Township is charged with five counts of possession of child sexually abusive material, a four-year felony; one count of using a computer to commit a crime, a seven-year crime, and a misdemeanor charge for possessing marijuana, the Sheriff's Office said today.

He was arrested and then released Saturday from the Macomb County Jail after posting a $10,000 cash or surety interim bond. He was formally arraigned today, where the same bond was continued. His next court date is Jan. 19.

Police ask citizens to report unusual activity

Soo Evening News, January 5, 2016

With the country seemingly in a heightened state of alert, Michigan State Police are reminding local residents that they can play a critical role with the newly unveiled "If you see something, say something" campaign.

"Homeland security starts with hometown security and our citizens know their neighborhoods, schools and work places better than anyone," said F/Lt. Joe Shier of the St. Ignace Post. "If something appears suspicious or out of place, don't hesitate to report it to law enforcement."

An expert on right-wing terrorism explains the militia movement behind the Oregon takeover

Vox, January 5, 2016

A group of armed activists calling itself Citizens for Constitutional Freedom took over a federal building on the Malheur National Wildlife Refuge near Burns, Oregon, on Saturday, saying they were protesting the tyranny of the federal government.

The militants have called for others throughout the US to come and join their fight. They're tapping into a growing trend: the number of unorganized militias in the US has increased 37 percent in the past year, according to the Southern Poverty Law Center.

Daryl Johnson saw this coming. In 2009, as an analyst at the Department of Homeland Security, Johnson wrote a report arguing that the economic downturn and the election of the first black president could fuel a new wave of anti-government violence from extreme right-wing groups.

His report was later leaked, provoking widespread outrage from conservatives. Johnson left DHS in 2010. But his analysis proved correct. The number of anti-government militias grew ninefold between 2008 and 2011, and after a brief period of decline, is now growing again.

El Nino storms slam drought-parched California

Associated Press, January 5, 2016

A strong storm was forecast for Northern California, prompting officials to issue flash flood watches for several rural areas hit by last year's wildfires.

El Nino storms lined up over the Pacific started soaking California with light rain Monday but a series of stronger systems are expected to arrive starting Tuesday, forecasters said.

The National Weather Service issued a flash-flood watch for Northern California communities affected by several destructive wildfires last summer and fall.

Michigan DNR Marks Busy 2015 With Several Successes

Ammoland, January 5, 2016

When wildfires raged this season in western states – and a Canadian province – the Michigan DNR was quick to put a fireman to work on putting out a hot spot on the Marquette County Road 601 fire. The fireman was among several sent to Manitoba this past summer. respond. This year, 54 individuals traveled to hot zones in Alaska, California, Idaho, Manitoba, Montana, Oregon and Washington, taking on 16 different overhead positions from fire-line leadership to command staff and hand crews. There were a total of 58 dispatches (or assignments), each one lasting roughly two weeks.

"Cooperative efforts are key to protecting people, property and resources statewide as well as nationally," said. Paul Kollmeyer, DNR resource protection section manager. "We are proud that our firefighters have the necessary skills to assist with emergency situations in other states."

Kollmeyer said that while DNR firefighters are providing assistance out west or in other locations, Michigan remains adequately staffed to handle any fire incident that might start here at home. When sending staff on out-of-state firefighting assignments, the state of Michigan is fully reimbursed for all costs associated with providing that support.

Clare County Crews Work To Repair Gas Line

9 and 10 News, January 5, 2016

Construction crews in the city of Clare hit a gas line while working near an old car dealership.

Clare County's emergency manager says the crew hit a line at an old Ford dealership at the south end of Clare.

The Admiral Gas Station next to the old car dealership was quickly evacuated.

The street was blocked off between McEwan and Clare streets while crews worked to repair the line, but has since been reopened.

We have a crew heading to Clare and will have the latest updates on the gas leak on air and online.

You have heard the news. Even still, watch this video. Just at least the first three minutes. After you start its hard to stop.

Then ask yourself a few questions.

1. Did I vote in last year's Election that got Rick Snyder re-elected?
2. (If No) Do I feel like a complete idiot for not using my valuable vote to keep this guy from destroying the city of Flint as well as the rest of our state?
3. (If Yes) Who did I vote for again?
4. (If Yes, and you voted Snyder) What makes me so dumb? Is it that my parents raised me to vote biasedly on their own views, and I blindly helped elect a scumbag?
5. (If Yes, and you didn't vote Snyder) How could I have helped keep him from being elected in the first place when there are so many biased idiots who's biased political views come from their parents? Why aren't there more citizens voting?
6. How can I get this guy out of office

MEDIA MONITORING REPORT

1/5/2016

Issues:

- No issues to report.

Summary:

- Gov. Rick Snyder is considering whether to declare an emergency for Flint's contaminated water a week after apologizing to residents for the state's handling of Flint's water crisis.
- Gov. Rick Snyder is gathering the information needed to formally declare a state of emergency in Flint over the water contamination issue, but in the meantime is "already recognizing this as an emergency," spokesman Dave Murray said Monday.
- Keri Webber, summed up her feelings in as it relates to the city of Flint and its lead contaminated water: "We're terrified."
- A Genesee County judge has clarified a ruling made last month regarding water shutoff notices for Flint residents.
- The Genesee County Health department estimates 40 percent of homes have not yet installed the filters.
- About 1,200 workers are taking advantage of the relatively mild winter to build the final portion of a new pipeline to bring water from Lake Huron to communities including Flint.
- Bryn Mickle, Flint Journal/MLive editor, talks with Rachel Maddow about why his organization is calling for a federal investigation, including subpoena power, of what the Rick Snyder administration knew, and when, about the problems with lead and the new water supply to Flint.
- Nancy Kaffer opines about the state apology and that the resignation over Flint water is the first step.
- The recent scandal over lead-poisoning in the water in Flint prompted many of our communities to take a closer look at the issue. According to recent data, West Michigan neighborhoods are home to even higher levels of lead poisoning in kids than Flint.
- A former emergency management professional suspects levees are causing the Mississippi River to flood.
- With the country seemingly in a heightened state of alert, Michigan State Police are reminding local residents that they can play a critical role with the newly unveiled "If you see something, say something" campaign.

Analysis:

- Heavy coverage about Genesee County's request for a Governor's declaration.

- *Concern about Flint residents obtaining the filters they need.*
- Will continue to monitor the situation.

FLINT WATER

Snyder weighs declaring water emergency in Flint

The Detroit News, January 4, 2016

Gov. Rick Snyder is considering whether to declare an emergency for Flint's contaminated water a week after apologizing to residents for the state's handling of Flint's water crisis.

But Michigan faces hurdles to getting federal relief, including forgiveness for state loans to Flint involving drinking-water infrastructure improvements that are covered by federal rules.

Even before any official declaration can be made, Snyder's office said Monday that state officials "are recognizing this as an emergency and are working with city and county leaders to coordinate efforts, streamline communication and tap all available resources at the state's control."

Board declares state of emergency in Flint water crisis

Detroit Free Press, January 4, 2016

Gov. Rick Snyder is gathering the information needed to formally declare a state of emergency in Flint over the water contamination issue, but in the meantime is "already recognizing this as an emergency," spokesman Dave Murray said Monday.

Murray made his comment after the Flint Journal reported the Genesee County Board of Commissioners declared a state of emergency Monday in Flint.

The board's action follows an emergency declaration by Flint Mayor Karen Weaver, who said she plans to meet this week with Snyder.

Specifics of the request are being worked out, but plans call for dealing with causes and effects of lead contamination. It's also part of the process for requesting federal assistance.

Emergency declaration for Flint headed to Gov. Snyder's desk

WJRT-TV 12 in Flint, January 4, 2016

An emergency declaration is heading to the Governor's desk.

The Genesee County Board of Commissioners signed off on the order Monday morning to try to secure federal money for Flint's fight on lead.

By declaring a state of emergency, city and county officials hope to secure federal funding to assist with the water emergency. The number they're asking for right now is $45 million from Washington.

Mother concerned, angry over continuing water crisis

WNEM-TV 5, January 4, 2016

Keri Webber, summed up her feelings in as it relates to the city of Flint and its lead contaminated water: "We're terrified."

The mother of two daughters is fearful of what the future might bring.

"My girls are 15 and 20 and very close to their next birthday. We have no idea what this means long term for the reproduction," Webber said.

The emotions this family feels on a daily basis is over flowing

It started when experts discovered high levels of lead in the drinking water flowing from the tap at houses throughout this city. Webber said the added insult is paying for that water.

"Not even offended, I am angry. Our water bill last month was $240 for what?" Webber said.

Webber's youngest daughter is 15. Victoria has had extreme complications due to lead poisoning, while her oldest Stephanie, 20, appears lead free. At least for now.

As a mother she wonders what will happen to them in a few years after having consumed lead-laced water?

"I know. There aren't words. We have fought for these kids," Webber said. "We didn't have these kids easy, it took us five years, protected them at every turn and handed them poison in a glass."

Flint water customers with overdue water bills, will now get more notice before a shutoff

WJRT-TV 12 in Flint, January 4, 2016

A Genesee County judge has clarified a ruling made last month regarding water shutoff notices for Flint residents.

Circuit Judge Archie Hayman is NOT blocking the city from issuing them for customers delinquent in paying bills since September.

That's when lower water and sewer rates were put into place after his ruling that deemed a 35-percent increase, illegal.

It's all tied to a class-action lawsuit against the city - involving Flint residents who believe they were wrongly over-charged.

Attorney Val Washington, who is representing them in the case, says the Judge is instead, requiring customers be given MORE notice - 90 days - before the city takes action with stopping service.

Notices began going out again last month.

Flint water filter use is low

WJRT-TV 12 in Flint, January 4, 2016

There's disturbing information that three months after a campaign began to make free water filters available to fight lead in Flint, many homes still do not have them.

The Genesee County Health department estimates 40 percent of homes have not yet installed the filters.

Dr. Mona Hanna-Attisha is the Hurley Medical Center pediatrician who discovered high lead levels in Flint children. She says too many parents are not making the effort to install the filters that can block lead in drinking water.

Hanna-Attisha says last month, all 54 families checked through a health program related to lead said they didn't have water filters in their homes.

We checked with adults picking up students at a Flint elementary school to see if they had filters in their homes.

"We're planning on it today because we just recently got it. The majority of people I know don't have them hooked up. Maybe they're just lazy," said Sameika Clayton.

"Well, I kind of just got mine because everyone was getting theirs in a certain order, or I couldn't really take off from work to go get it, so I just got mine," said Queda Wright.

"I got one just to keep the water pure even though we still drink bottled water," said Lemeer Bell.

You can pick up free water filters and replacement cartridges at two GCCARD offices in Flint and at the DHS offices in downtown Flint.

Call 211 for information on how you can receive a free water filter

Work continues on new Michigan water pipeline

Detroit Free Press, January 5, 2016

OREGON TOWNSHIP, Mich. — About 1,200 workers are taking advantage of the relatively mild winter to build the final portion of a new pipeline to bring water from Lake Huron to communities including Flint.

The Flint Journal reports the $285 million Karegnondi Water Authority project is on track.

Crews are burying the 66-inch-diameter pipeline on a path that starts with an intake at Lake Huron. Sections under construction include parts of Sanilac and Lapeer counties. A $71 million water treatment plant is being built in Oregon Township.

Flint switched from Detroit's water system in 2014 to Flint River water in a cost-cutting move ahead of the Karegnondi project's completion. Residents complained about the taste, smell and appearance, and children were found to have elevated blood-lead levels. Flint returned to Detroit's system in October.

Kaffer: State apology, resignation over Flint water first step

Detroit Free Press, January 5, 2016

In the quiet week between Christmas and New Year's Day, Michigan Department of Environmental Quality chief Dan Wyant resigned, followed quickly by department spokesman Brad Wurfel.

And Gov. Rick Snyder — finally — apologized for what happened in Flint.

For 18 months, Flint residents were exposed to lead-contaminated drinking water, after the city — while under state oversight and with MDEQ approval — began to draw its drinking water from the Flint River. Since the switch, an increasing percentage of Flint kids have elevated blood-lead levels. Lead poisoning causes irreversible behavioral and developmental difficulties.

So this apology, and these resignations, represent a sea change. But it's not enough.

For months, Snyder and his MDEQ attempted to dodge the reality that state policy wrought in the City of Flint. As reports, based not only on data compiled or gathered by outside researchers and journalists but on the state's own information, began to explain what was happening, Snyder's spokespeople and MDEQ officials worked to deflect, discredit and deny.

State employees who intentionally distort data could face jail time under a proposed law

Michigan Radio, January 5, 2016

A state lawmaker wants to make it a felony for state employees to manipulate datain official reports.

State Representative Phil Phelps, D-Flushing, says there's no law on the books to punish state employees who intentionally distort data to change the outcome of an official report.

Critics claim that's what happened with state reports that downplayed problems with Flint's drinking water after the 2014 switch to the city's namesake river. If that's what happened, Phelps says that should be against the law.

"If that was proven to be manipulation of data or removing data that changed the outcome, it could be subject to a five year felony," says Phelps.

Video: New calls for federal probe of Snyder admin in Flint water fiasco

MSNBC (Rachel Maddow Show), January 4, 2016

Bryn Mickle, Flint Journal/MLive editor, talks with Rachel Maddow about why his organization is calling for a federal investigation, including subpoena power, of what the Rick Snyder administration knew, and when, about the problems with lead and the new water supply to Flint.

Data shows even higher lead poisoning in kids in West Michigan than Flint

Fox 17 in Grand Rapids, January 5, 2016

GRAND RAPIDS, Mich. – The recent scandal over lead-poisoning in the water in Flint prompted many of our communities to take a closer look at the issue. According to recent data, West Michigan neighborhoods are home to even higher levels of lead poisoning in kids than Flint.

The problem in Flint was so bad it forced the head of Michigan's Department of Environmental Quality to quit last week. Yet as this crisis continues, data shows the problem is broader than the Flint area.

In a recent report, The Center for Michigan, a think tank promoting awareness of public policy issues, cited evidence that among five Grand Rapids' zip codes alone, nearly one in 10 kids tested positive for lead poisoning.

"In Grand Rapids, it's collectively between those zip codes, it's 10 percent," said Paul Haan, executive director with the Healthy Homes Coalition of West Michigan. "We're four times the national level of kids with that low to moderate to even high level of lead poison."

EMERGENCY MANAGEMENT AND HOMELAND SECURITY

Weather spotters serve as eyes and ears for meteorologists

Port Huron Times Herald, January 4, 2016

Stan Arnett has been tracking severe weather for at least three decades.

The 70-year-old Marysville man is one of about 50 trained weather spotters in St. Clair County.

Arnett said it was something he started doing through his love of amateur radio.

"A long time ago I was interested in the magic of communicating around the world or even locally on two-way radios," he said.

Now he uses that hobby to talk to people around the world and help meteorologists determine if severe weather warnings need to be issued.

"Any severe weather ... anything that significantly impacts citizenry," is reported, Arnett said. "It's just something I can do."

Rich Pollman, the warning coordination meteorologist at the National Weather Service White Lake office, said about half of the 5,000 spotters in the 17-county region are ham radio operators.

Levees among possible cause of more frequent flooding

Associated Press, January 5, 2016

The Mississippi River floods more often than it used to, and at higher levels. Richard Knaup thinks he knows why.

The veteran emergency management director for southeast Missouri's Cape Girardeau County is fighting floods again, just as he did last year, and the year before that, and the year before that.

"Prior to levee building, the river was a wild thing and it spread out between the river bluffs," Knaup said Monday. "Now we've tried to tame it. Mother Nature and Old Man River will fight back."

Ex-Macomb County PR rep arrested in child porn case

Detroit Free Press, January 4, 2016

A former spokesman for Macomb County government, the Detroit International Bridge Co. and Cobo Center who is well-known in metro Detroit public relations and media circles has been arrested on child porn charges by the Macomb County Sheriff's Office.

Philip William Frame, 61, of Shelby Township is charged with five counts of possession of child sexually abusive material, a four-year felony; one count of using a computer to commit a crime, a seven-year crime, and a misdemeanor charge for possessing marijuana, the Sheriff's Office said today.

He was arrested and then released Saturday from the Macomb County Jail after posting a $10,000 cash or surety interim bond. He was formally arraigned today, where the same bond was continued. His next court date is Jan. 19.

There's disturbing information that three months after a campaign began to make free water filters available to fight lead in Flint, many homes still do not have them. #FlintWater

FOR IMMEDIATE RELEASE

GENESEE COUNTY COMMISSIONERS DECLARE EMERGENCY

Flint, MI -- January 4, 2016 – During their first board meeting of the year, Monday morning, Genesee County Commissioners declared a state of emergency in Genesee County. The move a sign that county leaders support Flint Mayor Dr. Karen Weaver and her efforts to get resources and relief to the residents suffering from the ongoing water situation in the city.

Mayor Weaver declared a state of emergency in Flint last month to raise awareness about the severity of the problems surrounding the water situation that continues to effect residents. The problems a result of the man-made disaster caused by the city switching to the Flint River as a water source in 2014.

Following the board's vote today, Genesee County Commission Chairperson, Jaime Curtis said, "This is a state, man-made disaster and we're going to ask the state to fix their disaster. Curtis also said, "Genesee County is the fifth largest county in Michigan and we will not be ignored."

Mayor Weaver hopes the county's show of support will convince the Governor to provide the City of Flint with financial support to help leaders address immediate infrastructure needs. Those needs include more than $45 million to replace every identified lead pipe in the city, reimbursement of the $2 million spent to switch back to the Detroit Water Sewerage Department, $6 million to help with the transfer to the Karegnondi pipeline and additional resources to support the city's Heath Initiative to assist affected adults and children in Flint who have consumed water contaminated with lead.

In an interview with media after the board's emergency declaration Mayor Weaver said, "It's a victory and a step in the right direction." The mayor plans to meet with Governor Snyder in Lansing Thursday of this week to discuss the state's response and next steps.

MEDIA MONITORING REPORT

1/4/2016

Issues:

- No issues to report.

Summary:

- The chairman of the Genesee County Board of Commissioners has declared a state of emergency in Flint because of lead in the city's water supply.
- Gov. Rick Snyder is gathering the information needed to formally declare a state of emergency in Flint over the water contamination issue, but in the meantime is "already recognizing this as an emergency," spokesman Dave Murray said Monday.
- Plans are moving forward to seek more help handling problems with Flint's water system.
- A booming rendition of the spiritual hymn "Wade in the Water" set the tone Sunday morning for what was to come during a service at the Unitarian Universalist Congregation of Flint
- Gov. Rick Snyder of Michigan apologized this week for how the water crisis in Flint has been handled. Residents there were exposed water with high levels of lead for months after the city switched water suppliers. The city has since switched back to the Detroit water system.
- A New Jersey newspaper editorial examines its state government's lack of action due to lead in drinking water.
- Civil rights groups are planning to march and shut down a stretch of Michigan Avenue Monday night to demand justice in the December fatal shooting of an unarmed Detroit man by a Dearborn police officer/
- The Michigan State Police have enacted new rules that require all Multi-Line Telephone Systems (MLTS) or Private Branch Exchange (PBX) phones systems in Michigan to provide accurate locations for phones when a user dials 911.
- Sanilac County could invest nearly $1 million to renovate a 9,840-square-foot building in Sandusky to relocate multiple departments to a space officials say better suits their needs.
- Illinois, Missouri assess damage, cleanup after flooding.
- National Weather Service forecasts: Lake Effect Snow impacting parts of the state.

Analysis:

- Heavy local coverage about Genesee County's local declaration due to the Flint water crisis.
- Lake effect snow is impacting parts of Michigan.
- Will continue to monitor the situation.

FLINT WATER

Flint water crisis emergency declaration heading to Gov. Rick Snyder

MLive, January 4, 2015

The chairman of the Genesee County Board of Commissioners has declared a state of emergency in Flint because of lead in the city's water supply.

Chairman Jamie Curtis, supported by the county board, signed the declaration today, Jan. 4, during a meeting of the commissioners, clearing the way to send the request for help to Gov. Rick Snyder.

City and county officials said the request will amount to more than $50 million, including money to replace lead service lines and make other infrastructure upgrades but said specifics of the request are still being developed.

"Its a victory, and it's a step in the right direction," said Flint Mayor Karen Weaver, who said she plans to meet with Snyder in iscuss the declaration Thursday, Jan. 7.

Weaver declared that Flint had suffered a man-made disaster because of lead in water last month, the first step in requesting state and federal assistance.

"We're not going to be ignored," Curtis said. "We're going to get the help that these people need."

Board declares state of emergency in Flint water crisis

Detroit Free Press, January 4, 2015

LANSING – Gov. Rick Snyder is gathering the information needed to formally declare a state of emergency in Flint over the water contamination issue, but in the meantime is "already recognizing this as an emergency," spokesman Dave Murray said Monday.

Murray made his comment after the Flint Journal reported the Genesee County Board of Commissioners declared a state of emergency Monday in Flint.

The board's action follows an emergency declaration by Flint Mayor Karen Weaver, who said she plans to meet this week with Gov. Rick Snyder.

Specifics of the request are being worked out, but plans call for dealing with causes and effects of lead contamination. It's also part of the process for requesting federal assistance.

Flint switched from Detroit's water system last year to Flint River water in a cost-cutting move. Residents complained about the taste, smell and appearance, and children were found to have elevated blood-lead levels. Flint returned to Detroit's system in October.

Last week, Department of Environmental Quality Director Dan Wyant resigned over the issue, as did his communications director, Brad Wurfel.

"The health and welfare of Flint residents is a top priority, and we're committed to working closely with Mayor Weaver and the Genesee County Commission on a coordinated response to health and infrastructure issues," Murray said Monday in an e-mail to the Free Press.

The Michigan State Police's Emergency Management and Homeland Security Division is working with the Genesee County Emergency Management Coordinator to gather information about the resources needed for a governor's declaration of an emergency, Murray said.

"The State Police have been closely engaged in the situation since the beginning, meeting with both county and city leaders to guide them through state and federal laws regarding the emergency management process," he said.

"Due to the uniqueness of this situation, we have to look at all possible options to help Flint residents. But prior to a formal declaration, we are recognizing this as an emergency and are working with city and county leaders to coordinate efforts, streamline communication and tap all available resources at the state's control."

Plans move forward to seek more help for Flint water system

Associated Press, January 4, 2015

Plans are moving forward to seek more help handling problems with Flint's water system.

The Flint Journal reports (http://bit.ly/1Pb62V5) Genesee County board Chairman Jamie Curtis, supported by the board, declared a state of emergency Monday in Flint.

It follows an emergency declaration by Flint Mayor Karen Weaver, who says she plans to meet this week with Gov. Rick Snyder.

Specifics of the funding request are being worked out, but plans call for dealing with causes and effects of lead contamination. It's also part of the process for requesting federal assistance.

Flint switched from Detroit's water system last year to Flint River water in a cost-cutting move. Residents complained about the taste, smell and appearance, and children were found to have elevated blood-lead levels. Flint returned to Detroit's system in October.

County OKs Flint's state of emergency declaration

Michigan Radio, January 4, 2016

Flint's state of emergency declaration is on its way to the governor's office.

The Genesee County Commission approved the declaration for the city of Flint Monday.

The declaration is tied to elevated lead levels in the city's drinking water.

The city's action plan calls for $45 million to replace 15,000 lead transmission lines that connect Flint homes to the city's water system. It also asks for $6 million to help Flint connect to a new pipeline under construction from Lake Huron.

Commission chairman Jamie Curtis says his county's needs will not be ignored.

"This is a state man-made disaster," says Curtis., "And we're going to put together a comprehensive plan and we're going to ask the state to fix their disaster."

In April, 2014, the city switched from Detroit to the Flint River as the source of its tap water. But city and state officials failed to address of the corrosiveness of the river water. Researchers say the river water damaged water pipes, and the pipes eventually leeched high levels of lead into the drinking water. The city switched back to Detroit water last fall.

However, health officials say the threat of lead exposure persists.

"Lead should never be in the body of a child," Dr. Mona Hanna-Attisha told county commissioners today. She recently published a study in a national medical journal showing childrens' blood lead levels in some Flint neighborhoods have tripled.

Health officials fear the lead problem will continue for years to come.

"It's going to be pure hell," is how County Commissioner Brenda Clark describes the effect on Flint schools, when infants who consumed formula made with lead-tainted water start kindergarten in a few years.

But coming up with a specific number for how much is needed to cover the health care costs is problematic.

Mayor Karen Weaver says that's why they've drafted a "fluid" plan to address the issue as more information is gathered.

Weaver is scheduled to sit down with Gov. Snyder on Thursday. It will be up to the governor to decide whether Flint's water problems can be submitted to the Obama administration for a federal disaster declaration.

Weaver plans to travel to Washington later this month to meet with federal officials.

State Rep. Sheldon Neeley calls out, on governor for help over Flint water

MLive, January 3, 2016

FLINT TWP, MI – A booming rendition of the spiritual hymn "Wade in the Water" set the tone Sunday morning for what was to come during a service at the Unitarian Universalist Congregation of Flint.

The service included guest speaker Sheldon Neeley, the 34th District state House Representative from Flint, who took a hard stance against Gov. Rick Snyder and what he felt was the emergency manager's role over the water issue in Flint.

"Governor Snyder provided an apology," said Neeley to around 50 people seated in the audience. "Thank you for those words, Governor, but an apology is worthless unless your actions follow."

Neeley said the water issues stemmed from an emergency manager in place at the city.

County commissioners to take up Flint water action plan

Michigan Radio, January 3, 2016

Flint's plan to recover from its drinking water problems goes to the Genesee County commission Monday morning.

The city's use of the Flint River for its drinking water damaged the city's pipes, and exposed thousands of people to high levels of lead. The city switched back to Detroit water last Fall. But city residents are still being told to use water filters.

Mayor Karen Weaver is asking the county commission to give its OK to Flint's plan to fix the problem.

Open Letter to Gov. Rick Snyder: Too Late to Apologize About Flint's Water Crisis

DailyKos, January 4, 2016

Should Apologies be Accepted When The Act Was Intentional? Should Apologies Present Sense of Instant Relief – Regardless if a Long List of Repeated Cover Ups Are Revealed?

What About Standards?

Should a Governor Who Set His Standards So High He Proudly Signed A Bill Twice Over Ensuring Full Control of Cities, Townships, Villages, Counties and School Districts– That Fails To Meet His High Standards -- Be Easily Forgiven With an "Apology" for Allowing Flint's Residents to Drink Toxic Water for years on end?

Governor Rick Snyder, the answer is a resounding no. No, Flint Residents should not accept your "apology" nor should they — as YOU continued structure that allowed for repeated lies about safety of the water.

Lead Poisoning In Michigan Highlights Aging Water Systems Nationwide

WBEZ-FM 91.5 (Chicago), January 4, 2016

Gov. Rick Snyder of Michigan apologized this week for how the water crisis in Flint has been handled. Residents there were exposed water with high levels of lead for months after the city switched water suppliers. The city has since switched back to the Detroit water system.

Snyder also said the state has to learn from Flint, as many other cities in Michigan also have an aging infrastructure.

Robert Puentes, director of the Metropolitan Infrastructure Initiative at the Brookings Institution, tells NPR's Scott Simon that the problem of aging water systems plagues many suburbs and smaller cities in the United States.

Editorial: Poisoned children are an outrage in Michigan – but not New Jersey?

Star-Ledger (Newark, New Jersey), January 3, 2016

Imagine if thousands of children were being poisoned, in many cases causing permanent brain damage. Parents would be in a state of panic. The headline would be stripped across every news channel.

That's what's happening in Michigan. The mayor of Flint has declared a state of emergency to address lead poisoning in the city's water supply. The proportion of children with elevated lead in their blood has nearly doubled, putting them at risk of irreversible cognitive damage. Two top officials have resigned. Now, the governor is apologizing.

Except that thousands of children are being poisoned in New Jersey, too, and there is no public outcry. Thousands more will fall victim next year, and we'll hear hardly a peep about it. Worst of all, our public officials saw all this coming, and could have saved many of these children. But they didn't, because it wasn't a priority.

Sorry kids, but you're going to have to live with brain damage, because Chris Christie and his predecessors had budget gaps to fill.

EMERGENCY MANAGEMENT AND HOMELAND SECURITY

March aims to shut down Michigan Avenue in Dearborn

Detroit Free Press, January 1, 2016

Civil rights groups are planning to march and shut down a stretch of Michigan Avenue Monday night to demand justice in the December fatal shooting of an unarmed Detroit man by a Dearborn police officer.

The march will begin at 6:30 p.m. at Michigan Avenue and Greenfield in the Kroger parking lot in Dearborn and continue a few blocks to the Dearborn Police Department, organizers said. The event is being organized by the National Action Network. Community organizations such as Take On Hate and Black Lives Matter are planning to participate.

Kevin Matthews, a 35-year-old Detroit resident, was shot multiple times Dec. 23 on Detroit's west side by a Dearborn police officer following a foot chase. The shooting is being investigated by Detroit police, who did not immediately return a call for comment Sunday.

New rules to improve emergency response time

Hillsdale Daily News, January 1, 2016

HILLSDALE — The Michigan State Police have enacted new rules that require all Multi-Line Telephone Systems (MLTS) or Private Branch Exchange (PBX) phones systems in Michigan to provide accurate locations for phones when a user dials 911.

The rules went into effect on Dec. 31, 2015.

"(The Michigan State police) have been pushing for that for a long time," Doug Sanford, emergency management director and Hillsdale 911 director, said.

Sanford said that the location of the 911 caller is vital for a quick response.

Sanilac putting $900K into emergency center

Port Huron Time-Herald, January 3, 2106

Sanilac County could invest nearly $1 million to renovate a 9,840-square-foot building in Sandusky to relocate multiple departments to a space officials say better suits their needs.

Administrator Kathy Dorman said departments including buildings and grounds and Central Dispatch have run into space issues, making the move priority for the county.

The exterior of the county-owned building at 95 Dawson St. — that officials have pegged its new Emergency Operations and Training Center — will remain largely as is, but Dorman said its interior will receive "quite extensive" remodeling.

She said that includes removing or rearranging walls and installing a new roof, heating and cooling system and security system.

Illinois, Missouri assess damage, cleanup after flooding

Associated Press, January 4, 2015

KINCAID, Ill. (AP) - Sharon Stivers mustered a smile as a visitor walked into her muddy yard.

"Welcome to my flood sale," Stivers joked, nodding to a tall stack of water-soaked furniture, appliances and belongings pulled from her home and piled high by the road in the flat central Illinois town of Kincaid. "You can have the whole thing for 50 cents."

The Mississippi River and most other waterways in Missouri and Illinois flooded last week after 10-14 inches of rain fell over a wide swath of the two states. The water receded in most places Sunday but continued to rise in a few. Cleanup and damage assessment was only beginning, and could take weeks.

Twenty-five deaths in the two states were blamed on flooding, nearly all of them the result of vehicles driving over flooded roadways. The death toll rose Sunday when the body of a second teenager missing for several days was found near Kincaid, a town of about 1,400 residents along the South Fork Sangamon River near Springfield.

The Mississippi River was receding except in the far southern tip of both states. After that, flooding is expected to worsen in Arkansas, Kentucky, Tennessee and other southern states, though the breadth of the flooding there isn't expected to match what happened in Missouri and Illinois.

Oregon militia standoff: Ranchers due at prison and what else to expect Monday

Oregon Live, January 4, 2015

The two father and son ranchers who triggered a national cry for justice over their convictions for arson were expected today to surrender themselves to federal prison, ending efforts of militants and fellow ranchers to spare them.

A family friend who asked not to be publicly identified told The Oregonian/OregonLive that Dwight Hammond Jr., 73, and Steven Hammond, 46, left Harney County over the weekend to report. He said they were traveling to California.

Their surrender closes one chapter of a controversial case that has spun into a national drama.

They leave behind a community reeling from the occupation of the Malheur National Wildlife Refuge, a sweeping reserve southeast of Burns. Militants, including the three sons of Nevada rancher Cliven Bundy, took over the empty headquarters compound on Saturday, insisting they will stay until federal land is returned to private ownership.

MLIVE.COM

Erin Brockovich
2 hrs ·

Governor Snyder needs to issue this emergency declaration. An Executive branch of government's declaration of an "emergency" sends a strong message. Flint is in a state of emergency, children are suffering and all the resources available must be deployed to insure the immediate and ongoing safety of this community's children. Not declaring an emergency at this point would be a purely political move.

Subject: PRESS RELEASE: GENESEE COUNTY COMMISSIONERS DECLARE EMERGENCY

Kristin Moore
Public Relations Director, City of Flint
kmoore@cityofflint.com

FOR IMMEDIATE RELEASE

GENESEE COUNTY COMMISSIONERS DECLARE EMERGENCY

Flint, MI -- January 4, 2016 – During their first board meeting of the year, Monday morning, Genesee County Commissioners declared a state of emergency in Genesee County. The move a sign that county leaders support Flint Mayor Dr. Karen Weaver and her efforts to get resources and relief to the residents suffering from the ongoing water situation in the city.

Mayor Weaver declared a state of emergency in Flint last month to raise awareness about the severity of the problems surrounding the water situation that continues to effect residents. The problems a result of the man-made disaster caused by the city switching to the Flint River as a water source in 2014.

Following the board's vote today, Genesee County Commission Chairperson, Jaime Curtis said, "This is a state, man-made disaster and we're going to ask the state to fix their disaster. Curtis also said, "Genesee County is the fifth largest county in Michigan and we will not be ignored."

Mayor Weaver hopes the county's show of support will convince the Governor to provide the City of Flint with financial support to help leaders address immediate infrastructure needs. Those needs include more than $45 million to replace every identified lead pipe in the city, reimbursement of the $2 million spent to switch back to the Detroit Water Sewerage Department, $6 million to help with the transfer to the Karegnondi pipeline and additional resources to support the city's Heath Initiative to assist affected adults and children in Flint who have consumed water contaminated with lead.

In an interview with media after the board's emergency declaration Mayor Weaver said, "It's a victory and a step in the right direction." The mayor plans to meet with Governor Snyder in Lansing Thursday of this week to discuss the state's response and next steps.

Subject: PRESS RELEASE: GENESEE COUNTY COMMISSIONERS DECLARE EMERGENCY

Kristin Moore
Public Relations Director, City of Flint
kmoore@cityofflint.com

FOR IMMEDIATE RELEASE

GENESEE COUNTY COMMISSIONERS DECLARE EMERGENCY

Flint, MI -- January 4, 2016 – During their first board meeting of the year, Monday morning, Genesee County Commissioners declared a state of emergency in Genesee County. The move a sign that county leaders support Flint Mayor Dr. Karen Weaver and her efforts to get resources and relief to the residents suffering from the ongoing water situation in the city.

Mayor Weaver declared a state of emergency in Flint last month to raise awareness about the severity of the problems surrounding the water situation that continues to effect residents. The problems a result of the man-made disaster caused by the city switching to the Flint River as a water source in 2014.

Following the board's vote today, Genesee County Commission Chairperson, Jaime Curtis said, "This is a state, man-made disaster and we're going to ask the state to fix their disaster. Curtis also said, "Genesee County is the fifth largest county in Michigan and we will not be ignored."

Mayor Weaver hopes the county's show of support will convince the Governor to provide the City of Flint with financial support to help leaders address immediate infrastructure needs. Those needs include more than $45 million to replace every identified lead pipe in the city, reimbursement of the $2 million spent to switch back to the Detroit Water Sewerage Department, $6 million to help with the transfer to the Karegnondi pipeline and additional resources to support the city's Heath Initiative to assist affected adults and children in Flint who have consumed water contaminated with lead.

In an interview with media after the board's emergency declaration Mayor Weaver said, "It's a victory and a step in the right direction." The mayor plans to meet with Governor Snyder in Lansing Thursday of this week to discuss the state's response and next steps.

FOR IMMEDIATE RELEASE

GENESEE COUNTY COMMISSIONERS DECLARE EMERGENCY

Flint, MI -- January 4, 2016 – During their first board meeting of the year, Monday morning, Genesee County Commissioners declared a state of emergency in Genesee County. The move a sign that county leaders support Flint Mayor Dr. Karen Weaver and her efforts to get resources and relief to the residents suffering from the ongoing water situation in the city.

Mayor Weaver declared a state of emergency in Flint last month to raise awareness about the severity of the problems surrounding the water situation that continues to effect residents. The problems a result of the man-made disaster caused by the city switching to the Flint River as a water source in 2014.

Following the board's vote today, Genesee County Commission Chairperson, Jaime Curtis said, "This is a state, man-made disaster and we're going to ask the state to fix their disaster. Curtis also said, "Genesee County is the *fifth largest county in Michigan and we will not be ignored.*"

Mayor Weaver hopes the county's show of support will convince the Governor to provide the City of Flint with financial support to help leaders address immediate infrastructure needs. Those needs include more than $45 million to replace every identified lead pipe in the city, reimbursement of the $2 million spent to switch back to the Detroit Water Sewerage Department, $6 million to help with the transfer to the Karegnondi pipeline and additional resources to support the city's Heath Initiative to assist affected adults and children in Flint who have consumed water contaminated with lead.

In an interview with media after the board's emergency declaration Mayor Weaver said, "It's a victory and a step in the right direction." The mayor plans to meet with Governor Snyder in Lansing Thursday of this week to discuss the state's response and next steps.

Hi Zach,

The Governor's Office is taking the lead on questions regarding Genesee County's request for a Governor's declaration. I've CC'd Dave Murray on this email.

Thanks,

Ron

Hi Ron,

Hope all is well.

With the Genesee County Board of Commissioners declaring a state of emergency in Flint, and the Flint mayor asking for a state declaration in the city, regarding the water crisis, what happens now?

Zach

Good morning, I received a call from Chris Devriendt advising he was sending this email to me. Chris basically advised the City of Flint is handing over their IAP to the County on Monday and the County is going to ask for a Governor's declaration. I asked what resources have been used and exhausted by the City and the County as well as what resources are being asked for. Chris is caught in the middle here. The City's IAP is basically asking for millions of dollars to fix their infrastructure and asking for the 2 million they spent to make the switch back to Detroit water be forgiven. I also asked if they had GIS mapping to show which service lines are lead in the city. Chris advised the city is working with Wayne State University on those and to his knowledge no maps are available yet. He further advised maps contained in Dr.

Mona's article are "locked" by the Institutional Review Board until her article is published. The city is going to request the Board to release the maps to them but that is not a given.

Once again, they are basically asking for money to fix their infrastructure problem. And, Sean Kammer is asking Chris if there is a link to MICIMS that he can share with the public. One word- clueless. Sorry, I know you will delete it if you need to send any of this info on. I will plan on being at the meeting Monday unless I hear otherwise. Please let me know your thoughts. BJ

Dear LT Roach,

This missive is to invite yourself and any other MSP EMHS personnel to the commissioners' meeting on 1/4/2016. The meeting will be held at the County Admin Building, 1101 Beach Street, Flint, MI 48502 on the 3rd floor in the Harris Auditorium at 9:00am. This is the building just south of the Sheriff's Office and the room is to your immediate left as you exit the elevator.

It is anticipated that at this meeting, the County will declare a state of emergency and quite possibly elevate it to the State level at the same time. I am attaching the City of Flint IAP, County Declaration, and Governor's request for your review and comment. I understand that this is short notice and lacking on proper protocol but I value your input and guidance.

To illustrate the dire need this situation calls for in regards to professional intervention, the City PIO just left me a message asking if there is a link to the IAP on MI CIMS that he can share with the public...

If you or your colleagues have any questions, comments, or observations feel free to share my personal cell phone number with them

Very Respectfully,

Mayors office submits "Incident Action Plan" to county regarding Flint water
Dec. 29, 2015
FLINT (WJRT) - (12/29/15) - The City of Flint took another major step Tuesday in addressing the current water "State of Emergency" declared earlier this month by Mayor Karen Weaver.

According to the city administrator, Mayor Weaver's office submitted an official "Incident Action Plan" to Genesee County Emergency Management and Homeland Security Office.

The move strategically comes just days before a January 4th meeting by the County Board of Commissioners and could help lead to additional assistance.

The action plan includes key steps for immediate relief, like water filter distribution, and for long term solutions, like addressing medical needs and infrastructure challenges.

FOR IMMEDIATE RELEASE
Tuesday, Dec. 29, 2015

Gov. Rick Snyder takes action on initial findings from Flint Water Task Force

Changes to take place at DEQ, meeting planned with Mayor Karen Weaver

In response to initial findings from the Flint Water Task Force, Gov. Rick Snyder today issued the following statement:

"When I became aware that the city of Flint's water showed elevated lead levels and that the state's handling of the situation was being questioned, I requested funding to switch the source back to the Great Lakes Water Authority and appointed an independent task force to identify possible missteps and areas for improvement.

"The task force has done an exceptional job, reviewing stacks of documents and interviewing scores of Flint, Genesee County, state and federal officials. Although the

task force's final report is not yet completed, members have made me aware of some interim findings and corrective steps that I have decided to take immediately in order to restore trust in how the state keeps its citizens safe and informed.

"We'll continue to work with the community members to make sure we hear and respond to their concerns.

"In addition, MDEQ Director Dan Wyant has offered his resignation, and I've determined that it's appropriate to accept it. I'm also making other personnel changes at MDEQ to address problems cited by the task force.

"But changes in leadership and staff are not enough. I understand there can be disagreements within the scientific community. That is why I have directed both the departments of Environmental Quality and Health and Human Services to invite every external scientist who has worked on this issue to be our partners in helping us improve Flint water. Let's share research on water and blood lead level testing so we can arrive at accurate and mutually supported conclusions. Together, we should work to affirm that we're using the very best testing protocols to ensure Flint residents have safe drinking water and that we're taking steps to protect their health over the short and long term.

"I want the Flint community to know how very sorry I am that this has happened. And I want all Michigan citizens to know that we will learn from this experience, because Flint is not the only city that has an aging infrastructure.

"I know many Flint citizens are angry and want more than an apology. That's why I'm taking the actions today to ensure a culture of openness and trust. We've already allocated $10 million to test the water, distribute water filters, and help in other ways. Last week, I called Flint Mayor Karen Weaver, and we're going to meet soon to discuss other ways the state can offer assistance.

"These are only initial steps - we fully expect to take more actions following the recommendations of our task force. When it comes to matters of health and quality of life, we're committed to doing everything we can to protect the well-being of our citizens."

Whoops! Wrong account. All emergency and disaster information is sent through the @MichEMHS Twitter account. We have a steady battle rhythm going.

We push things through the MSP Facebook page as the situation develops. We had a Facebook post this morning--I'll see what we can queue up this afternoon.

Thanks Ron! You might consider putting something out on social media ... I noticed the last MSP postings on Facebook and Twitter weren't weather related.

Or maybe I'm looking at the wrong accounts ... Should I be looking at another Twitter account besides @MichStatePolice and the Michigan State Police FB account...? I THINK those would be the ones people would go to, but maybe you have an *emergency ops one.*

MEDIA MONITORING REPORT

Statewide Severe Winter Storm No. 1
12/28/2015

Issues:

- No issues to report.

Summary:

- The National Weather Service has issued a Winter Storm Warning through Tuesday morning for Montcalm, Gratiot, Ionia, Clinton, Barry, Eaton, Ingham, Calhoun and Jackson Counties.
- A winter storm is forecast to move across Illinois bringing high winds, icy precipitation and waves up to 20-feet high along the shores of Lake Michigan.
- The Monroe County Emergency Management Division is encouraging area residents to plan ahead for potential hazards.
- Meteorologists are predicting some potentially hazardous weather that could cause roads to ice over and floods Monday.
- All non-essential state of Michigan workers in the Lower Peninsula are being sent home at 1 p.m. today, joining many local government workers who went home at noon in advance of the ice storm moving into the region.
- Genesee County travelers shouldn't worry when the raindrops start Monday, Dec. 28, but after 4:30 p.m. when the sun goes down and ice formation starts, according to John Daly, Genesee County Road Commission manager-director.
- As freezing rain, sleet and wind gusts close to 50 mph hit the Jackson area, the National Weather Service has upgraded the winter weather advisory to a winter storm warning.

- MLive reports on how stores are gearing up for the need of generators and emergency supplies for the winter storm in Michigan.
- Area libraries are among local organizations closing early today as a severe winter storm approached West Michigan.
- Travel conditions across Michigan are expected to be difficult today as much of the state is under a Winter Storm Warning, Freezing Rain Advisory or Winter Weather Advisory.
- Gov. Rick Snyder activated the State Emergency Operations Center due to the hazardous winter storm expected to affect Michigan.
- TV clips: Road crews prepare for storm.

Analysis:

- Media coverage is neutral.
- Multiple media outlets report on Gov. Rick Snyder activiating the SEOC for the winter storm and sending non-essential state workers home.
- Media outlets reporting on updated conditions for storm throughout day.
- Will continue to monitor the situation.

MICHIGAN SEVERE WEATHER

Snow/sleet and freezing rain this afternoon

WILX, December 28, 2015

The National Weather Service has issued a Winter Storm Warning through Tuesday morning for Montcalm, Gratiot, Ionia, Clinton, Barry, Eaton, Ingham, Calhoun and Jackson Counties. A Winter Weather Advisory has been issued through early Tuesday morning for Shiawassee, Livingston, Washtenaw and Lenawee Counties. A Freezing Rain Advisory has been issued for Branch and Hillsdale Counties through Monday evening.

Snow, sleet and freezing rain over the area at noon will continue through the afternoon. As low pressure gets closer to the Michigan winds will be picking up in speed. Computer models are saying ice accumulations could be around a quarter inch in Mid-Michigan. Sleet accumulations of around a half inch are possible. The ice and sleet teamed up with wind gusts near 45 MPH late this afternoon into the evening hours will more than likely cause scattered power outages.

Winter Storm to bring icy weather, high winds to Illinois

WEBZ 91.5, December 28, 2015

A winter storm is forecast to move across Illinois bringing high winds, icy precipitation and waves up to 20-feet high along the shores of Lake Michigan.

The National Weather Service on Monday morning had storm warnings, freezing rain advisories and flood warnings across Illinois. Forecasters predicted heavy icing in the northern half of Illinois. Heavy rain and flooding is expected in central Illinois with river flooding likely to continue for several days.

Monroe County EMD shares winter safety tips

Monroe News, December 28, 2015

With winter weather starting to settle in for the season, the Monroe County Emergency Management Division is encouraging area residents to plan ahead for potential hazards. Here is the list of tips that the EMD issued Monday morning: BE PREPARED FOR COLDER TEMPERATURES & WINTER STORMS While we have not yet experienced it yet this season, Michigan winters can bring extremely cold temperatures, large amounts of snow and bursts of freezing rain. With severe winter weather events likely to occur sometime in the next couple of months, now is the time to prepare for the unexpected. The start of a new year is the perfect time for Monroe County residents to plan ahead and make arrangements before severe winter weather strikes. We strongly encourage everyone to take a few steps to get "winter ready."

Weather Service issues flood warning for Metro Detroit

MLive, December 28, 2015

DETROIT, MI -- Meteorologists are predicting some potentially hazardous weather that could cause roads to ice over and floods Monday.

The National Weather Service issued a lakeshore flood warning about 10 a.m. for Wayne and Monroe counties stemming from possible rising water levels.

"Water levels will rise quickly along the Lake Erie shore," the Weather Service said.

State workers going home at 1pm

Lansing State Journal, December 28, 2015

LANSING - All non-essential state of Michigan workers in the Lower Peninsula are being sent home at 1 p.m. today, joining many local government workers who went home at noon in advance of the ice storm moving into the region.

A winter storm warning called for up to a quarter-inch of ice this afternoon and evening, making travel hazardous and prompting the cities of Lansing and East Lansing to close facilities at noon today. Ingham County also closed at noon and Clinton County at 12:15 p.m. Eaton County had not yet made a decision to close offices, although Delta Township closed its offices at noon.

Ice accumulation on Genesee County roads to start when sun goes down

MLive, December 28, 2015

FLINT, MI – Genesee County travelers shouldn't worry when the raindrops start Monday, Dec. 28.

It's the sun falling from the sky that's going to be the problem, according to John Daly, Genesee County Road Commission manager-director.

"After 4:30 p.m., and the sun starts to go down, that's when we're going to get ice formation," Daly said. "That's going to be the big problem with this one."

Live updates: Freezing rain, gusts near 50 mph hit the Jackson area

MLive, December 28, 2015

JACKSON, MI — As freezing rain, sleet and wind gusts close to 50 mph hit the Jackson area, the National Weather Service has upgraded the winter weather advisory to a winter storm warning.

The warning will remain in effect until 4 a.m. Tuesday, Dec. 29, the NWS reports. Freezing rain is expected to continue through Monday evening before temperatures start to rise above freezing. In addition, the NWS projects between one- and three-tenths of an inch of ice accumulation with a steady wind between 20 and 30 mph.

Stores gearing up for the storm's rush on generators, emergency supplies

MLive, December 28, 2015

GRAND RAPIDS, MI – Between a long electrical outage over Christmas Eve and a big storm moving in today, Rylee's Ace Hardware put an order in for more generators.

Good thing, because there has been a run on them over the last few days.

Generators are currently sold out at both the Grand Rapids area Menards in Comstock Park and Wyoming. More should arrive tonight or tomorrow morning, say staff.

Libraries shut down as storm approaches, check first before heading out

MLive, December 28, 2015

MUSKEGON COUNTY, MI – Area libraries are among local organizations closing early today as a severe winter storm approached West Michigan.

Hackley Public Library, Muskegon Area District Library branches, Spring Lake District Library, Loutit Library in Grand Haven, Fremont Area District Library and Newaygo Area District Library all have closed for the day.

A winter storm with high winds and freezing rain is expected to hit the area early this afternoon. A half-inch of ice could accumulate, making travel in the area treacherous.

Sleet and freezing rain hitting southeast Michigan

Monroe News, December 28, 2015

Travel conditions across Michigan are expected to be difficult today as much of the state is under a Winter Storm Warning, Freezing Rain Advisory or Winter Weather Advisory. Monroe County falls into the Winter Weather Advisory area, according to the National Weather Service in Detroit, with that alert expected to be in effect until 9 p.m. Precipitation began late this morning as sleet mixed with some freezing.

Gov. Snyder activates State Emergency Operations Center due to winter storm

Up North Live, December 28, 2015

WPBN/WGTU — Gov. Rick Snyder activated the State Emergency Operations Center due to the hazardous winter storm expected to affect Michigan.

The National Weather Service is forecasting about a foot of heavy, wet snow for the Upper Peninsula and freezing rain for some areas of the Lower Peninsula. Power outages are likely to happen.

"The safety of all Michiganders is our top priority, and the heavy snowfall and freezing rain could create hazardous conditions in much of our state," Snyder said. "Residents should pay close attention to advisories and stay off the roads if at all possible. State authorities continue to closely monitor the situation and are sharing information and coordinating with communities to keep everyone as safe as possible."

Storm prompts Michigan to activate Emergency Operations Center

WNDU, December 28, 2015

LANSING, Mich. (AP) The state's Emergency Operations Center has been activated as a winter storm is expected to bring heavy wet snow to the Upper Peninsula and freezing rain and high winds to other parts of Michigan.

Gov. Rick Snyder also says state offices in the Lower Peninsula are to close at 1 p.m. Monday due to the storm.

Winter storm warnings and advisories have been issued for a number of areas. The Emergency Operations Center coordinates response and recovery efforts by state and local agencies.

Subject: Great Talking To you Today

Hi Sean,

Great talking to you today. Please don't hesitate and call my cell phone if you need assistance.

Some items to consider:

- Establishing a Joint Information System for working with other responding agencies so you're on the same page. If it's needed, consider establishing a Joint Information Center (JIC) to collocate all Public Information Officers (PIOs) in one location. You can establish a unified messaging framework and delegate tasks.
    - How does a JIC function? This is a great resource → http://www.uscg.mil/hq/cg092/cg09225/docs/JIC_Model_2013.pdf.
    - Emergency Support Function No. 15 (External Affairs) http://www.fema.gov/media-library-data/965d87d8c5ffc4bcccb01979913e01fc/ESF15_SOP_08-30-2013-02.pdf.

- Establish a liaison with 2-1-1 to obtain trends and rumors. The United Way runs 2-1-1, so I would start with your local guy. If that doesn't work, contact Mr. Tom Page, 2-1-1 Executive Director, at 517-664-9811 or email tpage@uwmich.org.
    - **ALSO:** Push information to 2-1-1. Promote it too. Many folks have never heard of 2-1-1.
    - **If you find 2-1-1 is not working for you, establish a public inquiry line. This can be someone answering phones or a recorded message. I've even seen Google Voice used before.**
- Get a battle rhythm established for key messages and news releases—come up with a message for every day or two and then plan ahead for the next message. Date and number the press releases too.
    - Possible topics:
        - **How is the city of Flint working to help the health of its residents?**
        - How can I obtain a new water filter?
        - Where can I go to get a new water filter?
        - Health and safety information about the water (Can I bathe in it? Can I drink in it?)
        - How do I know if I have lead pipes?
        - How do I get my water tested?
        - Other operations taking place (e.g., bottle water distribution).
    - Coordinate with other partnering agencies on messaging and approvals.
- Establish a mechanism for community outreach. Work with police (neighborhood watch), nonprofits and faith-based organizations to get the word out. Create an information packet with FAQs, etc., make copies, and use channels to get the word out.
    - There may be mechanisms to canvass neighborhoods.
    - This is especially important for older residents and those with functional needs.
- Designate a media line. And only let the news media know about it. This enables the media to have a direct mechanism to call to be updated about information.

Please let me know if you need anything. Don't hesitate.

Thanks,

Ron

MEDIA MONITORING REPORT

12/23/2015

Issues:

- No issues to report.

Summary:

- Michigan Rep. Dan Kildee said the state needs to step forward and fund a program to benefit the health of the city's youngest residents.
- New details are emerging in the Flint Water Crisis as a university professor is saying the state health department knew all about the problems - before they were made public.
- The Genesee County Medical Society is backing Mayor Karen Weaver's push for a federal disaster declaration because of Flint's lead in water crisis.
- Flint Mayor Karen Weaver hosted the first meeting in the City's Emergency Operations Center where City officials met with partners from other agencies to discuss the City's Water Emergency.
- The Michigan State Police Emergency Management Division has released a list of practical emergency preparedness gift ideas.
- The Michigan Legislature took its time in 2015, completing just one of Gov. Rick Snyder's top four fall priorities and sending him the fewest number of bills since Republicans took full control of state government five years ago.
- The Michigan Republican Party is standing behind a party official who shared an offensive post about Muslims on several social media platforms.
- Michigan U.S. Senators Debbie Stabenow and Gary Peters met with Congressman Dan Kildee in Flint today to discuss the transfer of $2 billion into the federal Hardest Hit Fund.
- National Weather Service forecast updates.

- TV clips: Snyder admin allowed Flint to drink toxic water; Going practical this holiday shopping season.

Analysis:

- Media coverage is neutral.
- Coverage continues on Flint water.
- The City of Flint website posted that Mayor Karen Weaver hosted the first meeting in the City's Emergency Operations Center where City officials met with partners from other agencies to discuss the City's Water Emergency.
- Will continue to monitor the situation.

FLINT WATER

State health fund needed in response to Flint water crisis, congressman says

MLive, December 23, 2015

FLINT, MI – As questions continue to swirl about who should be held responsible for the Flint water crisis, U.S. Rep. Dan Kildee said the state needs to step forward and fund a program to benefit the health of the city's youngest residents.

Kildee, D-Flint Township, continued to call for a state-financed program during a Tuesday, Dec. 22, meeting with The Flint Journal editorial board that would be used to continually monitor potential health ramifications for those exposed to elevated lead levels in the city's water supply.

University professor says officials knew about Flint water crisis before it became public

WXYZ, December 22, 2015

(WXYZ) - New details are emerging in the Flint Water Crisis as a university professor is saying the state health department knew all about the problems - before they were made public.

Genesee County medical society supports Flint declaration of water emergency

MLive, December 23, 2015

FLINT, MI – The Genesee County Medical Society is backing Mayor Karen Weaver's push for a federal disaster declaration because of Flint's lead in water crisis.

In a letter to Weaver today, Dec. 22, Dr. Pino Colone, president of the Medical Society, says his group "supports your call to the Genesee County Board of Commissioners and the state of Michigan to perform a damage assessment consistent with that which is needed to declare a state of emergency ..."

City officials meet with county, other agencies over state of emergency

City of Flint, December 22, 2015

Mayor Karen Weaver hosted the first meeting in the City's Emergency Operations Center (EOC) where City officials met with partners from other agencies to discuss the City's Water Emergency. In addition to City Officials, the EOC meeting included members of the Genesee County Board of Commissioners, the Michigan State Police's Emergency Management Division, the United Way, and the Genesee County Health Department. The purpose of the meeting was to discuss next steps for the city as it continues to implement its Support Emergency Operations Plan, construct an Incident Response Plan, and coordinate their efforts with outside agencies and governments.

"It was a productive meeting, where we coordinated with several agencies and levels of government. We are a step closer to bringing permanent solutions to Flint," said the Mayor, who declared a State of Emergency on Monday December 14 over ongoing problems with lead contamination in the City's water.

EMERGENCY MANAGEMENT AND HOMELAND SECURITY

Michigan State Police release list of emergency preparedness gift ideas

WXYZ, December 22, 2015

(WXYZ) - If you need to buy a last-minute Christmas gift, consider getting someone an item that could help save their life.

The Michigan State Police has released its annual list of emergency preparedness gift ideas. Think practical items that could come in handy in the event of an emergency.

State Police suggest gifts to help prepare for an emergency

WSJM, December 22, 2015

If you're having trouble figuring out what to buy a loved one this Christmas, how about something that will help them stay prepared for an emergency? The Michigan State Police Emergency Management

Division has released a list of practical gift ideas, things which spokesperson Ron Leix says people often wish they had when it's too late.

"It's not a bunch of flair to give," Leix told WSJM. "It's a practical gift idea that gets that conversation started about preparing for an emergency or a disaster."

MSP suggests emergency preparedness gift ideas

ABC 57, December 23, 2015

If you still have some more holiday shopping to do, an unlikely source may have a few ideas for that perfect gift.

On Tuesday, Michigan State Police released their 2015 emergency preparedness gift list.

According to Michigan State Police, tornados and flooding have ravaged the state over the past two years.

Practical gift ideas for the holiday season

WLNS, December 22, 2015

LANSING, Mich. (WLNS) – It's an annual trend this time of year, practical gifts for the holiday season.

"I think if you're going to give a gift this actually presents the opportunity for you to save someone's life, " said Lieutenant Gabriel Covey with State Police.

Covey says facing an emergency head-on before it happens is the best thing you can do for your loved ones.

"It gets people talking it gets that conversation started about being prepared and a lot of us wait till the last minute or until it's too late man I wish I had this my house just flooded."

MICHIGAN POLITICS

Gov. Rick Snyder goes 1 for 4 on fall priorities as Michigan Legislature calls it a year

MLive, December 23, 2015

LANSING, MI — The Michigan Legislature took its time in 2015, completing just one of Gov. Rick Snyder's top four fall priorities and sending him the fewest number of bills since Republicans took full control of state government five years ago.

Snyder, who remains relentlessly positive a year into his second term, attributes the low batting average to the big swings on road funding, which included a whiff on Proposal 1 in May before lawmakers knocked a final deal over to his desk in November.

Michigan Republican Party official shares inflammatory social media post

Michigan Radio, December 22, 2015

The Michigan Republican Party is standing behind a party official who shared an offensive post about Muslims on several social media platforms.

Wayne Bradley, the GOP's state director of African-American Engagement, said he apologizes if he offended anybody.

Michigan cities may soon get more federal funding to fight blight

Michigan Radio, December 22, 2015

Michigan may soon apply for tens of millions of dollars in federal funding to tear down blighted homes.

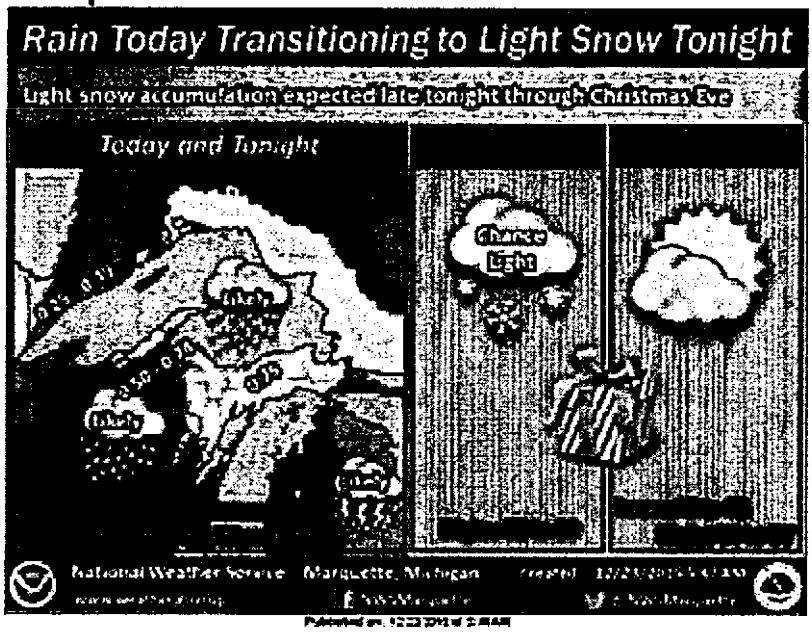
Michigan U.S. Senators Debbie Stabenow and Gary Peters met with Congressman Dan Kildee in Flint today to discuss the transfer of $2 billion into the federal Hardest Hit Fund.

Peters says the evidence that this program works is "overwhelming".

"Whenever you knock down blighted homes in a neighborhood, those property values stabilize. Those properties go up in value. People move back into the neighborhood," says Peters.

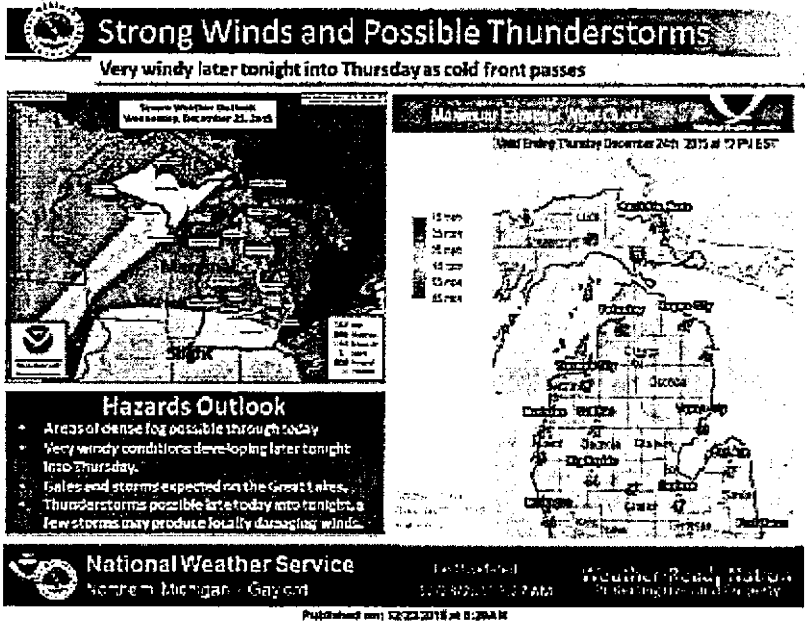
NATIONAL WEATHER SERVICE FORECASTS

Marquette



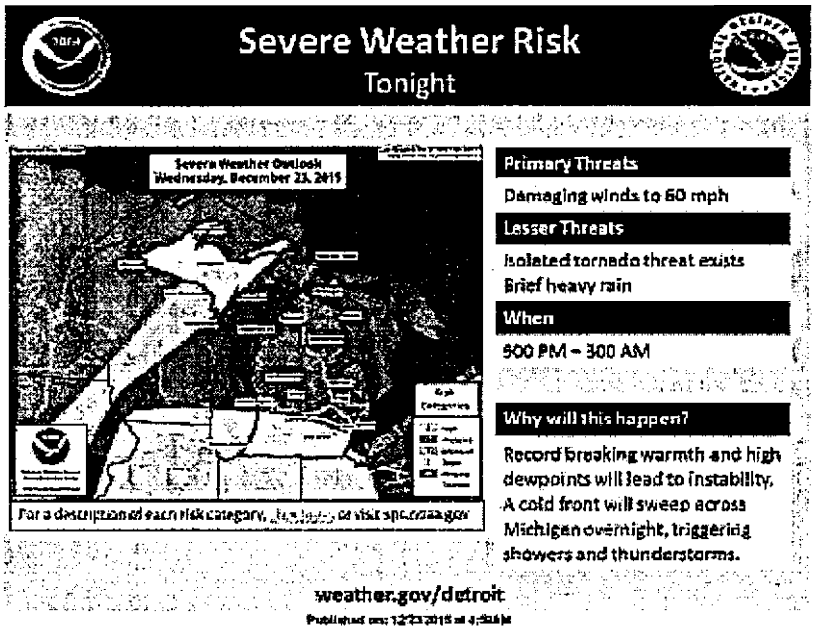
Light snow accumulation expected through Christmas Day. Warm temperatures continue and will be wet through tonight.

Gaylord



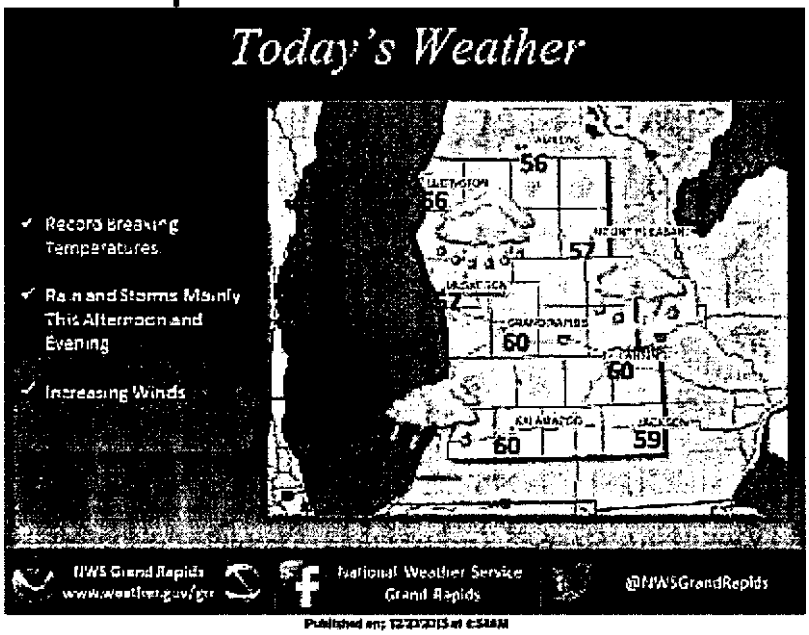
Record to near record setting warmth today then very windy later tonight into Thursday.

Detroit



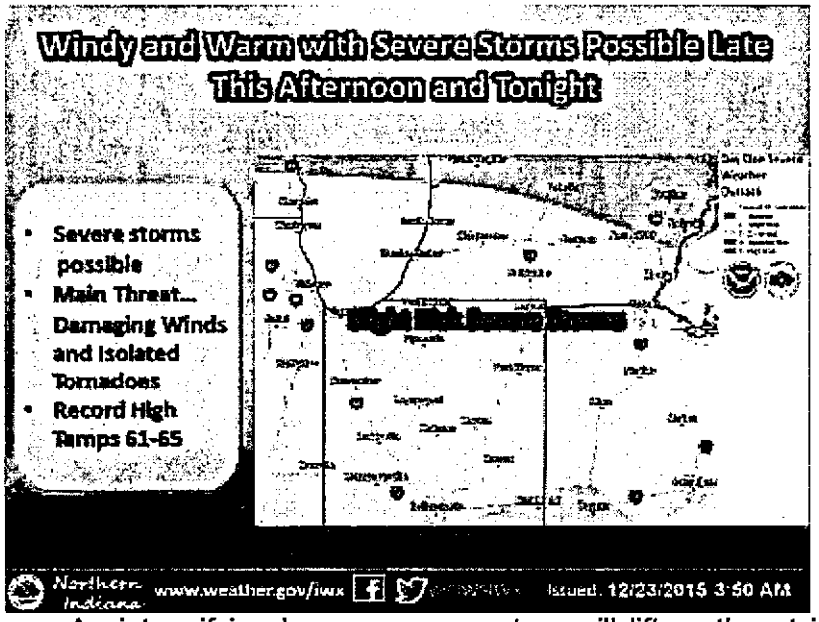
A deepening low pressure system will lift out of the Texas panhandle this morning and through the western Great Lakes this evening. Warm and humid air, drawn northward into lower Michigan, will fuel showers and the potential for thunderstorms beginning this evening. Some of the storms may become severe with damaging wind gusts to 60 mph the primary threat. The most favorable time period for thunderstorms is between 9pm and 3 am EST. Strong westerly winds will also develop in the wake of the cold front passage. A high potential then exists for west winds to exceed 40 mph, particularly north of Interstate 69 between 3 AM and 9 AM EST.

Grand Rapids



Today's record highs are 57 in both Grand Rapids, Lansing, and 54 in Muskegon. We should exceed all these values! However rain and storms will move in toward mid day and continue into the evening. Some storms could be strong with damaging winds. An isolated tornado could even occur. Winds will remain strong through tonight and into Thursday, occasionally gusting to 50 mph.

Northern Indiana



An intensifying low pressure system will lift northeast into the upper Midwest this afternoon causing unseasonably warm/moist air to move into our area. As the cold front associated with this system moves east late this afternoon and tonight, showers are expected with thunderstorms possible. Some of the storms could be severe with damaging winds and isolated tornadoes. Record highs in the lower to middle 60s are expected today with lows tonight only in the 40s.

Do you know how to spot the signs of frost bite and hypothermia?

SPOT

FROSTBITE

A victim is often unaware of frostbite because tissues turn white or numb.

Signs & Symptoms
- Redness or pain in any skin area may be the first signs of frostbite.

Other signs include:
- a white or grayish yellow skin area
- skin that feels unusually firm or waxy
- numbness

HYPOTHERMIA

Hypothermia often occurs at very cold temperatures, but can occur at cool temperatures (below 95°F) if a person is not dressed for the weather or cold water, and becomes chilled.

Signs & Symptoms
Adults:
- shivering
- exhaustion
- confusion
- fumbling hands
- memory loss
- slurred speech
- drowsiness

Infants:
- bright red, cold skin
- very low energy

If a person's temperature is below 95° get medical attention immediately.

Subject: City Officials Meet with County, Other Agencies Over State of Emergency

City Officials Meet with County, Other Agencies Over State of Emergency

Mayor Karen Weaver hosted the first meeting in the City's Emergency Operations Center (EOC) where City officials met with partners from other agencies to discuss the City's Water Emergency. In addition to City Officials, the EOC meeting included members of the Genesee County Board of Commissioners, the Michigan State Police's Emergency Management Division, the United Way, and the Genesee County Health Department. The purpose of the meeting was to discuss next steps for the city as it continues to implement its Support Emergency Operations Plan, construct an Incident Response Plan, and coordinate their efforts with outside agencies and governments.

"It was a productive meeting, where we coordinated with several agencies and levels of government. We are a step closer to bringing permanent solutions to Flint," said the Mayor, who declared a State of Emergency on Monday December 14 over ongoing problems with lead contamination in the City's water.

Genesee County Board of Commissioners Chairman Jamie Curtis and Vice-Chair Bryant Nolden pledged to support Flint's efforts to address water quality issues and public health, which includes assisting in the provision of immediate relief and seeking help to implement long-term solutions.

Immediate relief includes such as water filters, bottled water, and making certain foods available that help treat the effects of lead poisoning. The County is working to share critical health and nutrition information with the City to make this possible.

Long term solutions include several capital improvement projects to upgrade and replace the City's water distribution infrastructure. The cost of doing this is still being determined by the City. The City is currently working on a comprehensive Incident Response Plan that details all of the actions to be taken and their costs. The Incident Response Plan will be presented to the County Board of Commissioners after the new year. It is intended to demonstrate the City's need for outside assistance and additional resources to properly address the water emergency beyond what is available

at the County Level. The Mayor has continuously called for outside assistance with these efforts because of the serious financial challenges facing the city. Flint continues to remain in State receivership while addressing this Emergency.

Subject: State Legislative Black Caucus asks governor for State of Emergency in Flint

State Rep. Sheldon Neely (D-Flint) is calling for the governor declare a state of emergency. I believe this was generated from a news release the Legislative Black Caucus issued a couple of days ago.

It's apparent the news outlet doesn't know the emergency or disaster process as well.

State Legislative Black Caucus asks governor for State of Emergency in Flint
ABC 12, Dec. 21, 2015

FLINT (WJRT) - (12/21/15) - The 19 members of the Michigan Legislative Black Caucus joined with the city, Monday, in asking Governor Rick Snyder to declare a state of emergency in Flint.

"The [consequence] of lead exposure to families is permanent, permanent damage. We need to make sure we provide them them best type of health activity to mitigate some of those damages," said Rep. Sheldon Neeley (D-Flint), who sits on the caucus.

The lawmaker says calling a state of emergency is a crucial step in bringing in some much needed state and federal dollars to try and resolve the issue permanently. This comes a week after Flint Mayor Karen Weaver declared a state of emergency at the local level, which is the first step to those federal dollars.

Neeley says if the governor were to do the same, it would show he cares about what's happening to the people in Flint.

"These requests are falling on deaf ears right now. We're trying to shock the governor into a state of emergency," said Rep. Neeley.

An emergency operations center is now taking calls on the water emergency in Flint.

Subject: Situtational Awareness: Virginia Tech researcher accuses state health officials of "hiding" data on Flint's water

Virginia Tech researcher accuses state health officials of "hiding" data on Flint's water
Michigan Radio, Dec. 21, 2015

Virginia Tech researchers accuse Michigan health officials of trying to "stonewall" the investigation into lead in Flint's drinking water.

The documents obtained through a Freedom of Information Act request are available online.

Marc Edwards says newly obtained internal documents show Department of Health and Human Services employees tried to hide evidence that matched the increased lead levels in children found by doctors at Hurley Medical Center.

"There are emails that show they reproduced the Hurley analysis very early on, and in a document they said is not to be distributed to the public, they noted they found the same thing as Hurley but they didn't tell anyone," says Edwards.

Edwards says state health department officials were following the lead of the Michigan Department of Environmental Quality in the handling of Flint's water crisis.

The MDEQ initially downplayed the importance of the data from Virginia Tech and Hurley Medical Center.

The data suggested elevated lead levels, in the drinking water of some Flint homes and the blood of Flint children, could be linked to the city's switch from Detroit water to the Flint River in April, 2014. Researchers claim the corrosive nature of the river and a lack of treatment resulted in damage to pipes, which then started leeching lead into the drinking water.

After 18 months, the city switched back to Detroit water in October. However, there is still concern lead may continue to be a problem, and Flint residents are advised to continue using filters or drink only bottled water.

There is no safe level of lead. Exposure to lead can have serious health effects, especially in young children.

The Department of Health and Human Services issued a written statement this afternoon defending the agency's handling of the blood lead level data. In the statement, the agency insists it "consistently provided information regarding blood lead levels in the city of Flint."

When initially looking at the citywide and county elevated blood lead level numbers, the increase appeared to be consistent with the routine seasonal fluctuation seen in the summer months. It wasn't until the Hurley report came out that our epidemiologists took a more in-depth look at the data by ZIP code, controlling for seasonal variation, and confirmed an increase outside of normal trends. As a result of this process, we have determined that the way we analyze data needs to be thoroughly reviewed. Additionally, Gov. Rick Snyder has created a Flint Water Task Force to review all city, state and federal responses and actions and is expected to make recommendations moving forward.

The statement went on to say DHHS will continue to work to ensure "appropriate case management and follow up is occurring in Flint."

Mayor pins Flint's hopes on water disaster declaration | MLive.com

FLINT, MI -- The federal government may have never recognized a man-made water crisis like Flint's as a disaster before, but asking for the assistance has been Mayor Karen Weaver's plan since before she was elected Nov. 3.

"Our city is in a crisis -- a water crisis," Weaver said. "So far, what we've had are Band-Aid fixes, (and) it's not enough ... I don't see any other option."

On Monday, Dec. 21, the mayor plans to meet with Genesee County Board of Commissioners Chairman Jamie Curtis and others involved in emergency planning to discuss the city's incident response plan, a step-by-step outline aimed at addressing the water crisis.

"Things are falling together nicely," she said Friday, Dec. 18. "(The plan) is going to say, 'We need this, this and this,' and attach numbers where we can."

The Michigan Emergency Management Act outlines the process for seeking federal disaster assistance, which starts with the local declaration of a state of emergency. In that statement, a local jurisdiction says it has sustained widespread or severe damage, injury or loss of life.

Communities that have typically been granted disaster aid have suffered from natural disasters such as severe storms, flooding and fires, but Weaver believes that Flint's disaster with lead in its water is just as devastating.

There are cases in which less-common disasters have been recognized with federal aid, including one for severe hardship to the salmon industry in Alaska in 1953, a chlorine barge accident in Louisiana in 1962 and dam failure in Colorado in 1973, according to FEMA records.

"The president can declare an emergency or major disaster for any natural or manmade event that the president determines has caused damage of such severity that it is beyond the combined capabilities of state and local governments to respond," FEMA spokesman Mark J. Peterson said in an email to The Flint Journal-MLive

"We're being positive and optimistic" with Flint's application, Weaver said.

The city's state of emergency says, "Flint children have experienced increased blood lead levels since the switch to the Flint River, and this damage to children is irreversible and can cause effects to a child's IQ ... (resulting) in learning disabilities and the need for special education and mental health services and an increase in the juvenile justice system."

Weaver has so far not assigned a dollar figure to damage done to children who drank Flint River water since April 2014, and she said this week that Flint's old water distribution system was also damaged by corrosive river water. "So that's where we are (also) going to need some help."

Although Flint City Council members have been generally supportive of Weaver seeking the disaster declaration, and the Michigan Legislative Black Caucus is supporting the request, Flint City Councilman Josh Freeman said he doesn't believe it will be granted.

"It's giving false hope to people that the problem is going to fixed" with a disaster declaration, Freeman said. "At some point we have to stop playing politics and start governing."

The councilman said state and federal officials are unlikely to send disaster relief to Flint because other parts of the county and the state have childhood blood lead levels -- from all sources -- that are similar to children in Flint.

"Maybe I'm wrong. Hopefully I'm wrong," he said.

FEMA's Web site shows 77 disaster declarations nationwide so far in 2015 and eight current disasters.

The current declarations cover damage caused by fire in California; severe storms and flooding in Wyoming; straight-line winds, flooding and severe storms on the Pine Ridge Indian Reservation in South Dakota; severe storms, tornadoes, straight-line winds and flooding in Texas; severe storms, tornadoes, straight-line winds and flooding in Oklahoma; severe storms, tornadoes, straight-line winds and flooding in Arkansas; and severe storms and flooding in South Carolina.

To reach the desk of President Obama, Weaver's disaster declaration must be approved by county Chairman Curtis and both officials must determine that the disaster is beyond the capabilities of the city or county to handle. Curtis has said he is "fully on board" to do whatever he can to help the city of Flint.

In Michigan, all requests for assistance are channeled through the Michigan State Police, Emergency Management and Homeland Security Division. The MSP reviews requests and makes recommendations to the governor, according to Ron Leix, a spokesman for the division.

The governor has the authority to mobilize state agencies to provide assistance, and if the state cannot cope with the disaster, Gov. Rick Snyder could request assistance through FEMA.

The federal agency makes disaster recommendations to the president.

State Rep. Sheldon Neeley, D-Flint, urged Snyder to get Flint's application for help to the president as quickly as possible.

"Issuing a health emergency is the most responsible thing to do," Neeley said in a news release. "This is a public health crisis, and our children are most at-risk. A state-declared health emergency will allow the city to access federal funding."

Leix, Ron (MSP)

From: Leix, Ron (MSP)
Sent: Friday, December 18, 2015 6:54 PM
To: Kelenske, Chris (MSP); Katarsky, Anthony (MSP)
Subject: Gongwer: Legislative Black Caucus Requests Emergency Declaration

As Flint Mayor Karen Weaver and the city council declared a state of emergency in the city because of the ongoing drinking water crisis, the Legislative Black Caucus on Friday asked the administration of Governor Rick Snyder to do the same, though city officials have not yet asked for that from the state, a Department of State Police official said.

The caucus said in a statement the issuance of a state of emergency would help address continuing health concerns caused by the increased lead levels in the city's water and give the city access to federal dollars.

The city has stopped pulling water from the Flint River, but the caucus said the state of emergency is in response to continuing reports and studies that indicate the presence of coliform bacteria and high levels of lead in the city's drinking water.

Rep. Sheldon Neeley (D-Flint), vice chairman of the LBC, said he is working with local, state and federal officials to find solutions and resources. He said a state-declared heath emergency will allow the city to access federal funding.

"Issuing a health emergency is the most responsible thing to do," Mr. Neeley said. "This is a public health crisis, and our children are most at risk. We urge Gov. Snyder to issue the state of emergency so the city of Flint can get immediate monetary relief."

But Chris Kelenske, the deputy state director of emergency management and homeland security with the Department of State Police, said the city and the county are currently operating under the state's emergency protocols and have not yet asked for the state to declare an emergency.

Mr. Kelenske said he currently has an MSP official in the city working as a liaison and the department is plugged in to what is happening in the city.

"Right now what they have done is Flint has put in place their ... emergency operations plan," he said.

To get additional state resources and even federal dollars, the city would have to have a very specific list of the resources they need, he said. He said the federal government's first question would be what specific needs the city has.

"State assistance is used to supplement ... local resources. It is not to be used to simple budgetary relief," he said. "There is a process in place and it is just a matter of making sure that we follow the process as well as looking at other avenues of funding."

Anna Heaton, spokesperson for Governor Rick Snyder, also said the administration has been working closely with officials in Flint. She noted the state has given $10 million in grants and other assistance to help cover the temporary switch in water source and improve existing water infrastructure.

"The administration also has in place an action plan that includes increased testing, free filters and other steps to help residents," Ms. Heaton said. "The governor also appointed a bipartisan task force charged with reviewing all of the city, state and federal government actions and recommending changes looking forward that can address potential challenges in Flint and other cities."

It its statement, the caucus said blood tests taken before and after the city ended its contract with the Detroit Water and Sewerage Department and began using Flint River water showed that the number of Flint children with elevated blood-lead levels had jumped from 2.1 percent to 4 percent. Additional tests have disclosed that the blood-lead levels of children living in the poorest Flint neighborhoods have jumped from 2.5 percent to 6.3 percent, the statement said.

"Water is a basic human right," Rep. LaTanya Garrett (D-Detroit) said. "Many of our urban communities have succumb to various water issues. We have a due diligence to work tirelessly to provide relief to our citizens."

Hi Ron,

So today the legislative black caucus called on the administration to declare a state of emergency in Flint. Wondering if that could happen given the main problem in Flint has already occurred. Considering the water situation in Flint, would a request for a disaster declaration (is this the right term?) be more appropriate?

Also has MSP received anything formal in requesting a state of emergency or something like it?

Thanks,

Alethia Kasben

How does this sound?

- Either "state of disaster" or "state of emergency" declaration could be appropriate. Both types of Governor's declarations provide the same assistance from the state of Michigan. Most individuals don't know there are two broadly defined types of declarations in the Michigan Emergency Management Act. It would be up to the Governor to determine which one is appropriate.

Hi Ron,

So today the legislative black caucus called on the administration to declare a state of emergency in Flint. Wondering if that could happen given the main problem in Flint has already occurred. Considering the water situation in Flint, would a request for a disaster declaration (is this the right term?) be more appropriate?

Also has MSP received anything formal in requesting a state of emergency or something like it?

Thanks,

Alethia Kasben

Governor sits down in a one-on-one interview with TV5, answers tough questions
LANSING, MI (WNEM) - Governor Rick Snyder talked about some of his highlights of the year in his sit-down interview with TV5.

He said he is proud the unemployment numbers are down to the lowest they've been in a while and legislature passed a package of bills to fund our roads.

But this year, there have certainly been some low-lights.

Governor Snyder said the Flint water crisis is one of those low-points.

"It is a problem that you wish never happened," Snyder said.

Flint children have been found to have elevated lead levels, a problem that has been attributed to the city switching its water source to corrosive Flint River water. It is also a problem many people blame directly on the Governor's office and the emergency manager Snyder appointed.

"People bring lawsuits for many reasons, and I can't really comment if it's in litigation," Snyder said.

Though he wouldn't comment on that, he did say it's too early to place blame and he has a panel working to get the bottom of it.

"People speculate a lot, and in many cases it's not based on what the facts really are, and I appreciate this group working hard to get the facts," Snyder said.

The Governor said the state helped fund the switch back to Detroit water and has offered up resources to the people of Flint. He also said he supports Flint Mayor Karen Weaver's state of emergency declaration seeking federal funds.

As he waits for those results, to the north, a $130-billion merger of Dow Chemical and DuPont.

It's yet to be seen what this means, but Snyder said he's hoping the company stays local.

"We want to see the combined entity do really well and hopefully select Michigan for continuing growth," Snyder said.

And another big issue, especially with the presidential campaigns heating up, is immigration. He talked about his perceived shift in position.

"I thought it appropriate to say let's not stop the pipeline we currently have coming, but let's pause before we dramatically expand programs to make sure we're doing everything possible, within reason, to make sure we're striking that right balance," Snyder said.

He said one issue he'll be taking a close look at early next year is the elimination of straight-party voting. He said Michigan is one of a few states that still has it, but said he wants to make sure it'll work here.

He also talked about the state's crime and schools in our interview with him. To see the interview in its entirety, click the video player above.

Genesee County chairman says he can send Flint disaster request to governor
MLive, Dec. 18, 2015

FLINT, MI -- Genesee County Board of Commissioners Chairman Jamie Curtis says he is authorized to forward Flint's request for a disaster declaration to the governor and plans to meet with Mayor Karen Weaver about it next week.

In a letter to Weaver Thursday, Dec. 17, Curtis says county guidelines and state law call for him to consult with the county's emergency management coordinator -- Sheriff Robert Pickell -- and Michigan State Police once he has been given the declaration.

"Upon such consultation and review of the city's declaration of emergency and upon determining that the situation is beyond the capabilities of the county to handle, I as the the county board chair, may then declare a state of emergency and request assistance from the state of Michigan and a governor's declaration," Curtis' letter says.

Curtis declined to comment further on the matter, and The Flint Journal-MLive could not immediately reach Weaver for comment. The chairman's letter says he will "do whatever I can ... to assist the city of Flint as it continues to struggle with its emergency water situation."

Earlier this week, Curtis said he did not plan to call a special meeting of the county Board of Commissioners to consider the disaster request but would add the issue to the agenda of the county board at its next meeting on Jan. 4.

The mayor has said state and federal funds are needed to respond to health problems caused by lead in drinking water here and to replace thousands of lead service lines in the city.

Weaver's declaration, read to the City Council Monday, Dec. 14, did not include an estimate of damages suffered by the city and residents.

To support the request for disaster relief, the city also announced that it has enacted its "Support Emergency Operations Plan" and opened an "Emergency Operations Center."

Sean Kammer, assistant to the city administrator, said the center is available to answer questions from residents and will be used to coordinate relief efforts.

The EOC is located in Flint Fire Station 1, 310 E. Fifth St., and the center can be reached by calling 810-237-6888, extension 5005 from 8 a.m. until 5 p.m. Monday through Friday.

Subject: State Sen. Jim Ananich News Release

Situational Awareness. State Sen. Jim Ananich, D-Flint, issued the following in response to the Flint Water Advisory Task Force's correspondence with the Governor.

Senate Minority Leader Jim Ananich Wants More Urgency from Governor, Trained Emergency Coordinator on the Ground

17th of December, 2015

LANSING, Mich. — Senate Minority Leader Jim Ananich (D–Flint) responded to today's release of Flint Water Task Force correspondence. He reiterated specific actions that would help organize efforts with the Flint water crisis, including bringing in a trained emergency management professional to coordinate assistance within the City of Flint.

"Political appointees and public relations people are what got us into this mess, and they aren't who we need leading us out of it," Sen. Ananich said. "Anything less than a professional trained in emergency management or public health will not suffice."

Sen. Ananich requested a crisis responder from the Michigan State Police, the Federal Emergency Management Agency or the Department of Homeland Security.

"Dashboards and nice words won't cut it — our community needs action and answers. While I appreciate that the task force seems to recognize it needs to recommend changes before they release their final report, the administration still doesn't seem to comprehend how devastating this crisis is and that it's far from over," Sen. Ananich said.

In addition to calling for more urgency, Sen. Ananich has pushed for stronger legislative oversight and hearings, and additional resources for those families suffering from lead overexposure.

Snyder Administration Leans on Lies to Avoid Flint Water Disclosures
Lie told by Health Department lawyer needs investigation

LANSING — In a recent story by the Detroit Free Press, it was reported that a lawyer for the Department of Health and Human Services claimed that documents related to the Flint Water Crisis could not be released because of a "litigation hold" placed on documents by the Attorney Generals office. However, the Attorney General claims he did not place a hold and the story points out that the term is not a phrase used in litigation surrounding public documents.

"This administration is more concerned with covering the Governor's political ass than they are about the health and well-being of the children and citizens of Flint," **said Lonnie Scott, executive director of Progress Michigan.** "Time and time again when it comes to FOIA, the Snyder administration has hidden behind delays, 'the fee approach' and now they are resorting to making up new legal terms, all in an effort to hide the truth about what happened in Flint and what led to thousands of children being poisoned on his watch. They may think that their delays are slick political operating and sound legal logic but where I come from we have a simple word for actions like these: Bullshit."

This week, Mayor Karen Weaver declared a State of Emergency due to the poor water quality in Flint. This comes months after Gov. Snyder stood behind a podium and denied responsibility for the crisis.

"Standing behind podiums with a forced look of concern is not leadership," **Scott continued.** "The Governor should immediately show leadership and order all state departments to release all documents showing when the Flint crisis was discovered and what was done to fix it. That's what a real leader would do so I won't hold my breath. This is the latest in a long list of examples that go to show Gov. Snyder has broken his campaign promise of more transparency and failed to address our broken FOIA system."

MEDIA MONITORING REPORT

12/17/2015

Issues:

- No issues to report.

Summary:

- ACLU Investigative Journalist Curt Guyette writes in The Guardian that Flint Mayor Karen Weaver's emergency declaration represents that the city returning to democracy.
- Nancy Kaffer opines in the Detroit Free Press about Gov. Rick Snyder not being able to recall when he learned about the elevated lead levels in Flint children.
- Michigan Radio has produced an hour documentary about the Flint water problems.
- Flint Mayor Karen Weaver is asking Flint City Councilmembers to be civil and professional during their meetings.
- Current actions to protect the public from lead in water appear to be taking place without a system to measure results and delineate responsibilities, according to a task force charged with reviewing Flint's lead in water crisis.
- Genesee County Board Chairman Jamie Curtis says he supports Flint's call for assistance, but the city must follow the proper process for an emergency declaration. He says the process is similar to applying for a grant.
- U.S. Homeland Security Secretary Jeh Johnson activated the National Terrorism Advisory System for the first time Wednesday, warning the public of "self-radicalized actors who could strike with little or no notice."
- Russia's strategic nuclear forces chief says its new weapons will be capable of "neutralizing" any potential missile defenses.
- When the public needs to know what's happening during a weather, health, or safety emergency, it's usually a public information officer that relays critical information. Several Region 7 emergency management officials underwent training.
- U.S. law enforcement officials said that gun charges will be announced Thursday against Enrique Marquez, who bought the assault rifles used in the deadly Dec. 2 attack here.
- National Weather Service: Snow coming this weekend; mild temps next week.

Analysis:

- The Flint water situation is an evolving situation.

- Several news articles are being written from complied information from other articles. Some information is packaged out of context.
- The MSP/EMSHD PIO expects another surge of media coverage after the Jan. 4 Genesee County Board of Commissioners meeting.
- State Sen. Jim Ananich, D-Flint, is renewing calls for a professional emergency management official to manage the situation in Flint. He is also skeptical of the Flint Water Advisory Task Force.

- Will continue to monitor the situation.

FLINT WATER

Flint's state of emergency is a sign that democracy is working there again

The Guardian, December 16, 2015

It might seem counterintuitive that Flint, Michigan's declaration that there are dangerously high levels of lead in the city's drinking water – and in the blood of the city's children – is a positive thing. The contamination of the city's drinking water is, after all, is a gut-wrenching tragedy.

But the *declaration* about the undrinkable water, made by newly elected mayor Karen Weaver on Monday, is positive in this regard: it is evidence that a semblance of democracy has returned to Flint.

Such an announcement would have been unimaginable even six months ago, when Flint was still under the control of an "emergency manager" appointed by Governor Rick Snyder. The state's usurpation of local power essentially obliterated the kinds of checks and balances that are key to a functioning democracy.

The Surreal Flint Experience: 2014-2015 Water Crisis // Video of Resident Getting Arrested for Questioning Safety of Water

FlintWaterStudy.org, December 17, 2015

Now that the 2014-2015 Flint Drinking Water Crisis has a name and is getting national attention, we wanted everyone to get a glimpse of the surreal journey of Flint residents. The scene was a City Council meeting about 17 months into the water crisis. Understandably, Flint residents were upset, as they were paying the highest water rates in the U.S. (average $200 per month) for water that is now acknowledged to have been dangerous and non-potable.

The residents had just collected their own data, with the assistance of Virginia Tech researchers, that demonstrated Flint water was not meeting Federal safety standards for lead. At the meeting, Flint residents were not allowed to speak, and if they did so, they were arrested. The only mode of asking a question to the government was to write them on Post-In notes or submit them on paper, and residents were told that answers would be posted a week later on the City of Flint's website. Moreover, questions from several Flint residents (like Melissa Mays and LeeAnne Walters) were never answered.

Kaffer: When did state know kids in Flint were lead poisoned?

Detroit Free Press Opinion, December 17, 2015

When did the State of Michigan first learn that kids in Flint had been poisoned by lead in the city's drinking water?

This is one of the most critical questions to answer in the aftermath of a public health crisis that's still unfolding in one of the state's largest cities.

And it shouldn't be a hard question to answer.

But when I asked Gov. Rick Snyder this week, he said he couldn't recall.

Officials at the state department of health say they didn't know what was happening until a Flint pediatrician released her own analysis in September -- even though data previously collected by the state showed the same trend, a reversal in a decades-long decline in the percentage of kids with lead in their blood.

And the health department has been stalling a Virginia Tech University researcher who has been trying to get public records that could show who knew what, and when.

It's ridiculous. Immediately after Snyder acknowledged there was a problem in Flint, the Free Press editorial board encouraged him not to slow-walk the postmortem. Snyder has appointed an after-action task force to find out what happened, and he told the Free Press this week that he's waiting for that report to provide answers to many of these questions -- but answers should certainly be readily available for the man in charge of the state departments involved in this fiasco.

So inconsistency and obfuscation continue.

Listen to "Not Safe to Drink," a special documentary about the Flint water crisis

Michigan Radio, December 16, 2015

What would you do if your tap water turned brown? If it gave your children a rash every time they took a bath? Or worse, what if it made them sick? Listen to our special documentary below, and hear the wild story about how the water in Flint became *Not Safe To Drink*.

Audio

Flint mayor tells City Council 'fussing and fighting' need to end

MLive – Flint Journal, December 16, 2015

FLINT, MI — Fewer than 50 days into her first term as Flint mayor, Karen Weaver already doesn't like some of what she's seen from the Flint City Council.

"When we're yelling and fussing and fighting — that is no way to get anything done," Weaver told the council Monday, Dec. 16, after members Eric Mays, Kerry Nelson and Monica Galloway argued over procedural rules, a proposed special meeting and the amount of time Mays was speaking.

The theatrics, sometimes involving residents, are nothing new at council meetings.

A uniformed police officer is on duty at every regular and committee meeting of the council, and Mays still is facing a misdemeanor disorderly conduct charge tied to his behavior in July when police escorted him from a meeting room.

Weaver said council members may disagree without being disagreeable.

Flint's Water Crisis Just Became A Double Emergency

Huffington Post, December 17, 2015

JeCorey Hawkins had a scary moment with the water in Flint, Michigan, in September. The 22-year-old psychology student had stooped at a drinking fountain at his university when the water took on a grainy texture in his mouth.

"I was very creeped out because I didn't know if I would be sick," Hawkins told The Huffington Post on Tuesday. He said he and his family, which lives in Flint, hadn't been drinking tap water since earlier this year, though he trusted the University of Michigan's efforts to test and treat water on its Flint campus.

Flint's water problems turned out to be worse than most people realized when a local pediatrician reported in September that more children were being poisoned with lead, a dangerous neurotoxin. The continued problems with the water prompted Flint Mayor Karen Weaver to declare an emergency Tuesday.

"I am requesting that all things be done necessary to address this state of emergency declaration, effective immediately," Weaver said.

It's the second emergency declaration over toxic water for the beleaguered city – Genesee County, which surrounds Flint, declared an emergency for the same reason back in October.

Jamie Curtis, chairman of the Genesee County Board of Commissioners, told HuffPost he didn't understand what Weaver hoped to achieve with her declaration, saying the mayor hadn't been in touch with any demands. He said the commission would take it up at its Jan. 4 meeting.

"I'm not sure what her declaration is," Curtis said. "What I don't think the people of Flint need ... is nothing more than rhetoric saying, 'I've declared this emergency,' but nothing comes of it.

Michigan Mayor Declares State Of Emergency Over Lead Levels

NPR, December 17, 2015

The mayor of Flint, Michigan says her city is experiencing a "man-made disaster" after a 2014 switch to a new water source.

She says the city's usage of water from the Flint River elevated blood lead levels in children, leading to irreversible health effects.

In a televised interview on The Rachel Maddow Show on Tuesday, Mayor Karen Weaver called her choice to declare a state of emergency "the only step we could take at this point," adding that the city is seeking state and federal funds in light of health problems of the city's children.

"We know that Flint is not in a position to bear this burden alone, and we are asking and looking for state and federal assistance. And the only way that we were going to happen was to declare a state of emergency, and hopefully that gets it to the county which will get it to the state where the governor can make it federal."

But it's not clear that Genesee County will support Mayor Weaver's request for federal disaster aid, which is a crucial step in elevating the issue to the federal level, The Flint Journal-MLive reported Tuesday. County board Chairman had initially said "that there's no need for the state of emergency" because "nothing more can be done." He later told the same publication that the issue will receive a "full hearing" in front of the Genesee County Board of Commissioners on January 4.

VIDEO: One family's take on life in Flint with bad tap water

Michigan Radio, December 17, 2015

As Flint's water crisis unfolded, there was a lot of news about decisions made by top level officials.

The decision to switch the city's drinking; decisions about corrosion control; and, eventually, the decision to switch back to Detroit water.

But what did these decisions mean for people living in Flint?

We gave one Flint family, the MacIntyres, a disposable camera and asked them to take photos of the way the Flint water crisis affected their day to day life.

Flint's 'toxic soup' polluted water worse for children than thought, doctor says

The Guardian, December 17, 2015

The doctor who discovered that the children of Flint, Michigan, were at risk of irreparable brain damage from lead poisoning in the city's water supply has warned that the problem of "toxic soup" coming out of their household taps may have affected many more than originally thought.

All children under the age of six – between 8,000 and 9,000 of them – have been put in jeopardy by Flint's contaminated water.

As many as 15% of those tested in certain city hotspots have shown dangerous levels of lead in their blood, according to Dr Mona Hanna-Attisha, a pediatrician at the local hospital who raised the alarm in the summer about metal in the water.

"This is an emergency. People think of disasters as being hurricanes, or tornadoes, or ice storms, but this is a disaster right here in Flint that is alarming and absolutely gut-wrenching," Hanna-Attisha said on Wednesday.

The newly elected mayor of Flint, Karen Weaver, declared a state of emergency on Monday night, calling for federal assistance to deal with what she labeled a "manmade disaster".

Governor's task force on Flint water crisis releases early recommendations

MLive-Flint Journal, December 17, 2015

FLINT, MI – Current actions to protect the public from lead in water appear to be taking place without a system to measure results and delineate responsibilities, according to a task force charged with reviewing Flint's lead in water crisis.

In a letter to Gov. Rick Snyder, who appointed the Flint Water Advisory Task Force in October, the group acknowledged steps, including distribution of free water filters, that have been taken to carry out the governor's plan to address lead levels in the city's drinking water.

But the group also makes initial recommendations for improvement, including that the state address:

- The need for the Michigan Department of Health and Human Services and Department of Environmental Quality to set goals for actions in collaboration with local and federal agencies and organizations.
- The need for a set of corresponding timelines for the goals.

- The need to establish responsibility for meeting the goals in a timely fasion and for contingency plans for the state if the goals are not being met.
- The need for clear, regular communication with the Flint community and stakeholder groups regarding action steps and updates.
- That a single person or entity -- "potentially independent of any one particular state agency" -- serve as the point person to coordinate ongoing work.

EMERGENCY MANAGEMENT AND HOMELAND SECURITY

Homeland Security activates new terror warning level

USA Today, December 17, 2015

WASHINGTON — Homeland Security Secretary Jeh Johnson activated the National Terrorism Advisory System for the first time Wednesday, warning the public of "self-radicalized actors who could strike with little or no notice."

The bulletin, which marks the addition of a new level of public warning to the system, will be in effect for the next six months, or until events dictate otherwise, Johnson said.

The Department of Homeland Security is "especially concerned that terrorist-inspired individuals and homegrown violent extremists may be encouraged or inspired to target public events or places," the bulletin stated.

Russian general says new weapons will 'neutralize' US shield

Associated Press, December 17, 2015

MOSCOW (AP) - Russia's strategic nuclear forces chief says its new weapons will be capable of "neutralizing" any potential missile defenses.

Col. Gen. Sergei Karakayev, the Strategic Missile Forces' commander, said Wednesday in remarks carried by Russian news agencies that the nation's military planners have taken into account the emerging potential of NATO's U.S.-led missile defenses.

The Kremlin long has described the U.S. missile shield as a top threat to Russia, dismissing Washington's claim that it is intended to fend off an Iranian missile threat.

Karakayev said that while the existing U.S. missile defense isn't capable of deflecting a missile attack Russia is capable of launching, the American missile shield will become more advanced in the future.

He added that Russia already has taken steps that would "guarantee neutralizing" any prospective missile defense.

Public Information Officers Gather to Train, Share Tips on Information Sharing

9 and 10 News, December 17, 2015

When the public needs to know what's happening during a weather, health, or safety emergency, it's usually a public information officer that relays critical information.

This morning public information officers gathered in Benzie County to learn more about having a common voice for the public.

The training included public speaking, press release writing and how different department deliver messages to the public.

Officers from the DNR, health department, state police, National Parks Service, and county administrations discussed how to better work together.

"If you have damage or condemnation of certain things, those people they all come from different backgrounds and different focuses," says Frank Post, Benzie County Emergency Management Coordinator. "Now how do we congeal all that? How do we make it all come together so that the public clearly understands what's going on."

The public information officers there say it's great to get together with other agencies to share experiences and advice.

Gun charges expected against San Bernardino shooter's friend

Washington Post, December 17, 2015

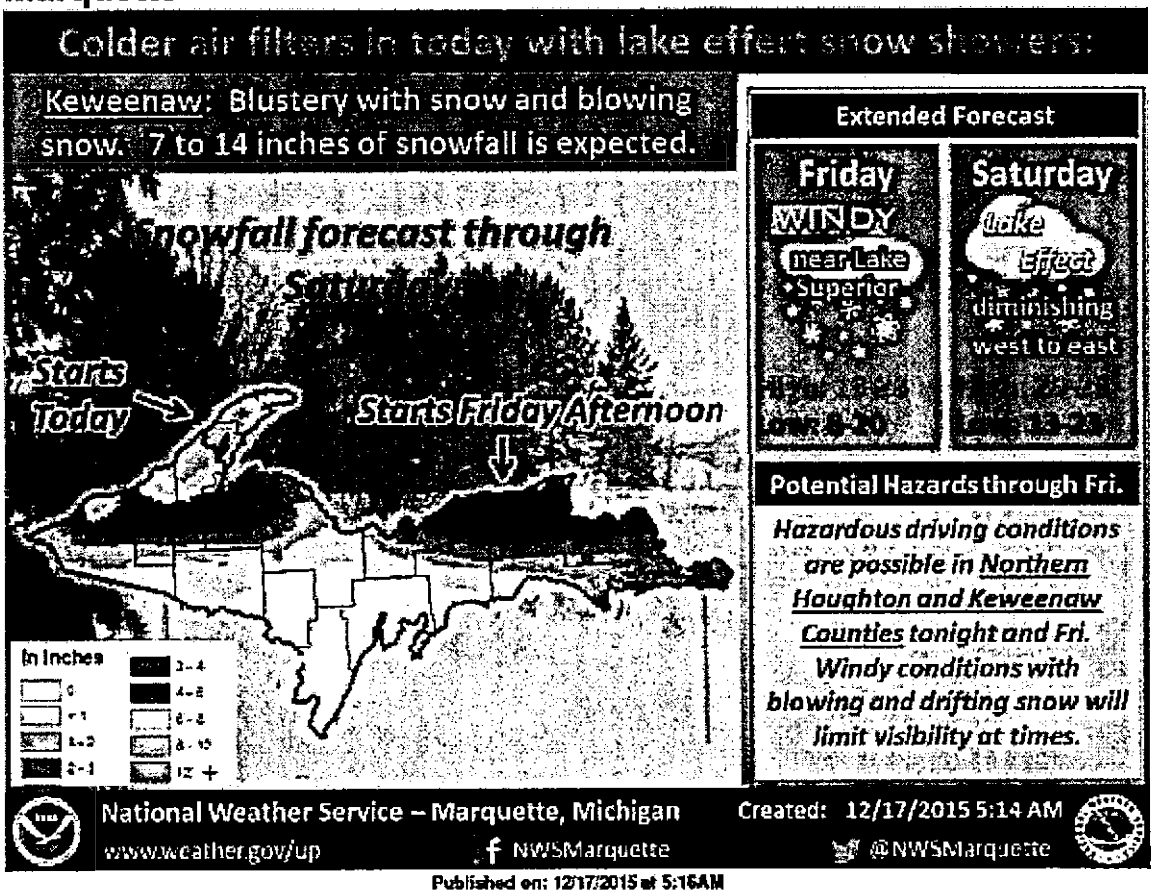
SAN BERNARDINO — U.S. law enforcement officials said that gun charges will be announced Thursday against Enrique Marquez, who bought the assault rifles used in the deadly Dec. 2 attack here.

It is not clear if Marquez has been arrested yet. But the 24-year-old has been at the center of the extensive federal investigation of the massacre carried out by his former neighbor, Syed Rizwan Farook, and Farook's Pakistani wife, Tashfeen Malik.

Authorities have said Marquez purchased two assault rifles used in the shooting that killed 14 people.

NATIONAL WEATHER SERVICE FORECASTS

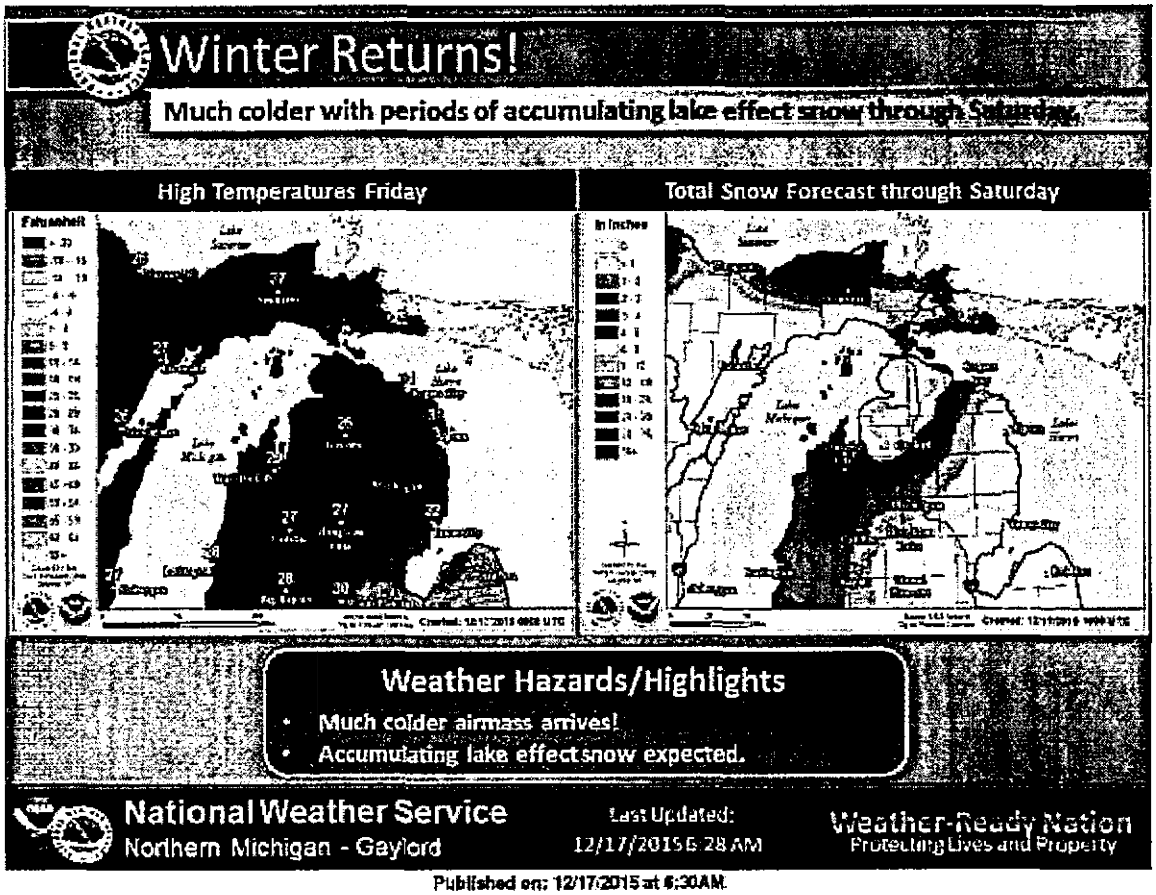
Marquette



Published on: 12/17/2015 at 5:16AM

Lake effect snow will intensify today over the Keweenaw Peninsula, which will combine with gusty westerly winds to produce blowing and drifting snow and difficult travel conditions. The lake effect snow is expected to continue into Saturday before diminishing.

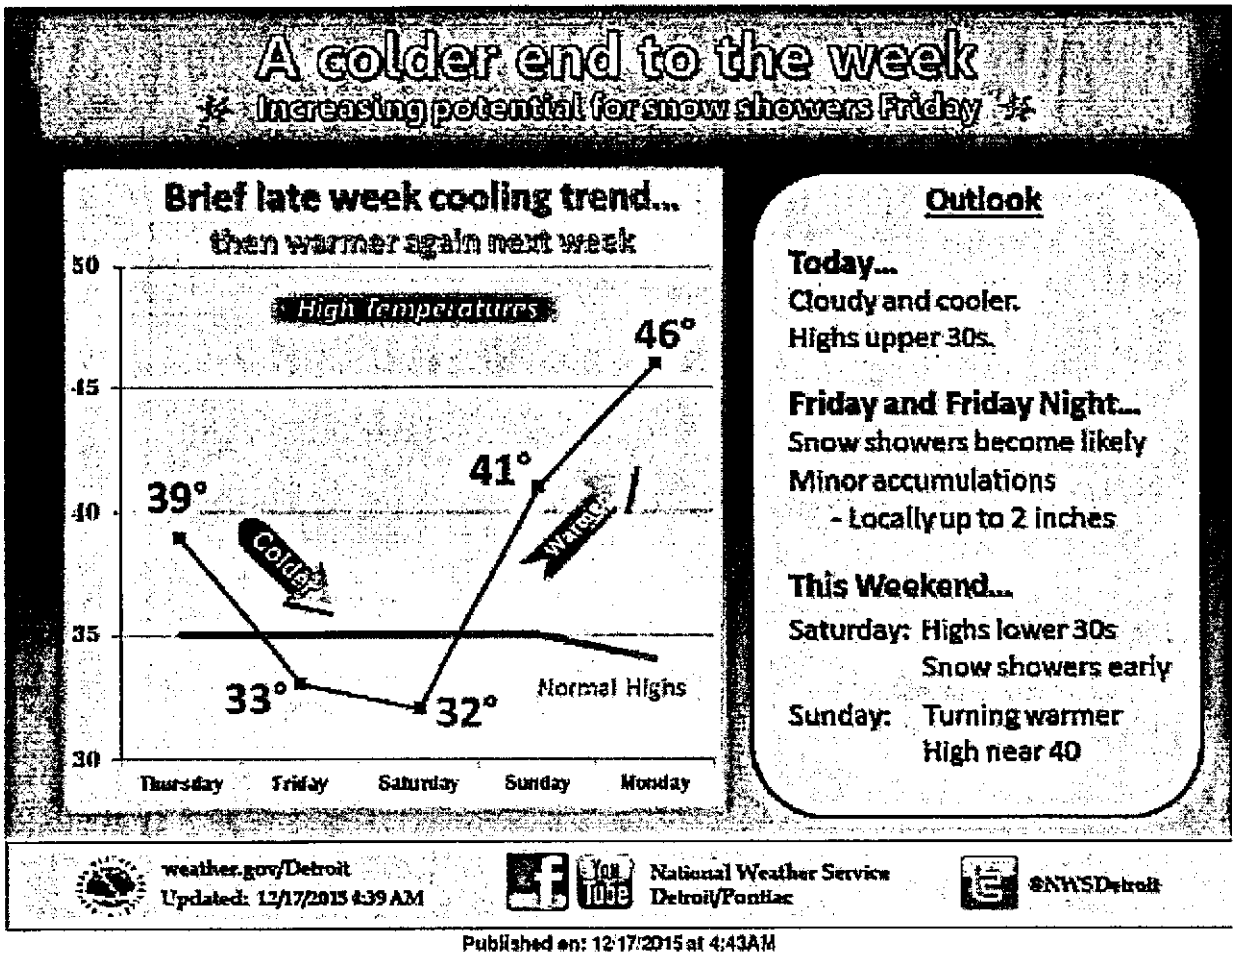
Gaylord



Published on: 12/17/2015 at 6:30AM

Coldest air yet this season will spread across the Great Lakes today through Saturday, kicking off scattered to numerous lake effect snow showers in the process. Some of the snow showers could be locally heavy, especially in the traditional snow belts Friday and Friday night, where several inches of snow are expected. Conditions are expected to moderate heading into the end of the weekend and start of next week.

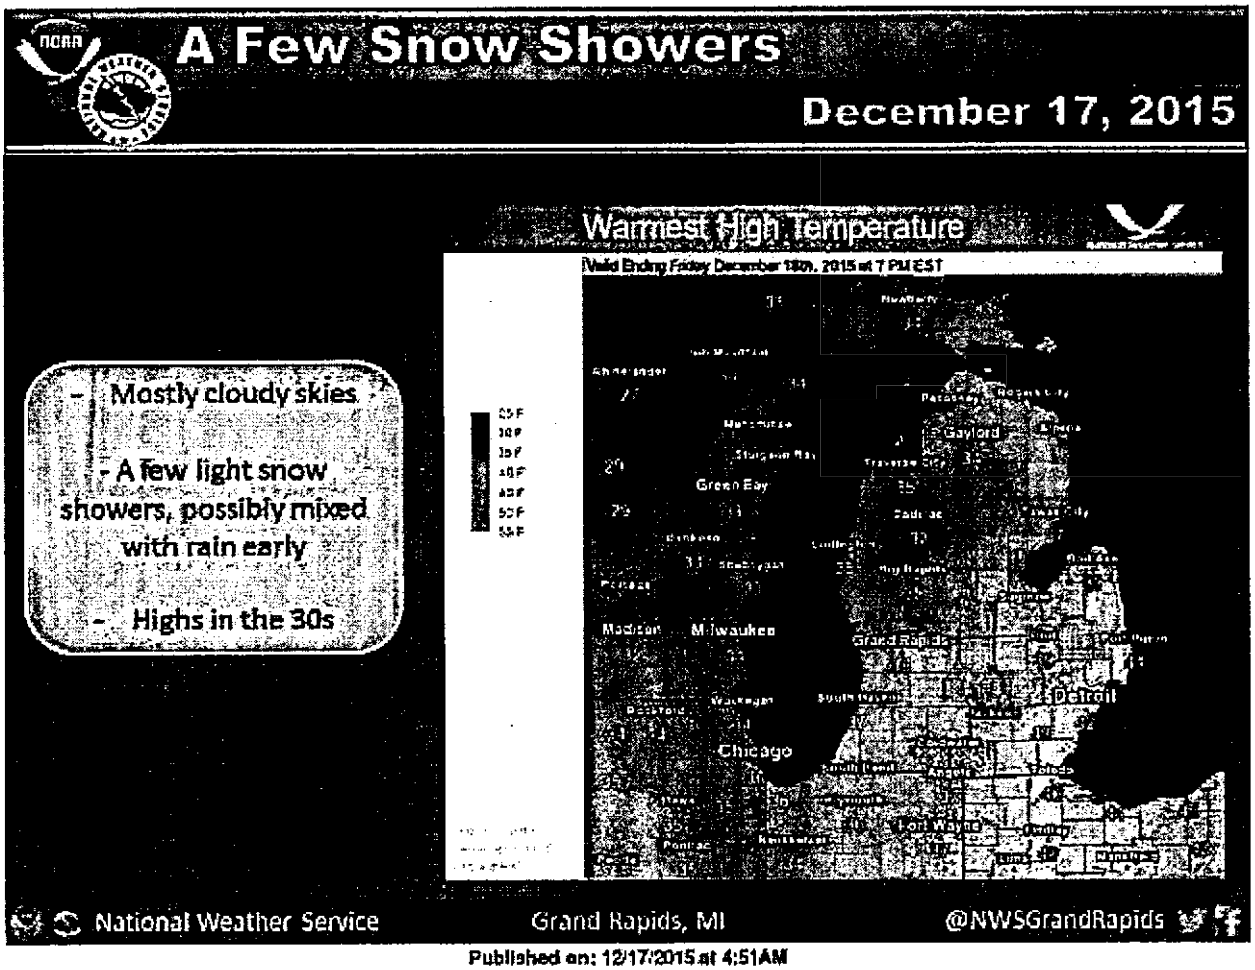
Detroit



Published on: 12/17/2015 at 4:43AM

Stretch of cloudy and colder conditions begins today. Highs today upper 30s to near 40. Trending even colder for Friday and Saturday, with highs in the lower 30s. Snow showers become likely Friday and Friday Night, with some minor accumulation possible during this time.

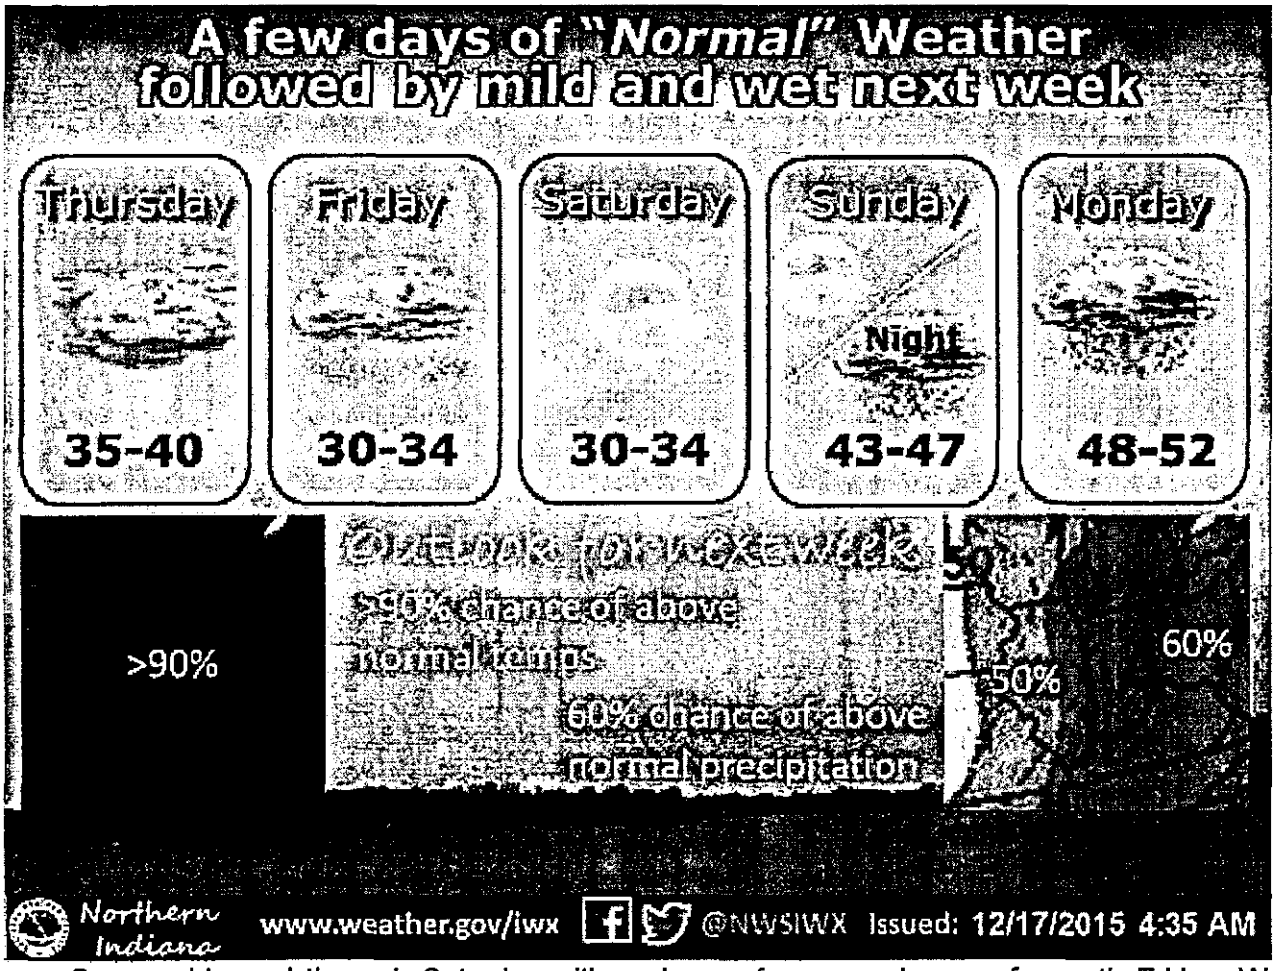
Grand Rapids



Published on: 12/17/2015 at 4:51AM

A few snow showers will be possible today, with no accumulation expected. Highs in the 30s.

Northern Indiana



Seasonably cool through Saturday with a chance for snow showers far north Friday. Warming trend commences Sunday with a good chance for rain late Sunday night through early Monday.

JIM ANANICH — FLINT WATERINFO

"We need to make sure every citizen understands the seriousness of the Flint water crisis and gets access to resources such as filters, safe water and health care assistance. We also need a trained emergency management person on the ground coordinating the response — a priority we've suggested for weeks.

We will continue to get to the bottom of how this happened. The longer we neglect our crumbling infrastructure, the more likely it becomes that tragedies like this could take place in other communities, and we need to make sure this never happens again."

Flint's Water Crisis Just Became A Double Emergency
Turns out declaring an emergency doesn't make the emergency go away

12/16/2015 01:09 pm ET | Updated 1 hour ago

JeCorey Hawkins had a scary moment with the water in Flint, Michigan, in September. The 22-year-old psychology student had stopped at a drinking fountain at his university when the water took on a grainy texture in his mouth.

"I was very creeped out because I didn't know if I would be sick," Hawkins told The Huffington Post on Tuesday. He said he and his family, which lives in Flint, hadn't been drinking tap water since earlier this year, though he trusted the University of Michigan's efforts to test and treat water on its Flint campus.

Flint's water problems turned out to be worse than most people realized when a local pediatrician reported in September that more children were being poisoned with lead, a dangerous neurotoxin. The continued problems with the water prompted Flint Mayor Karen Weaver to declare an emergency Tuesday.

"I am requesting that all things be done necessary to address this state of emergency declaration, effective immediately," Weaver said.

It's the second emergency declaration over toxic water for the beleaguered city -- Genesee County, which surrounds Flint, declared an emergency for the same reason back in October.

Jamie Curtis, chairman of the Genesee County Board of Commissioners, told HuffPost he didn't understand what Weaver hoped to achieve with her declaration, saying the mayor hadn't been in touch with any demands. He said the commission would take it up at its Jan. 4 meeting.

"I'm not sure what her declaration is," Curtis said. "What I don't think the people of Flint need ... is nothing more than rhetoric saying, 'I've declared this emergency,' but nothing comes of it."

The county's Oct. 1 declaration warned Flint residents not to drink the water unless it had been specially filtered and confirmed not to have high levels of lead.

The trouble started in 2014 when emergency managers appointed by Michigan Gov. Rick Snyder (R) decided to try saving money by switching Flint's water supply from the Detroit system to the Flint River.

Local officials toasted the decision, though residents immediately complained about the taste, smell and appearance of what came from their taps. Most importantly, the new water turned out to be more corrosive, causing lead to leach from Flint's old pipes -- and into the city's kids.

Research published by Flint pediatrician Mona Hanna-Attisha in September showed levels of lead in children's blood spiked at the same time as the water switch. Elevated blood lead levels are especially harmful for children, who can suffer stunted growth and irreversible brain damage. In October, after denying any problem, state officials

acknowledged they failed to treat the water to adjust for its corrosiveness, and Snyder signed legislation switching Flint back to Detroit's water.

The city has told residents it could take as long as six months for the water lead levels to decline.
A Dec. 11 report from the Michigan Department of Environmental Quality said the state found elevated blood lead in 39 of 1,836 Flint residents who had testing done since early October. Blood lead levels can decline in a matter of weeks after a person is exposed to lead.

This week, in response to Weaver's new disaster declaration, a spokesman for Snyder referred HuffPost to previous statements from the governor's office outlining actions already taken, including an Oct. 2 action plan and the Oct. 21 creation of a special task force to investigate what went wrong and recommend solutions.

Hawkins wasn't impressed by the latest emergency declaration.

"It's kinda scary, but at the same time, it's like, the water has been this bad, you know, for all this time," he said. "They just decided to put a name to it at this point."

Hawkins has two younger sisters, 10 and 7 years old, who he said have suffered some hair loss, which is a common complaint among Flint residents who can't avoid bathing with the water.

"There is no reason for them to be losing hair at their age," Hawkins said.

This article has been updated with information from a Department of Environmental Quality report.

John Pearce So stop protecting criminals just because they held an elected position. They should be held to a higher standard, not a lower one. There should be no difference in the penalties for a company who endangers lives and lies about it, than for an elected official. In fact, I'd consider the elected official more culpable because their job is to protect the people.

Subject: Flint Water Inquiry

Hi Ron,

Sorry I missed your call. Your voicemail somehow made its way to our secretary's mailbox. Sadly, she had a death in her family and your message sat in her voicemail inbox yesterday afternoon.

A Michigan State Police, Emergency Management and Homeland Security staff member was notified about a FEMA reserve of water that was about to expire. FEMA often provides nonprofit agencies this type of water. The nonprofit is only liable for the shipping costs.

Spl/Lt. B.J. Roach is our third district emergency management coordinator, which covers Genesee County. She put the United Way and the Food Bank of Eastern Michigan in touch with FEMA. From my understanding, the United Way paid for the shipment of the water for the Food Bank of Eastern Michigan. Those two nonprofits are in a better position to say who paid for what.

Spl/Lieutenant Roach has been working with Genesee County Emergency Management officials about the situation in Flint. In fact, she's been working with local officials since this became an emerging issue.

On another note...

Since your inquiry, Flint Mayor Karen Weaver has declared a "local state of emergency" due to the water issues. When a mayor or chief executive official makes a local emergency declaration, he or she is activating their community's emergency operations plans and administering local aid and assistance, as well as issuing directives.

A "local state of emergency" from a municipality or county doesn't mean state or federal assistance is coming. It's like a red flag, letting everyone know there's a problem.

The Flint Emergency Management program is incorporated into the Genesee County Emergency Management program. If additional assistance is requested, the city will have to make a request to the county. If county and city resources are overwhelmed, they would make a request for state assistance.

At this time, we have not received any requests for state assistance through the Michigan Emergency Management Act.

ATTACHED: Emergency or Disaster Declaration Process Fact Sheet

You'll have to inquire with Flint officials about what emergency response efforts are underway due to the emergency declaration (e.g., like staffing their emergency operations center, public information center, working with the county, activating emergency response plans, etc.). They would be in a better position to answer those questions.

Please let me know if you need anything else.

Thanks,

Ron

"We're going to do what we said we were going to do ... It can be on their conscience if they don't approve this," she said of the county.

Curtis said he would do "everything I can for the safety of Flint and Genesee County residents," but said he was disappointed in not being included in conversations about the emergency request to date.

Curtis experienced the work required in requesting disaster relief in 2012 after heavy rains flooded parts of the county.

Even though the county documented about 1,800 specific losses tied to the flooding, the Federal Emergency Management Agency ultimately rejected the county's request for disaster assistance.

Weaver's declaration does not include a specific cost associated with the lead in water crisis but she said Tuesday that in addition to damaging the health of citizens, the city's infrastructure, including water transmission pipes, has suffered damage.

Genesee County commissioners will consider Flint disaster-area request
By Ron Fonger | rfonger1@mlive.com
on December 15, 2015 at 5:36 PM

FLINT, MI -- Mayor Karen Weaver's request for a federal disaster designation will get a full hearing before the Genesee County Board of Commissioners Jan. 4.

County board Chairman Jamie Curtis said Tuesday, Dec. 15, that he will do what he can to support the request even though he hasn't been involved in planning discussions so far.

Weaver declared a state of emergency because of Flint's water crisis Monday, Dec. 14, starting the process of having the city declared a disaster area -- something that requires county and state approvals before federal officials consider the request.

Curtis initially told The Flint Journal-MLive that he didn't believe the county needed to act on Weaver's declaration because county officials had already declared a health emergency in October.

The board chairman said the health emergency triggered the release of millions in state funds for water filters and to help reconnect Flint to the Detroit water system.

But after a news conference Dec. 15, Weaver said she would send Curtis a certified copy of her declaration and let commissioners decide the fate of her request.

"We're going to do what we said we were going to do ... It can be on their conscience if they don't approve this," she said of the county.

Curtis said he would do "everything I can for the safety of Flint and Genesee County residents," but said he was disappointed in not being included in conversations about the emergency request to date.

Curtis experienced the work required in requesting disaster relief in 2012 after heavy rains flooded parts of the county.

Even though the county documented about 1,800 specific losses tied to the flooding, the Federal Emergency Management Agency ultimately rejected the county's request for disaster assistance.

Weaver's declaration does not include a specific cost associated with the lead in water crisis but she said Tuesday that in addition to damaging the health of citizens, the city's infrastructure, including water transmission pipes, has suffered damage.

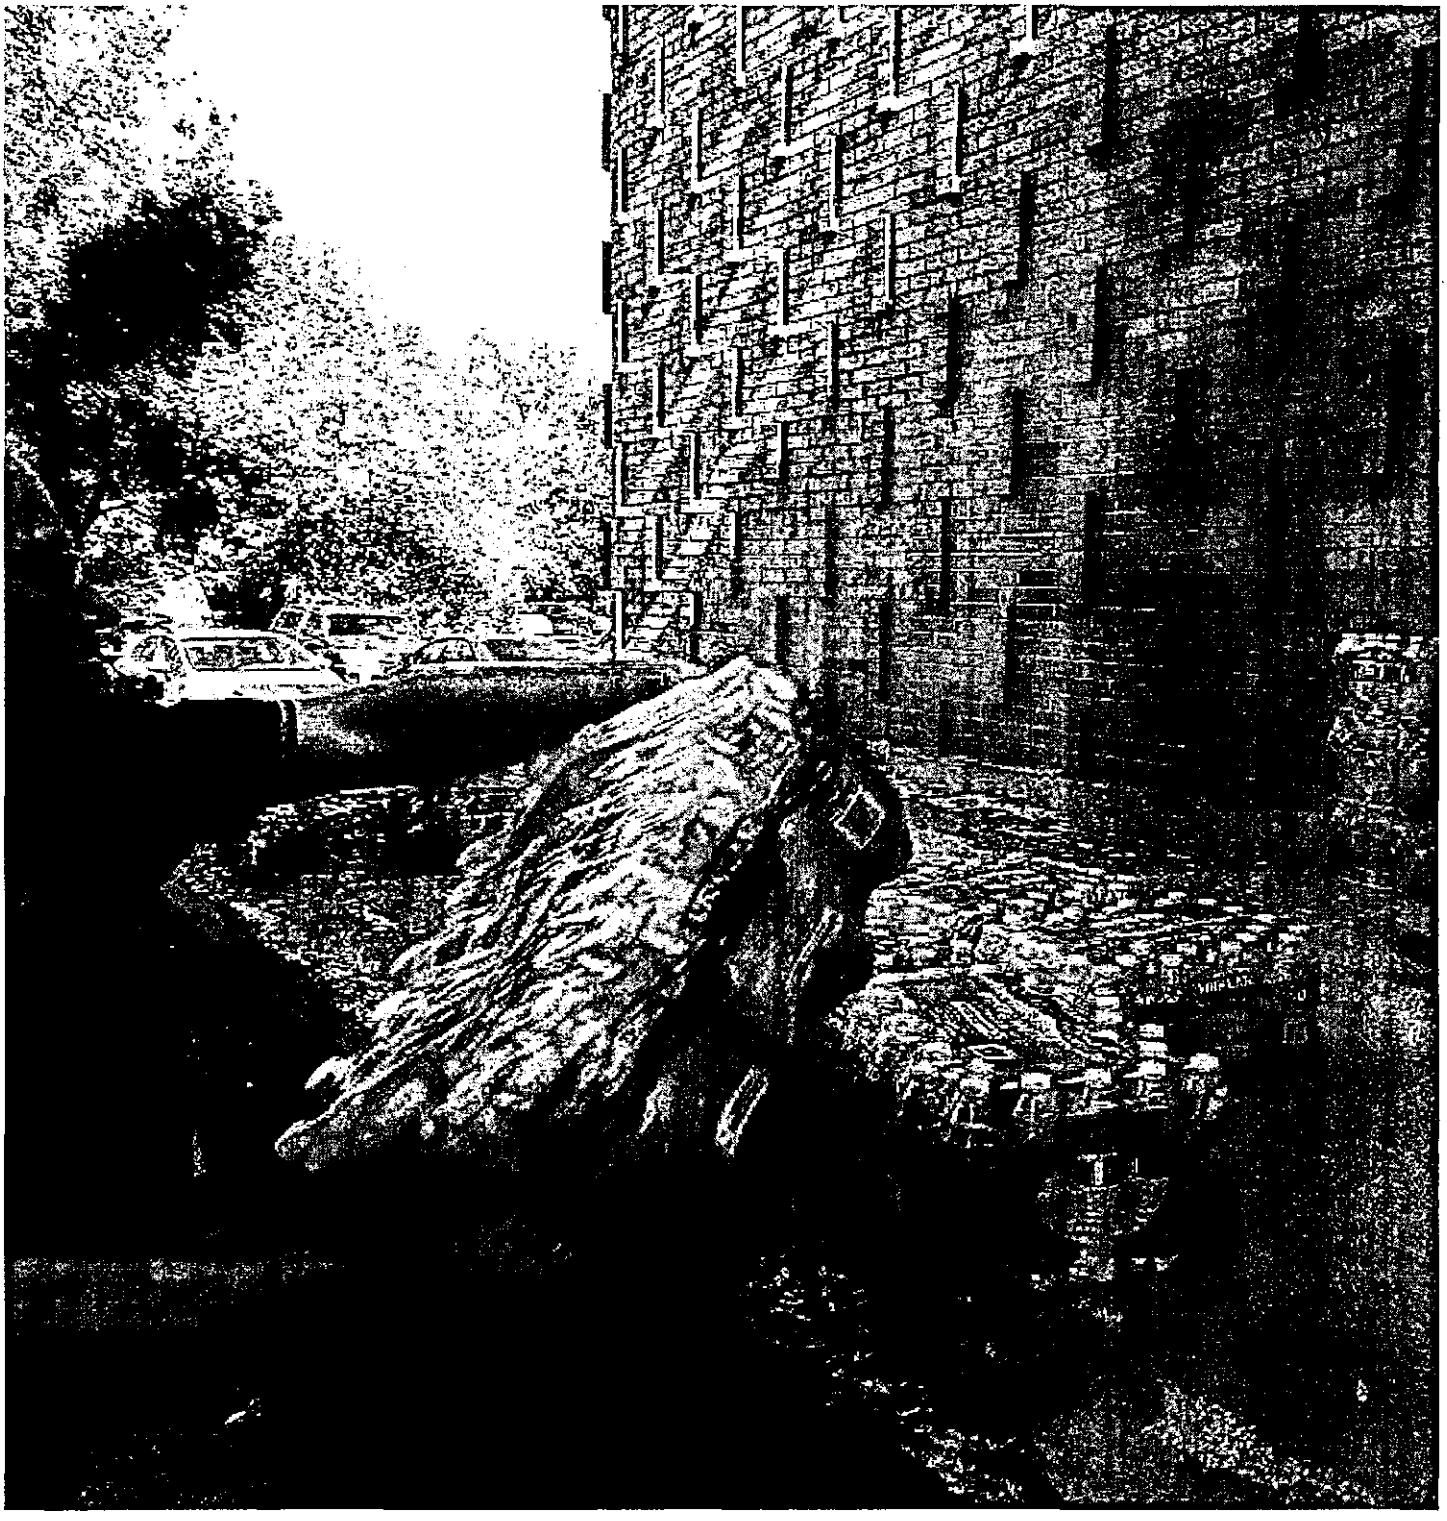
Flint mayor asks county for support of emergency declaration

By STEVE CARMODY · 1 HOUR AGO
SHARE Twitter Facebook Google+ Email



CREDIT STEVE CARMODY / MICHIGAN RADIO

A push to declare a state of emergency in Flint is running into some pushback.

Mayor Karen Weaver called for the declaration this week. She says the city needs state and federal help to repair its problem-plagued water system.

Flint's water system is antiquated. In 2014, partly to save money, the city switched from Detroit water to the Flint River for its drinking water.

But the corrosive river water damaged pipes and led to increased lead levels in the drinking water. The city switched back to Detroit water this fall, but researchers still say people should not drink it unfiltered.

Weaver announced her state of emergency declaration Monday night. But for it to move forward, she's asking the Genesee County Commissioners to back the city's declaration.

"We're looking for resources. We need some help, and I hope they will approve it," says Weaver.

The mayor would like Genesee County Commissioners to hold a special meeting this month to back her call to declare a state of emergency in Flint.

But Genesee County Commission Chair Jamie Curtis is reluctant. He says he hasn't seen the paperwork yet and he wants to make sure it doesn't just repeat the health emergency declaration the county declared in October.

Curtis admits he's frustrated with the way Flint's mayor has handled this request.

"I don't know what it is that Weaver wants me to do when she doesn't call me ... have a meeting with me," says Curtis.

Curtis says he's open to taking up the state of emergency declaration next month.

In the end, it will be up to Gov. Rick Snyder to decide whether to declare a disaster in Flint.

The governor's office issued this statement:

"Flint residents deserve safe, clean water, and the Governor's Office continues to work with Mayor Weaver. We also are working with the bipartisan Flint Water Task Force that the governor appointed to review the city, state and federal actions regarding the water infrastructure challenges and health concerns. The task force also is expected to offer

recommendations on what each level can do moving forward to address these issues in Flint and potentially other areas in our state."

Recent tests showed a small number of Flint residents have elevated blood lead levels.

Researchers are concerned though that many people in Flint may have consumed lead-tainted water for many months before switching to bottled water. The results of that exposure may not be seen for years.

Hi Ron,

That's a good question.

The "public health emergency" wasn't declared through the Michigan Emergency Management Act and went down a different path for obtaining assistance. And I'm not sure on the specifics about how that works, but it doesn't directly involve our agency or the Federal Emergency Management Agency.

The Michigan Department of Health and Human Services or the Genesee County Health Department may have a better idea about the assistance provided under the "public health emergency" declaration.

I've attached a copy of the Genesee County health declaration from October 1.

At this time, no requests have been made for state or federal assistance through the Michigan Emergency Management Act.

Thanks,

Ron

Subject: Flint Water Inquiry

Hi Ron,

Sorry I missed your call. Your voicemail somehow made its way to our secretary's mailbox. Sadly, she had a death in her family and your message sat in her voicemail inbox yesterday afternoon.

A Michigan State Police, Emergency Management and Homeland Security staff member was notified about a FEMA reserve of water that was about to expire. FEMA often provides nonprofit agencies this type of water. The nonprofit only is only liable for the shipping costs.

Spl/Lt. B.J. Roach is our third district emergency management coordinator, which covers Genesee County. She put the United Way and the Food Bank of Eastern Michigan in touch with FEMA. From my understanding, the United Way paid for the shipment of the water for the Food Bank of Eastern Michigan. Those two nonprofits are in a better position to say who paid for what.

Spl/Lieutenant Roach has been working with Genesee County Emergency Management officials about the situation in Flint. In fact, she's been working with local officials since this became an emerging issue.

On another note...

Since your inquiry, Flint Mayor Karen Weaver has declared a "local state of emergency" due to the water issues. When a mayor or chief executive official makes a local emergency declaration, he or she is activating their community's emergency operations plans and administering local aid and assistance, as well as issuing directives.

A "local state of emergency" from a municipality or county doesn't mean state or federal assistance is coming. It's like a red flag, letting everyone know there's a problem.

The Flint Emergency Management program is incorporated into the Genesee County Emergency Management program. If additional assistance is requested, the city will have to make a request to the county. If county and city resources are overwhelmed, they would make a request for state assistance.

At this time, we have not received any requests for state assistance through the Michigan Emergency Management Act.

ATTACHED: Emergency or Disaster Declaration Process Fact Sheet

You'll have to inquire with Flint officials about what emergency response efforts are underway due to the emergency declaration (e.g., like staffing their emergency operations center, public information center, working with the county, activating emergency response plans, etc.). They would be in a better position to answer those questions.

Please let me know if you need anything else.

Thanks,

Ron

Subject: Flint News Release: Mayor Karen Weaver Declares State of Emergency

Mayor Karen Weaver Declares State of Emergency

Posted by: Sean Kammer

Mayor Karen Weaver has declared a State of Emergency in response to a man-made disaster caused by the City switching to the Flint River as a water source. This switch has resulted in elevated lead levels in drinking water which prompted both the City and the County Health department to issue a health advisory earlier this year.

Mayor Weaver states that this was one of the things she had promised to do while campaigning for mayor.

Declaring an emergency intends to help raise awareness of the issue that the water is still not safe to drink and activates the City's Emergency Support Plan in order to respond to the crisis.

On October 16 of this year, the City switched back to the Detroit Water and Sewerage Department as the source of water, however lead levels remain well above the federal action level of 15 parts per billion in many homes. Residents are advised to continue using water filters while long term solutions are being developed.

The Mayor will hold a press conference about the State of Emergency on Tuesday, December 15 at 2pm at City Hall.

Hello Steve,

I've reached out to Ron Leix, the spokesman for the Michigan State Police's Emergency Management and Homeland Security Division. You can reach out to him directly on all issues concerning emergency declarations. He's a tremendous resource and a great guy, too. (I've included him on this email so you have his contact information.)

When a mayor or other chief executive official declares a local state of emergency, that means they are activating their emergency response plans. A local community may declare a local state of emergency exists when they have sustained widespread or severe damage, injury or loss of life or property. This ensures the response and recovery aspects of the emergency operations plan have been activated, and local resources are being utilized to the fullest extent possible. Authorities may authorize local aid and assistance.

It doesn't trigger an automatic state or federal response. The city of Flint works in support of the overall Genesee County Emergency Management program. We have not received any requests for state assistance through the Michigan Emergency Management Act.

But, it's important to note that we continue to work with Mayor Weaver, and the state government already has allocated more than $10 million to help the city with its health and infrastructure needs. We also are working closely with the Governor's bipartisan Flint Water Task Force to review city, state and federal actions in Flint with an eye toward recommendations for the future to work with that city and others.

I'm passing along a fact sheet from Ron that goes through the process.

Dave,

We did receive the DHHS press releases, but for a variety of reasons (shortened fund drive newscasts for example) we decided not to report on them.

Back to Weaver's State of emergency declaration, does it trigger anything? Does this force the governor to request federal or state aid?

Steve

On Monday, December 14, 2015, Murray, David (GOV) <MurrayD1@michigan.gov> wrote:

Flint residents deserve safe, clean water, and the Governor's Office continues to work with Mayor Weaver. We also are working with the bipartisan Flint Water Task Force that the governor appointed to review the city, state and federal actions regarding the water infrastructure challenges and health concerns. The task force also is expected to offer recommendations on what each level can do moving forward to address these issues in Flint and potentially other areas in our state.

Steve, I have to ask because I didn't see a story from anyone at Michigan Radio. Did you guys get the release from DHHS about the updated testing results or the DEQ release about testing in schools that focused in on problem areas in fixtures?

Let me know if you need those. I can send them, or make sure you are on their distribution lists.

Dave

Volume #54, Report #242, Article #2--Thursday, December 10, 2015

Senate Activity Report | House Activity Report

House Oversight Sends FOIA Exemption Bill To Natural Resources

A bill that would exempt certain government documents related to pipelines from the Freedom of Information Act was amended by the House Oversight and Ethics Committee and then referred to the House Natural Resources Committee on Thursday.

The committee spent nearly the entire 90 minutes of the meeting taking testimony and adopting substitutes and amendments on HB 4540 only to re-refer it. The bill would exempt the following from FOIA:

- Information presumed to be critical energy infrastructure information;
- Cybersecurity plans, assessments and threats; and
- Information that would identify, or provide a means of identifying, a person that could become the vim of a cybersecurity incident, or that would disclose a person's cybersecurity plans.

The committee heard opposition from the Michigan Environmental Council, the Food and Water Watch and the Michigan League of Conservation Voters.

After the meeting, Jack Schmitt, deputy director for Michigan LCV, criticized the committee for moving the bill to Natural Resources.

"If it wasn't seriously concerning, it'd be comedic that the chair of the House Oversight and *Ethics* (his emphasis) Committee used a backdoor measure to sustain a bill restricting transparency when the votes weren't there to support it," he said in a statement. "Clearly, our oil pipelines aren't the only place we need stronger oversight and transparency."

Committee Chair **Rep. Ed McBroom** (R-Vulcan) said there were both environmental and governmental oversight concerns regarding the bill. He said the committee finished its work regarding the oversight, and Natural Resources could work to address additional concerns.

Mr. McBroom said after the hearing he was prepared for either reporting the bill or referring it to the other committee.

"I felt like we had done as much as possible, (but) the bills still aren't ready for prime time," he said. "I think you've got two primary concerns that swirl around this bill. One is from environmental groups and one is from open government groups. There was always some discussion on which of the two committees the bill should have been in in the first place. ... I think we have done a lot of work in regards to the oversight issues, and it's appropriate now for Natural Resources to take a whack at it."

Under the bill, a public body would have to exempt information presumed to be critical energy infrastructure information. When a FOIA is submitted, the company would have to label it as such and it would be presumed critical information until determined otherwise by the Michigan Agency for Energy.

Under an amendment to the bill, if a person was denied a FOIA request because the information was presumed to be critical, they would appeal at the circuit court level.

James Clift with the Environmental Council said the bill's definition of critical energy information is too broad. And he said under federal law, the person who is asking for the information on a pipeline is taken into account - for example if you are a person with a pipeline near your property or a public safety group.

"There is no balance here at all," he said.

Rep. Kurt Heise (R-Plymouth Township), sponsor of the bill, said the information that would be restricted is to protect information that, if in the wrong hands, would impact public safety.
"We have had representatives from the State Police and the Michigan National Guard who have said that this is a very useful tool in our effort to protect Michigan residents and our energy infrastructure from people who might seek to do us harm," Mr. Heise said.

I don't know about all of you but I am confused as to who know what now so let's start over.

BJ thank you for directing us to this available water it is a wonderful savings for the community . We have acquired two truckloads of water for the cost of transportation, a savings of about $5,000.

We have confirmed with FEMA HQ – the approval for the release of 2 loads of water out of Fredrick, Maryland. Darwin Freight is scheduled to pick up 1 load on Thursday the 10th and the 2nd load on Friday the 11th.

I contacted Dan Schulman for FEMA (312) 408-4427 dan.shulman@fema.vhs.gov and provided follow up information for the loads and identified myself as contact person if they had any questions. Jamie and I will prepare a press release to inform the community of the donation of the water and the collaboration of community that made it possible.

FEMA only concern about the donation is that it was made based on the availability of the water not due to any particular issue in Flint or anywhere else.

Jamie give me a call tomorrow and we can finalize the press release and I can have one of our staff prepare it. If I have forgotten anything or if anyone thinks we need to take any other steps let me know.

Subject: Water loads

Hi Bill,

We have confirmed with FEMA HQ - Tureana Dash receiving release numbers for 2 loads of water out of Fredrick, Maryland. I have passed on the release number to Darwin Freight. They are looking to set up to pick up 1 load on Thursday the 10th and the 2nd load on Friday the 11th.

I received a call from Chicago Dan Schulman for FEMA(312) 408-4427. Dan needed follow up information for the loads if asked who could they contact here at our Food Bank I gave him your name. He also wanted to know if asked who in the city could they refer to for questions and are we doing a press release when we receive the water. I let him know I would talk with you and either have you call or I would follow-up.

Thanks

Tina

Good morning, just learned 2 truckloads of water was ordered for Genesee co food banks. The cost for delivery is $1500 per truck which is being paid for by the United Way. Jamie Gaskin, UW, advised that is half the cost they would have paid otherwise so he is extremely thankful. This was just stated in our weekly Flint Water meeting. 😊

MEDIA MONITORING REPORT

12/4/2015

Issues:

- No issues to report.

Summary:

- Congressmen Dan Kildee spoke loud and clear to President Obama's cabinet, America's top corporate CEO's and other lawmakers about Flint's water emergency and infrastructure problems plaguing the city.
- The Department of Health and Human Services says of the nearly 1,000 children in Flint it tested since the beginning of October, 21 children still have elevated blood lead levels.
- Preliminary state data indicates that 30 of 1,361 adults and children tested in Flint since October 1 had elevated blood lead levels, according to a report issued today by the Michigan Department of Health and Human Services.

- Peter Bade, who served as city attorney throughout Mayor Dayne Walling's six years as mayor, has tendered his resignation.
- The professor whose research helped expose rising levels of lead in drinking water in Flint says it's still not safe to drink without a faucet filter.
- The head of Genesee County's homeland security, Jenifier Boyer, submitted her resignation Tuesday Dec. 1 just weeks after she filed a sex discrimination complaint against Genesee County Sheriff Robert Pickell.
- In light of the most recent mass shooting in California this week, public safety at Northern Michigan University says they are prepared to handle a similar situation.
- WLNS does a report on what to do if there is an active shooter situation at a workplace.
- Gwinnett County commissioners gave the Gwinnett County Fire and Emergency Services officials permission this week to accept 500 smoke alarms and a $10,000 stipend from the Michigan Public Health Institute to pay for education programs in elementary schools.
- Kalamazoo County emergency management officials say they've been training to respond to a mass shooting since before September 11.
- The suspects in the San Bernardino shootings used semiautomatic rifles that were legally obtained despite gun laws in California that were intended to ban assault weapons and are widely regarded as among the strictest in the country.
- The woman who helped carry out the shooting in San Bernardino, Calif., on Wednesday had pledged allegiance to the Islamic State in a Facebook posting, according to federal law enforcement officials.
- National Weather Service forecast updates.
- TV clips: Detroit Homeland Security Officials roll out emergency alert system; Self-defense in a shooting situation.

Analysis:

- Media coverage is neutral.
- Heavy coverage on San Bernardino shooting incident that occurred Wednesday, Dec. 2.
- Coverage continues on Flint water issues.
- The Department of Health and Human Services reports that nearly 1,000 children in Flint it tested since the beginning of October, 21 children still have elevated blood lead levels.
- Flint City attorney Peter Blade resigns; Flint Mayor Karen Weaver expects to replace blade despite questions about her authority to make appointments because of the state's oversight.
- Will continue to monitor situation.

FLINT

Congressman Dan Kildee discusses Flint's water emergency in White House meeting

ABC 12, December 3, 2015

FLINT (WJRT)- (12/3/15) - Inside the White House Export Council meeting Thursday, Congressmen Dan Kildee spoke loud and clear to President Obama's cabinet, America's top corporate CEO's and other lawmakers about Flint's water emergency and infrastructure problems plaguing the city.

" It's a city of 100,000 people, that for fourteen months had lead levels in its water system that were so high that 7,000 children under the age of five, for fourteen months, were explose to lead in a way that will affect the trajectory of their lives permanently," Representative Kildee said.

New blood lead level results in from the state

ABC 12, December 3, 2015

FLINT (WJRT) - (12/03/15) - New blood lead level results are in from the state.

The Department of Health and Human Services says of the nearly 1,000 children in Flint it tested since the beginning of October, 21 children still have elevated blood lead levels.

Flint city attorney resigns; New mayor says she expects to name replacement

MLive, December 3, 2015

FLINT – Peter Bade, who served as city attorney throughout Mayor Dayne Walling's six years as mayor, has tendered his resignation.

Bade said today, Dec. 3, that he has accepted a position in the Office of General Counsel at Hurley Medical Center and will serve his last day as city attorney Jan. 1.

MDHHS releases latest data outlining blood lead levels in Flint; follow up care, case management resources continue for families

Michigan.gov, December 3, 2015

LANSING, Mich. – Preliminary data indicates that 30 of 1,361 adults and children tested in Flint since October 1 had elevated blood lead levels, according to a report issued today by the Michigan Department of Health and Human Services.

This marks the first summary report on lead testing called for in the state's action plan related to health concerns about Flint's water infrastructure.

Preliminary state data shows drop in rate of elevated lead levels in Flint

MLive, December 3, 2015

FLINT, MI -- Preliminary data shows 30 of 1,361 adults and children tested since Oct. 1 in Flint had elevated blood lead levels, according to a new state report.

The 2.2 percent rate of elevated blood lead is below the 6 percent rate found in tests done between July and September, the state said.

Congressman Dan Kildee pushes action on Flint Water Crisis, infrastructure investments at White House meeting of President's export council

dankildee.house.gov, December 3, 2015

Congressman Dan Kildee (MI-05) today spoke at the White House about the Flint water crisis and the need for critical investments in our nation's older, industrial cities like Flint, Saginaw and Bay City, especially when it comes to improvements to our infrastructure and aging water systems.

Congressman Kildee's remarks came at a meeting of the President's Export Council, where he is one of only five members of the U.S. House of Representatives appointed to advisory board. The President's Export Council is the principal advisory council to the president on trade and manufacturing, made up of both government and private sector leaders. Since his appointment in January by former Speaker of the House John Boehner, Congressman Kildee has used his position on the council to push for policies that

support American workers and American cities. It has also allowed him to advocate for economic policies that create jobs and boost U.S. manufacturing exports.

Flint water still unsafe without lead filters, professor says

MLive, December 3, 2015

FLINT, MI — The professor whose research helped expose rising levels of lead in drinking water in Flint says it's still not safe to drink without a faucet filter.

Professor Marc Edwards told doctors and others at Hurley Medical Center on Wednesday, Dec. 2, that researchers at Virginia Tech university are continuing to test water samples in Flint, and while lead levels are dropping, they remain above the federal limit for lead in some areas.

EMERGENCY MANAGEMENT AND HOMELAND SECURITY

County official who claims workplace sex discrimination resigns

MLive, December 3, 2015

GENESEEE COUNTY, MI – The head of Genesee County's homeland security, Jenifier Boyer, submitted her resignation Tuesday Dec. 1 just weeks after she filed a sex discrimination complaint against Genesee County Sheriff Robert Pickell.

Boyer filed a complaint against Pickell on Nov. 13 claiming sexual discrimination at the workplace.

Self-defense in a shooting situation

WILX, December 4, 2015

The first option you have in an active shooter situation is to run.

"Anytime you're out, whether you're at a mall, children in school, government building, movie theatre, you should always know your way out. you should always know the quickest exit," said Lt. Brody Boucher with Michigan State Police.

That starts with always being aware of your surroundings. Because if you can't run, the next option is to hide.

NMU officers talk about preparing for active shooters

Upper Michigan Source, December 3, 2015

MARQUETTE — In light of the most recent mass shooting in California this week, public safety at Northern Michigan University says they are prepared to handle a similar situation.

Public safety trains their officers to gather information, secure perimeters, and make contact with shooting suspects. They train year-round with city, county and state officers. In an active shooter situation, people should try to barricade the room they are in with chairs, tables and anything that will keep the shooter out.

Agencies talk emergency communications plans

Up North Live, December 3, 2015

WPBN/WGTU — With the events that happened on Wednesday in California, law enforcement in Northern Michigan said they are prepared to respond to a mass casualty or active shooter situation.

Law enforcement said they're constantly training and will regularly work with other agencies to make sure that they're on the same page.

What to do if an active shooter comes into your workplace

WLNS, December 3, 2015

LANSING, MI (WLNS)- The deadly shooting that happened yesterday is a stark reminder that similar violence could happen almost anywhere.

This begs the question, what plans can you have in place to keep this from happening in your workplace and respond quickly if it did?

Six news spoke to Michigan State Police and officials at MSU about how to plan for the unexpected.

Fire department joining Michigan-based fire safety education program

Gwinnett Daily Post, December 3, 2015

Does your child know what to do when a fire breaks out?

If they don't, Gwinnett County Fire and Emergency Services officials plan to make sure will learn soon enough. County commissioners gave the agency permission this week to accept 500 smoke alarms and a $10,000 stipend from the Michigan Public Health Institute to pay for education programs in elementary schools.

The money enables the department to join the institute's Sound Off with the Home Safety Patrol program as a "super site selection."

Kalamazoo county officials say W. Mich. is prepared for mass shooting event

WWMT, December 3, 2015

KALAMAZOO, Mich. (NEWSCHANNEL 3) - According to the Washington Post, there have been 355 mass shootings this year.

In fact, the shooting in San Bernardino was the second mass shooting on Wednesday alone.

Four people were shot, and one person was killed in Savannah, Georgia.

SAN BERNARDINO SHOOTING

'It was unspeakable': San Bernardino Officer says of shooting scene

NPR, December 4, 2015

Lt. Mike Madden of the San Bernardino police was on his way to lunch when a dispatcher sent out word of an active shooter at the Inland Regional Center.

Madden is a police administrator, and dispatch is one function he oversees. He could tell from the dispatcher's voice that "this was actually happening, a real event. ... We have an active shooter, and we have an active shooter going on in our city."

Couple kept tight lid on plans for San Bernardino shooting

New York Times, December 3, 2015

SAN BERNARDINO, Calif. — Syed Rizwan Farook and Tashfeen Malik met online and married two years ago, after he presented himself on a Muslim dating site as a devout young man who liked to fix cars and memorize the Quran. They registered at Target when Ms. Malik became pregnant, with a cheery newlyweds' catalog of wishes: a car seat, diapers and safety swabs.

But for all the outward signs of suburban normality, this couple, according to the police, used their comfortable home in a middle-class community near here to stockpile weapons and build pipe bombs. And on Wednesday morning, they left their 6-month-old daughter with her grandmother before heading to a holiday party with Mr. Farook's co-workers where, the police say, they killed 14 people and wounded 21 others. A few hours later, they died in a crush of bullets in a brutal face-off with the police.

Weapons in San Bernardino Shootings were legally obtained

New York Times, December 4, 2015

The suspects in the San Bernardino shootings used semiautomatic rifles that were legally obtained despite gun laws in California that were intended to ban assault weapons and are widely regarded as among the strictest in the country.

The rifles were variants of the popular AR-15, the semiautomatic civilian version of a military M-16. They are surprisingly easy to acquire in California, though they come with limitations aimed at curbing their ability to inflict mass damage. Semiautomatic rifles, for instance, cannot have magazines that hold more than 10 bullets or can be quickly removed.

San Bernardino gunwoman pledged allegiance to ISIS, officials say

New York Times, December 4, 2015

WASHINGTON — The woman who helped carry out the shooting in San Bernardino, Calif., on Wednesday had pledged allegiance to the Islamic State in a Facebook posting, according to federal law enforcement officials.

There's no evidence the group directed the woman, Tashfeen Malik, and her husband Syed Rizwan Farook, to launch the attacks, which killed 14 and wounded 21, said the officials, who spoke on the condition of anonymity because the investigation is continuing.

CBS News obtains photos of Calif. Shooters' bombs

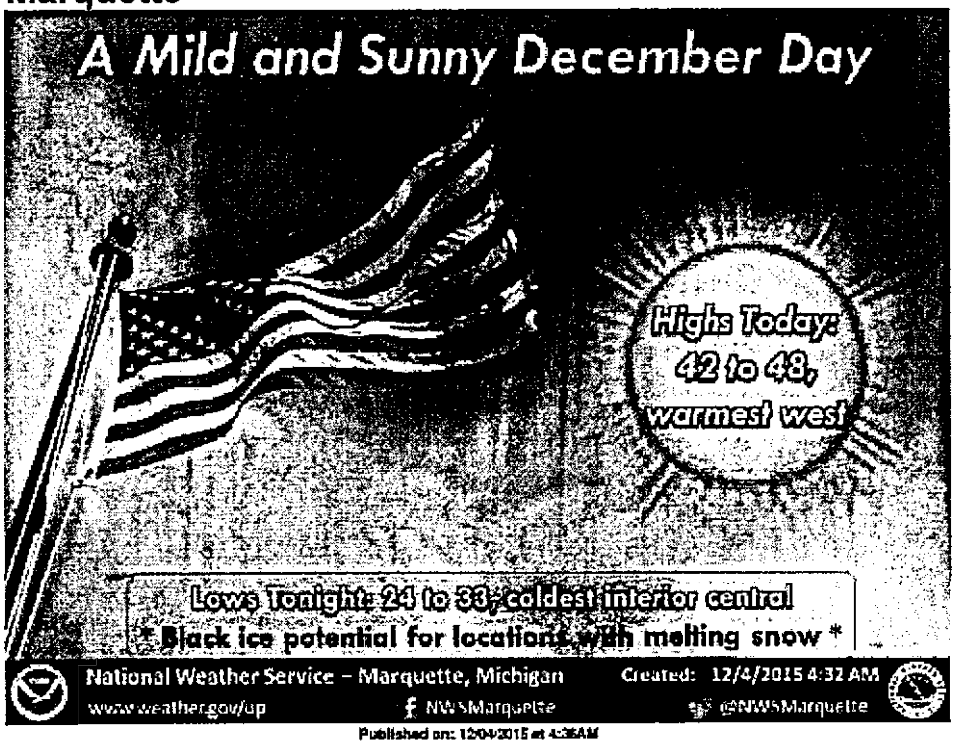
CBS News, December 3, 2015

CBS News has obtained images of explosive devices found at a Southern California social services center and the home of Syed Rizwan Farook, 28, and his wife, Tashfeen Malik, 27.

Below is a photograph of the explosive device found at the facility where the holiday party was held. It is a cell phone photograph taken of the screen of the robot used by bomb squad to evaluate the explosive device. The photo shows a yellow toy car with a remote device intended to be the ignition source and three pipes connected to it and wires.

NATIONAL WEATHER SERVICE FORECASTS

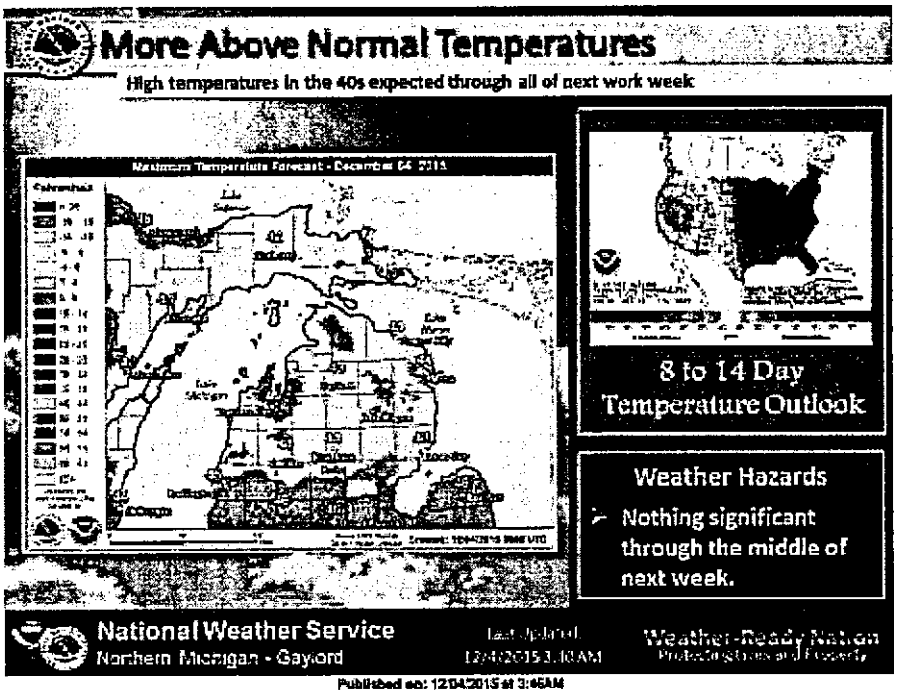
Marquette



Published on: 12/04/2015 at 4:36AM

It will be a mild and sunny December day today, with highs in the 40s. Expect temperatures tonight to bottom out in the mid 20s to low 30s, with the coolest readings over the interior central portions of Upper Michigan. Taking a look ahead to the start of the weekend, temperatures on Saturday should again be in the 40s. A few 50 degree readings will be possible along the Lake Superior shoreline. With warm days and cool nights, the potential exists for melting snow to re-freeze on sidewalks and roadways, causing black ice.

Gaylord



Published on: 12/04/2015 at 3:45AM

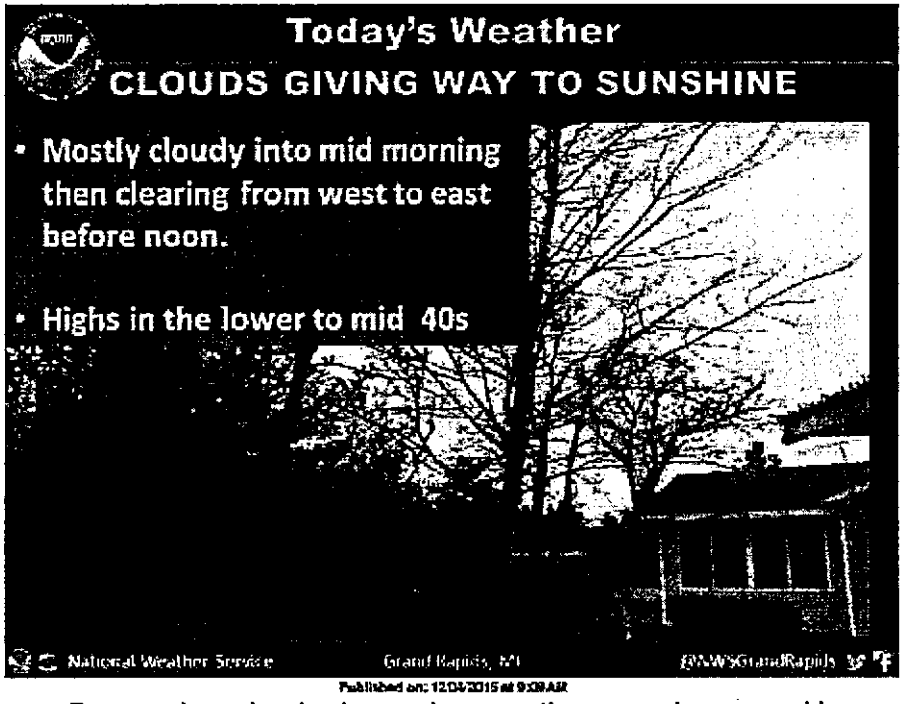
Morning clouds are expected to finally depart, leaving plenty of sun for the afternoon. Precipitation will be very hard to come by, while much warmer than normal temperatures are expected for quite a while. High temperatures through all of next work week will be in the 40s.

Detroit

Published on: 12/04/2015 at 8:47AM

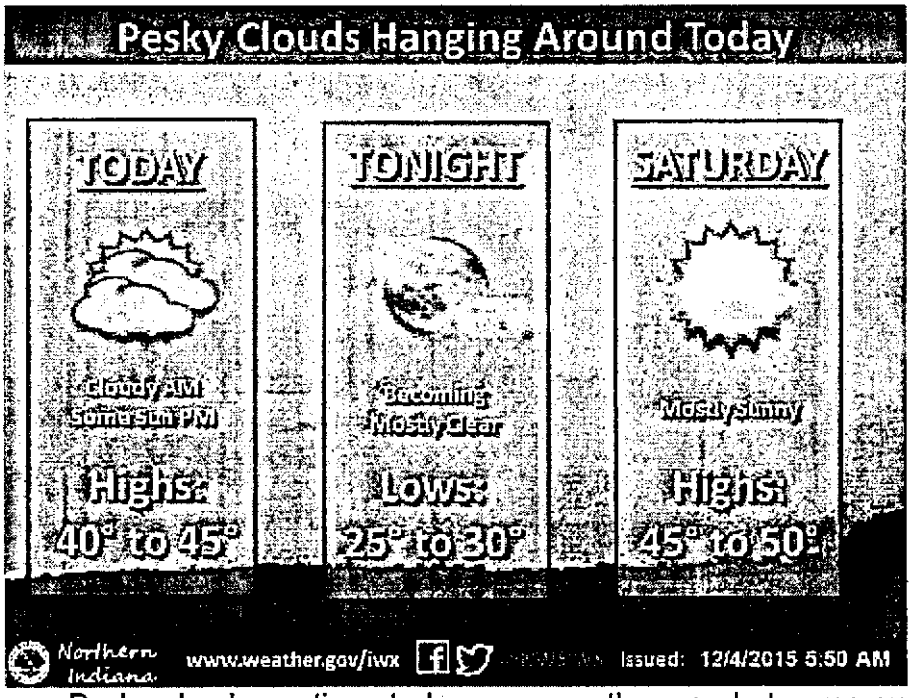
High pressure will influence the region for the next several days, maintaining dry conditions. Southwest flow circulating around this high will maintain an influx of relatively warm air across the region.

Grand Rapids



Decreasing clouds, becoming mostly sunny by noon. Unseasonably warm with highs in the lower to mid 40s.

Northern Indiana



Pesky clouds continue to hang across the area but some sun is expected by this afternoon. Mostly clear skies are expected tonight and Saturday. However...there is a chance that low clouds or even some fog could form once again tonight and spoil this forecast. Highs today will be in the lower 40s and lows tonight will be in the upper 20s.

MEDIA MONITORING REPORT

12/4/2015

Issues:

- No issues to report.

Summary:

- Congressmen Dan Kildee spoke loud and clear to President Obama's cabinet, America's top corporate CEO's and other lawmakers about Flint's water emergency and infrastructure problems plaguing the city.
- The Department of Health and Human Services says of the nearly 1,000 children in Flint it tested since the beginning of October, 21 children still have elevated blood lead levels.
- Preliminary state data indicates that 30 of 1,361 adults and children tested in Flint since October 1 had elevated blood lead levels, according to a report issued today by the Michigan Department of Health and Human Services.
- Peter Bade, who served as city attorney throughout Mayor Dayne Walling's six years as mayor, has tendered his resignation.
- The professor whose research helped expose rising levels of lead in drinking water in Flint says it's still not safe to drink without a faucet filter.
- The head of Genesee County's homeland security, Jenifier Boyer, submitted her resignation Tuesday Dec. 1 just weeks after she filed a sex discrimination complaint against Genesee County Sheriff Robert Pickell.
- In light of the most recent mass shooting in California this week, public safety at Northern Michigan University says they are prepared to handle a similar situation.
- WLNS does a report on what to do if there is an active shooter situation at a workplace.
- Gwinnett County commissioners gave the Gwinnett County Fire and Emergency Services officials permission this week to accept 500 smoke alarms and a $10,000 stipend from the Michigan Public Health Institute to pay for education programs in elementary schools.
- Kalamazoo County emergency management officials say they've been training to respond to a mass shooting since before September 11.
- The suspects in the San Bernardino shootings used semiautomatic rifles that were legally obtained despite gun laws in California that were intended to ban assault weapons and are widely regarded as among the strictest in the country.
- The woman who helped carry out the shooting in San Bernardino, Calif., on Wednesday had pledged allegiance to the Islamic State in a Facebook posting, according to federal law enforcement officials.
- National Weather Service forecast updates.
- TV clips: Detroit Homeland Security Officials roll out emergency alert system; Self-defense in a shooting situation.

Analysis:

- Media coverage is neutral.
- Heavy coverage on San Bernardino shooting incident that occurred Wednesday, Dec. 2.
- Coverage continues on Flint water issues.
- The Department of Health and Human Services reports that nearly 1,000 children in Flint it tested since the beginning of October, 21 children still have elevated blood lead levels.
- Flint City attorney Peter Blade resigns; Flint Mayor Karen Weaver expects to replace blade despite questions about her authority to make appointments because of the state's oversight.
- Will continue to monitor situation.

FLINT

Congressman Dan Kildee discusses Flint's water emergency in White House meeting

ABC 12, December 3, 2015

FLINT (WJRT)- (12/3/15) - Inside the White House Export Council meeting Thursday, Congressmen Dan Kildee spoke loud and clear to President Obama's cabinet, America's top corporate CEO's and other lawmakers about Flint's water emergency and infrastructure problems plaguing the city.

" It's a city of 100,000 people, that for fourteen months had lead levels in its water system that were so high that 7,000 children under the age of five, for fourteen months, were explose to lead in a way that will affect the trajectory of their lives permanently," Representative Kildee said.

New blood lead level results in from the state

ABC 12, December 3, 2015

FLINT (WJRT) - (12/03/15) - New blood lead level results are in from the state.

The Department of Health and Human Services says of the nearly 1,000 children in Flint it tested since the beginning of October, 21 children still have elevated blood lead levels.

Flint city attorney resigns; New mayor says she expects to name replacement

MLive, December 3, 2015

FLINT – Peter Bade, who served as city attorney throughout Mayor Dayne Walling's six years as mayor, has tendered his resignation.

Bade said today, Dec. 3, that he has accepted a position in the Office of General Counsel at Hurley Medical Center and will serve his last day as city attorney Jan. 1.

MDHHS releases latest data outlining blood lead levels in Flint; follow up care, case management resources continue for families

Michigan.gov, December 3, 2015

LANSING, Mich. – Preliminary data indicates that 30 of 1,361 adults and children tested in Flint since October 1 had elevated blood lead levels, according to a report issued today by the Michigan Department of Health and Human Services.

This marks the first summary report on lead testing called for in the state's action plan related to health concerns about Flint's water infrastructure.

Preliminary state data shows drop in rate of elevated lead levels in Flint

MLive, December 3, 2015

FLINT, MI – Preliminary data shows 30 of 1,361 adults and children tested since Oct. 1 in Flint had elevated blood lead levels, according to a new state report.

The 2.2 percent rate of elevated blood lead is below the 6 percent rate found in tests done between July and September, the state said.

Congressman Dan Kildee pushes action on Flint Water Crisis, infrastructure investments at White House meeting of President's export council

dankildee.house.gov, December 3, 2015

Congressman Dan Kildee (MI-05) today spoke at the White House about the Flint water crisis and the need for critical investments in our nation's older, industrial cities like Flint, Saginaw and Bay City, especially when it comes to improvements to our infrastructure and aging water systems.

Congressman Kildee's remarks came at a meeting of the President's Export Council, where he is one of only five members of the U.S. House of Representatives appointed to advisory board. The President's Export Council is the principal advisory council to the president on trade and manufacturing, made up of both government and private sector leaders. Since his appointment in January by former Speaker of the House John Boehner, Congressman Kildee has used his position on the council to push for policies that

support American workers and American cities. It has also allowed him to advocate for economic policies that create jobs and boost U.S. manufacturing exports.

Flint water still unsafe without lead filters, professor says

MLive, December 3, 2015

FLINT, MI — The professor whose research helped expose rising levels of lead in drinking water in Flint says it's still not safe to drink without a faucet filter.

Professor Marc Edwards told doctors and others at Hurley Medical Center on Wednesday, Dec. 2, that researchers at Virginia Tech university are continuing to test water samples in Flint, and while lead levels are dropping, they remain above the federal limit for lead in some areas.

EMERGENCY MANAGEMENT AND HOMELAND SECURITY

County official who claims workplace sex discrimination resigns

MLive, December 3, 2015

GENESEEE COUNTY, MI – The head of Genesee County's homeland security, Jenifier Boyer, submitted her resignation Tuesday Dec. 1 just weeks after she filed a sex discrimination complaint against Genesee County Sheriff Robert Pickell.

Boyer filed a complaint against Pickell on Nov. 13 claiming sexual discrimination at the workplace.

Self-defense in a shooting situation

WILX, December 4, 2015

The first option you have in an active shooter situation is to run.

"Anytime you're out; whether you're at a mall, children in school, government building, movie theatre, you should always know your way out. you should always know the quickest exit," said Lt. Brody Boucher with Michigan State Police.

That starts with always being aware of your surroundings. Because if you can't run, the next option is to hide.

NMU officers talk about preparing for active shooters

Upper Michigan Source, December 3, 2015

MARQUETTE — In light of the most recent mass shooting in California this week, public safety at Northern Michigan University says they are prepared to handle a similar situation.

Public safety trains their officers to gather information, secure perimeters, and make contact with shooting suspects. They train year-round with city, county and state officers. In an active shooter situation, people should try to barricade the room they are in with chairs, tables and anything that will keep the shooter out.

Agencies talk emergency communications plans

Up North Live, December 3, 2015

WPBN/WGTU — With the events that happened on Wednesday in California, law enforcement in Northern Michigan said they are prepared to respond to a mass casualty or active shooter situation.

Law enforcement said they're constantly training and will regularly work with other agencies to make sure that they're on the same page.

What to do if an active shooter comes into your workplace

WLNS, December 3, 2015

LANSING, MI (WLNS)- The deadly shooting that happened yesterday is a stark reminder that similar violence could happen almost anywhere.

This begs the question, what plans can you have in place to keep this from happening in your workplace and respond quickly if it did?

Six news spoke to Michigan State Police and officials at MSU about how to plan for the unexpected.

Fire department joining Michigan-based fire safety education program

Gwinnett Daily Post, December 3, 2015

Does your child know what to do when a fire breaks out?

If they don't, Gwinnett County Fire and Emergency Services officials plan to make sure will learn soon enough. County commissioners gave the agency permission this week to accept 500 smoke alarms and a $10,000 stipend from the Michigan Public Health Institute to pay for education programs in elementary schools.

The money enables the department to join the institute's Sound Off with the Home Safety Patrol program as a "super site selection."

Kalamazoo county officials say W. Mich. is prepared for mass shooting event

WWMT, December 3, 2015

KALAMAZOO, Mich. (NEWSCHANNEL 3) - According to the Washington Post, there have been 355 mass shootings this year.

In fact, the shooting in San Bernardino was the second mass shooting on Wednesday alone.

Four people were shot, and one person was killed in Savannah, Georgia.

SAN BERNARDINO SHOOTING

'It was unspeakable': San Bernardino Officer says of shooting scene

NPR, December 4, 2015

Lt. Mike Madden of the San Bernardino police was on his way to lunch when a dispatcher sent out word of an active shooter at the Inland Regional Center.

Madden is a police administrator, and dispatch is one function he oversees. He could tell from the dispatcher's voice that "this was actually happening, a real event. ... We have an active shooter, and we have an active shooter going on in our city."

Couple kept tight lid on plans for San Bernardino shooting

New York Times, December 3, 2015

SAN BERNARDINO, Calif. — Syed Rizwan Farook and Tashfeen Malik met online and married two years ago, after he presented himself on a Muslim dating site as a devout young man who liked to fix cars and memorize the Quran. They registered at Target when Ms. Malik became pregnant, with a cheery newlyweds' catalog of wishes: a car seat, diapers and safety swabs.

But for all the outward signs of suburban normality, this couple, according to the police, used their comfortable home in a middle-class community near here to stockpile weapons and build pipe bombs. And on Wednesday morning, they left their 6-month-old daughter with her grandmother before heading to a holiday party with Mr. Farook's co-workers where, the police say, they killed 14 people and wounded 21 others. A few hours later, they died in a crush of bullets in a brutal face-off with the police.

Weapons in San Bernardino Shootings were legally obtained

New York Times, December 4, 2015

The suspects in the San Bernardino shootings used semiautomatic rifles that were legally obtained despite gun laws in California that were intended to ban assault weapons and are widely regarded as among the strictest in the country.

The rifles were variants of the popular AR-15, the semiautomatic civilian version of a military M-16. They are surprisingly easy to acquire in California, though they come with limitations aimed at curbing their ability to inflict mass damage. Semiautomatic rifles, for instance, cannot have magazines that hold more than 10 bullets or can be quickly removed.

San Bernardino gunwoman pledged allegiance to ISIS, officials say

New York Times, December 4, 2015

WASHINGTON — The woman who helped carry out the shooting in San Bernardino, Calif., on Wednesday had pledged allegiance to the Islamic State in a Facebook posting, according to federal law enforcement officials.

There's no evidence the group directed the woman, Tashfeen Malik, and her husband Syed Rizwan Farook, to launch the attacks, which killed 14 and wounded 21, said the officials, who spoke on the condition of anonymity because the investigation is continuing.

CBS News obtains photos of Calif. Shooters' bombs

CBS News, December 3, 2015

CBS News has obtained images of explosive devices found at a Southern California social services center and the home of Syed Rizwan Farook, 28, and his wife, Tashfeen Malik, 27.

Below is a photograph of the explosive device found at the facility where the holiday party was held. It is a cell phone photograph taken of the screen of the robot used by bomb squad to evaluate the explosive device. The photo shows a yellow toy car with a remote device intended to be the ignition source and three pipes connected to it and wires.

Booth Newspapers Rises Again In State Government Communications

By Zachary Gorchow
Editor
Posted: November, 24 2015 11:20 AM

Governor Rick Snyder's naming of longtime journalist Meegan Holland as his new communications director cemented something that has been developing for some time now – many key state communications officials have significant experience in the old Booth Newspapers chain.

Now known as MLive, Booth was the former umbrella organization covering the Ann Arbor News, Jackson Citizen-Patriot, Kalamazoo Gazette, Muskegon Chronicle, Grand Rapids Press, Flint Journal, Saginaw News and Bay City Times.

Ms. Holland held a variety of leadership roles as a Booth editor over the years. She'll be working closely with Dave Murray, the newly named press secretary for Mr. Snyder, who spent his career mostly with the Flint Journal and Grand Rapids Press as an education beat reporter.

In the departments, Chris Gautz handles the spokesperson role at the Department of Corrections. He had a stint at the Jackson Citizen-Patriot (and later worked at Gongwer News Service). Bob Wheaton, a former reporter at the Flint Journal and editor at the Citizen-Patriot, is a spokesperson at the Department of Health and Human Services. Jeff Cranson, a former longtime deputy metro editor at the Grand Rapids Press, heads up communications now for the Department of Transportation. Ed Golder, a former editorial page editor at the Press, handles communications for the Department of Natural Resources.

Katie Bach, a former Flint Journal community news editor, is the media affairs manager at the Michigan State Housing Development Authority. And Gisgie Davila Gendreau, a former reporter in the Booth Lansing Bureau, is the communications director for the Department of State.

Of the eight, five went straight from Booth to the state while the other two worked other jobs before landing in state government. Some of this is a sign of the terrible turbulence that continues to roil the newspaper industry.

The situation with Booth from 2009-11 was dire. The Ann Arbor News discontinued its print publication. Several other newspapers in the chain reduced print publication days. Once columnist Peter Luke left the Booth Lansing Bureau, which in the 1980s and 1990s and still into the 2000s was a journalistic force in this city, the chain had no state Capitol presence for a period.

Thankfully, Booth, upon rebranding as MLive, revived the Lansing Bureau and hired good people to restore a proud tradition. Still, it has not been all sunshine and rainbows since then. MLive laid off Ms. Holland and another talented journalist in the Lansing Bureau in cost-cutting moves about a year ago.

When that happened, Ms. Holland said she had no regrets and it was time for new adventures. She'll be in good company with her fellow former Boothies as she gets started.

Subject: FW: Declaration Questions

As discussed...

From: Kelenske, Chris (MSP)
Sent: Friday, November 13, 2015 2:55 PM
To: Smith, Paul (GOV)
Cc: Etue, Kriste (MSP); Gorski, Gary (MSP); Katarsky, Anthony (MSP)
Subject: Declaration Questions

Paul

Per your call/question the other day reference a state declaration of an emergency in Flint:

As you know, the Governor can declare at any time for any reason

- From PA 390... "Emergency" means any occasion or instance in which the governor determines state assistance is needed to supplement local efforts and capabilities to save lives, protect property and the public health and safety, or to lessen or avert the threat of a catastrophe in any part of the state.
- From the start, the state (EMHSD as well as other state agencies) was engaged and EMSHD continually urged officials to work with and through the local EM to coordinate the response and recovery.
- A local declaration of an emergency was never put in place and local resources were being used in conjunction with the DCH.
- We never received any requests for assistance under PA390.

What is gained with a Governor's Declaration?

- Command and control for 28 days
- Ability to apply Section 19 funding
- Ability to apply Section 18 funding

Discussion Points

- There is no local declaration of an emergency; there is no request for state assistance under PA390.
    - Local resources have been sufficient to address the situation (outside of needing money which I believe is being handled).
- The state will formally own the event if we put a Governor's Declaration in place. This could be viewed as the state having owned up to how the water issue was caused (e.g. "The triggering event was caused by the state; that is why the state is now declaring.").
- A state declaration sets a precedent for issuing a state declaration for an infrastructure maintenance event. What if lead is found in other areas of the state's drinking water due to infrastructure issues? This action opens the door to any other jurisdiction with water quality issues.
- State financial support has already been provided outside of PA 390, so timing is questionable.
- Section 18 use could drain the Disaster Contingency Fund.

Please let me know if you would like to discuss or if this is not what you were looking for.

Chris

Subject: Declaration Questions

Paul

Per your call/question the other day reference a state declaration of an emergency in Flint:

As you know, the Governor can declare at any time for any reason

- From PA 390... "Emergency" means any occasion or instance in which the governor determines state assistance is needed to supplement local efforts and capabilities to save lives, protect property and the public health and safety, or to lessen or avert the threat of a catastrophe in any part of the state.
- From the start, the state (EMHSD as well as other state agencies) was engaged and EMSHD continually urged officials to work with and through the local EM to coordinate the response and recovery.
- A local declaration of an emergency was never put in place and local resources were being used in conjunction with the DCH.
- We never received any requests for assistance under PA390.

What is gained with a Governor's Declaration?

- Command and control for 28 days
- Ability to apply Section 19 funding
- Ability to apply Section 18 funding

Discussion Points

- There is no local declaration of an emergency; there is no request for state assistance under PA390.
    - Local resources have been sufficient to address the situation (outside of needing money which I believe is being handled).
- The state will formally own the event if we put a Governor's Declaration in place. This could be viewed as the state having owned up to how the water issue was caused (e.g. "The triggering event was caused by the state; that is why the state is now declaring.").

- A state declaration sets a precedent for issuing a state declaration for an infrastructure maintenance event. What if lead is found in other areas of the state's drinking water due to infrastructure issues? This action opens the door to any other jurisdiction with water quality issues.
- State financial support has already been provided outside of PA 390, so timing is questionable.
- Section 18 use could drain the Disaster Contingency Fund.

Please let me know if you would like to discuss or if this is not what you were looking for.

MEDIA MONITORING REPORT

11/19/2015

Issues:

- No issues to report.

Summary:

- Over the next three days, Southeast Michigan is going to slowly descend from sunny skies and unseasonably warm temperatures into a rainy/snowy weekend.
- A wind advisory is in effect for the second half of the day in the Muskegon area, and snow could be on its way.
- Winter storm watches are posted in parts of five Midwest states as the first accumulating snow of the season for some in the Upper Midwest, Corn Belt, and Great Lakes will put an exclamation mark on a week of change in the weather pattern.
- A sexual discrimination complaint has been filed against Genesee County Sheriff Robert Pickell by the head of the sheriff's homeland security office.
- A mock active shooting training exercise last year at Romeo High School may have been the tipping point for identifying shortcomings with Macomb County's emergency communications system.
- Efforts are taking place to help deal with damage that remains from August 2014 flooding in Detroit.
- Gov. Rick Snyder announced that the state of Michigan has retained its accreditation by the Emergency Management Accreditation Program. This national accreditation reaffirms the ability of state government to prepare for and respond to all types of emergencies and disasters.
- The Belgian jihadi suspected of masterminding deadly attacks in Paris died along with his cousin in a police raid on a suburban apartment building, officials said Thursday.
- At least three dozen people in the United States suspected of ties to the Islamic State were under heavy electronic or physical surveillance even before the Paris attacks, senior American officials say.

- Governor Rick Snyder was the first governor in the nation to speak out on refugees following last week's terrorist attacks in Paris and Beirut. And he may have come to regret it as he tries to clarify his position vis a vis what a lot of the nation's other Republican governors are saying about refugees and immigration.
- Oakland County Executive L. Brooks Patterson has stepped into the Syrian refugee debate by urging Pontiac Mayor Deirdre Waterman to discontinue her support of housing Syrian refugees in Pontiac.
- A Republican legislator is renewing a push to lift Wisconsin's moratorium on new nuclear power plants, saying the state's manufacturers must have a reliable source of energy as burning fossil fuels grows more expensive.
- Leaders from the Flint area want stronger regulation of public drinking water systems to avoid more problems such as the lead contamination that has plagued the Michigan city.
- Elected officials and activists have delivered the story of Flint's lead in water crisis in person to the federal government, testifying Wednesday, Nov. 18, before a U.S. EPA advisory council.

Analysis:

- Media coverage is neutral.
- Snow is looking more and more likely this weekend. Confidence is great about having snow; however, the amount is uncertain at this time. Forecasts are ranging from 1 to 6 inches.
- Will continue to monitor the evolving weather conditions.

MICHIGAN WEATHER

Up to 6 inches of snow on way as Michigan's temps cool

The Detroit News, Nov. 19, 2015

Over the next three days, the metro area is going to slowly descend from sunny skies and unseasonably warm temperatures into a rainy/snowy weekend.

"Things are going to be turning cooler starting Thursday night into Friday," meteorologist Sara Schultz said. "Thursday will be pretty nice with highs in the lower 50s, but temperatures will begin to drop at night. On Thursday, we can also expect a little wind with gusts as high as the lower 30s."

Friday is expected to be dry with a high temperature in the low 40s while the nighttime low will be around 30 degrees.

"We have the potential for snow starting Friday night into Saturday," Schultz said. "We have a chance of one or two inches in the metro area, but it will most likely be rain mixed with snow."

Wild weather on its way with high winds, waves then snow predicted

MLive-Muskegon, Nov. 19, 2015

MUSKEGON, MI – A wind advisory is in effect for the second half of the day in the Muskegon area, and snow could be on its way.

The National Weather Service advisory, in effect from noon to midnight Thursday, Nov. 19, calls for wind gusts up to 50 mph, particularly along the lake. A gale warning is in effect for Lake Michigan, with waves expected to be 6 to 10 feet Thursday night.

Then on Friday, a storm system possibly bringing up to 9 inches of snow, will move into the area and linger through Wednesday, according to a hazardous weather outlook statement from the Weather Service.

First Snow of Season Ahead in Parts of the Midwest, Including Chicago, Detroit, Milwaukee; Winter Storm Watches Issued

Weather Channel, Nov. 19, 2015

Winter storm watches are posted in parts of five Midwest states as the first accumulating snow of the season for some in the Upper Midwest, Corn Belt, and Great Lakes will put an exclamation mark on a week of change in the weather pattern.

A swath from northeast Nebraska and southeast South Dakota into Iowa, southern Wisconsin and northern Illinois is covered by winter storm watches issued by local National Weather Service offices. In the much of the Upper Midwest, this means a potential for at least 6 inches of snow in 12 hours, or 8 inches of snow in 24 hours.

EMERGENCY MANAGEMENT AND HOMELAND SECURITY

County homeland security head files sexual discrimination claim against sheriff

MLive-Flint, Nov. 18, 2015

GENESEE COUNTY, MI – A sexual discrimination complaint has been filed against Genesee County Sheriff Robert Pickell by the head of the sheriff's homeland security office.

enifier Boyer filed a complaint against Pickell Nov. 13 claiming sexual discrimination at the workplace.

Boyer's attorney, Glen Lenhoff who is speaking on her behalf, declined to detail specifics of the complaint. The Flint Journal through the Freedom of Information Act has requested a copy of the complaint.

"Jenifier Boyer is a very honorable and highly educated woman," Lenhoff said. "Her sex discrimination complaint against Mr. Pickell must be taken very serious by the Genesee County commissioners. A complaint and un-biased investigation must be completed immediately. She is the highest female managerial person in the whole department."

Macomb County in Michigan Gets $10 Million Plan to Beef up Police Communications

Detroit Free Press, Nov.17, 2015

A mock active shooting training exercise last year at Romeo High School may have been the tipping point for identifying shortcomings with Macomb County's emergency communications system.

Officials were trying to show what the new communications center filled with video screens and dispatchers can do by infiltrating camera systems in local schools. Those watching at the communications center in Mt. Clemens could see what was happening live as the SWAT exercise unfolded, but they couldn't talk with the officers inside the school.

"Had it been real, it would have been disastrous," County Executive Mark Hackel said Thursday. "We need to enhance this. It enhances everyone's ability to communicate with each other."

Volunteer effort seeks to deal with 2014 flood damage

Associated Press, Nov. 17, 2015

DETROIT (AP) - Efforts are taking place to help deal with damage that remains from August 2014 flooding in Detroit.

The city says about 3,000 families still are living in homes damaged by the flooding despite more than $60 million in Federal Emergency Management Agency funds being distributed for city residents. Millions more has been made available in southeast Michigan.

A group called All Hands Volunteers, in partnership with Northwest Detroit Flood Recovery Project and United Methodist Committee on Relief, will be working to clean up at least 100 homes between Thursday and Dec. 1. The partnership is called All Hands On Detroit.

Those organizing the effort are seeking volunteers. Organizers will provide training and necessary safety equipment. Signup details are online.

State retains emergency management accreditation

Hillsdale Daily News, Nov. 18, 2015

Gov. Rick Snyder today announced that the state of Michigan has retained its accreditation by the Emergency Management Accreditation Program. This national accreditation reaffirms the ability of state government to prepare for and respond to all types of emergencies and disasters.

"The state of Michigan continues to be a national emergency management and homeland security leader," Snyder said. "In Michigan, we are committed to having a system in place that ensures our residents are prepared for all hazards, whether natural or human-made. I commend the Michigan State Police and the other state departments for their dedication and commitment in this arena."

PARIS ATTACKS

Suspected mastermind of Paris attacks killed

Associated Press, Nov. 19, 2015

Paris — The Belgian jihadi suspected of masterminding deadly attacks in Paris died along with his cousin in a police raid on a suburban apartment building, officials said Thursday.

Paris Prosecutor Francois Molins' office said 27-year-old Abdelhamid Abaaoud was identified based on skin samples, but authorities did not know how he died. His body was found in the apartment building targeted in the chaotic and bloody raid in the Paris suburb of Saint-Denis on Wednesday.

Three police officials say a woman who died in the raid was Abaaoud's cousin. One said Hasna Aitboulahcen is believed to have detonated a suicide vest after a brief conversation with police officers.

The official confirmed an audio recording, punctuated by gunshots, in which an officer asks: "Where is your boyfriend?" and she responded angrily: "He's not my boyfriend!" Then loud bangs are heard.

The exact relationship between Abaaoud and Aitboulahcen was not clear.

U.S. Investigators Struggle to Track Homegrown ISIS Suspects

New York Times, Nov. 19, 2015

WASHINGTON — At least three dozen people in the United States suspected of ties to the Islamic State were under heavy electronic or physical surveillance even before the Paris attacks, senior American officials say. But unlike the attackers in France, the officials say, the majority of those under investigation here never traveled to Syria to fight alongside the Islamic State or receive training from it.

In many ways, the officials say, that makes the American investigations even harder. Those under investigation typically have little terrorism expertise or support from a cell, which makes thwarting an Islamic State-inspired attack in the United States less like stopping a traditional terrorist plot and more like trying to prevent a school shooting.

SYRIAN REFUGEES

Syrian refugees controversy gets Lansing's attention

Lansing State Journal, Nov. 19, 2015

LANSING - The resettlement of Syrian refugees in Michigan is a controversial issue, but several Lansing area organizations and leaders are ready to help others get out of the warn-torn country.

St. Vincent Catholic Charities has resettled in Mid-Michigan over 20,000 refugees from around the world in the last 30 years and hopes to welcome up to 100 from Syria within the next year — if the federal government continues allowing the placements.

"We'll keep doing what we do and we'll see what happens," said Judi Harris, program director for refugee services at St. Vincent. "I think it's a little too early right now to change anything."

Students, faculty respond to Snyder's refugee stance

Michigan Daily (U of M), Nov. 19, 2015

In wake of terrorist attacks in Paris that left 129 dead, Michigan Gov. Rick Snyder joined 31 governors in vowing to pause the entry of Syrian refugees into their states.

Early reports indicated that one the attackers may have been a refugee from Syria, though officials now say that theory was likely incorrect. Even so, that notion stoked fears that ISIS fighters would enter the country along with the refugees fleeing their violent campaigns.

In response, LSA senior Sarah Raoof and Public Health students Tala Dahbour and Reem Kashlan launched a letter-writing campaign on Facebook. The campaign encourages students to visit the "Share your Opinion" page on the governor's website to send either a pre-written or personal letter expressing opposition to his plan to block Syrian refugees.

Snyder trying to clear his record in statements on refugees

Michigan Radio, Nov. 19, 2015

Governor Rick Snyder was the first governor in the nation to speak out on refugees following last week's terrorist attacks in Paris and Beirut. And he may have come to regret it as he tries to clarify his position vis a vis what a lot of the nation's other Republican governors are saying about refugees and immigration.

Following the attacks, Governor Snyder said he was hitting the "pause" button on efforts to get more visas for Middle Eastern refugees to settle in Michigan.

Oakland County Executive orders staff to end support of Pontiac Syrian housing project

Oakland Press, Nov. 18, 2015

Oakland County Executive L. Brooks Patterson has stepped into the Syrian refugee debate by urging Pontiac Mayor Deirdre Waterman to discontinue her support of housing Syrian refugees in Pontiac.

The development in question is proposed for a 10-block area near Franklin Road and South Boulevard.

The move follows calls from several governors' announcements — including one from Michigan Gov. Rick Snyder — to postpone accepting Syrian refugees.

Snyder can't legally refuse refugees, but he probably won't roll out the welcome mat

Michigan Radio, Nov. 18, 2015

When Gov. Rick Synder's office released a statement asking the Department of Homeland Security to review the vetting process for Syrian refugees seeking asylum in the United States after the terrorist attacks in Paris, the reaction was swift.

Soon dozens of governors declared their opposition or support of settling Syrian refugees in their respective states.

However, Detroit Free Press Capitol Hill reporter Todd Spangler tells Stateside host Cynthia Canty that state governors have no legal say when it comes to accepting refugees.

Kaffer: Snyder's political pandering on refugees shames us all

Detroit Free Press, Nov. 19, 2015

One of the worst things about terrorism is it works. Last week's deadly terrorist attacks in Paris did exactly what its perpetrators intended: killed innocent Parisians, surely, but caused people across the globe to worry that they'd be next, to fear sudden death or torment at the hands of anonymous, implacable attackers.

It's hard to argue with fear. It allows little room for cool-headed decision making.

And in that context, the "circle the wagons" response of many Americans after the Paris attacks is understandable. It is manifest most publicly in a resistance toward accepting refugees from Syria, where the Islamic State in Iraq and Syria holds territory.

The U.S. has taken in 1,800 Syrian refugees in the last two years. Because conflict in Syria is ongoing, and because the number of refugees has taxed that country's immediate neighbors, President Barack Obama has said the U.S. will take in 10,000 refugees by the end of 2016.

Compounded by the current story that one of the attackers entered France with a phony passport, with a trail indicating he'd entered France as a refugee, it's easy to understand why many Americans might fear an onrush of poorly vetted immigrants from Syria that could include criminals bent on harm.

But that's not how it works.

And it's impossible to understand why some elected officials -- like Gov. Rick Snyder -- have opted not to educate and inform, but to fan the flames of suspicion and intolerance. Snyder, along with 33 other governors, have said they will halt efforts to accept Syrian refugees, something they are not legally capable of doing. This boneheaded move is particularly startling in Snyder's case; for years, he's pitched Michigan as a destination for immigrants, suggesting that new residents from overseas could help reverse the state's population loss.

MICHIGAN NUCLEAR

Michigan legislators urge new Canadian PM to say 'no' to nuclear dump

The Voice, Nov. 19, 201`5

Michigan's two U.S. senators and 10 of its 14 U.S. representatives wasted little time in signing a letter to new Canadian Prime Minister Justin Trudeau, urging his government to deny the necessary permits to Ontario Power Generation to build a nuclear waste dump 2,200 feet underground less than a mile from Lake Huron.

The letter went out on Nov. 5, the day after Trudeau was sworn in as prime minister and proceeded to appoint a diverse cabinet comprising 15 men and 15 women.

After congratulating Trudeau on becoming Canada's 23rd prime minister, the U.S. politicians zeroed in on the issue at hand.

Wisconsin Republicans push to lift nuclear plant moratorium

Associated Press, Nov. 16, 2015

MADISON, Wis. (AP) — A Republican legislator is renewing a push to lift Wisconsin's moratorium on new nuclear power plants, saying the state's manufacturers must have a reliable source of energy as burning fossil fuels grows more expensive.

Under current Wisconsin law, state regulators can't grant permission for a new nuclear power plant unless a federal storage facility for the waste from nuclear plants across the country exists and the plant wouldn't burden state ratepayers. No such centralized storage facility exists, however. President Barack Obama's administration pulled funding for creating one at Nevada's Yucca Mountain, leaving nuclear plants to continue storing waste on-site in pools and casks.

FLINT WATER

Flint leaders seek tougher rules on lead in drinking water

Associated Press, Nov. 18, 2015

Leaders from the Flint area want stronger regulation of public drinking water systems to avoid more problems such as the lead contamination that has plagued the Michigan city.

U.S. Rep. Dan Kildee told the Environmental Protection Agency's National Drinking Water Council the lead pollution of Flint's water was a "failure of government." The council met Wednesday near Washington, D.C., to discuss revising a federal rule on lead and copper levels in water.

Story of Flint water crisis, 'failure of government,' unfolds in Washington

MLive-Flint, Nov. 18, 2015

FLINT, MI -- Elected officials and activists have delivered the story of Flint's lead in water crisis in person to the federal government, testifying Wednesday, Nov. 18, before a U.S. EPA advisory council.

"What happened in Flint is a failure of government, and we must ensure that it never happens again to Flint or any other community," U.S. Rep. Dan Kildee, D-Flint, said in opening testimony to the National Drinking Water Advisory Council. "The EPA has the ultimate responsibility to ensure that drinking water standards are followed."

In addition to Kildee, state Senate Minority Leader Jim Ananich, D-Flint; Dr. Mona Hanna-Attisha of Hurley Medical Center; Flint resident LeeAnne Walters; and professor Marc Edwards of Virginia Tech university all testified to the council, which is considering changes in federal rules on lead in water.

Flint doctor who exposed lead health crisis calls for change by the EPA

WJRT-TV 12 in Flint, Nov. 18, 2015

WASHINGTON, D.C. (WJRT) - (11/18/15) - The doctor who helped expose Flint's problem with lead in the drinking water spent Wednesday morning talking about the issue before leaders in Washington D.C.

Dr. Mona Hanna-Attisha testified before the Environmental Protection Agency, along with a Flint mother who claims her child has lead poisoning.

Hanna-Attisha used a PowerPoint presentation to showcase how something like this can happen anywhere across the country, not only in Flint.

MSU holds forum on Flint water

WJRT-TV 12 in Flint, Nov. 18, 2015

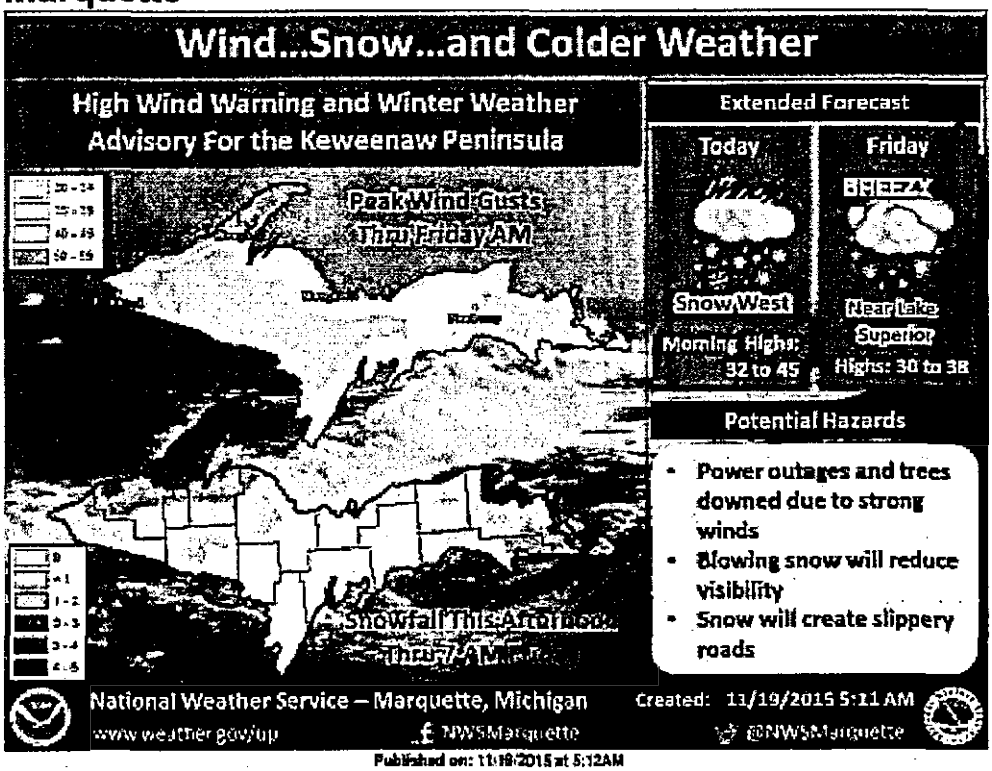
EAST LANSING (WJRT) - (11/18/15) - It's well beyond just the talk of the town.

It's the reason behind protests and the subject of mayoral debates, conversations in Lansing and now, hearings in Washington.

But ask a college student 50 miles away about Flint's water emergency and a lot of them will say they haven't heard about it.

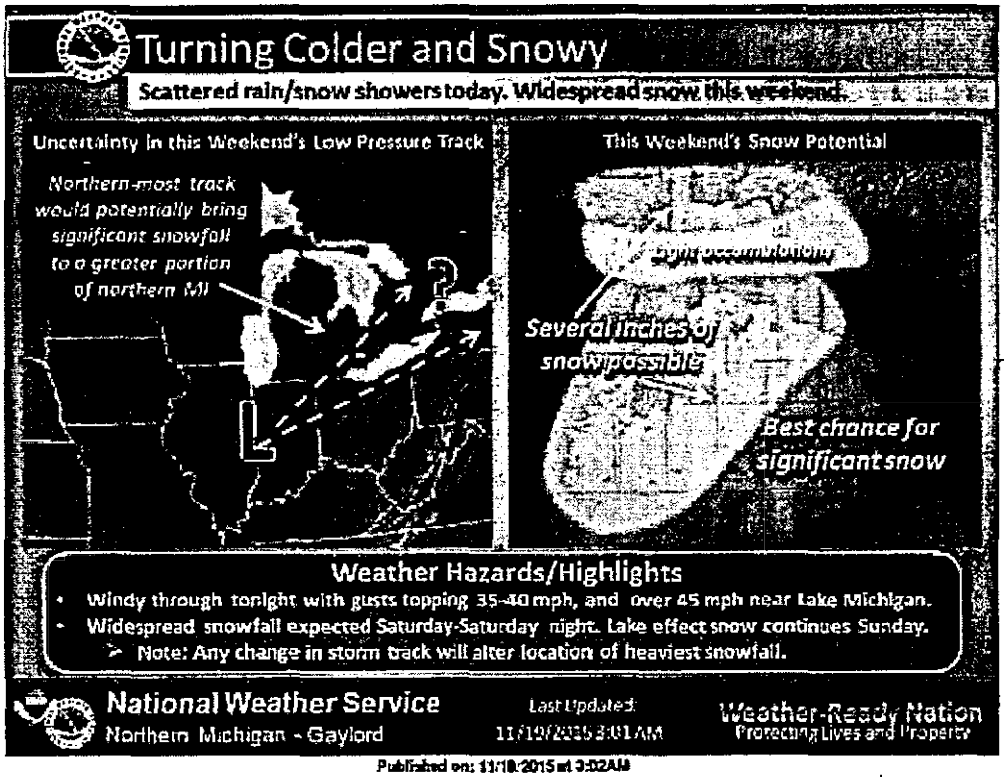
NATIONAL WEATHER SERVICE FORECASTS

Marquette



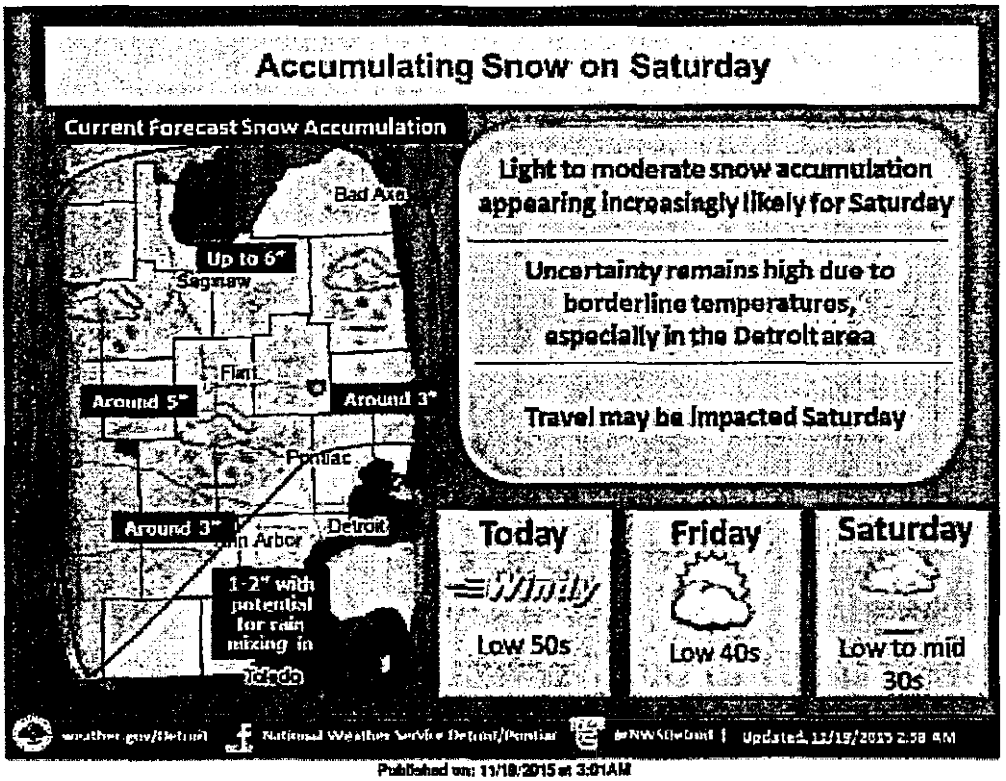
Gusty southwest winds will bring much colder air into the area today, along with lake effect snow this afternoon over the Keweenaw and tonight over the western U.P. The strong winds will lead to some power outages and when combined with the snow, visibilities will be greatly reduced over the Keweenaw Peninsula.

Gaylord



Scattered rain showers are expected to continue, mixing with snow on today. Potential is still for widespread snowfall across northern Michigan on Saturday with lake effect snow continuing Sunday.

Detroit



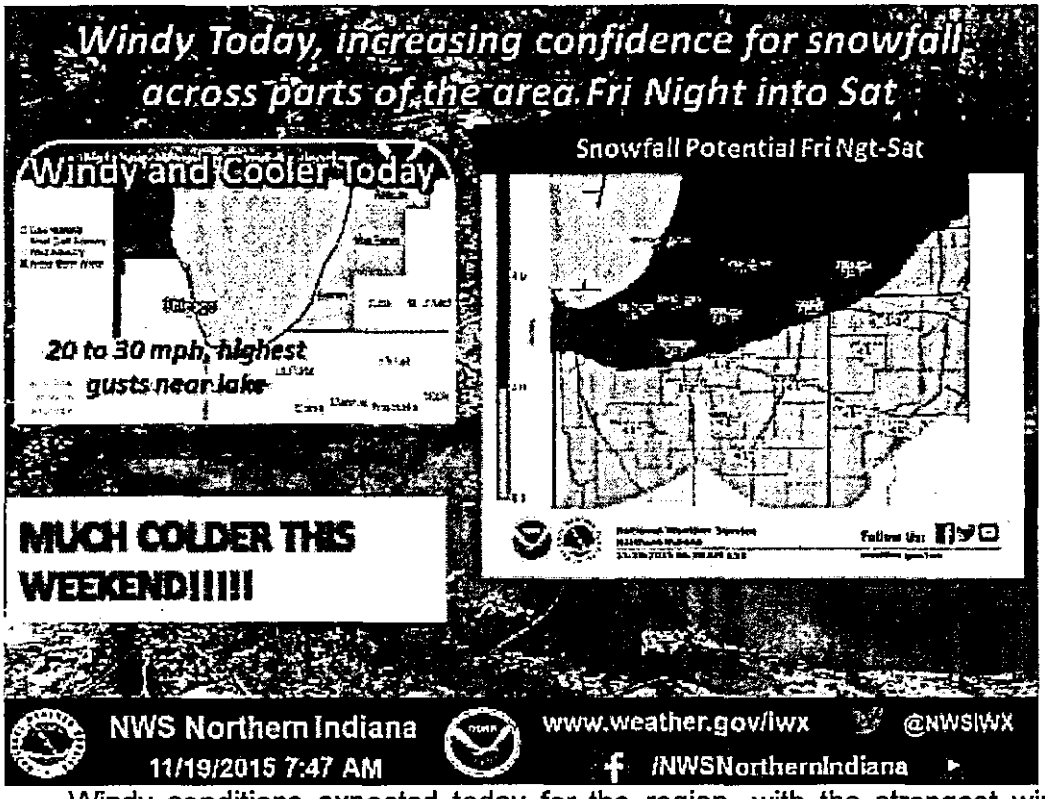
Gusty winds will be followed by falling temperatures this afternoon. A colder airmass in place for Friday will offset early day sunshine keeping highs near 40. Accumulating snow will move into the area during the day on Saturday. Uncertainty with regard to storm track and temperatures are still present, but it appears that northwest portions of SE Michigan will see up to 6" of snow. Amounts will taper off further south, with the potential for warm temperatures to cause rain to mix in at times for Detroit.

Grand Rapids

Published on: 11/19/2015 at 8:29AM

It will be another windy day with gusts around 40 mph inland and 45 mph along the lakeshore. This could lead to some scattered power outages. The temperature will fall especially later this afternoon. There will also be some light showers around. Accumulating snow (about 3-6 inches) and inconvenient travel are expected on Saturday.

Northern Indiana



Windy conditions expected today for the region, with the strongest winds expected closer to Lake Michigan, especially in Berrien county. Sustained winds of 20 to 30 mph with gusts to 40 mph will be common. Locally higher gusts to 45 mph or more are possible in Berrien county, warranting a Wind Advisory. Of greater focus is the increasing likihood for accumulating snow across parts of the area late Friday night into Saturday. The majority of the snow will fall during the day Saturday, which may limit amounts as temperatures in the mid to upper 30s and warm ground temperatures cause some melting of the snow as it falls. In addition, the track of the system is still being fine tuned with the highest amounts potentially shifting north or south. Once this system passes, MUCH colder air will arrive with highs Sunday struggling to climb above freezing.

MEDIA MONITORING REPORT

11/19/2015

Issues:

- No issues to report.

Summary:

- Over the next three days, Southeast Michigan is going to slowly descend from sunny skies and unseasonably warm temperatures into a rainy/snowy weekend.
- A wind advisory is in effect for the second half of the day in the Muskegon area, and snow could be on its way.
- Winter storm watches are posted in parts of five Midwest states as the first accumulating snow of the season for some in the Upper Midwest, Corn Belt, and Great Lakes will put an exclamation mark on a week of change in the weather pattern.
- A sexual discrimination complaint has been filed against Genesee County Sheriff Robert Pickell by the head of the sheriff's homeland security office.
- A mock active shooting training exercise last year at Romeo High School may have been the tipping point for identifying shortcomings with Macomb County's emergency communications system.
- Efforts are taking place to help deal with damage that remains from August 2014 flooding in Detroit.
- Gov. Rick Snyder announced that the state of Michigan has retained its accreditation by the Emergency Management Accreditation Program. This national accreditation reaffirms the ability of state government to prepare for and respond to all types of emergencies and disasters.
- The Belgian jihadi suspected of masterminding deadly attacks in Paris died along with his cousin in a police raid on a suburban apartment building, officials said Thursday.
- At least three dozen people in the United States suspected of ties to the Islamic State were under heavy electronic or physical surveillance even before the Paris attacks, senior American officials say.
- Governor Rick Snyder was the first governor in the nation to speak out on refugees following last week's terrorist attacks in Paris and Beirut. And he may have come to regret it as he tries to clarify his position vis a vis what a lot of the nation's other Republican governors are saying about refugees and immigration.
- Oakland County Executive L. Brooks Patterson has stepped into the Syrian refugee debate by urging Pontiac Mayor Deirdre Waterman to discontinue her support of housing Syrian refugees in Pontiac.
- A Republican legislator is renewing a push to lift Wisconsin's moratorium on new nuclear power plants, saying the state's manufacturers must have a reliable source of energy as burning fossil fuels grows more expensive.

- Leaders from the Flint area want stronger regulation of public drinking water systems to avoid more problems such as the lead contamination that has plagued the Michigan city.
- Elected officials and activists have delivered the story of Flint's lead in water crisis in person to the federal government, testifying Wednesday, Nov. 18, before a U.S. EPA advisory council.

Analysis:

- Media coverage is neutral.
- Snow is looking more and more likely this weekend. Confidence is great about having snow; however, the amount is uncertain at this time. Forecasts are ranging from 1 to 6 inches.
- Will continue to monitor the evolving weather conditions.

MICHIGAN WEATHER

Up to 6 inches of snow on way as Michigan's temps cool

The Detroit News, Nov. 19, 2015

Over the next three days, the metro area is going to slowly descend from sunny skies and unseasonably warm temperatures into a rainy/snowy weekend.

"Things are going to be turning cooler starting Thursday night into Friday," meteorologist Sara Schultz said. "Thursday will be pretty nice with highs in the lower 50s, but temperatures will begin to drop at night. On Thursday, we can also expect a little wind with gusts as high as the lower 30s."

Friday is expected to be dry with a high temperature in the low 40s while the nighttime low will be around 30 degrees.

"We have the potential for snow starting Friday night into Saturday," Schultz said. "We have a chance of one or two inches in the metro area, but it will most likely be rain mixed with snow."

Wild weather on its way with high winds, waves then snow predicted

MLive-Muskegon, Nov. 19, 2015

MUSKEGON, MI – A wind advisory is in effect for the second half of the day in the Muskegon area, and snow could be on its way.

The National Weather Service advisory, in effect from noon to midnight Thursday, Nov. 19, calls for wind gusts up to 50 mph, particularly along the lake. A gale warning is in effect for Lake Michigan, with waves expected to be 6 to 10 feet Thursday night.

Then on Friday, a storm system possibly bringing up to 9 inches of snow, will move into the area and linger through Wednesday, according to a hazardous weather outlook statement from the Weather Service.

First Snow of Season Ahead in Parts of the Midwest, Including Chicago, Detroit, Milwaukee; Winter Storm Watches Issued

Weather Channel, Nov. 19, 2015

Winter storm watches are posted in parts of five Midwest states as the first accumulating snow of the season for some in the Upper Midwest, Corn Belt, and Great Lakes will put an exclamation mark on a week of change in the weather pattern.

A swath from northeast Nebraska and southeast South Dakota into Iowa, southern Wisconsin and northern Illinois is covered by winter storm watches issued by local National Weather Service offices. In the much of the Upper Midwest, this means a potential for at least 6 inches of snow in 12 hours, or 8 inches of snow in 24 hours.

EMERGENCY MANAGEMENT AND HOMELAND SECURITY

County homeland security head files sexual discrimination claim against sheriff

MLive-Flint, Nov. 18, 2015

GENESEE COUNTY, MI – A sexual discrimination complaint has been filed against Genesee County Sheriff Robert Pickell by the head of the sheriff's homeland security office.

enifier Boyer filed a complaint against Pickell Nov. 13 claiming sexual discrimination at the workplace.

Boyer's attorney, Glen Lenhoff who is speaking on her behalf, declined to detail specifics of the complaint. The Flint Journal through the Freedom of Information Act has requested a copy of the complaint.

"Jenifier Boyer is a very honorable and highly educated woman," Lenhoff said. "Her sex discrimination complaint against Mr. Pickell must be taken very serious by the Genesee County commissioners. A complaint and un-biased investigation must be completed immediately. She is the highest female managerial person in the whole department."

Macomb County in Michigan Gets $10 Million Plan to Beef up Police Communications

Detroit Free Press, Nov.17, 2015

A mock active shooting training exercise last year at Romeo High School may have been the tipping point for identifying shortcomings with Macomb County's emergency communications system.

Officials were trying to show what the new communications center filled with video screens and dispatchers can do by infiltrating camera systems in local schools. Those watching at the communications center in Mt. Clemens could see what was happening live as the SWAT exercise unfolded, but they couldn't talk with the officers inside the school.

"Had it been real, it would have been disastrous," County Executive Mark Hackel said Thursday. "We need to enhance this. It enhances everyone's ability to communicate with each other."

Volunteer effort seeks to deal with 2014 flood damage

Associated Press, Nov. 17, 2015

DETROIT (AP) - Efforts are taking place to help deal with damage that remains from August 2014 flooding in Detroit.

The city says about 3,000 families still are living in homes damaged by the flooding despite more than $60 million in Federal Emergency Management Agency funds being distributed for city residents. Millions more has been made available in southeast Michigan.

A group called All Hands Volunteers, in partnership with Northwest Detroit Flood Recovery Project and United Methodist Committee on Relief, will be working to clean up at least 100 homes between Thursday and Dec. 1. The partnership is called All Hands On Detroit.

Those organizing the effort are seeking volunteers. Organizers will provide training and necessary safety equipment. Signup details are online.

State retains emergency management accreditation

Hillsdale Daily News, Nov. 18, 2015

Gov. Rick Snyder today announced that the state of Michigan has retained its accreditation by the Emergency Management Accreditation Program. This national accreditation reaffirms the ability of state government to prepare for and respond to all types of emergencies and disasters.

"The state of Michigan continues to be a national emergency management and homeland security leader," Snyder said. "In Michigan, we are committed to having a system in place that ensures our residents are prepared for all hazards, whether natural or human-made. I commend the Michigan State Police and the other state departments for their dedication and commitment in this arena."

PARIS ATTACKS

Suspected mastermind of Paris attacks killed

Associated Press, Nov. 19, 2015

Paris — The Belgian jihadi suspected of masterminding deadly attacks in Paris died along with his cousin in a police raid on a suburban apartment building, officials said Thursday.

Paris Prosecutor Francois Molins' office said 27-year-old Abdelhamid Abaaoud was identified based on skin samples, but authorities did not know how he died. His body was found in the apartment building targeted in the chaotic and bloody raid in the Paris suburb of Saint-Denis on Wednesday.

Three police officials say a woman who died in the raid was Abaaoud's cousin. One said Hasna Aitboulahcen is believed to have detonated a suicide vest after a brief conversation with police officers.

The official confirmed an audio recording, punctuated by gunshots, in which an officer asks: "Where is your boyfriend?" and she responded angrily: "He's not my boyfriend!" Then loud bangs are heard.

The exact relationship between Abaaoud and Aitboulahcen was not clear.

U.S. Investigators Struggle to Track Homegrown ISIS Suspects

New York Times, Nov. 19, 2015

WASHINGTON — At least three dozen people in the United States suspected of ties to the Islamic State were under heavy electronic or physical surveillance even before the Paris attacks, senior American officials say. But unlike the attackers in France, the officials say, the majority of those under investigation here never traveled to Syria to fight alongside the Islamic State or receive training from it.

In many ways, the officials say, that makes the American investigations even harder. Those under investigation typically have little terrorism expertise or support from a cell, which makes thwarting an Islamic State-inspired attack in the United States less like stopping a traditional terrorist plot and more like trying to prevent a school shooting.

SYRIAN REFUGEES

Syrian refugees controversy gets Lansing's attention

Lansing State Journal, Nov. 19, 2015

LANSING - The resettlement of Syrian refugees in Michigan is a controversial issue, but several Lansing area organizations and leaders are ready to help others get out of the warn-torn country.

St. Vincent Catholic Charities has resettled in Mid-Michigan over 20,000 refugees from around the world in the last 30 years and hopes to welcome up to 100 from Syria within the next year — if the federal government continues allowing the placements.

"We'll keep doing what we do and we'll see what happens," said Judi Harris, program director for refugee services at St. Vincent. "I think it's a little too early right now to change anything."

Students, faculty respond to Snyder's refugee stance

Michigan Daily (U of M), Nov. 19, 2015

In wake of terrorist attacks in Paris that left 129 dead, Michigan Gov. Rick Snyder joined 31 governors in vowing to pause the entry of Syrian refugees into their states.

Early reports indicated that one the attackers may have been a refugee from Syria, though officials now say that theory was likely incorrect. Even so, that notion stoked fears that ISIS fighters would enter the country along with the refugees fleeing their violent campaigns.

In response, LSA senior Sarah Raoof and Public Health students Tala Dahbour and Reem Kashlan launched a letter-writing campaign on Facebook. The campaign encourages students to visit the "Share your Opinion" page on the governor's website to send either a pre-written or personal letter expressing opposition to his plan to block Syrian refugees.

Snyder trying to clear his record in statements on refugees

Michigan Radio, Nov. 19, 2015

Governor Rick Snyder was the first governor in the nation to speak out on refugees following last week's terrorist attacks in Paris and Beirut. And he may have come to regret it as he tries to clarify his position vis a vis what a lot of the nation's other Republican governors are saying about refugees and immigration.

Following the attacks, Governor Snyder said he was hitting the "pause" button on efforts to get more visas for Middle Eastern refugees to settle in Michigan.

Oakland County Executive orders staff to end support of Pontiac Syrian housing project

Oakland Press, Nov. 18, 2015

Oakland County Executive L. Brooks Patterson has stepped into the Syrian refugee debate by urging Pontiac Mayor Deirdre Waterman to discontinue her support of housing Syrian refugees in Pontiac.

The development in question is proposed for a 10-block area near Franklin Road and South Boulevard.

The move follows calls from several governors' announcements — including one from Michigan Gov. Rick Snyder — to postpone accepting Syrian refugees.

Snyder can't legally refuse refugees, but he probably won't roll out the welcome mat

Michigan Radio, Nov. 18, 2015

When Gov. Rick Synder's office released a statement asking the Department of Homeland Security to review the vetting process for Syrian refugees seeking asylum in the United States after the terrorist attacks in Paris, the reaction was swift.

Soon dozens of governors declared their opposition or support of settling Syrian refugees in their respective states.

However, Detroit Free Press Capitol Hill reporter Todd Spangler tells Stateside host Cynthia Canty that state governors have no legal say when it comes to accepting refugees.

Kaffer: Snyder's political pandering on refugees shames us all

Detroit Free Press, Nov. 19, 2015

One of the worst things about terrorism is it works. Last week's deadly terrorist attacks in Paris did exactly what its perpetrators intended: killed innocent Parisians, surely, but caused people across the globe to worry that they'd be next, to fear sudden death or torment at the hands of anonymous, implacable attackers.

It's hard to argue with fear. It allows little room for cool-headed decision making.

And in that context, the "circle the wagons" response of many Americans after the Paris attacks is understandable. It is manifest most publicly in a resistance toward accepting refugees from Syria, where the Islamic State in Iraq and Syria holds territory.

The U.S. has taken in 1,800 Syrian refugees in the last two years. Because conflict in Syria is ongoing, and because the number of refugees has taxed that country's immediate neighbors, President Barack Obama has said the U.S. will take in 10,000 refugees by the end of 2016.

Compounded by the current story that one of the attackers entered France with a phony passport, with a trail indicating he'd entered France as a refugee, it's easy to understand why many Americans might fear an onrush of poorly vetted immigrants from Syria that could include criminals bent on harm.

But that's not how it works.

And it's impossible to understand why some elected officials -- like Gov. Rick Snyder -- have opted not to educate and inform, but to fan the flames of suspicion and intolerance. Snyder, along with 33 other governors, have said they will halt efforts to accept Syrian refugees, something they are not legally capable of doing. This boneheaded move is particularly startling in Snyder's case; for years, he's pitched Michigan as a destination for immigrants, suggesting that new residents from overseas could help reverse the state's population loss.

MICHIGAN NUCLEAR

Michigan legislators urge new Canadian PM to say 'no' to nuclear dump

The Voice, Nov. 19, 201`5

Michigan's two U.S. senators and 10 of its 14 U.S. representatives wasted little time in signing a letter to new Canadian Prime Minister Justin Trudeau, urging his government to deny the necessary permits to Ontario Power Generation to build a nuclear waste dump 2,200 feet underground less than a mile from Lake Huron.

The letter went out on Nov. 5, the day after Trudeau was sworn in as prime minister and proceeded to appoint a diverse cabinet comprising 15 men and 15 women.

After congratulating Trudeau on becoming Canada's 23rd prime minister, the U.S. politicians zeroed in on the issue at hand.

Wisconsin Republicans push to lift nuclear plant moratorium

Associated Press, Nov. 16, 2015

MADISON, Wis. (AP) — A Republican legislator is renewing a push to lift Wisconsin's moratorium on new nuclear power plants, saying the state's manufacturers must have a reliable source of energy as burning fossil fuels grows more expensive.

Under current Wisconsin law, state regulators can't grant permission for a new nuclear power plant unless a federal storage facility for the waste from nuclear plants across the country exists and the plant wouldn't burden state ratepayers. No such centralized storage facility exists, however. President Barack Obama's administration pulled funding for creating one at Nevada's Yucca Mountain, leaving nuclear plants to continue storing waste on-site in pools and casks.

FLINT WATER

Flint leaders seek tougher rules on lead in drinking water

Associated Press, Nov. 18, 2015

Leaders from the Flint area want stronger regulation of public drinking water systems to avoid more problems such as the lead contamination that has plagued the Michigan city.

U.S. Rep. Dan Kildee told the Environmental Protection Agency's National Drinking Water Council the lead pollution of Flint's water was a "failure of government." The council met Wednesday near Washington, D.C., to discuss revising a federal rule on lead and copper levels in water.

Story of Flint water crisis, 'failure of government,' unfolds in Washington

MLive-Flint, Nov. 18, 2015

FLINT, MI – Elected officials and activists have delivered the story of Flint's lead in water crisis in person to the federal government, testifying Wednesday, Nov. 18, before a U.S. EPA advisory council.

"What happened in Flint is a failure of government, and we must ensure that it never happens again to Flint or any other community," U.S. Rep. Dan Kildee, D-Flint, said in opening testimony to the National Drinking Water Advisory Council. "The EPA has the ultimate responsibility to ensure that drinking water standards are followed."

In addition to Kildee, state Senate Minority Leader Jim Ananich, D-Flint; Dr. Mona Hanna-Attisha of Hurley Medical Center; Flint resident LeeAnne Walters; and professor Marc Edwards of Virginia Tech university all testified to the council, which is considering changes in federal rules on lead in water.

Flint doctor who exposed lead health crisis calls for change by the EPA

WJRT-TV 12 in Flint, Nov. 18, 2015

WASHINGTON, D.C. (WJRT) - (11/18/15) - The doctor who helped expose Flint's problem with lead in the drinking water spent Wednesday morning talking about the issue before leaders in Washington D.C.

Dr. Mona Hanna-Attisha testified before the Environmental Protection Agency, along with a Flint mother who claims her child has lead poisoning.

Hanna-Attisha used a PowerPoint presentation to showcase how something like this can happen anywhere across the country, not only in Flint.

MSU holds forum on Flint water

WJRT-TV 12 in Flint, Nov. 18, 2015

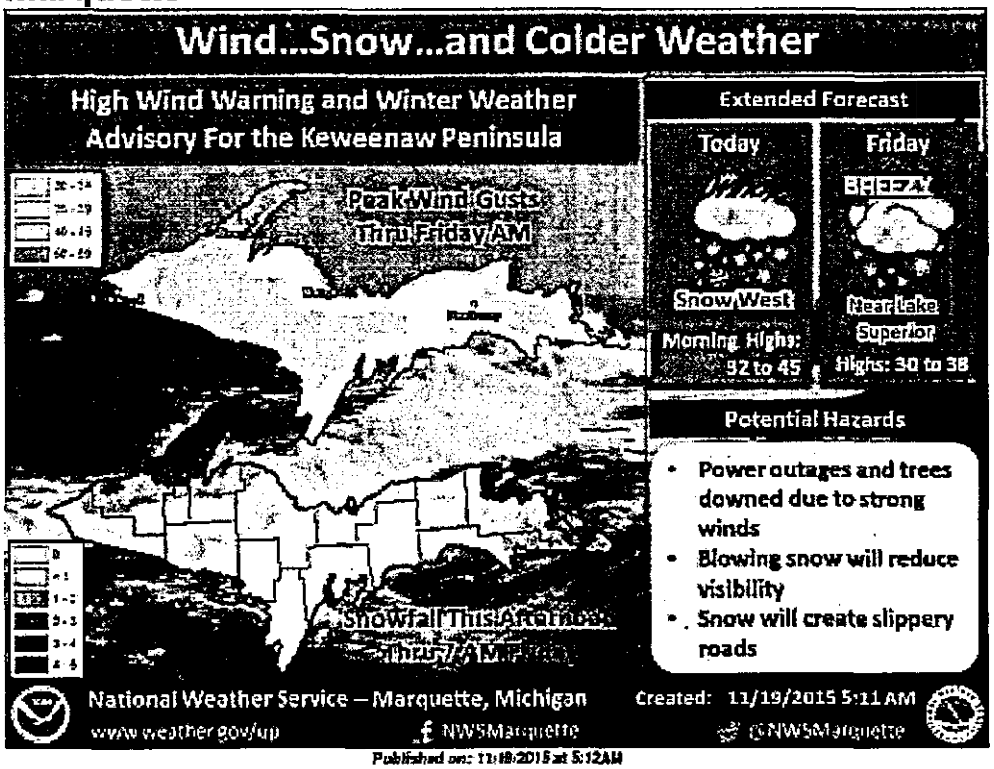
EAST LANSING (WJRT) - (11/18/15) - It's well beyond just the talk of the town.

It's the reason behind protests and the subject of mayoral debates, conversations in Lansing and now, hearings in Washington.

But ask a college student 50 miles away about Flint's water emergency and a lot of them will say they haven't heard about it.

NATIONAL WEATHER SERVICE FORECASTS

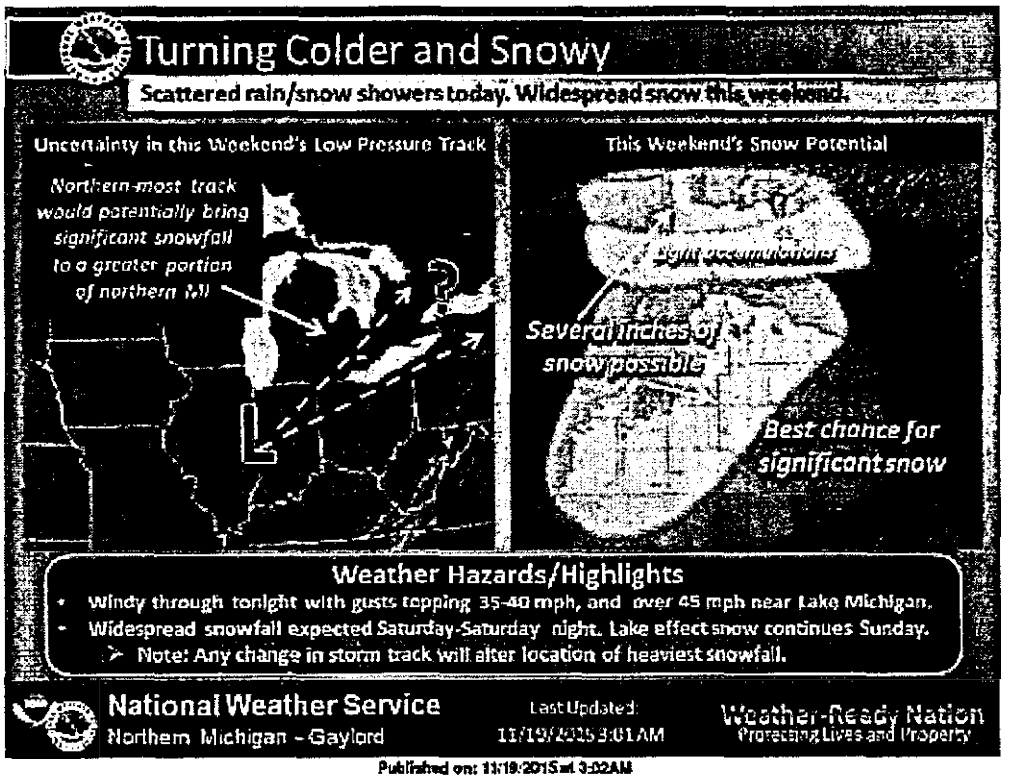
Marquette



Published on: 11/19/2015 at 5:12AM

Gusty southwest winds will bring much colder air into the area today, along with lake effect snow this afternoon over the Keweenaw and tonight over the western U.P. The strong winds will lead to some power outages and when combined with the snow, visibilities will be greatly reduced over the Keweenaw Peninsula.

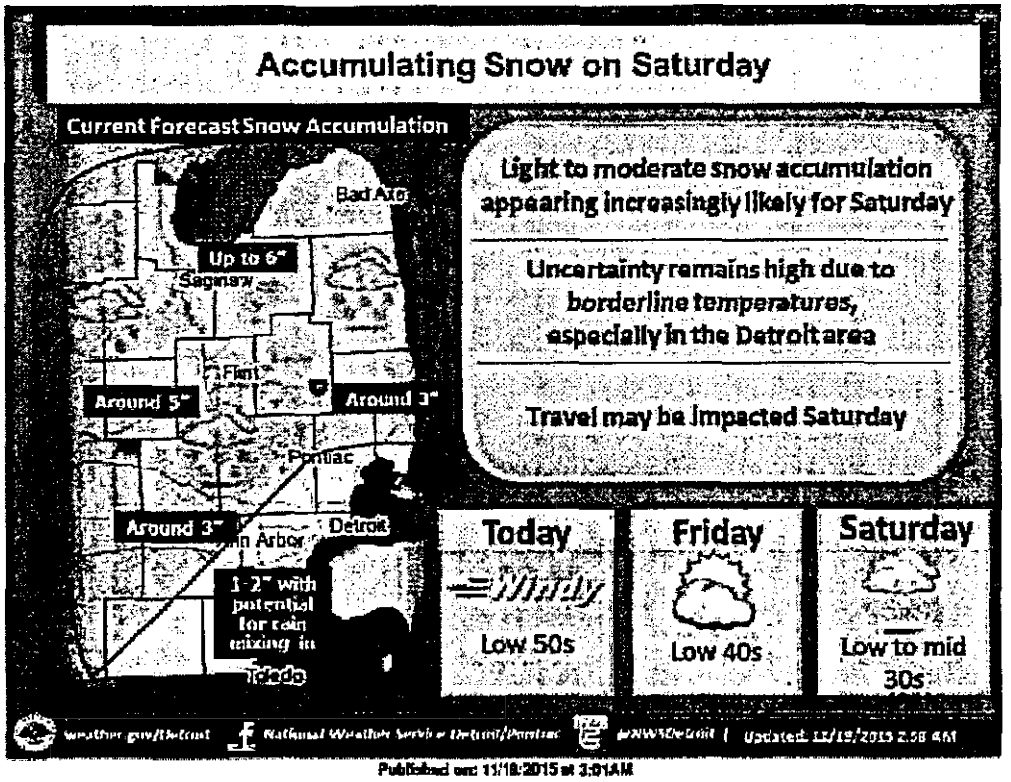
Gaylord



Published on: 11/19/2015 at 3:02AM

Scattered rain showers are expected to continue, mixing with snow on today. Potential is still for widespread snowfall across northern Michigan on Saturday with lake effect snow continuing Sunday.

Detroit



Published on: 11/19/2015 at 3:01AM

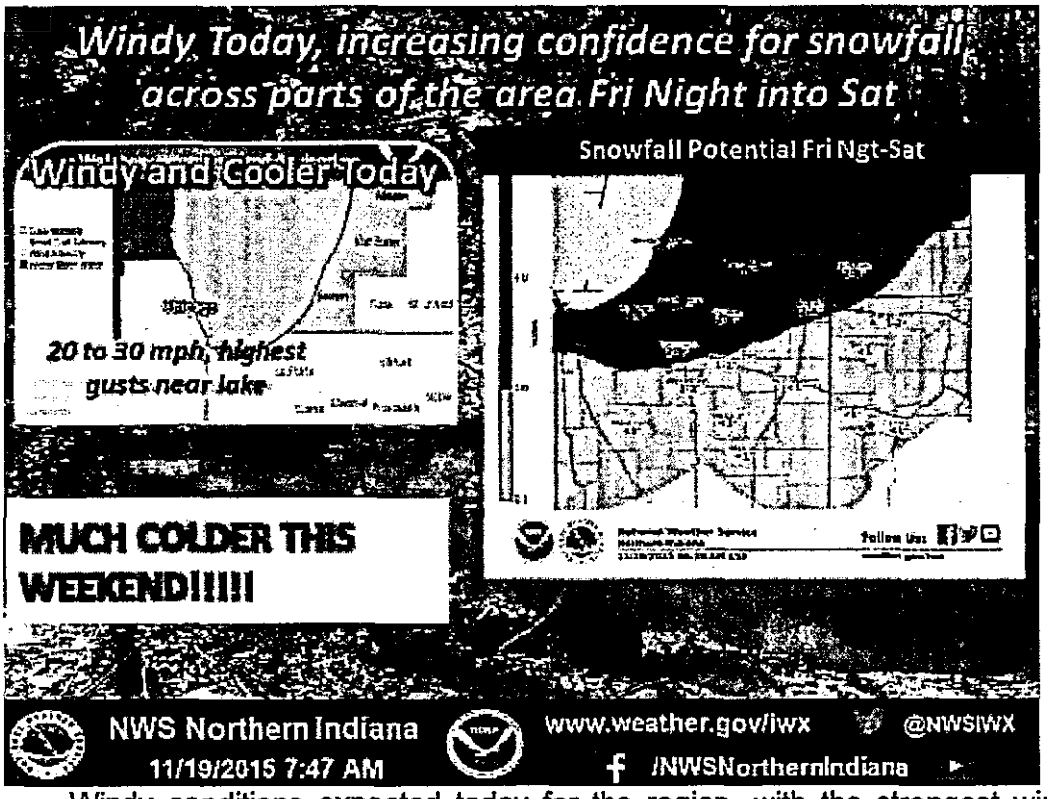
Gusty winds will be followed by falling temperatures this afternoon. A colder airmass in place for Friday will offset early day sunshine keeping highs near 40. Accumulating snow will move into the area during the day on Saturday. Uncertainty with regard to storm track and temperatures are still present, but it appears that northwest portions of SE Michigan will see up to 6" of snow. Amounts will taper off further south, with the potential for warm temperatures to cause rain to mix in at times for Detroit.

Grand Rapids

Published on: 11/19/2015 at 9:28AM

It will be another windy day with gusts around 40 mph inland and 45 mph along the lakeshore. This could lead to some scattered power outages. The temperature will fall especially later this afternoon. There will also be some light showers around. Accumulating snow (about 3-6 inches) and inconvenient travel are expected on Saturday.

Northern Indiana



Windy conditions expected today for the region, with the strongest winds expected closer to Lake Michigan, especially in Berrien county. Sustained winds of 20 to 30 mph with gusts to 40 mph will be common. Locally higher gusts to 45 mph or more are possible in Berrien county, warranting a Wind Advisory. Of greater focus is the increasing likihood for accumulating snow across parts of the area late Friday night into Saturday. The majority of the snow will fall during the day Saturday, which may limit amounts as temperatures in the mid to upper 30s and warm ground temperatures cause some melting of the snow as it falls. In addition, the track of the system is still being fine tuned with the highest amounts potentially shifting north or south. Once this system passes, MUCH colder air will arrive with highs Sunday struggling to climb above freezing.

With autumn in full swing, now is a great opportunity to take a course at the Emergency Management and Homeland Security Training Center (EMHSTC).

For this final quarter of 2015, the EMHSTC is highlighting a new federal course: Integrating Whole Community Inclusive Planning into the Emergency Management Process (AWR-330). This **FREE** one-day course provides students with an overview of basic concepts, legal requirements, and best practices for building the whole community into a comprehensive emergency management strategy.

The EMHSTC highly recommends anyone involved with emergency planning, response, and recovery to attend AWR-330. There will be one offering of this course in each part of the state.

We are also running other classes and a long-term power outage tabletop exercise. Don't wait and register today!

Subject: Upcoming Training Opportunities from the MSP-EMHSTC: TEST

With autumn in full swing, now is a great opportunity to take a course at the Emergency Management and Homeland Security Training Center (EMHSTC)

For this final quarter of 2015, the EMHSTC is highlighting a new federal course: Integrating Whole Community Inclusive Planning into the Emergency Management Process (AWR-330). This **FREE** one-day course provides students with an overview of basic concepts, legal requirements, and best practices for building the whole community into a comprehensive emergency management strategy.

The EMHSTC highly recommends anyone involved with emergency planning, response, and recovery to attend AWR-330. There will be one offering of this course in each part of the state.

We also running other classes and a long-term power outage tabletop exercise. Don't wait and register today!

Course	Date	Location
Integrating Whole Community Inclusive Planning into the EM Process (AWR-330)	November 30, 2015	Kalamazoo
Integrating Whole Community Inclusive Planning into the EM Process (AWR-330)	December 1, 2015	Mason
Community Healthcare Planning and Response to Disasters (MGT-409)	December 1 - 2, 2015	Benton Harbor
Chemistry 1	December 1 - 3, 2015	Lansing
Integrating Whole Community Inclusive Planning into the EM Process (AWR-330)	December 3, 2015	Taylor
Integrating Whole Community Inclusive Planning into the EM Process (AWR-330)	December 4, 2015	Kimball
Long-Term Power Outage Tabletop Exercise	December 8, 2015	Lansing
Integrating Whole Community Inclusive Planning into the EM Process (AWR-330)	December 10, 2015	Big Rapids
Integrating Whole Community Inclusive Planning into the EM Process (AWR-330)	December 11, 2015	Traverse City
Winter Weather Hazards: Science and Preparedness	December 15, 2015	Waterford
Winter Weather Hazards: Science and Preparedness	December 16, 2015	East Lansing
Winter Weather Hazards: Science and Preparedness	December 17, 2015	Grand Rapids
Integrating Whole Community Inclusive Planning into the EM Process (AWR-330)	March 15, 2016	Marquette

Hi Dave,

That's correct. All emergencies and disaster declarations begin and end at the local level through the Michigan Emergency Management Act (Public Act 390 of 1976).

Our third district Michigan State Police emergency management coordinator has been working closely working with Genesee County Emergency Management Coordinator Jenifer Boyer. At this time, the county has not requested state assistance through the Michigan Emergency Management Act.

Jenifer Boyer would be a good source to talk to about what sort of local declarations have been made and operations are taking place at the local level.

I hope this helps. Please let me know if you have any other questions.

Thanks,

Ron

Hi Damon,

I'm including on this email Ron Leix from Michigan State Police, who is the expert in all things related to emergencies.

My impression is that such a declaration request starts with local authorities. Ron, can you help me with the process and how it works?

Damon, it's also important to remember that the state continues to work with Flint leaders on their infrastructure challenges. In addition to the $6 million the state recently approved for the temporary reconnection to the Great Lakes Water Authority, the state earlier awarded the city $2 million in grants to improve infrastructure and $2.2 million in savings from restructured loans that can be directed to infrastructure repairs.

Subject: Flint Water Inquiry

There are several groups who are demanding the Governor issue a State of Emerfency related to the water & infrastructure situation in Flint. They claim it would open up the door for federal assistance.

My questions are...

DOES the governor have the power/authority to declare a State of Emergency for issues like what's happening in Flint?

IF such a declaration was made- does it open the doors to federal assistance for example... to replace old lead service lines... and/or other infrastructure?

Has the governor considered/discussed asking for additional monetary help from the federal government for infrastructure repairs/replacements in Flint?

Lastly, the governor has called for a third party review of the decision making that went into Flint's water source switch-problems that followed. What's the latest on that effort? Will the legislature have a role- Sen. Ananich says Legislature should have a role.

Thank you

Damon Maloney

- Lackadaisical and dismissive -- that's the tone of a Michigan Department of Environmental Quality spokeswoman's response to a July e-mail noting that a member of a second media outlet had made an inquiry about elevated lead levels in Flint's drinking water, according to a Detroit Free Press column.

Gov. Rick Snyder announces Flint Water Task Force to review state, federal and municipal actions, offer recommendations

Experts in public health, water management, environmental protection to focus on steps to protect residents

LANSING, Mich. – Gov. Rick Snyder today announced the creation of an independent advisory task force charged with reviewing actions regarding water use and testing in Flint and offer recommendations for future guidelines to protect the health and safety of all state residents.

Task force members include experts in public health and medicine, water management, and environmental protection from both sides of the aisle, and will be co-chaired by Ken Sikkema of Public Sector Consultants and Chris Kolb, of the Michigan Environmental Council. Also serving will be Dr. Matthew Davis of the University of Michigan Health System, Eric Rothstein, of the Galardi Rothstein Group and Dr. Lawrence Reynolds of Mott Children's Health Center in Flint.

"Transitioning back to the Detroit Water and Sewerage Department-Great Lakes Water Authority is

a good first step to protecting public health in Flint, but it's not the last step," Snyder said. "Bringing in outside experts to evaluate our actions and help monitor and advise on potential changes to law, procedures and practices will be key to continuing work on the comprehensive action plan and ensuring safe drinking water for all the residents in Flint and all of Michigan."

Snyder said the administration will fully cooperate with task force members, saying he wants an unbiased report focusing on steps taken in the past and recommendations that could improve practices to ensure all residents have access to safe, clean water.

Ken Sikkema is a senior policy fellow at Public Sector Consultants, where he specializes in public finance, environment, and energy policy. Prior to joining the firm, Sikkema served in both the Michigan House and Senate, culminating with four years as Senate majority leader. He has also served as both an adjunct and visiting professor at Grand Valley State University.

Chris Kolb is president of the Michigan Environmental Council, a statewide coalition of 70 environmental, public health and faith-based nonprofit groups. Before joining the MEC, Kolb represented Ann Arbor in the state House for six years and served six years on the Ann Arbor City Council. He has been president of the MEC for six years.

Matthew Davis, M.D., M.A.P.P., is professor of pediatrics and internal medicine at the University of Michigan Health System and professor of public policy at the Gerald R. Ford School at the University of Michigan, having joined the faculty in 2000. Davis also is a professor of health management and policy at the School of Public Health. He previously served as the chief medical executive of the Michigan Department of Community Health/Department of Health and Human Services.

Eric Rothstein is a national water issues consultant and principal at the Galardi Rothstein Group. He served as an independent advisor on the creation of the Great Lakes Water Authority. Rothstein also has served as Jefferson County, Alabama's rate consultant and municipal adviser for litigation related to the county's bankruptcy and issuance of $1.7 billion in sewer warrants and led strategic financial planning for the City of Atlanta's Department of Watershed Management. He has more than 30 years of experience in water, wastewater and stormwater utility finance and rate-making assessments.

Lawrence Reynolds, M.D., is a pediatrician in Flint who serves as president of the Mott Children's Health Center. He received his medical degree from Howard University College of Medicine and has been in practice for 36 years. He has served as president of the Genesee County Medical Society and the Michigan Chapter of the American Academy of Pediatrics. He has been honored for his humanitarian and advocacy efforts on behalf of children from the Community Foundation of Greater Flint.

Snyder has said reconnecting with the authority is a critical step to resolving water quality issues and addressing related health concerns. It will not immediately resolve the city's problem with lead service lines or aging infrastructure. It will take time for pipes in Flint to become coated with the phosphate corrosion control.

To best protect public health, state and local authorities will continue to carry out steps outlined on Oct. 2 in a comprehensive action plan, including continued testing, the use of faucet filters and providing residents with accurate information about steps to eliminate lead exposure. The Michigan Departments of Environmental Quality and Health and Human Services are continuing to provide free water filters, free lead testing through the state laboratory for Flint water customers, and hiring

additional staff to conduct health exposure monitoring for lead in drinking water.

Hi Shanon,

Sorry for the delay. Please let me know if you have any questions of concerns.

I'll be working on a finalized plan and content for Winter Hazards Awareness Week next week.

Thanks,

Ron

Ananich On Flint Water Funds: 'This Is By No Means Over'

Senate **Minority Leader Jim Ananich** was both heartened and relieved Thursday to have a supplemental appropriations bill unanimously approved in the Senate to provide $9.35 million to help his city of Flint get better water faster, but it was a cautious optimism as there is much left to do, he said.

Of the money, $6 million will go toward switching from the Flint River as the city's source for drinking water back to the Detroit system. Insufficient corrosion control for the river water caused lead in the service lines and pipes to leach into the water, leading to led levels above federal standards for remediation and rising levels of lead in Flint children's blood.

"As soon as we switch over to Detroit, we're not going to automatically have clean, drinkable water. We're still going to have to use the filters, still going to have to make sure they take precautions, because it takes a while to rebuild the corrosion controls against the pipes," Mr. Ananich (D-Flint) told the press after session. "I'm not an expert by any means, but it could be a few months.

"The one benefit I do think we have going forward is Flint will probably be the most tested water anywhere in the world over the next six months, as it should be, to make sure we rebuild that trust," he said.

The Senate decided quickly to take up **HB 4102**, as the House sent it over Wednesday evening after a unanimous vote among representatives as well.

And within hours, **Governor Rick Snyder** signed the bill into law, becoming **PA 143 of 2015** with immediate effect.

"This funding is a coordinated response to a serious problem and I'm pleased so many parties came together to help deliver safe drinking water to the city of Flint," Mr. Snyder said in a statement. "Reconnecting to the Great Lakes Water Authority is only the first step, as the state will continue testing and inspections to ensure Flint families and children have clean water in their homes and schools."

A week ago, Mr. Snyder called on the Legislature to provide funding to the city to help it in its efforts to switch back to the Detroit water system and have staff from both the Department of Environmental Quality and the Department of Health and Human Services. During that time, and even before, there had been a lot of finger-pointing about who ought to ultimately be responsible for the crisis that has caused Flint to go on high alert due to elevated levels of lead in its water.

And many of those questions of accountability remain, Mr. Ananich said.

"(The switch) was during the period of an emergency manager, and there wasn't many decisions allowed to be made by local elected officials. I can't speak about whether they were part of the conversations or not," he said. "It was the decision of the emergency manager to switch over, a decision by a different emergency manager to stay on it, and a third emergency manager denied the request to go back.

"It definitely needs to be looked at, the emergency manager laws, make sure there's some accountability on the back-end before they leave. They shouldn't be leaving cities with such crises when they leave," Mr. Ananich said.

But the other question is who should look at what and how. Mr. Ananich said he wasn't sure yet whether the state should investigate itself (effectively), a commission should review the situation, the Legislature should make changes to existing laws or create new ones, or more.

"All those questions need to be looked at," he said. "I'm not 100 percent sure exactly what method it should be, but I think it's warranted to have a further look at what happened, what mistakes were made, and how to make sure it doesn't ever happen again in cities like Flint but also across the state.

"This isn't a victory for my community. This is a fix to a problem that never should've happened," he said.

The supplemental appropriations allocates $6 million to get the city back on Detroit's water system; $300,000 for DEQ's drinking water and environmental health services; $1 million for DEQ's laboratory services; $1 million for

DHHS emergency services to purchase and distribute water to Flint residents; $850,000 for follow up services for children, including testing lead levels and care for those with abnormal levels; and $200,000 for plumbing inspections.
Of the $9.35 million allocated, $7.15 million is from the General Fund.

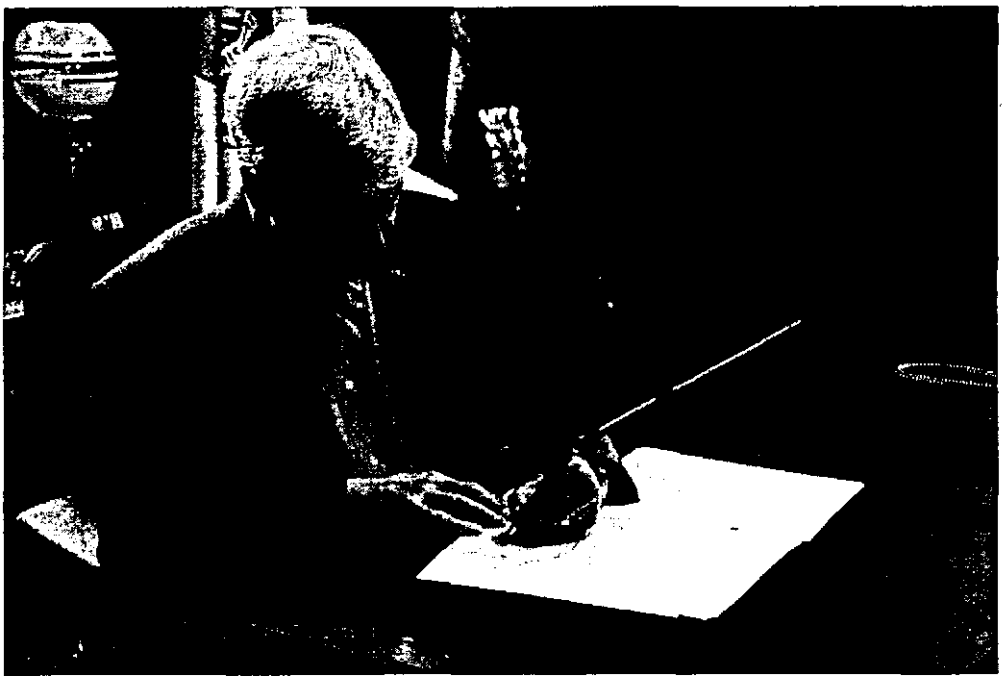
Gov. Rick Snyder signs bill authorizing funding for Flint to move back to Detroit water system

Temporary reconnection provides best protection for public health



LANSING, Mich. – Gov. Rick Snyder has signed bipartisan legislation that will direct funding to the City of Flint's emergency water services to reconnect the city's water supply to the Great Lakes Water Authority until the Karegnondi Water Authority pipeline is completed.

"This funding is a coordinated response to a serious problem and I'm pleased so many parties came together to help deliver safe drinking water to the city of Flint," Snyder said. "Reconnecting to the Great Lakes Water Authority is only the first step, as the state will continue testing and inspections to ensure Flint families and children have clean water in their homes and schools."

House Bill 4102, sponsored by state Rep. Al Pscholka, authorizes $6 million to move the city back to Detroit's water system until the new pipeline is finished.

In addition to the $6 million:

- $300,000 goes to the Department of Environmental Quality's drinking water and environmental health services;
- $1 million will provide for DEQ to test drinking water samples;
- $1 million allows the Department of Health and Human Services to purchase and distribute water filters to Flint residents;
- $850,000 will aid in follow-up services for children, including testing, investigations, and case management for those with elevated blood lead levels;
- $200,000 will fund state plumbing inspections for schools and health facilities.
- The City of Flint city government will provide $2 million toward reconnecting the water supply and the Charles Stewart Mott Foundation has committed $4 million.

The bill was approved unanimously in both the House and Senate and is now Public Act 143 of 2015.

For more information on this and other legislation, please visit www.legislature.mi.gov.

The EM Law and Flint: A Dispute on its Role
Gongwer
Oct. 12, 2015
The Flint water crisis has caused the debate over Michigan's local financial emergency law to roar back to life with considerable fury emanating from Flint that the law's focus on bringing a community's finances back into balance played a major role in the actions that led to using the Flint River as a temporary source of drinking water.

A lack of sufficient corrosion controls in the water pumped from the Flint River allowed lead from service lines to leach into the water, leading to lead levels in some spots well past federal limits and rising levels of lead in children's blood, prompting a frantic effort in the past two weeks to get filters to Flint residents and businesses, and switch back to Detroit water until a new pipeline to Lake Huron serving the city and counties to the east is finished.

When the final decision was made in 2014 to begin drawing water from the Flint River, ending a more than 40-year agreement with the Detroit Water and Sewerage Department to pull water from that system, Emergency Manager Darnell Earley was in total control of city operations under the Local Financial Stability and Choice Act.

Predating the city falling under control of an emergency manager in 2011, Flint, along with Genesee, Lapeer and Sanilac counties, had been studying forming a new authority to build their own pipe to Lake Huron, breaking away from the Detroit system. Flint was debating whether to switch to the new authority or draw from the Flint River. At the time, the concern from local officials, according to reports in The Flint Journal, was the cost of upgrading Flint water infrastructure. There was widespread agreement that the quality of water in the river was good.

And eventually those cost concerns ended consideration of using the Flint River as a permanent source of drinking water.

In 2012, with Emergency Manager Michael Brown now running the city, his administration began considering use of the Flint River as a temporary water source until the new Karengondi Water Authority pipeline could be completed.

In 2013, the council voted to drop Detroit water for the new Karengondi system.

Eventually, with a decision needing to be made on where to draw water until that system could be completed, Mr. Earley signed an order to draw the water out of the Flint River, saving more than $1 million a month. It was a decision lauded by many local officials, with Flint Mayor Dayne Walling pushing the button to shut off water from Detroit. Glasses of treated river water were raised to celebrate the moment.

Rep. Sheldon Neeley (D-Flint) was a member of the Flint City Council during this time, and he said the crisis shows the state needs to change the emergency manager law.

"The emergency manager law from my perspective caused 100 percent of the problem," he said.

Changes need to be made to assure a review panel on decisions made by emergency managers involving the health, welfare and safety of the community, Mr. Neeley said. He called PA 436 of 2012 a failed experiment.

"There should be some safeguards," he said.

While the council did vote for the KWA, it never voted on switching to the Flint River as a temporary source of water, he said, and to the extent local officials praised the reliability of the river as a drinking water source, he said that was because they assumed the water would be properly treated.

Further, Mr. Neeley said the emergency manager at the time of the vote, Ed Kurtz, vetoed the resolution adopted by the council, which he said contained changes to Mr. Kurtz's version, and then Mr. Kurtz, under his emergency manager powers, implemented his initial resolution.

But Rep. Al Pscholka (R-Stevensville), the sponsor of the original emergency manager law (later replaced with PA 436), said the law is not to blame. Flint wanted to leave the Detroit system for years.

"There's a lot of revisionist history going on here," he said. "The emergency manager didn't make the decision to build a pipeline to Lake Huron."

And Mr. Pscholka said local officials were involved in the decision to begin pumping water out of the Flint River.

"It was not as simple as the emergency manager declaring I'm going to be a hero and save a million and a half dollars by doing this," he said. "The locals were involved in this."

Mr. Pscholka said he saw no need to change the law to address this situation.

At some point, an engineer must have advised Mr. Earley the river would work as a water source, Mr. Pscholka said. The same thing would have happened had the city not been under emergency management.

"The blame game, I'm sure, will continue," he said. "But my focus right now on the floor is to make sure the people of Flint have safe drinking water."

The Legislature is expected to move swiftly this week on putting up $6 million toward the cost of Flint drawing water from Detroit until next summer.

State Provides Water Filters For Flint Child Care Facilities
Gongwer
Oct. 12, 2015
The Department of Licensing and Regulatory Affairs announced Monday that any registered child care facilities in Flint can receive free water filters.

The Department of Health and Human Services is providing free water filters to the child care providers, including an additional filter for any home-based providers who already received one as a resident.

The Genesee County Community Action Resource Department is also providing water-filtering pitchers.

Both the pitchers and filters will be available at the GCCARD office, 2727 Lippincott, beginning at 9 a.m. on Tuesday. To qualify, those picking up pitchers and filters have to show a child care license and proof of employment at the facility.

Gov. Rick Snyder: Move back to Detroit water provides best protection for public health in Flint

State, city, Mott Foundation, join to fund switch until KWA is ready

FLINT, Mich. – Flint families and children will be better protected by reconnecting with the Great Lakes Water Authority as the source of the city's drinking water until the Karegnondi Water Authority pipeline is completed, Gov. Rick Snyder said.

Snyder said Thursday that he will request the state Legislature to provide half, or $6 million, of the $12 million needed to reconnect with the authority through next summer, when the KWA is expected to be completed. The Flint city government will provide $2 million and the Charles Stewart Mott Foundation has committed $4 million.

"All Flint residents need clean, safe drinking water," Snyder said. "The technical experts helping the city on its water advisory all agree this move back to the Great Lakes Water Authority provides the best public health protection for children and families. This effort today is the result of people coming together to solve a problem. I appreciate Detroit's willingness to reconnect with Flint, the Mott Foundation's generous commitment, and the dedication of all parties to come together to protect Flint families and children."

Flint city leaders requested the state's help to fund the reconnection and to assist with health and infrastructure issues. Flint's move to the Great Lakes Water Authority is expected to cost about $1.3 million per month until the Karegnondi Water Authority is completed next summer.

"It's heartening to know so many people are working at so many levels to bring safe, clean water back to Flint," Mott Foundation President Ridgway White said. "We believe this transitional solution is the right and necessary thing to do, and we're glad we could help the state and the city make it happen."

The move to Detroit water, which is expected to carry, carries many public health benefits. As large bodies of water, the Great Lakes are naturally prone to fewer problems from large rain events and other runoff issues that can sometimes be present in shallower rivers. Additionally, the Great Lakes Water Authority water already has additional corrosion control, using phosphates to help coat the insides of pipes and limit lead from leaching into the water.

However, reconnecting with the authority will not completely resolve the city's problem with lead service lines or aging infrastructure. It will take time for pipes in Flint to become coated with the phosphate corrosion control. Additionally, some households in the city could experience lead in their drinking water until all lead pipes and plumbing are replaced.

"Reconnecting to Detroit is the fastest way to deliver clean, safe water to Flint and stabilize the infrastructure system," Flint Mayor Dayne Walling said. "I appreciate the state, the Mott Foundation, Detroit, and the county's participation in a solution for Flint's water problems. The health and safety of Flint's families, children and seniors is my top priority, and reconnecting to Detroit is a major step that the city could not take alone given budget constraints."

To best protect public health, Snyder said state and local authorities will continue to carry out steps outlined on Oct. 2 in a comprehensive action plan, including continued testing, the use of faucet filters and providing residents with accurate information about steps to eliminate lead exposure. The Michigan Departments of Environmental Quality and Health and Human Services today also committed an additional $3.5 million for water filters, free lead testing through the state laboratory for Flint water customers, and hiring additional staff to conduct health exposure monitoring for lead in drinking water.

Free filters are available for current MDHHS clients at the 125 E. Union St. or 4809 Clio Road MDHHS office locations. For residents who are not currently enrolled in MDHHS assistance programs, free filters

are available at the Genesee County Community Action Resource Department offices at 2727 Lippincott and 601 North Saginaw in Flint. Staff will be at all four locations from 9 a.m. to 4 p.m., Monday through Friday, to distribute filters and assist residents who have questions about proper installation. At the Lippincott location only, extended hours will be offered this weekend, including until 7 p.m. on Thursday and Friday and from 10 a.m. to 2 p.m. on Saturday.

Other good practices for residents concerned about lead include turning on the cold water tap and running the water until it's as cold as it will go. Additionally, only use cold water for cooking, drinking and especially mixing baby formula.

School test results released; more investigation planned

The state today also released the first results from its lead screening program in schools and homes. Of 37 total samples taken at 13 buildings, four samples spread over three buildings exceeded the federal action level of 15 parts per billion.

However, this sampling provides only an initial screen, and the state is committing to further testing water and inspecting plumbing at these schools. Until testing is complete, schools are advised to continue using bottled water and filtration as a precaution to protect children.

In addition, free testing is still available for any other Flint school, including daycares and Head Starts. Free testing is also available for any Flint resident.

Additional information, including more detailed lead screening results, is available at www.michigan.gov/flintwater.

Thursday, Oct. 8 at 10 a.m.
Gov. Rick Snyder will make an announcement regarding the Flint water system. He will be joined by Flint Mayor Dayne Walling, Director of Environmental Quality, Dan Wyant, Director of the Department of Health and Human Services, Nick Lyon, Dr. Eden Wells, Chief Medical Executive at DHHS, and Ridgway White of the Charles Stewart Mott Foundation.

A livestream option is also available at www.michigan.gov/snyderlive. If you wish to embed the event please visit http://new.livestream.com/snyderlive for more information.

Media must present valid press credentials on site.

Location:
Mott Foundation/Commerce Center Building – Conference Center, Ground Floor

519 S. Saginaw St.
Flint, MI

Thursday, Oct. 8 at 7 p.m.
Snyder will offer remarks at the Celebration of Life Gala supporting Magen David Adom (Israel's national 911 and emergency services).

Media must present valid press credentials on site.

Location:
Adat Shalom Synagogue
29901 Middlebelt Rd.
Farmington Hills, MI

Subject: "Blue Ribbon Panel of Water Experts"

Capt. and Tony,

At 2 p.m. today, a "blue ribbon panel of water experts" met about the Flint water issue. This meeting had the city of Flint's mayor, DPW director, health folks, as well as legislative staffers. I think there was someone there from the Department of Health and Human Services.

During the meeting, a representative from United Way-Genesee County said he needed "state emergency assistance" to help with the coordination and distribution of water filters. The panel was in agreement that state emergency assistance would be needed to help with the distribution. A staffer from state Sen. Jim Ananich's office said they have put in requests.

Not sure where this is going, but I figured I'd give you a "heads up" in case something comes down the pipeline.

Public Development
@Public_D
So state of #Michigan just dumped a bunch of filters onto @UWGeneseeCo to figure out how to distribute? mlive.com/news/flint/ind... #flintwater

Flint had no plan to minimize lead corrosion in people's drinking water post river switch
Michigan Radio
10.06.2015

Confused about corrosion control? We were too.

In Flint, lead levels in some children's blood have spiked dramatically. Scientists believe the Flint River is part of the problem. Flint switched from Detroit's water system and started pulling water from the Flint River last year.

We've been hearing some conflicting things from state officials about what exactly Flint has been doing — if anything — to cut down on lead in the water.

The confusion

State regulators told federal regulators earlier this year by email that Flint is not using corrosion control.

Corrosion control is important because it helps prevent lead from leaching out of old pipes into people's tap water.

But on Friday, Michigan Department of Environmental Quality Director Dan Wyant said this:

"Know that when the city switched from Detroit sewer and water, that the city utilized corrosion controls," he said.

That directly conflicts with what the state said before.

After Friday's press conference, we asked DEQ spokesman Brad Wurfel to clarify. He then said the corrosion control Flint used was lime.

"Flint was trying to address the hardness of the water, so they chose lime to address the hardness," he said. "That is also a corrosion control agent. It's a recognized corrosion control agent. It just wasn't, it wasn't cutting it."

We ran this by some outside experts.

Daniel Giammar is an expert on lead in water. He's a professor of environmental engineering at Washington University in St. Louis, Missouri.

"Simply claiming to have lime addition as corrosion control is insufficient," he says.

Giammar told us that you can use lime for corrosion control, but you have to have a plan. You want to make sure your water hits a certain pH range and alkalinity so that you minimize the amount of lead in the water.

"Whether or not you have corrosion control isn't whether or not you're adding lime, but it's rather, are you achieving the target pH that you set out?" he says.

The softening process could be making the situation worse.

Marc Edwards is a civil engineering professor from Virginia Tech University and a nationally renowned expert on water treatment. He was also confused by Wyant's claim that Flint had corrosion controls in place. So, over this past weekend, he took a closer look at Flint's data.

He says the water softening treatment Flint is using is actually making Flint's water more corrosive.

"Even as they're denying the water is corrosive and it's causing this higher lead, the pH value is plummeting, it's becoming more acidic," Edwards says. "And it led me to wonder, I mean, are they even watching what's happening to the pH of their water? It's like flying a jumbo jet without checking your gas tank."

We requested an interview with someone from Flint's water department, but they did not provide anyone to talk to us for this story by our deadline.

The DEQ's response

The DEQ says they have been keeping an eye on the pH of Flint's water.

Liane Shekter Smith heads up DEQ's Office of Drinking Water and Municipal Assistance.

"Absolutely, we've been monitoring the pH data. We monitored it prior to the switch to the Flint River and we monitored it since. And we've compared the pH data and there has not been a significant change."

Shekter Smith says they consider a pH of 7.5 to be acceptable. But both Marc Edwards and Daniel Giammar told us cities should shoot for a pH of 8 or above to minimize the amount of lead getting into drinking water. That's because you want the water to be less acidic to minimize corrosion.

Data available online from the City of Flint show that the pH of treated water leaving the plant has been trending downward - becoming more acidic. Monthly average pH measurements dropped from 8.07 in December 2014 to 7.34 in August 2015.

A key point here: there's a difference between having some kind of treatment process that might work and having an approved corrosion control plan.

Yesterday, Shekter Smith confirmed that Flint does not have a corrosion control plan.

"At the time they proposed switching to the Flint River and implementing the lime softening treatment method, there was an indication that the pH control provided by that method perhaps would provide optimal corrosion control," Shekter Smith says.

It's clear that method didn't work.

Tomorrow, city, state, and federal officials will get together to come up with some kind of plan to control the corrosion.

Hi Shanon,

Here's the Cybersecurity Awareness Month news release for your review. I've also attached the state employee email.

DTMB, EMHSD and IOD have reviewed and signed off.

I talked to Caleb this morning – and he asked that we route it through Anna Heaton. Dave Murray has been tied up with the Flint water issue.

Please let me know if you need anything.

Thanks,

Ron

MEDIA MONITORING REPORT

10/05/2015

Issues:

- Flint water issues continue to simmer.
- WDIV-TV 4 in Detroit reported that the "state has declared a public health emergency." No known declaration has been made.

Summary:

- Nancy Kaffer opines in the Detroit Free Press about avoiding tap water has become a way of life in Flint.
- The Detroit Free Press looks at the Flint water issue in an editorial.
- The state is convening a technical panel this week that's supposed to come up with a plan to respond to the Flint drinking water emergency. The group is made up of state and federal environmental officials, as well as outside experts.
- After weeks, and in some cases months of worrying about their water, there was finally some relief Saturday for people living in Flint. More than 2,700 water filters were handed out to Flint residents.
- Michigan will spend $1 million to buy water filters and immediately test water in public schools in Flint after testing showed elevated levels of lead in the city's children, the governor said Friday, a day after local health officials declared a public health emergency.
- Donations continue to pour in to Flint Community Schools to help students and staff handle the 'Water Worries'.
- In Flint, lead levels in some children's blood have spiked dramatically, and scientists believe a new drinking water source is to blame. They're pointing to lapses in oversight from state regulators, who they say should've seen the problem coming.
- A U.S. Coast Guard official has more concern over Enbridge's Line 5 pipeline under the ground in the Upper Peninsula rather than the under the Straits of Mackinac.

- Bermuda was lashed Sunday by gusting winds and pelting rains from a weakening Hurricane Joaquin as its spinning center tracked just west of the wealthy financial haven and tourist destination after plowing through the Bahamas as a major storm.
- A student at Monroe Middle School has been diagnosed with viral meningitis.

Analysis:

- Flint water issue coverage has gone international.
- Advocacy groups continue to mobilize due to the Flint water issues.
- Will continue to monitor.

FLINT WATER

Nancy Kaffer: Avoiding tap water has become a way of life in Flint

Detroit Free Press, Oct. 3, 2015

Outside a taco shop on Flint's Fifth Street, Estella Walker balances a gallon jug of water on top of the stroller that holds her 3-month-old son, DeWayne. She's mixing bottles of formula for DeWayne and his 19-month-old sister Vanessa.

Nadene Strickland sits outside her home on the city's north side, watching her grandsons play basketball. She still drinks the water. She can't afford bottled.

Shopping at the local farmers market with five of her seven children, Tena Fransioli says she hasn't used tap water in a long time.

Across town, it's bath night for LeeAnne Walters' kids. She heats bottled water in the microwave and carries it to the bathroom, slowly filling the tub. In Melissa Mays' bathroom, there's a reminder taped to the wall: To brush your teeth, use the bottled water on the bathroom counter.

This is life in Flint, where you really should not drink the water.

And no one, not in this country in the year 2015, should have to live this way.

For more than a year, Flint residents have been screaming that their water wasn't OK, that it smelled bad, tasted bad, looked bad, and was making them sick.

Few listened. The state told them, again and again, that the water was safe — that contamination had been handled, and that the water was within acceptable levels.

It wasn't until last week that Gov. Rick Snyder finally acknowledged the profound problems with Flint's water. Lead, from aging water service pipes, is leaching into the water the city pumps from the Flint River, exacerbated by a local treatment plant's failure to add appropriate chemicals.

But he still won't call it an emergency.

Editorial: For Flint, vindication -- for Snyder, more questions

Detroit Free Press, Oct. 2, 2015

Lead flows through Flint's water system and out of taps in people's homes.

Children have been drinking that water, and suffering the consequences.

And controls that should have prevented this from happening were nonexistent or inadequate.

After months of denial, we finally heard Gov. Rick Snyder and members of his cabinet validate the mounting data that confirms beyond reasonable doubt what Flint residents have known for months: Their water is not safe to drink.

In April 2014 -- while under state oversight -- Flint began to draw its water from the Flint River, a temporary measure until a new regional water authority comprising Flint, Genesee, Sanilac and Lapeer counties is complete next year. For decades, the city had purchased its water from the Detroit Water and Sewerage Department.

By June last year, residents began to complain that their tap water was the wrong color, that it had a troubling odor and taste. Many reported rashes and other health problems, likely linked to a disinfectant added to the water after tests showed it contained coliform bacteria.

By the start of this year, some residents began to suspect the water also contained lead and other heavy metals, leached from Flint's aging infrastructure by more-corrosive Flint River water, exacerbated by an inadequate water treatment plan.

Friday, Snyder and his cabinet announced a plan to improve corrosion controls that should have prevented lead from contaminating drinking water. They'll dedicate $1 million in state funds to purchase water filters for Flint residents, and to pay for expanded water testing and additional health and community resources.

In the long term, Snyder must find state funds to help Flint replace its aging service lines.

For Flint families, it should be the first step toward some semblance of normalcy, to a basic standard of living all Americans take for granted -- that the water running from our taps is clean, and drinkable.

Repairing Flint's water system will be complicated and costly. But the difficulty of that task pales in comparison to the work that must be done to repair the public trust, in both the systems meant to safeguard our health, and in the governor who is meant to oversee those safeguards.

Snyder's acknowledgement comes after repeated assurances that Flint water was safe, even as evidence mounted that this could not be true. An MDEQ spokesman denounced tests performed by a Virginia Tech University researcher – a MacArthur genius grant recipient – who evaluated hundreds of water samples, writing to one reporter that "this group specializes in looking for high lead problems. They pull that rabbit out of that hat everywhere they go. Nobody should be surprised when the rabbit comes out of the hat, even if they can't figure out how it is done."

When a hospital researcher announced last week a growing number of Flint children had elevated blood-lead levels, the MDEQ disparaged the researcher's work, calling it not "irresponsible," but "unfortunate," and saying that Flint's water situation had reached "near-hysteria" – despite state data that showed both increased amounts of lead in the water supply, and a greater number of children with elevated blood-lead levels. Lead poisoning is irreversible; children affected by it suffer from behavioral and developmental problems.

As late as Wednesday, Snyder spokesperson Sara Wurfel questioned the test data, insisting that the lead levels in Flint's water did not reach levels considered actionable by the U.S. Environmental Protection Agency.

The next day, Snyder admitted that in making the switch to Flint River water, that there were "probably things that weren't fully understood when the switch was made."

So we are left with questions that need answers. Not merely because this saga unfolded while Flint was under state oversight, a succession of emergency managers appointed by and answerable to Snyder, but also because the governor oversees the state agencies charged with preventing just this type of crisis.

What was the science that allowed the MDEQ to approve the switch to Flint River water? What was not "fully understood," and in the absence of that information, why did the switch proceed? MDEQ chief Dan Wyant referred to tests that indicated elevated lead levels -- when did were those tests performed?

We – along, we're confident, with other news agencies in this state – have filed requests to obtain information that will help answer these questions, through the state's Freedom of Information Act.

But we shouldn't even have to.

Snyder, as the state's chief executive, ought to be riding herd on the autopsy over the process that led to this public health crisis. And in addition to repairing what went wrong – or defending the state's actions and oversight – the governor needs to be up front with the public about what he finds.

This should never have happened to the people in Flint. Children, drinking tap water polluted by lead. It reads like something out of an impoverished, technologically deprived nation.

It's up to Snyder to assure that it never happens again.

Detroit men take water to Flint

WDIV-TV 4 in Detroit, Oct. 4, 2015

The Flint water problem has caused the state to declare a public health emergency.

While the state tries to find a permanent solution to the problem, two Detroit men are taking it upon themselves to help Flint families.

Anthony Scales was disturbed by the water crisis and he started collecting cases of bottled water and taking them to Potter Elementary School in Flint.

Tech panel to make recommendation on reconnecting Flint to Detroit

WMUK-FM 102.1, Oct. 5, 2015

The state is convening a technical panel this week that's supposed to come up with a plan to respond to the Flint drinking water emergency. The group is made up of state and federal environmental officials, as well as outside experts.

Dan Wyant directs the state Department of Environmental Quality. He says one of the first decisions is whether to reconnect Flint to the Detroit water system.

"The question is whether we'd be better if we want to Detroit water, and I'd like science to make that determination," Wyant says.

Flint Mayor Dane Walling says he'd ask the state to pick up the cost of one and a half to two million dollars a month if the city re-connects to the Detroit system.

The state is already distributing water filters to city residents, and has promised to step up testing of water in homes and schools.

Water filters given out to Flint residents

WJRT-TV 12 in Flint, Oct. 5, 2015

After weeks, and in some cases months of worrying about their water, there was finally some relief Saturday for people living in Flint.

More than 2,700 water filters were handed out to Flint residents.

The beginning of the day started with those most at risk for lead contamination.

Then the health department quickly opened it up to all city residents.

"I'm very happy I got here," said Sierra Booker, who has a one-year-old daughter.

After filter distribution, why some couldn't make it to get relief

WJRT-TV 12 in Flint, Oct. 4, 2015

2,700 hundred water filters were given out yesterday at U of M Flint's Recreation Center.

At first, only those most at risk were given filters - but by a couple hours in any Flint resident could come.

Still, there were 1,300 filters left at the end of the day, leading some to ask, why?

At River Park Apartments in Flint, a public housing complex, we found many people just didn't know the filter distribution was going on.

"Well we didn't hear about it until the last minute," said resident Natia Anderson.

"I didn't hear about it until a few minutes ago," said resident Lonnie Williams.

The Genesee County Health Department made the announcement late Friday morning, less than 24 hours before the actual event. Organizations like the United Way of Genesee County, and U of M Flint worked tirelessly with the Health Department, to make sure Saturday's giveaway went smoothly.

State and health officials address Flint water crisis, introduce plan of action

WXYZ-TV 7, Oct. 2, 2015

Michigan will spend $1 million to buy water filters and immediately test water in public schools in Flint after testing showed elevated levels of lead in the city's children, the governor said Friday, a day after local health officials declared a public health emergency.

A plan of action was outlined at a news conference, and includes:

*Testing in Flint public schools immediately to ensure that drinking water is safe, with testing also available at no cost to any other school in Flint.

Water filter giveaway open to all Flint residents held at UM-Flint

MLive, Oct. 3, 2015

Local organizations came together Saturday to distribute 4,000 water filters to Flint residents worried about lead in their water.

The **filter giveaway was held at the University of Michigan-Flint** at the Recreation Center on Saturday, Oct. 3. Originally organizers were focusing on low-income families with children, pregnant women, and the elderly, but opened it up to all residents in the afternoon. The giveaway began at 10 a.m. and ends at 5 p.m.

The United Way, University of Michigan-Flint, city of Flint, and other local agencies and businesses partnered to help distribute the filters.

The 4,000 filters distributed Saturday is only a fraction of the 20,000 estimated filters needed for Flint residents.

Thousands of water filters handed out

WNEM-TV 5 in Saginaw, Oct. 5, 105

FLINT, MI (WNEM) - Following tests that show elevated levels of lead in the Flint water system, thousands of filters were given away over the weekend.

The filters, certified by the National Sanitation Foundation, were handed out Saturday at the University of Michigan-Flint.

People like Margret Brown stood in line to get one. "My daughter is pregnant, she needed a water filter."

That makes Brown's daughter a top priority to receive the help. That's because tests have shown children with elevated levels of lead.

The lead began showing up after Flint switched off the Detroit water system, and started taking water from the Flint River. That water is causing lead in old pipes to flow into homes.

On Friday the state said it will contribute at least $1 million to buy home water filters.

Water filter distribution to start for residents in Flint

Associated Press/WEYI-TV 25 in Flint, Oct. 3, 2015

FLINT — Officials are scheduled to start distributing filters to some Flint residents receiving water from the city's water system.

"It's not good for him to drink that growing up, his body's not fully developed," parent Maxine Gray said of her one month old son.

Tests have shown children with elevated levels of lead, months after Flint began drawing and treating water from the Flint River. The water is stirring up lead in old pipes in thousands of homes.

About 4,000 filters certified by the National Sanitation Foundation will be handed out Saturday morning at the University of Michigan-Flint.

"I'm very excited," said Takisha Moller who's soon expecting her first child. "Glad I'll get to drink healthy water."

Receiving priority will be pregnant women, families where infants are on formula or being breastfed, and Children Special Health Care Services households. Only one filter will be available per home.

The state said Friday it's chipping in at least $1 million to buy home water filters for Flint.

Water donations pour in for Flint Community Schools

WJRT-TV 12 in Flint, Oct. 5, 2015

FLINT (WJRT) - (10/05/15) - Donations continue to pour in to Flint Community Schools to help students and staff handle the 'Water Worries'.

Word has spread throughout the state about the problem with high lead levels in the Flint water system.

As a precaution, water fountains in the Flint schools have been turned off.

Monday morning, two large deliveries were made to the Flint Community Schools. Twenty-four thousand bottles of Aquafina water were donated by the owners of Auto City Service. The truck arrived at the Flint Schools Maintenance and Operations Building on East Court Street and the cases were unloaded.

Walgreens is also donating 4,000 bottles of water to Flint schools. A delivery truck loaded up with 150 cases from the store at Beecher and Ballenger.

The water will be distributed to the 11 active school buildings in the Flint district.

School officials have said the two high schools need extra water because of extra school activities and athletics.

"We really appreciate all the donations we received thus far. Currently, we're able to meet the needs of our students at this point and we're starting to have more conversations on a long-term plan moving

forward...we still welcome all donations. You can deliver donations to our maintenance warehouse and also we're accepting donations on the school level," said Bilal Tawwab, Flint Schools superintendent.

Last Friday, the DEQ sampled water from all Flint schools. Results are not back yet.

Sorting out accountability in Flint water issues is "relatively complex"

Michigan Radio, Oct. 5, 2015

In Flint, lead levels in some children's blood have spiked dramatically, and scientists believe a new drinking water source is to blame. They're pointing to lapses in oversight from state regulators, who they say should've seen the problem coming.

Flint's water problems began about a year ago, not long after the city stopped drawing water from Detroit's system. To save money, Flint began getting its water from the Flint River.

But since the switch, doctors and researchers say cases of elevated blood levels in kids under five have doubled in some parts of the city. Lead can cause irreversible health damage, especially in young children.

"It was not my decision. I raised a number of concerns about it throughout the process," Flint Mayor Dayne Walling has said.

He was mayor when the city switched from Detroit's water system to the Flint River. But Mayor Walling wasn't in charge.

"The governor has a substantial responsibility here," he said.

Gov. Rick Snyder had appointed an emergency manager to run Flint.

By law, Michigan cities in danger of going bankrupt can get emergency managers–who have all kinds of power that elected leaders don't. In Flint, they decided the city couldn't afford Detroit's water bill anymore.

The city had been planning to join a new county system, which is under construction. State bean counters decided the Flint River could do until then.

Virginia Tech researcher Marc Edwards says Michigan's environmental regulators should have known Flint's new water source was much more corrosive than the water Detroit piped up from Lake Huron.

He says testing the water in the lab would've been a good start. Other consultants I spoke with said setting up a small scale, mock system inside Flint's water plant would have been a wise move. That would have given them a test period with the new water source before switching the whole system.

Edwards, who's been studying lead in water issues for decades, says Flint should also have had a corrosion control plan in place to treat the water, so that it didn't leach lead from old pipes.

"How on earth this was allowed to happen, or people believed it was ok for it to happen, I don't even know where to get started on that," Edwards said last week.

In February, officials at the U.S. Environmental Protection Agency found lead levels at one woman's home that were high enough to be considered toxic waste.

Edwards says that should've set off alarms for state regulators.

"Instead what they did is they took action after action to cover this problem up, and essentially leave Flint residents in harm's way. So at some point what might be attributed to an honest, perhaps innocent mistake...it changed into something completely different," Edwards said.

Emails show concerned federal officials asked the state if Flint was treating to control corrosion. State officials said yes. When the EPA asked what kind of treatment, there seemed to be a reversal. One email says plainly: "Flint is currently not practicing corrosion control treatment."

When asked if Flint broke federal rules by not having a corrosion control treatment plan, the U.S. EPA said the question was "relatively complex." Emails show at least one EPA employee believes Flint was required to treat the water to help prevent lead corrosion. But EPA spokespeople haven't been willing to say, plainly, that Flint broke federal rules.

Here's the written response from EPA Region 5 Administrator Susan Hedman:

"Actions that the State of Michigan and the City of Flint announced (Friday) are important steps to protect public health. The immediate steps being taken to implement corrosion control will reduce lead in drinking water, as required by the Safe Drinking Water Act. US EPA will continue to provide technical assistance to the State of Michigan and the City of Flint to support their joint effort."

On Friday afternoon, protestors lined up outside a university building, where city and state officials announced their latest plan to fix Flint's water.

"We survived bacteria. We've had boil-water advisories as a result. They put too much chloride in the water. And it's just been one disaster after another," Flint resident Claire McClinton said.

Elizabeth Taylor, another Flint resident, places blame on Gov. Snyder. Why?

"Well, because he put us in this emergency manager situation. They just do whatever he tells them to do," Taylor said.

Taylor is disappointed no officials have been willing to "man up and apologize."

"These men, they're just like...excuse me, but it's like their genitalia have fallen off. They have nothing left in their brains. And you can't run a city or a state like that. They have to be more responsible," she said.

Inside the building, state officials made yet another reversal, telling reporters that, actually, Flint *has* been treating the water for lead.

"State government, and the federal government for that matter, or any government, can only make decisions on the information we've got," Michigan Department of Environmental Quality spokesman Brad Wurfel said.

"We'll also concede that we've been learning as we go. So as we've learned more, we've changed paths here," Wurfel said.

Now state officials say they'll start a new corrosion control treatment plan for Flint by next month.

Until then, they've budgeted $1 million to give people free lead filters for their homes.

EMERGENCY MANAGEMENT AND HOMELAND SECURITY

Great Lakes face threat from another Enbridge line

Detroit Free Press, Oct. 4, 2015

The 62-year-old segment of Canadian oil transport giant Enbridge's Line 5 pipeline underwater, at the bottom of the Straits of Mackinac, has been generating the most buzz and concern lately over how a spill from it would harm the Great Lakes.

But it's another segment of that same pipeline, out of the water and running through the Upper Peninsula along U.S.-2 highway for nearly 90 miles between Manistique and St. Ignace, that poses a more immediate — and just as dire — threat to the lakes, according to a U.S. Coast Guard oil spill contingency specialist. The 30-inch-diameter transmission line runs under at least 20 rivers and creeks that feed into northern Lake Michigan, and at points is within a half-mile of the lake.

"Quite frankly, we see a spill in the straits as a very low probability," said Steven Keck, who's based at the Coast Guard's Sault Ste. Marie station. "But that corridor along U.S.-2 we see as a much higher probability.

"We don't seem to get a lot of attention on that stretch between Manistique and St. Ignace, but it's still the Great Lakes."

A joint team of the Coast Guard; other federal, state, and local agencies; Enbridge officials, and representatives of Marine Pollution Control, an oil spill response contractor for Enbridge, conducted a walking line survey of Line 5 where it crosses streams, creeks and rivers along the U.S.-2 corridor earlier this year.

Bermuda whipped by weakening Hurricane Joaquin

Associated Press, Oct. 5, 2015

HAMILTON, Bermuda (AP) - Bermuda was lashed Sunday by gusting winds and pelting rains from a weakening Hurricane Joaquin as its spinning center tracked just west of the wealthy financial haven and tourist destination after plowing through the Bahamas as a major storm.

Residents of the mid-Atlantic British dependency mostly hunkered down at home after securing patio furniture and stocking up on gas and batteries as the hurricane whipped the mid-Atlantic British territory. All flights to L.F. Wade International Airport were cancelled and ferry service was closed due to rough seas.

Emergency service agencies were placed on alert and there were scattered power outages by early evening.

"I think it's going to be bad, and last year I lost a lot of stuff to the storms," said retiree Susan DeSilva, whose son-in-law helped her secure her windows and doors as the storm approached.

Others were far less worried in the tiny territory accustomed to rough weather. At least one bar in the capital of Hamilton was packed with people riding out the hurricane with drinks and friends.

"I can think of worse places to be," said Derrick Tucker in the crowded Robin Hood Pub and Restaurant as the wind whistled outside.

Case of viral meningitis reported in Montrose School District

MLive, Oct. 5, 2015

MONTROSE, MI -- Another student at a Genesee County school has contracted meningitis.

A student at a Montrose middle school has been diagnosed with viral meningitis, according to a letter the district sent to parents Monday morning, Oct. 5.

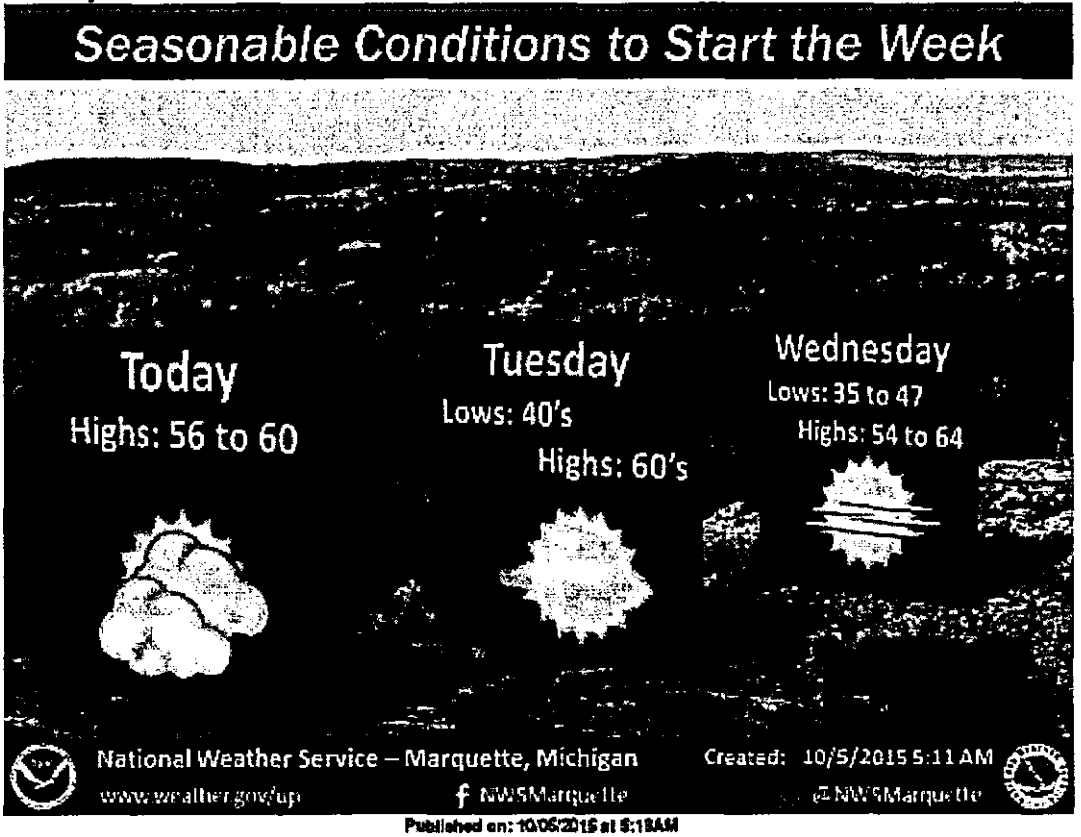
Common areas at Keuhn-Haven Middle School were disinfected over the weekend, and additional staff will be brought in to help regularly disinfect surfaces in all the district's buildings, according to Superintendent Edward Graham's letter.

Meningitis is an infection of the lining of the brain and spinal cord.

"As we begin the new week, in addition to our normal cleaning routine, we will be bringing in additional help to assist in the regular disinfecting of surfaces in all buildings," the letter reads.

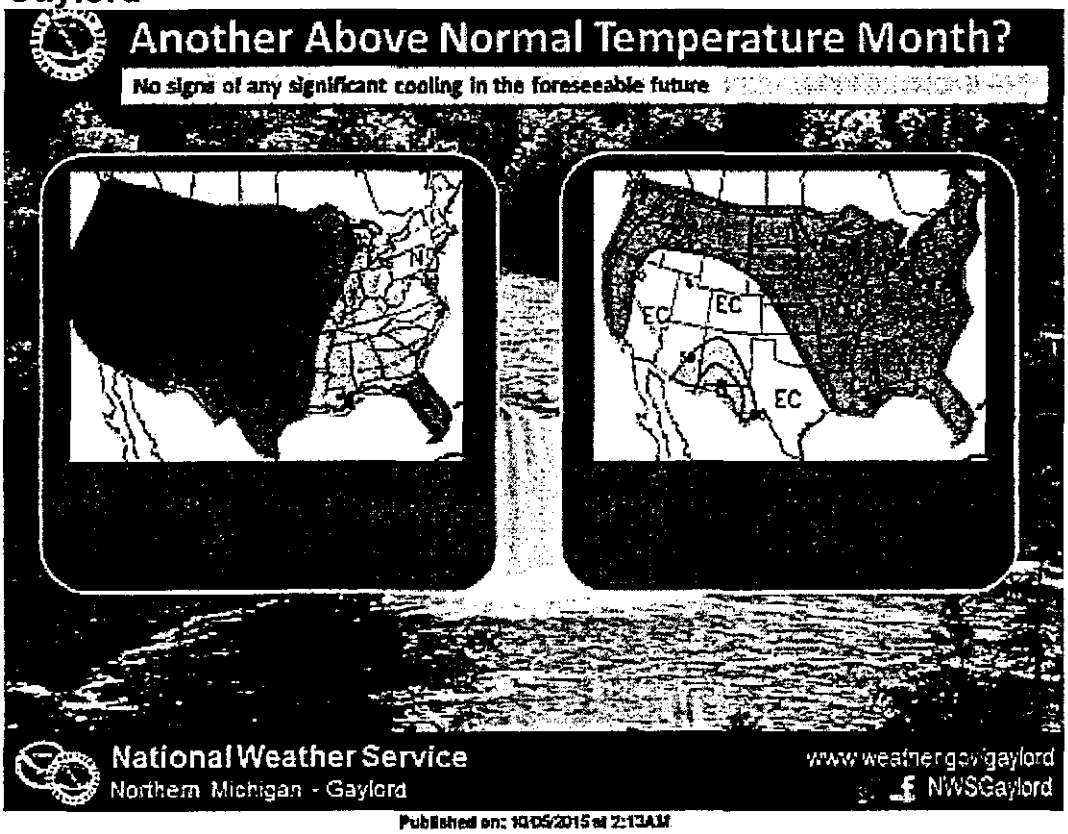
NATIONAL WEATHER SERVICE FORECASTS

Marquette



Despite a cold front moving through the area late tonight and Tuesday, conditions will remain dry into midweek with temperatures at or above normal for early October.

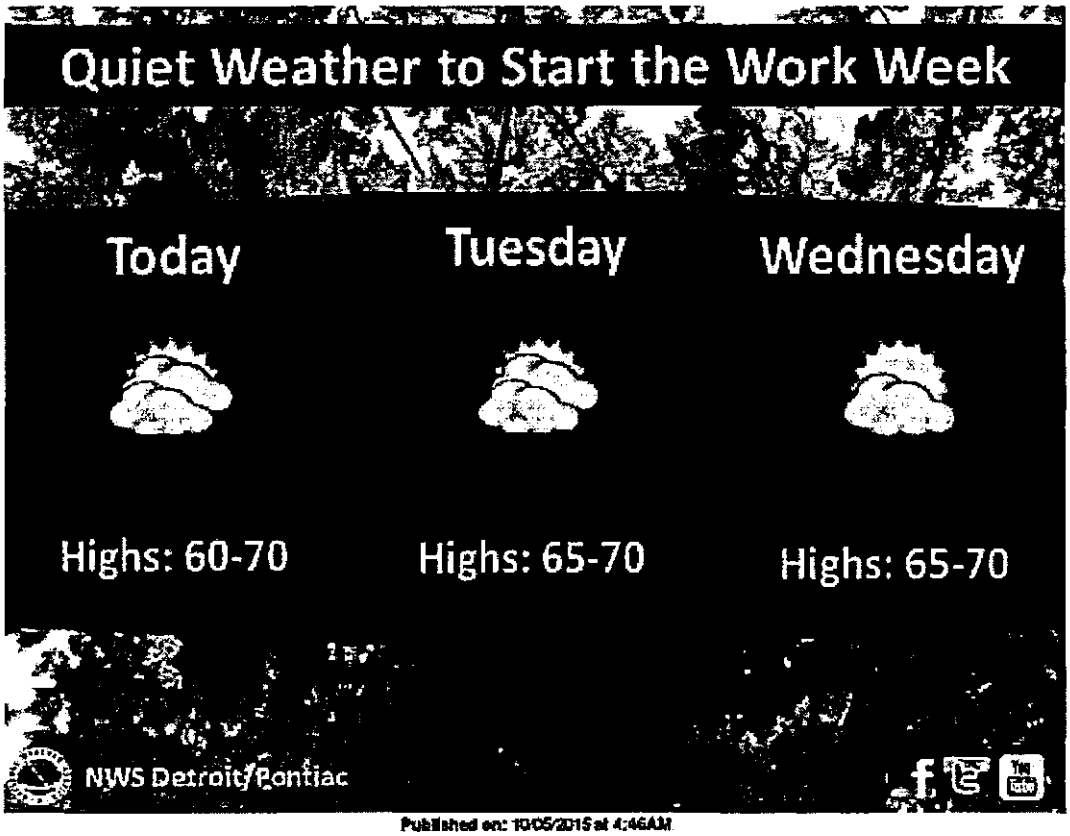
Gaylord



Published on: 10/05/2015 at 2:13AM

Pattern continues to favor lack of any sustained cold air, with odds favoring a warmer than normal October. Plenty of time for things to change of course.

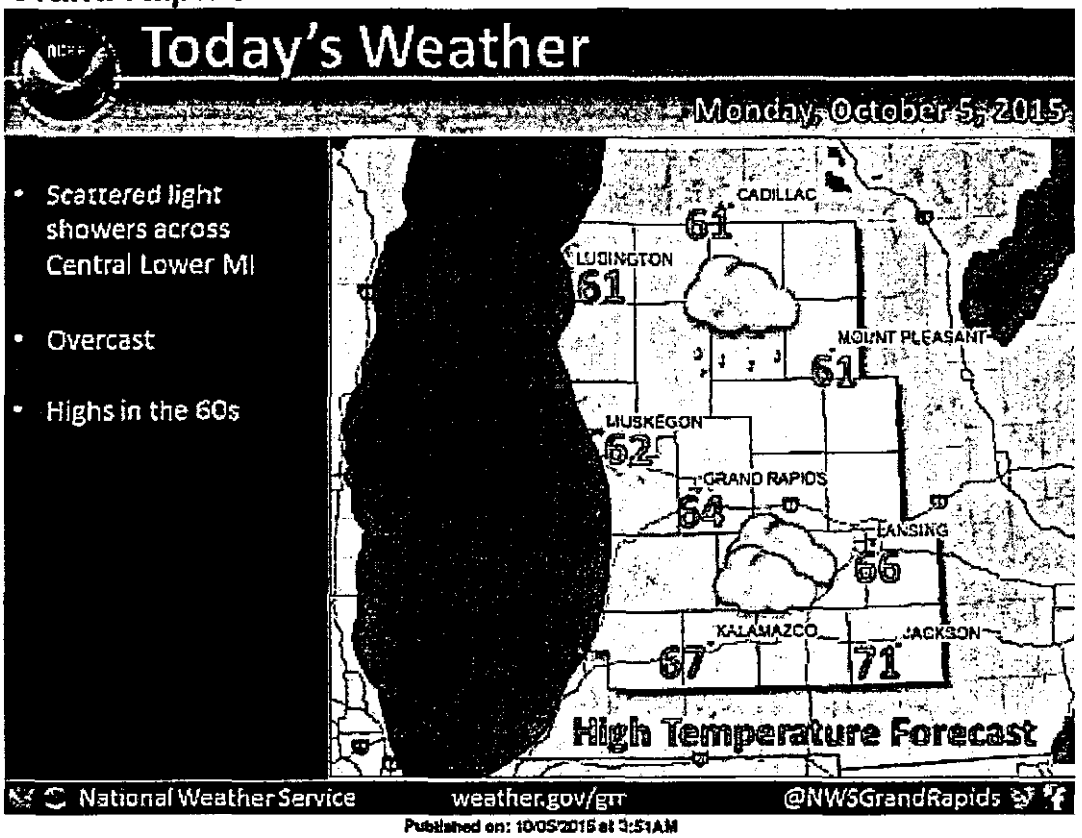
Detroit



Published on: 10/05/2015 at 4:46AM

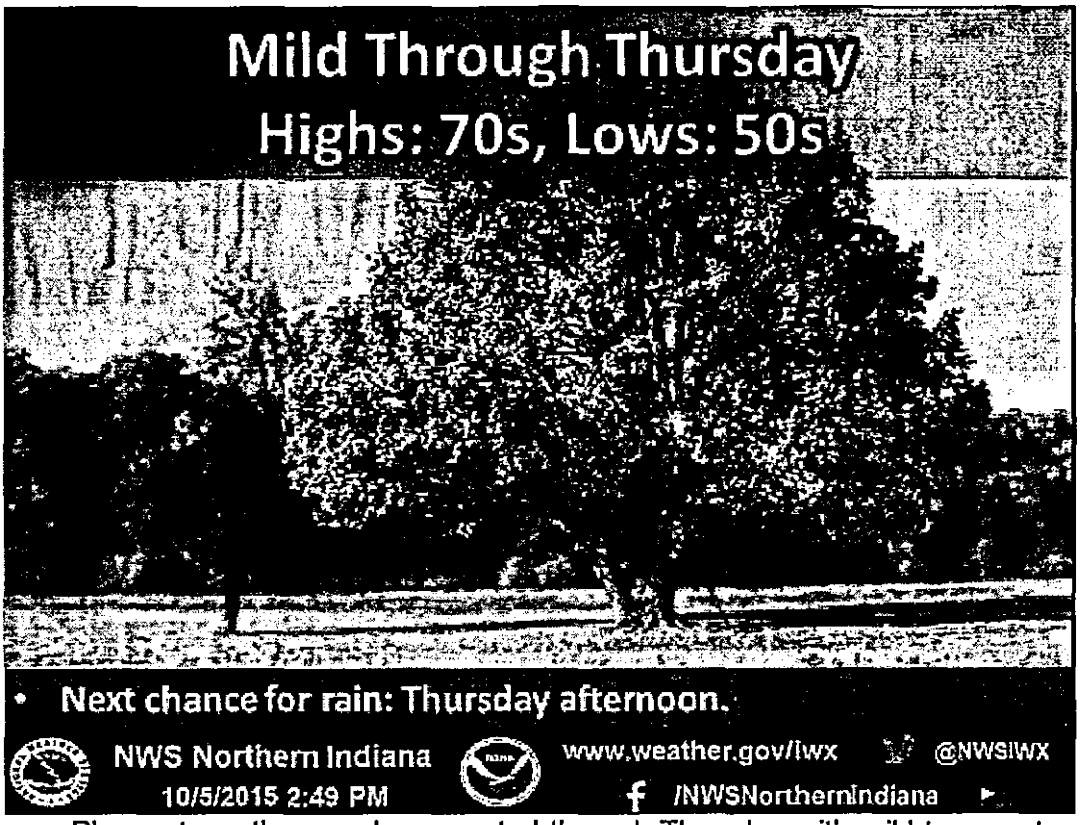
High pressure will slowly expand into the area through the middle of the week, providing quiet weather for Southeast Michigan. A few showers will be possible today along and north of the I-69 corridor, but otherwise, dry weather is expected.

Grand Rapids



A band of scattered, very light showers continues to track northeast across Central Lower Michigan this morning. Any light rain should be out of the area by early afternoon. It will be a dreary day with overcast skies.

Northern Indiana



Pleasant weather can be expected through Thursday with mild temperatures. Highs will be around 70 to the upper 70s. Lows should be in the low to mid 50s. The next chance for rain is Thursday afternoon.

More than 2700 water filters were passed out to Flint residents on Saturday. The Genesee County Health Department will announce this week their plan for distributing the remaining filters. My top priority remains to work for an aggressive, comprehensive solution for Flint families to gain access to the safe drinking water they desperately need and deserve. #FlintWater

The Flint water quality issue is getting national attention. Since Flint switched to getting their water from the Flint river lead levels have spiked in tap water and more than doubled in children. Any lead in children's water is a health concern. We are hoping for a swift solution that goes beyond handing out filters & bottled water. http://n.pr/1OSUVVc#Flintwater should be #safewater

While I do not make blanket recommendations... ever... this is the recommendation I made for Flint almost 8 months ago. I am a "less is more" when it comes to adding chemical to Drinking Water... but the Flint system used one water quality for decades before switch to another... and a corrosion control chemical is really their best alternative. (They can turn off the ammonia feed and the fluoride feed - immediately) The chemical cost may range from less than 1 cent to 10 cents per thousand gallons of water treated depending upon the systems water quality.

The damage caused by corrosion within Drinking Water distribution systems is one of the largest problems for the water utility industry. The effects on the safety and health throughout a community, as well as the associated costs resulting from corrosion, are indeed a major concern for water quality managers.

The byproducts of corrosion in the distribution system can protect, harbor and support bacteria, yeasts and other microorganisms by forming a glycocalyx. Over time a depressed pH forms, due to anaerobic conditions, beneath this glycocalyx causing increased corrosion in the form of pin hole leaks. Additional problems can also result causing odor, bad tastes and slime.

All of these corrosion caused problems add to the cost of water treatment thru increased pumping costs, loss of water or water pressure, and the need for the replacement of water heaters. Typically, an increase in customer complaints due to colored water, bad taste or staining also adds to the overall expense of a drinking water district.

All waters are corrosive to some degree. Chloramine make water much more corrosive... while the disinfection is weaker, the ammonia breaks free and feeds the biofilm growth (nitrification) which make every year a system continues to use chloramine a compounding problem. Most utilities conduct free chlorine "burnouts"... which just makes the situation that much worse.

The corrosivity of the water affects the infrastructure of a distribution system by attacking the piping, concrete and pumps which are often very difficult to budget for a municipality. Factors that affect the corrosive nature of water are: pH, oxygen content, total hardness, total dissolved solids, temperature and alkalinity. The selection of the proper corrosion inhibitor is critical to resolve the corrosion tendency of a water system.

There are numerous corrosion inhibitors that have been used in water over the years, such as: zinc, molybdates, nitrite-borate blends, silicates and phosphates. From a Drinking Water standpoint only two of the above mentioned inhibitors are used, sodium silicates and inorganic phosphates, and usually phosphates are the obvious choice due to treatment costs. Silicates are used at a significantly higher treatment levels whereas a blend of phosphates can typically result in treatment levels as low as 1.0 ppm.

The consistent feed of the corrosion is essential to the success of a corrosion control program. Interruptions if chemical feed can result in the loss of the protective film established on the system piping. Finally, the flow rates of a system are critical in a reliable corrosion control program to provide continuously transport the inhibitor to all areas of the system metallurgy; otherwise an effective protective film will not be established on the metal surfaces of the piping.

Blended phosphate technology has proven to be the most cost effective means of treating Drinking Water systems. The treatment levels for a successful treatment program are usually fed within a 1.0 to 2.0 ppm range. This technology provides a tenacious protective coating at the cathodic and anodic sites. This film forming action develops through a controlled deposition process via a "threshold treatment concept".

This controlled deposition process is a result of the water chemistry combining with the orthophosphate in the product formulation. The key in controlling this deposition is in blending in a variety of polyphosphate compounds. These polyphosphates provide a scrubbing action on the metal surfaces which limits the amount of protective coating being laid down. This is a terrific method of providing a strong protective film while scrubbing away old deposits and biofilm formations.

Some municipalities have tried to feed orthophosphate alone, in the form of phosphoric acid. The phosphoric acid typically has to be fed at a much higher concentration to achieve the same corrosion inhibition results of a blended phosphate program. In addition to this, there is no means of controlling the amount of deposition that will occur often resulting into an adverse effect on "C" factors or possibly increasing the potential for biofilm development. Blended phosphate technology eliminates the concern over these possible problems.

In addition to providing corrosion control of systems metallurgy, blended phosphate products also have the ability to sequester hardness salts, iron and manganese. The damage that can result from hardness,

iron and manganese has been well documented over the years and is significant in terms of revenue while certainly adding to the frustration of a community. The proper sequestration of iron and manganese tremendously improves the appearance of the water preventing these metals from oxidizing and depositing/staining on fixtures and clothing. This ability of ortho and polyphosphates working together, results in stabilized water quality while minimizing color, scale, deposits, corrosion and chlorine demand in drinking water systems.

Benefits of Blended Phosphate Technology

1. Inhibits corrosion of metallurgy within a distribution piping system.
2. Decreases iron tuberculation within a distribution system.
3. Reduces lead and copper levels in the drinking water to meet the 1991 Lead and Copper rule, allowing municipalities to maintain levels of lead < 15 ppb and copper < 1.3 ppm.
4. Decreases biofilm development thereby increasing system life thru reduced MIC.
5. Decreases chlorine demand which improves overall disinfection.
6. Reduces discoloration, staining and mineral build-up on customer fixtures and clothing, resulting in fewer customer complaints.
7. Decreases calcium scale deposits usually seen in hot water heaters.
8. Municipality saves revenue thru reduced corrosion and scale which reduces system failures in terms of leaks and ruptures while also conserving water via reduced hydrant directional flushing.

Blended phosphate technology has been used for over 60 years within the drinking water industry. It remains one of the most cost effective means of controlling corrosion due to the low chemical feedrate required. With this low dosage rate the actual chemical cost may range from less than 1 cent to 10 cents per thousand gallons of water treated depending upon the systems water quality. These blended phosphate cost are offset by the operational and maintenance savings to the utility and consumer.

MEDIA MONITORING REPORT

10/05/2015

Issues:

- Flint water issues continue to simmer.
- WDIV-TV 4 in Detroit reported that the "state has declared a public health emergency." No known declaration has been made.

Summary:

- Nancy Kaffer opines in the Detroit Free Press about avoiding tap water has become a way of life in Flint.
- The Detroit Free Press looks at the Flint water issue in an editorial.
- The state is convening a technical panel this week that's supposed to come up with a plan to respond to the Flint drinking water emergency. The group is made up of state and federal environmental officials, as well as outside experts.
- After weeks, and in some cases months of worrying about their water, there was finally some relief Saturday for people living in Flint. More than 2,700 water filters were handed out to Flint residents.
- Michigan will spend $1 million to buy water filters and immediately test water in public schools in Flint after testing showed elevated levels of lead in the city's children, the governor said Friday, a day after local health officials declared a public health emergency.
- Donations continue to pour in to Flint Community Schools to help students and staff handle the 'Water Worries'.
- In Flint, lead levels in some children's blood have spiked dramatically, and scientists believe a new drinking water source is to blame. They're pointing to lapses in oversight from state regulators, who they say should've seen the problem coming.
- A U.S. Coast Guard official has more concern over Enbridge's Line 5 pipeline under the ground in the Upper Peninsula rather than the under the Straits of Mackinac.
- Bermuda was lashed Sunday by gusting winds and pelting rains from a weakening Hurricane Joaquin as its spinning center tracked just west of the wealthy financial haven and tourist destination after plowing through the Bahamas as a major storm.
- A student at Monroe Middle School has been diagnosed with viral meningitis.

Analysis:

- Flint water issue coverage has gone international.
- Advocacy groups continue to mobilize due to the Flint water issues.

- *Will continue to monitor.*

FLINT WATER

Nancy Kaffer: Avoiding tap water has become a way of life in Flint

Detroit Free Press, Oct. 3, 2015

Outside a taco shop on Flint's Fifth Street, Estella Walker balances a gallon jug of water on top of the stroller that holds her 3-month-old son, DeWayne. She's mixing bottles of formula for DeWayne and his 19-month-old sister Vanessa.

Nadene Strickland sits outside her home on the city's north side, watching her grandsons play basketball. She still drinks the water. She can't afford bottled.

Shopping at the local farmers market with five of her seven children, Tena Fransioli says she hasn't used tap water in a long time.

Across town, it's bath night for LeeAnne Walters' kids. She heats bottled water in the microwave and carries it to the bathroom, slowly filling the tub. In Melissa Mays' bathroom, there's a reminder taped to the wall: To brush your teeth, use the bottled water on the bathroom counter.

This is life in Flint, where you really should not drink the water.

And no one, not in this country in the year 2015, should have to live this way.

For more than a year, Flint residents have been screaming that their water wasn't OK, that it smelled bad, tasted bad, looked bad, and was making them sick.

Few listened. The state told them, again and again, that the water was safe — that contamination had been handled, and that the water was within acceptable levels.

It wasn't until last week that Gov. Rick Snyder finally acknowledged the profound problems with Flint's water. Lead, from aging water service pipes, is leaching into the water the city pumps from the Flint River, exacerbated by a local treatment plant's failure to add appropriate chemicals.

But he still won't call it an emergency.

Editorial: For Flint, vindication -- for Snyder, more questions

Detroit Free Press, Oct. 2, 2015

Lead flows through Flint's water system and out of taps in people's homes.

Children have been drinking that water, and suffering the consequences.

And controls that should have prevented this from happening were nonexistent or inadequate.

After months of denial, we finally heard Gov. Rick Snyder and members of his cabinet validate the mounting data that confirms beyond reasonable doubt what Flint residents have known for months: Their water is not safe to drink.

In April 2014 – while under state oversight – Flint began to draw its water from the Flint River, a temporary measure until a new regional water authority comprising Flint, Genesee, Sanilac and Lapeer counties is complete next year. For decades, the city had purchased its water from the Detroit Water and Sewerage Department.

By June last year, residents began to complain that their tap water was the wrong color, that it had a troubling odor and taste. Many reported rashes and other health problems, likely linked to a disinfectant added to the water after tests showed it contained coliform bacteria.

By the start of this year, some residents began to suspect the water also contained lead and other heavy metals, leached from Flint's aging infrastructure by more-corrosive Flint River water, exacerbated by an inadequate water treatment plan.

Friday, Snyder and his cabinet announced a plan to improve corrosion controls that should have prevented lead from contaminating drinking water. They'll dedicate $1 million in state funds to purchase water filters for Flint residents, and to pay for expanded water testing and additional health and community resources.

In the long term, Snyder must find state funds to help Flint replace its aging service lines.

For Flint families, it should be the first step toward some semblance of normalcy, to a basic standard of living all Americans take for granted -- that the water running from our taps is clean, and drinkable.

Repairing Flint's water system will be complicated and costly. But the difficulty of that task pales in comparison to the work that must be done to repair the public trust, in both the systems meant to safeguard our health, and in the governor who is meant to oversee those safeguards.

Snyder's acknowledgement comes after repeated assurances that Flint water was safe, even as evidence mounted that this could not be true. An MDEQ spokesman denounced tests performed by a Virginia Tech University researcher – a MacArthur genius grant recipient – who evaluated hundreds of water samples, writing to one reporter that "this group specializes in looking for high lead problems. They pull that rabbit out of that hat everywhere they go. Nobody should be surprised when the rabbit comes out of the hat, even if they can't figure out how it is done."

When a hospital researcher announced last week a growing number of Flint children had elevated blood-lead levels, the MDEQ disparaged the researcher's work, calling it not "irresponsible," but "unfortunate," and saying that Flint's water situation had reached "near-hysteria" – despite state data that showed both increased amounts of lead in the water supply, and a greater number of children with elevated blood-lead levels. Lead poisoning is irreversible; children affected by it suffer from behavioral and developmental problems.

As late as Wednesday, Snyder spokesperson Sara Wurfel questioned the test data, insisting that the lead levels in Flint's water did not reach levels considered actionable by the U.S. Environmental Protection Agency.

The next day, Snyder admitted that in making the switch to Flint River water, that there were "probably things that weren't fully understood when the switch was made."

So we are left with questions that need answers. Not merely because this saga unfolded while Flint was under state oversight, a succession of emergency managers appointed by and answerable to Snyder, but also because the governor oversees the state agencies charged with preventing just this type of crisis.

What was the science that allowed the MDEQ to approve the switch to Flint River water? What was not "fully understood," and in the absence of that information, why did the switch proceed? MDEQ chief Dan Wyant referred to tests that indicated elevated lead levels – when did were those tests performed?

We – along, we're confident, with other news agencies in this state -- have filed requests to obtain information that will help answer these questions, through the state's Freedom of Information Act.

But we shouldn't even have to.

Snyder, as the state's chief executive, ought to be riding herd on the autopsy over the process that led to this public health crisis. And in addition to repairing what went wrong – or defending the state's actions and oversight – the governor needs to be up front with the public about what he finds.

This should never have happened to the people in Flint. Children, drinking tap water polluted by lead. It reads like something out of an impoverished, technologically deprived nation.

It's up to Snyder to assure that it never happens again.

Detroit men take water to Flint

WDIV-TV 4 in Detroit, Oct. 4, 2015

The Flint water problem has caused the state to declare a public health emergency.

While the state tries to find a permanent solution to the problem, two Detroit men are taking it upon themselves to help Flint families.

Anthony Scales was disturbed by the water crisis and he started collecting cases of bottled water and taking them to Potter Elementary School in Flint.

Tech panel to make recommendation on reconnecting Flint to Detroit

WMUK-FM 102.1, Oct. 5, 2015

The state is convening a technical panel this week that's supposed to come up with a plan to respond to the Flint drinking water emergency. The group is made up of state and federal environmental officials, as well as outside experts.

Dan Wyant directs the state Department of Environmental Quality. He says one of the first decisions is whether to reconnect Flint to the Detroit water system.

"The question is whether we'd be better if we want to Detroit water, and I'd like science to make that determination," Wyant says.

Flint Mayor Dane Walling says he'd ask the state to pick up the cost of one and a half to two million dollars a month if the city re-connects to the Detroit system.

The state is already distributing water filters to city residents, and has promised to step up testing of water in homes and schools.

Water filters given out to Flint residents

WJRT-TV 12 in Flint, Oct. 5, 2015

After weeks, and in some cases months of worrying about their water, there was finally some relief Saturday for people living in Flint.

More than 2,700 water filters were handed out to Flint residents.

The beginning of the day started with those most at risk for lead contamination.

Then the health department quickly opened it up to all city residents.

"I'm very happy I got here," said Sierra Booker, who has a one-year-old daughter.

After filter distribution, why some couldn't make it to get relief

WJRT-TV 12 in Flint, Oct. 4, 2015

2,700 hundred water filters were given out yesterday at U of M Flint's Recreation Center.

At first, only those most at risk were given filters - but by a couple hours in any Flint resident could come.

Still, there were 1,300 filters left at the end of the day, leading some to ask, why?

At River Park Apartments in Flint, a public housing complex, we found many people just didn't know the filter distribution was going on.

"Well we didn't hear about it until the last minute," said resident Natia Anderson.

"I didn't hear about it until a few minutes ago," said resident Lonnie Williams.

The Genesee County Health Department made the announcement late Friday morning, less than 24 hours before the actual event. Organizations like the United Way of Genesee County, and U of M Flint worked tirelessly with the Health Department, to make sure Saturday's giveaway went smoothly.

State and health officials address Flint water crisis, introduce plan of action

WXYZ-TV 7, Oct. 2, 2015

Michigan will spend $1 million to buy water filters and immediately test water in public schools in Flint after testing showed elevated levels of lead in the city's children, the governor said Friday, a day after local health officials declared a public health emergency.

A plan of action was outlined at a news conference, and includes:

*Testing in Flint public schools immediately to ensure that drinking water is safe, with testing also available at no cost to any other school in Flint.

Water filter giveaway open to all Flint residents held at UM-Flint

MLive, Oct. 3, 2015

Local organizations came together Saturday to distribute 4,000 water filters to Flint residents worried about lead in their water.

The filter giveaway was held at the University of Michigan-Flint at the Recreation Center on Saturday, Oct. 3. Originally organizers were focusing on low-income families with children, pregnant women, and the elderly, but opened it up to all residents in the afternoon. The giveaway began at 10 a.m. and ends at 5 p.m.

The United Way, University of Michigan-Flint, city of Flint, and other local agencies and businesses partnered to help distribute the filters.

The 4,000 filters distributed Saturday is only a fraction of the 20,000 estimated filters needed for Flint residents.

Thousands of water filters handed out

WNEM-TV 5 in Saginaw, Oct. 5, 105

FLINT, MI (WNEM) - Following tests that show elevated levels of lead in the Flint water system, thousands of filters were given away over the weekend.

The filters, certified by the National Sanitation Foundation, were handed out Saturday at the University of Michigan-Flint.

People like Margret Brown stood in line to get one. "My daughter is pregnant, she needed a water filter."

That makes Brown's daughter a top priority to receive the help. That's because tests have shown children with elevated levels of lead.

The lead began showing up after Flint switched off the Detroit water system, and started taking water from the Flint River. That water is causing lead in old pipes to flow into homes.

On Friday the state said it will contribute at least $1 million to buy home water filters.

Water filter distribution to start for residents in Flint

Associated Press/WEYI-TV 25 in Flint, Oct. 3, 2015

FLINT — Officials are scheduled to start distributing filters to some Flint residents receiving water from the city's water system.

"It's not good for him to drink that growing up, his body's not fully developed," parent Maxine Gray said of her one month old son.

Tests have shown children with elevated levels of lead, months after Flint began drawing and treating water from the Flint River. The water is stirring up lead in old pipes in thousands of homes.

About 4,000 filters certified by the National Sanitation Foundation will be handed out Saturday morning at the University of Michigan-Flint.

"I'm very excited," said Takisha Moller who's soon expecting her first child. "Glad I'll get to drink healthy water."

Receiving priority will be pregnant women, families where infants are on formula or being breastfed, and Children Special Health Care Services households. Only one filter will be available per home.

The state said Friday it's chipping in at least $1 million to buy home water filters for Flint.

Water donations pour in for Flint Community Schools

WJRT-TV 12 in Flint, Oct. 5, 2015

FLINT (WJRT) - (10/05/15) - Donations continue to pour in to Flint Community Schools to help students and staff handle the 'Water Worries'.

Word has spread throughout the state about the problem with high lead levels in the Flint water system. As a precaution, water fountains in the Flint schools have been turned off.

Monday morning, two large deliveries were made to the Flint Community Schools. Twenty-four thousand bottles of Aquafina water were donated by the owners of Auto City Service. The truck arrived at the Flint Schools Maintenance and Operations Building on East Court Street and the cases were unloaded.

Walgreens is also donating 4,000 bottles of water to Flint schools. A delivery truck loaded up with 150 cases from the store at Beecher and Ballenger.

The water will be distributed to the 11 active school buildings in the Flint district.

School officials have said the two high schools need extra water because of extra school activities and athletics.

"We really appreciate all the donations we received thus far. Currently, we're able to meet the needs of our students at this point and we're starting to have more conversations on a long-term plan moving

forward...we still welcome all donations. You can deliver donations to our maintenance warehouse and also we're accepting donations on the school level," said Bilal Tawwab, Flint Schools superintendent.

Last Friday, the DEQ sampled water from all Flint schools. Results are not back yet.

Sorting out accountability in Flint water issues is "relatively complex"

Michigan Radio, Oct. 5, 2015

In Flint, lead levels in some children's blood have spiked dramatically, and scientists believe a new drinking water source is to blame. They're pointing to lapses in oversight from state regulators, who they say should've seen the problem coming.

Flint's water problems began about a year ago, not long after the city stopped drawing water from Detroit's system. To save money, Flint began getting its water from the Flint River.

But since the switch, doctors and researchers say cases of elevated blood levels in kids under five have doubled in some parts of the city. Lead can cause irreversible health damage, especially in young children.

"It was not my decision. I raised a number of concerns about it throughout the process," Flint Mayor Dayne Walling has said.

He was mayor when the city switched from Detroit's water system to the Flint River. But Mayor Walling wasn't in charge.

"The governor has a substantial responsibility here," he said.

Gov. Rick Snyder had appointed an emergency manager to run Flint.

By law, Michigan cities in danger of going bankrupt can get emergency managers–who have all kinds of power that elected leaders don't. In Flint, they decided the city couldn't afford Detroit's water bill anymore.

The city had been planning to join a new county system, which is under construction. State bean counters decided the Flint River could do until then.

Virginia Tech researcher Marc Edwards says Michigan's environmental regulators should have known Flint's new water source was much more corrosive than the water Detroit piped up from Lake Huron.

He says testing the water in the lab would've been a good start. Other consultants I spoke with said setting up a small scale, mock system inside Flint's water plant would have been a wise move. That would have given them a test period with the new water source before switching the whole system.

Edwards, who's been studying lead in water issues for decades, says Flint should also have had a corrosion control plan in place to treat the water, so that it didn't leach lead from old pipes.

"How on earth this was allowed to happen, or people believed it was ok for it to happen, I don't even know where to get started on that," Edwards said last week.

In February, officials at the U.S. Environmental Protection Agency found lead levels at one woman's home that were high enough to be considered toxic waste.

Edwards says that should've set off alarms for state regulators.

"Instead what they did is they took action after action to cover this problem up, and essentially leave Flint residents in harm's way. So at some point what might be attributed to an honest, perhaps innocent mistake...it changed into something completely different," Edwards said.

Emails show concerned federal officials asked the state if Flint was treating to control corrosion. State officials said yes. When the EPA asked what kind of treatment, there seemed to be a reversal. One email says plainly: "Flint is currently not practicing corrosion control treatment."

When asked if Flint broke federal rules by not having a corrosion control treatment plan, the U.S. EPA said the question was "relatively complex." Emails show at least one EPA employee believes Flint was required to treat the water to help prevent lead corrosion. But EPA spokespeople haven't been willing to say, plainly, that Flint broke federal rules.

Here's the written response from EPA Region 5 Administrator Susan Hedman:

"Actions that the State of Michigan and the City of Flint announced (Friday) are important steps to protect public health. The immediate steps being taken to implement corrosion control will reduce lead in drinking water, as required by the Safe Drinking Water Act. US EPA will continue to provide technical assistance to the State of Michigan and the City of Flint to support their joint effort."

On Friday afternoon, protestors lined up outside a university building, where city and state officials announced their latest plan to fix Flint's water.

"We survived bacteria. We've had boil-water advisories as a result. They put too much chloride in the water. And it's just been one disaster after another," Flint resident Claire McClinton said.

Elizabeth Taylor, another Flint resident, places blame on Gov. Snyder. Why?

"Well, because he put us in this emergency manager situation. They just do whatever he tells them to do," Taylor said.

Taylor is disappointed no officials have been willing to "man up and apologize."

"These men, they're just like...excuse me, but it's like their genitalia have fallen off. They have nothing left in their brains. And you can't run a city or a state like that. They have to be more responsible," she said.

Inside the building, state officials made yet another reversal, telling reporters that, actually, Flint *has* been treating the water for lead.

"State government, and the federal government for that matter, or any government, can only make decisions on the information we've got," Michigan Department of Environmental Quality spokesman Brad Wurfel said.

"We'll also concede that we've been learning as we go. So as we've learned more, we've changed paths here," Wurfel said.

Now state officials say they'll start a new corrosion control treatment plan for Flint by next month.

Until then, they've budgeted $1 million to give people free lead filters for their homes.

EMERGENCY MANAGEMENT AND HOMELAND SECURITY

Great Lakes face threat from another Enbridge line

Detroit Free Press, Oct. 4, 2015

The 62-year-old segment of Canadian oil transport giant Enbridge's Line 5 pipeline underwater, at the bottom of the Straits of Mackinac, has been generating the most buzz and concern lately over how a spill from it would harm the Great Lakes.

But it's another segment of that same pipeline, out of the water and running through the Upper Peninsula along U.S.-2 highway for nearly 90 miles between Manistique and St. Ignace, that poses a more immediate — and just as dire — threat to the lakes, according to a U.S. Coast Guard oil spill contingency specialist. The 30-inch-diameter transmission line runs under at least 20 rivers and creeks that feed into northern Lake Michigan, and at points is within a half-mile of the lake.

"Quite frankly, we see a spill in the straits as a very low probability," said Steven Keck, who's based at the Coast Guard's Sault Ste. Marie station. "But that corridor along U.S.-2 we see as a much higher probability.

"We don't seem to get a lot of attention on that stretch between Manistique and St. Ignace, but it's still the Great Lakes."

A joint team of the Coast Guard; other federal, state, and local agencies; Enbridge officials, and representatives of Marine Pollution Control, an oil spill response contractor for Enbridge, conducted a walking line survey of Line 5 where it crosses streams, creeks and rivers along the U.S.-2 corridor earlier this year.

Bermuda whipped by weakening Hurricane Joaquin

Associated Press, Oct. 5, 2015

HAMILTON, Bermuda (AP) - Bermuda was lashed Sunday by gusting winds and pelting rains from a weakening Hurricane Joaquin as its spinning center tracked just west of the wealthy financial haven and tourist destination after plowing through the Bahamas as a major storm.

Residents of the mid-Atlantic British dependency mostly hunkered down at home after securing patio furniture and stocking up on gas and batteries as the hurricane whipped the mid-Atlantic British territory. All flights to L.F. Wade International Airport were cancelled and ferry service was closed due to rough seas.

Emergency service agencies were placed on alert and there were scattered power outages by early evening.

"I think it's going to be bad, and last year I lost a lot of stuff to the storms," said retiree Susan DeSilva, whose son-in-law helped her secure her windows and doors as the storm approached.

Others were far less worried in the tiny territory accustomed to rough weather. At least one bar in the capital of Hamilton was packed with people riding out the hurricane with drinks and friends.

"I can think of worse places to be," said Derrick Tucker in the crowded Robin Hood Pub and Restaurant as the wind whistled outside.

Case of viral meningitis reported in Montrose School District

MLive, Oct. 5, 2015

MONTROSE, MI – Another student at a Genesee County school has contracted meningitis.

A student at a Montrose middle school has been diagnosed with viral meningitis, according to a letter the district sent to parents Monday morning, Oct. 5.

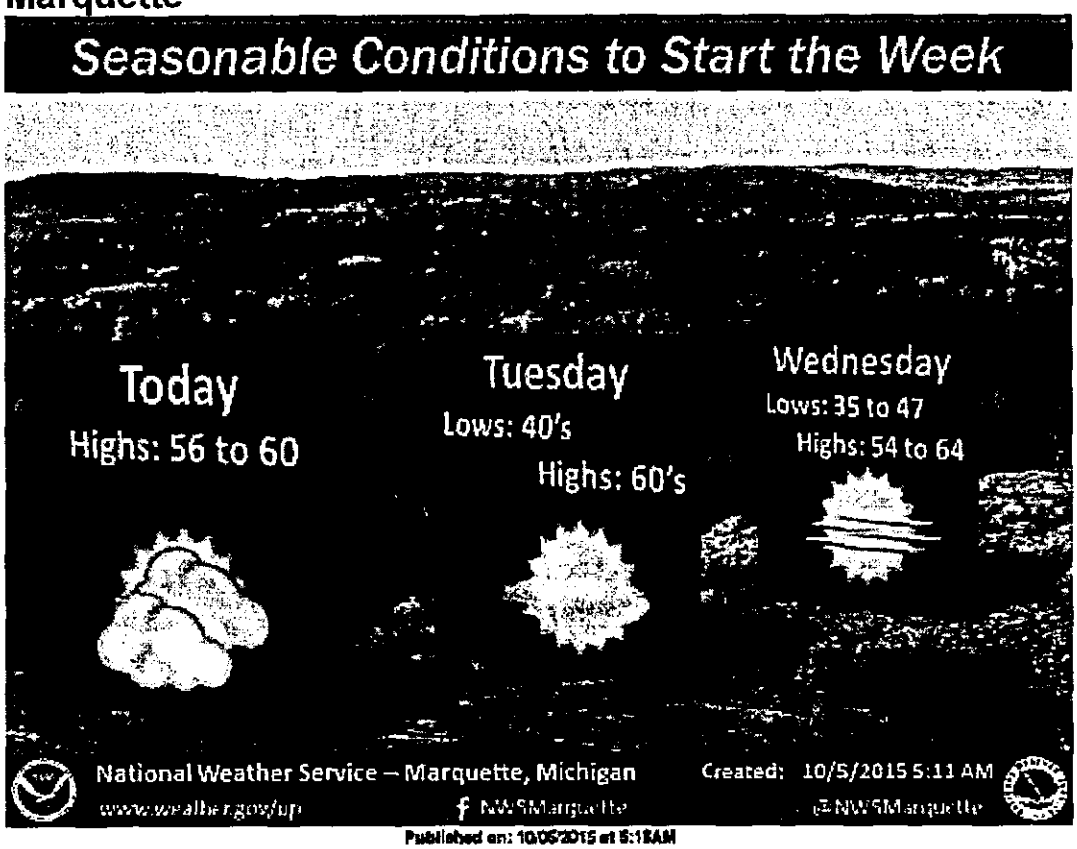
Common areas at Keuhn-Haven Middle School were disinfected over the weekend, and additional staff will be brought in to help regularly disinfect surfaces in all the district's buildings, according to Superintendent Edward Graham's letter.

Meningitis is an infection of the lining of the brain and spinal cord.

"As we begin the new week, in addition to our normal cleaning routine, we will be bringing in additional help to assist in the regular disinfecting of surfaces in all buildings," the letter reads.

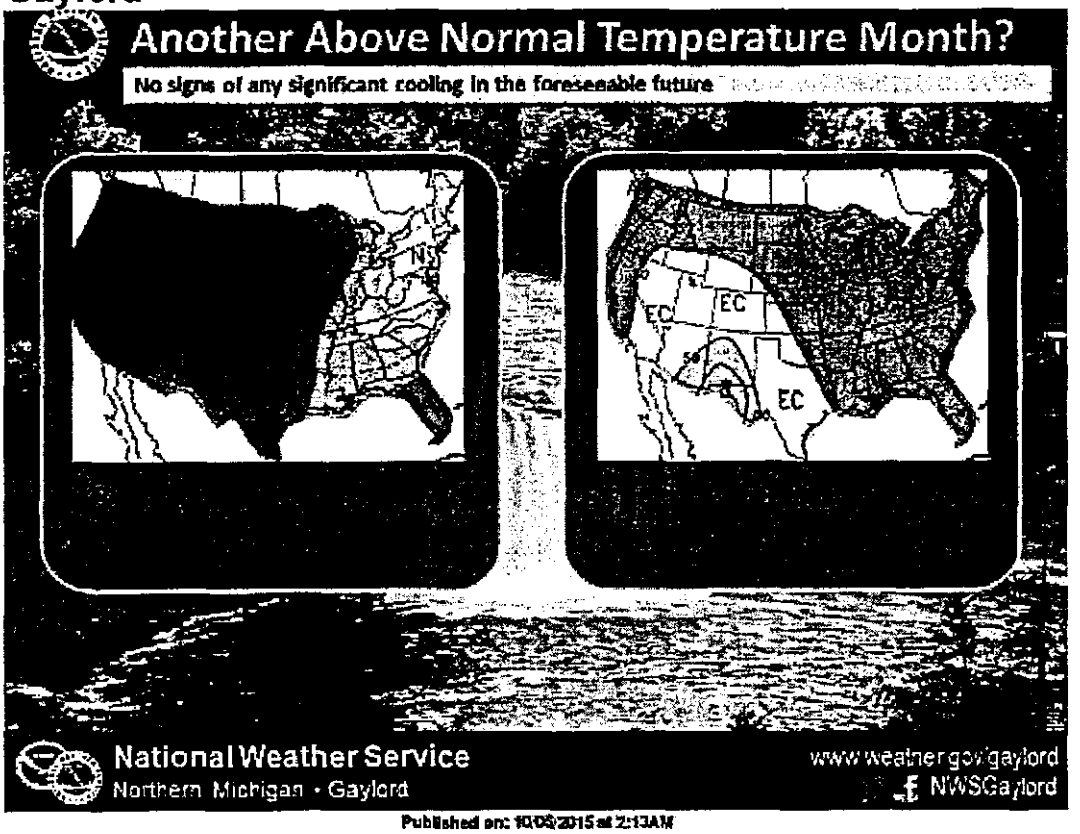
NATIONAL WEATHER SERVICE FORECASTS

Marquette



Despite a cold front moving through the area late tonight and Tuesday, conditions will remain dry into midweek with temperatures at or above normal for early October.

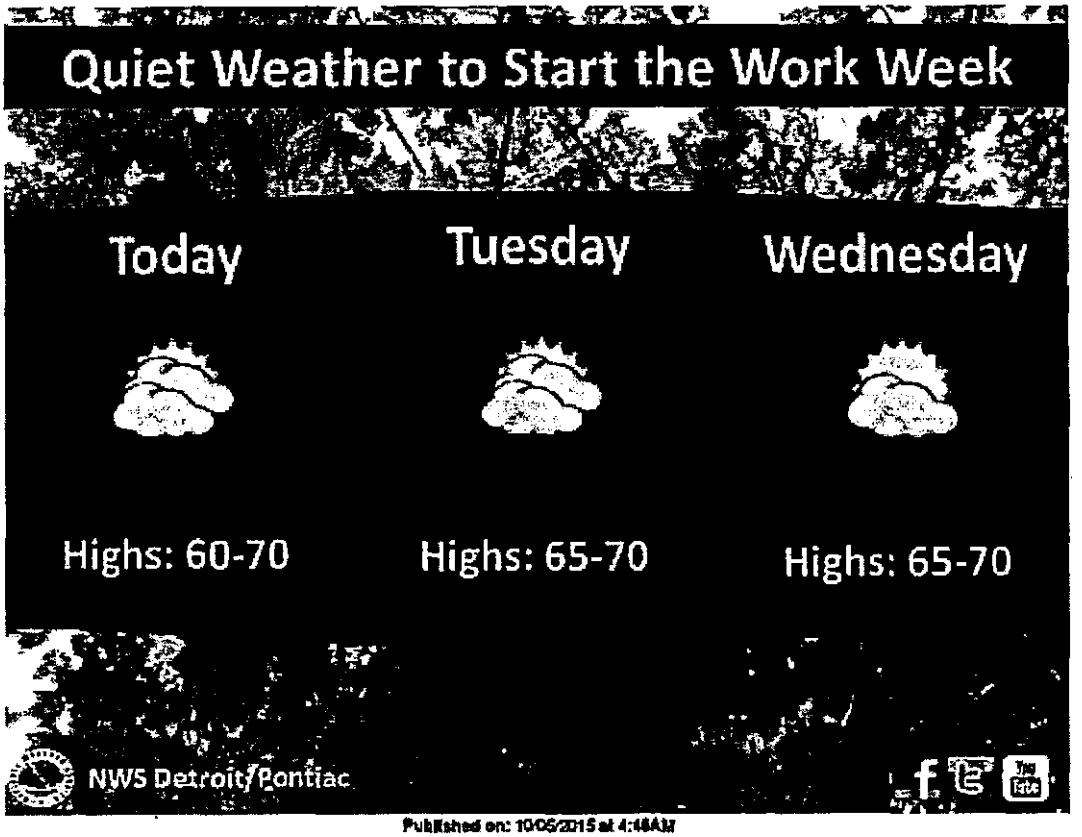
Gaylord



Published on: 10/05/2015 at 2:13AM

Pattern continues to favor lack of any sustained cold air, with odds favoring a warmer than normal October. Plenty of time for things to change of course.

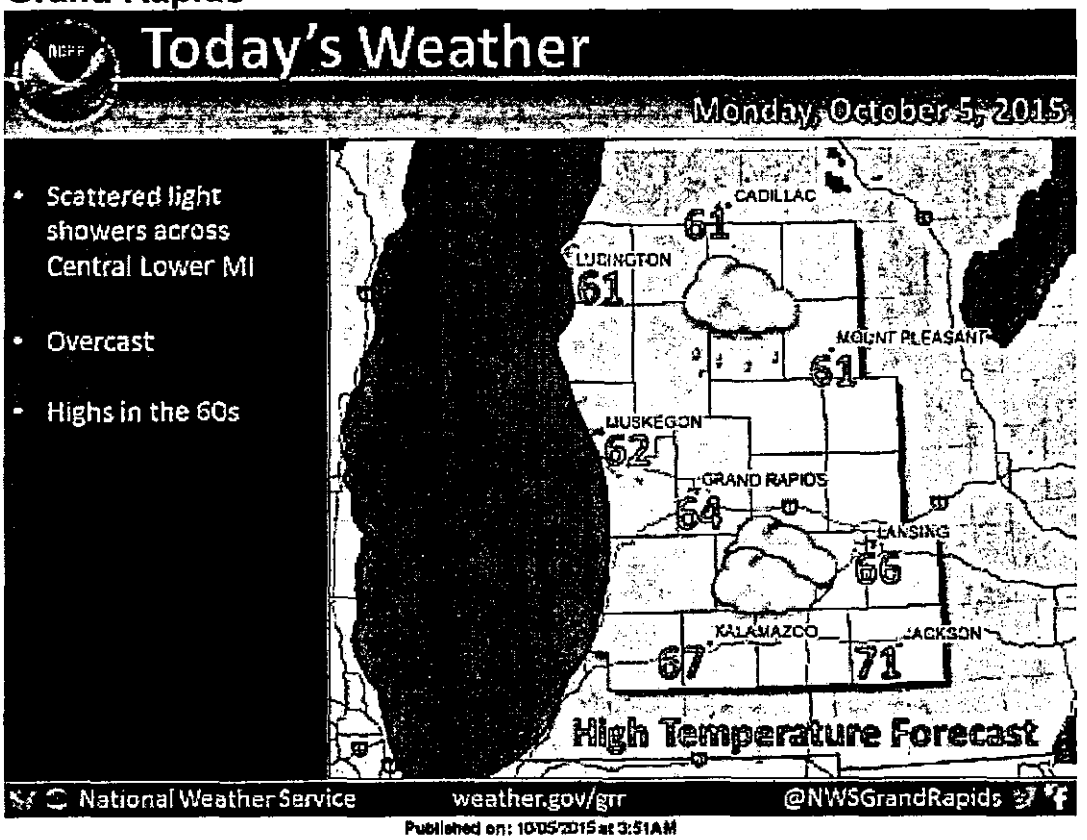
Detroit



Published on: 10/05/2015 at 4:48AM

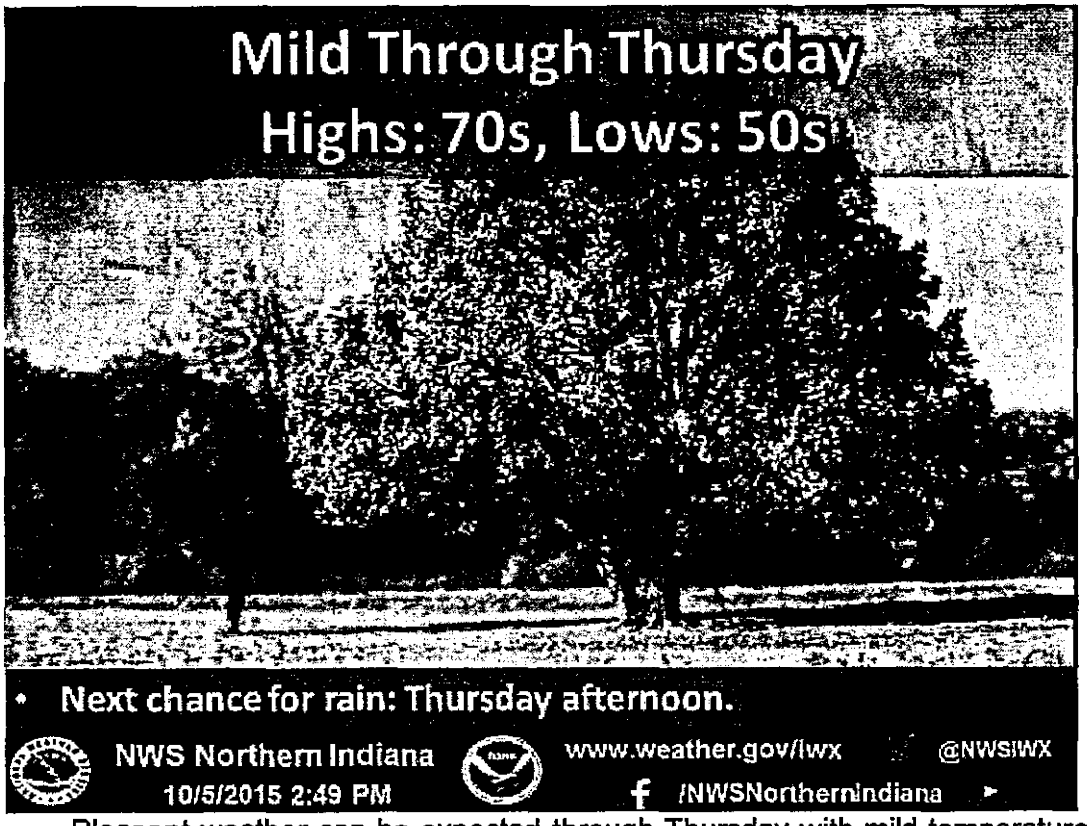
High pressure will slowly expand into the area through the middle of the week, providing quiet weather for Southeast Michigan. A few showers will be possible today along and north of the I-69 corridor, but otherwise, dry weather is expected.

Grand Rapids



A band of scattered, very light showers continues to track northeast across Central Lower Michigan this morning. Any light rain should be out of the area by early afternoon. It will be a dreary day with overcast skies.

Northern Indiana



Pleasant weather can be expected through Thursday with mild temperatures. Highs will be around 70 to the upper 70s. Lows should be in the low to mid 50s. The next chance for rain is Thursday afternoon.

More than 2700 water filters were passed out to Flint residents on Saturday. The Genesee County Health Department will announce this week their plan for distributing the remaining filters. My top priority remains to work for an aggressive, comprehensive solution for Flint families to gain access to the safe drinking water they desperately need and deserve. #FlintWater

The Flint water quality issue is getting national attention. Since Flint switched to getting their water from the Flint river lead levels have spiked in tap water and more than doubled in children. Any lead in children's water is a health concern. We are hoping for a swift solution that goes beyond handing out filters & bottled water. http://n.pr/1OSUVVc#Flintwater should be #safewater

While I do not make blanket recommendations... ever... this is the recommendation I made for Flint almost 8 months ago. I am a "less is more" when it comes to adding chemical to Drinking Water... but the Flint system used one water quality for decades before switch to another... and a corrosion control chemical is really their best alternative. (They can turn off the ammonia feed and the fluoride feed - immediately) The chemical cost may range from less than 1 cent to 10 cents per thousand gallons of water treated depending upon the systems water quality.

The damage caused by corrosion within Drinking Water distribution systems is one of the largest problems for the water utility industry. The effects on the safety and health throughout a community, as well as the associated costs resulting from corrosion, are indeed a major concern for water quality managers.

The byproducts of corrosion in the distribution system can protect, harbor and support bacteria, yeasts and other microorganisms by forming a glycocalyx. Over time a depressed pH forms, due to anaerobic conditions, beneath this glycocalyx causing increased corrosion in the form of pin hole leaks. Additional problems can also result causing odor, bad tastes and slime.

All of these corrosion caused problems add to the cost of water treatment thru increased pumping costs, loss of water or water pressure, and the need for the replacement of water heaters. Typically, an increase in customer complaints due to colored water, bad taste or staining also adds to the overall expense of a drinking water district.

All waters are corrosive to some degree. Chloramine make water much more corrosive... while the disinfection is weaker, the ammonia breaks free and feeds the biofilm growth (nitrification) which make every year a system continues to use chloramine a compounding problem. Most utilities conduct free chlorine "burnouts"... which just makes the situation that much worse.

The corrosivity of the water affects the infrastructure of a distribution system by attacking the piping, concrete and pumps which are often very difficult to budget for a municipality. Factors that affect the corrosive nature of water are: pH, oxygen content, total hardness, total dissolved solids, temperature and alkalinity. The selection of the proper corrosion inhibitor is critical to resolve the corrosion tendency of a water system.

There are numerous corrosion inhibitors that have been used in water over the years, such as: zinc, molybdates, nitrite-borate blends, silicates and phosphates. From a Drinking Water standpoint only two of the above mentioned inhibitors are used, sodium silicates and inorganic phosphates, and usually phosphates are the obvious choice due to treatment costs. Silicates are used at a significantly higher treatment levels whereas a blend of phosphates can typically result in treatment levels as low as 1.0 ppm.

The consistent feed of the corrosion is essential to the success of a corrosion control program. Interruptions if chemical feed can result in the loss of the protective film established on the system piping. Finally, the flow rates of a system are critical in a reliable corrosion control program to provide continuously transport the inhibitor to all areas of the system metallurgy; otherwise an effective protective film will not be established on the metal surfaces of the piping.

Blended phosphate technology has proven to be the most cost effective means of treating Drinking Water systems. The treatment levels for a successful treatment program are usually fed within a 1.0 to 2.0 ppm range. This technology provides a tenacious protective coating at the cathodic and anodic sites. This film forming action develops through a controlled deposition process via a "threshold treatment concept".

This controlled deposition process is a result of the water chemistry combining with the orthophosphate in the product formulation. The key in controlling this deposition is in blending in a variety of polyphosphate compounds. These polyphosphates provide a scrubbing action on the metal surfaces which limits the amount of protective coating being laid down. This is a terrific method of providing a strong protective film while scrubbing away old deposits and biofilm formations.

Some municipalities have tried to feed orthophosphate alone, in the form of phosphoric acid. The phosphoric acid typically has to be fed at a much higher concentration to achieve the same corrosion inhibition results of a blended phosphate program. In addition to this, there is no means of controlling the amount of deposition that will occur often resulting into an adverse effect on "C" factors or possibly increasing the potential for biofilm development. Blended phosphate technology eliminates the concern over these possible problems.

In addition to providing corrosion control of systems metallurgy, blended phosphate products also have the ability to sequester hardness salts, iron and manganese. The damage that can result from hardness,

iron and manganese has been well documented over the years and is significant in terms of revenue while certainly adding to the frustration of a community. The proper sequestration of iron and manganese tremendously improves the appearance of the water preventing these metals from oxidizing and depositing/staining on fixtures and clothing. This ability of ortho and polyphosphates working together, results in stabilized water quality while minimizing color, scale, deposits, corrosion and chlorine demand in drinking water systems.

Benefits of Blended Phosphate Technology

1. Inhibits corrosion of metallurgy within a distribution piping system.
2. Decreases iron tuberculation within a distribution system.
3. Reduces lead and copper levels in the drinking water to meet the 1991 Lead and Copper rule, allowing municipalities to maintain levels of lead < 15 ppb and copper < 1.3 ppm.
4. Decreases biofilm development thereby increasing system life thru reduced MIC.
5. Decreases chlorine demand which improves overall disinfection.
6. Reduces discoloration, staining and mineral build-up on customer fixtures and clothing, resulting in fewer customer complaints.
7. Decreases calcium scale deposits usually seen in hot water heaters.
8. Municipality saves revenue thru reduced corrosion and scale which reduces system failures in terms of leaks and ruptures while also conserving water via reduced hydrant directional flushing.

Blended phosphate technology has been used for over 60 years within the drinking water industry. It remains one of the most cost effective means of controlling corrosion due to the low chemical feedrate required. With this low dosage rate the actual chemical cost may range from less than 1 cent to 10 cents per thousand gallons of water treated depending upon the systems water quality. These blended phosphate cost are offset by the operational and maintenance savings to the utility and consumer.

Gov. Rick Snyder: Comprehensive action plan will help Flint residents address water concerns

Collaborative effort with state, federal and city leaders focuses on testing, assistance

FLINT, Mich. – Flint residents need to have access to safe, clean, water now and long into the future, Gov. Rick Snyder said, announcing a comprehensive action plan created with state, federal and city leaders to address concerns about drinking water.

The water leaving Flint's drinking water system is safe to drink, but some families with lead plumbing in their homes or service connections could experience higher levels of lead in the water

that comes out of their faucets.

The action plan focuses on increasing water testing, offering additional precautions for families with lead plumbing in their homes, and providing long-term solutions to address the city's water infrastructure challenges. The plan was created at Snyder's direction by the Michigan Departments of Environmental Quality (DEQ) and Health and Human Services (DHHS), the U.S. Environmental Protection Agency, and the city of Flint.

"We are focused on helping ensure safe, clean, accessible drinking water and addressing and mitigating concerns and protecting public health," Snyder said. "Today's action plan builds upon ongoing work with local, state and federal agencies and our partnership with city and community leaders. Together, we are working to ensure that all Flint residents have accurate information and know that help is available to address potential problems."

The city and the state also are working together to gather more data to ensure the water that leaves the treatment plant as well as the water that arrives in Flint homes is safe for all residents. The plan includes:

- Testing in Flint public schools immediately to ensure that drinking water is safe, with testing also available at no cost to any other school in Flint.
- Offering free water testing to Flint residents to assure their drinking water is safe.
- Providing free water filters to residents.
- Expanding health exposure testing of individual homes.
- Accelerating corrosion controls in the Flint drinking water system.
- Accelerating water system improvements to address replacing lead service lines.
- Expediting the completion of the Karegnondi Water Authority pipeline.
- Expanding a Safe Drinking Water Technical Advisory Committee to ensure the best technology, practices and science are being followed by adding an expert from the Environmental Protection Agency's Office of Research and Development to the group.
- Naming Dr. Eden Wells, chief medical executive for the Michigan Department of Health and Human Services, as the Flint drinking water public health adviser.
- Boosting a comprehensive lead education program to make sure residents have detailed information about how to protect themselves and their homes.

Residents can have their water tested by calling 810-787-6537 and pressing 1, or emailing flintwater@cityofflint.com. The DEQ is covering the cost of this testing.

State leaders have been working closely with state and federal lawmakers to tap resources at all levels of government to address concerns.

State health experts said there has been an increase in elevated childhood blood lead levels in some specific communities. Initial analysis of MDHHS data found that blood lead levels of children in Flint have followed an expected seasonal trend. While this analysis for Flint as a whole remains true, a comprehensive and detailed review breaking down data by ZIP codes with the city revealed that MDHHS data is consistent with a study presented recently by Hurley Children's Hospital.

"While we cannot conclusively say that the water source change is the sole cause of the increase, this analysis supports our efforts as we take active steps to reduce all potential lead exposures in Flint," MDHHS Director Nick Lyon said. "As part of this, we are working closely with our public and private partners to provide Flint residents on MDHHS assistance programs with free water filters and inform families about the steps they can take to reduce all lead exposures in their home."

As a part of the action plan, National Sanitation Foundation certified water filters will be made available to Flint residents through emergency state funds and coordinated efforts with local community agencies and donors. Information about how to obtain the filters will soon be available.

"This action plan offers concrete steps we will take in a local, state and federal partnership to ensure all Flint residents have safe water to drink," DEQ Director Dan Wyant said. "The DEQ will work closely with the city to gather further data to ensure the water that leaves Flint's system as well as the water that arrives in Flint homes is safe to drink."

Additional information is available at www.michigan.gov/flintwater.

State To Contribute $1M As Part Of Flint Water Fix

In the short term, Flint residents will have access to water filters, some purchased with state funds, and in the longer term the city will be improving its corrosion controls to keep lead out of water supplies, state and city officials said today in unveiling a plan to address recent water safety concerns in the city.

Moving Flint back to getting water from the Detroit Water and Sewerage System is also still on the table for both state and local officials, but will require negotiations, both sides said.

Both sides said the water itself is not the source of lead and the city will be working in the coming years to replace the lead service lines that are the source.

Environmental Quality Direct Dan Wyant acknowledged that testing shows increased lead levels in the water since the city moved from the Detroit system in 2014, but he argued the problem was the switch and not the water source. He said one of the state's efforts is to ensure the city has sufficient corrosion controls in place so when it switches sources again away from the Flint River, the problem does not recur.

Mr. Wyant said the state has continued quarterly testing of the city's water source and those tests have continued to show no lead.

Eden Wells, chief medical officer for the state, said blood tests for children in the city did not change after the water change, but she said tests of children in two high-risk ZIP codes did, as tests by Hurley Medical Center had shown earlier, show increased blood lead levels in those areas after the water change.

But she and others said it was still not confirmed that the water was the source of the additional lead exposure.

Flint Mayor Dayne Walling said the city was still considering switching back to Detroit water while efforts to finish an agreement with Karegnondi Water Authority are completed. But he said the switch would cost the city up to $2 million a month it does not have.

Mr. Wyant, asked if the state would cover those costs, said only that the state had committed $1 million already toward the problem but that Governor Rick Snyder had said he would be willing to mediate discussions between the city and the Detroit system.

Gongwer News Service will have more on this story in the full Michigan Report.

Flint River will remain as city water source in state plan to address lead
MLive, Oct. 2, 2015
FLINT, MI -- The city would continue to use the Flint River as its water source, according to a plan expected to unveiled today, Oct. 2, by state officials.

A person with knowledge of the plan said it includes the immediate testing of water in all Flint schools, faucet filters for city residents and expanded testing for lead among city residents.

The plan is being unveiled at a 1:30 p.m. news conference at Kettering University.

The person familiar with the plan said it does not include reconnecting to the Lake Huron water through the Detroit Water and Sewerage Department.

Parts of the plan include:

- Immediately test water at Flint schools at state expense, working with administrators.
- Expand lead exposure testing for individuals.
- Continue offering free water testing to Flint residents at no charge.
- Expedite optimization of corrosion control
- Expediting completion of the Karegnondi Water Authority
- Appointing a Flint Drinking Water Public Health Advisor
- Providing water filters to Flint residents
- Expanding a comprehensive lead education initiative
- Today's news conference comes after an avalanche of disastrous news about Flint water and a drastic change in direction among city and state officials, who have defended the safety of city water for months.

Calls for the city to end its use of the Flint River for drinking water increased after a Hurley Medical Center doctor's study showed the number of children in the city with elevated blood levels nearly doubled after the city started using it as a water source in 2014.

State officials initially questioned the data, but Snyder this week acknowledged problems with lead.

The state oversees water quality in Flint, and state-appointed emergency managers were running city government when decisions were made not to negotiate a short-term agreement to continue buying Lake Huron water from Detroit and to instead use the river as a water source.

Although the city is not currently in violation of the Safe Drinking Water Act, bacteria, the level of total trihalomethanes and lead have been problems in the water system since then.

> A coalition of Flint and state organizations asked the U.S. Environmental Protection Agency on Thursday to order a switchover of the Flint water system with the Detroit Water and Sewerage system, in what is one of the most striking actions in the controversy. The demand came as state officials plan to announce a series of actions on Flint on Friday dealing with the water problems in the city.
> One legislator - who also complained he had been denied documents from the state dealing with the switch from the Detroit system to using water from the Flint River (a state official said the wrong documents had been requested) - said there had been a general discussion, but no specifics about what Mr. Snyder might announce. Rep. Phil Phelps (D-Flushing) said he expected the state would provide more filters to residents to help curb lead in the water. Filters will be helpful, Mr. Phelps said, but not enough.
> Governor Rick Snyder will not be at the event, to be held at Kettering University, but Flint Mayor Dayne Walling, along with Environmental Quality Director Dan Wyant, Health and Human Services Director Nick Lyon, Urban Initiatives Director Harvey Hollins and the state's chief medical officer, Eden Wells, will speak on the initiatives being pursued.
> The presentation will be at 1:30 p.m.at the university's Innovation Center, 1300 Bluff Street.
> The controversy over the water in Flint has grown exponentially since indications that lead levels, caused mainly by antique pipes and their connections, were elevated in children who were tested. Researchers said they could not absolutely say the elevated levels were from the water, but the measures showed the increase since the city made the switch. Also on Thursday, it was announced that the city had received donations to provide some 5,000 water filters to help contain the lead.
> Prior to the discovery about elevated lead levels, the controversy over the system dealt largely with the smell and taste of the water. Flint switched from using Detroit water to drawing water

from the Flint River in 2014 as the city prepared to build its own system that would draw water from Lake Huron. The switch was made largely because Flint and Detroit could not agree on a short-term contract to use the water, and the city, under a state-appointed emergency manager because of financial problems, did not want to pay the cost of Detroit water.

In a press conference on Wednesday, Mr. Snyder acknowledged that in making the switch, not *all factors were probably considered.*

The request for the EPA to order both the city and state to make the switch to Detroit water came with a variety of city and state groups, including the Concerned Pastors for Social Action, the Flint Water Study Team, the Michigan Nurses Association, the NAACP-Michigan State Conference, the Natural Resources Defense Council and the Michigan branch of the American Civil Liberties Union, getting involved.

The request charged that neither the state nor Flint were doing enough to fix the problem and urged that both be ordered to immediately have Flint's water system reconnected with the Detroit system, and that city residents be provided with a free source of water that meets EPA standards.

Mr. Phelps, meanwhile, complained that the Department of Environmental Quality denied and the Department of Treasury ignored a Freedom of Information Act request for documents related to the city's switch from Detroit water to river water. Anytime there is a change in water systems of the course of water, the community has to apply to the state for that authority.

But Brad Wurfel, with the DEQ, said Flint did not have to file that application because the city had always listed the Flint River as its back-up should it need it for a water supply.

However, there are other documents that are available - to Mr. Phelps or anyone - dealing with the process the city and state took preparing for the switch, Mr. Wurfel said.

Mr. Phelps said a DEQ official contacted him and said there were documents available and that they would be sent to him. The official asked that he drop his FOIA request, Mr. Phelps said.

On the advice of his lawyers, Mr. Phelps said he did not drop the request. But he had also asked the department for any documents that might have to do with the switch. After his request was denied, he received several documents dealing with the system, but the documents were from 2007 and did not have to do with the switch.

Mr. Phelps was surprised by the refusal and was planning what steps to next take.

In terms of what the state should do to help in the situation, Senate Minority Leader Jim Ananich (D-Flint) told reporters after session on Thursday that he thought the state should first help with distributing filters to residents, especially those who may be most vulnerable, listing pregnant women, children, women that are nursing, those with immune system issues and the elderly among them.

"That should be done immediately," Mr. Ananich said. "I think we need to have corrosion control put in place as quickly as possible. Unfortunately, I think we need some independent, outside testers to come in and develop the confidence level that's just not there with traditional people in place. And I think we need to have a serious look at reconnecting with Detroit. I think the state needs to help us find a new source of water."

He said he would reserve judgment about how well the state has responded to the situation until after the administration makes its recommendations and remains unsure about any estimates on how much it might cost for Flint to reconnect to Detroit water.

"There's been some negotiations going on at the local level, but I think it's important to get the real cost because it's a public health issue. And I'm hopeful we'll find that. I would hope that all folks, with an issue of this magnitude, would not try to gouge a community that's been suffering the way they are," Mr. Ananich said. "I think we need to all, at the state level, make sure people are negotiating in good faith."

And Senate Majority Leader Arlan Meekhof (R-West Olive) said he is unsure what the state's role should be in terms of helping Flint. The Senate did, on Thursday, include a $100 placeholder to deal with Flint's water crisis in an appropriations supplemental it passed, but that was to keep the conversation going, Mr. Ananich said (see separate story).

"I don't know that we really have a solution there yet," Mr. Meekhof said after session. "We could use revolving funds maybe. I don't think the city of Flint is in as bad of financial trouble as the city of Detroit, so if they need to bond for something, they would have assets with which to bond and maybe fix the problem. There's lots of options that are out there."

Pressure mounts on Flint water, Snyder prepares action

Gongwer
10/01/2015

A coalition of Flint and state organizations asked the U.S. Environmental Protection Agency on Thursday to order a switchover of the Flint water system with the Detroit Water and Sewerage system, in what is one of the most striking actions in the controversy. The demand came as state officials plan to announce a series of actions on Flint on Friday dealing with the water problems in the city.

One legislator - who also complained he had been denied documents from the state dealing with the switch from the Detroit system to using water from the Flint River (a state official said the wrong documents had been requested) - said there had been a general discussion, but no specifics about what Mr. Snyder might announce. Rep. Phil Phelps (D-Flushing) said he expected the state would provide more filters to residents to help curb lead in the water. Filters will be helpful, Mr. Phelps said, but not enough.

Governor Rick Snyder will not be at the event, to be held at Kettering University, but Flint Mayor Dayne Walling, along with Environmental Quality Director Dan Wyant, Health and Human Services Director Nick Lyon, Urban Initiatives Director Harvey Hollins and the state's chief medical officer, Eden Wells, will speak on the initiatives being pursued.

The presentation will be at 1:30 p.m.at the university's Innovation Center, 1300 Bluff Street.

The controversy over the water in Flint has grown exponentially since indications that lead levels, caused mainly by antique pipes and their connections, were elevated in children who were tested. Researchers said they could not absolutely say the elevated levels were from the water, but the measures showed the increase since the city made the switch. Also on Thursday, it was announced that the city had received donations to provide some 5,000 water filters to help contain the lead.

Prior to the discovery about elevated lead levels, the controversy over the system dealt largely with the smell and taste of the water. Flint switched from using Detroit water to drawing water from the Flint River in 2014 as the city prepared to build its own system that would draw water from Lake Huron. The switch was made largely because Flint and Detroit could not agree on a short-term contract to use the water, and the city, under a state-appointed emergency manager because of financial problems, did not want to pay the cost of Detroit water.

In a press conference on Wednesday, Mr. Snyder acknowledged that in making the switch, not all factors were probably considered.

The request for the EPA to order both the city and state to make the switch to Detroit water came with a variety of city and state groups, including the Concerned Pastors for Social Action, the Flint Water Study Team, the Michigan Nurses Association, the NAACP-Michigan State Conference, the Natural Resources Defense Council and the Michigan branch of the American Civil Liberties Union, getting involved.

The request charged that neither the state nor Flint were doing enough to fix the problem and urged that both be ordered to immediately have Flint's water system reconnected with the Detroit system, and that city residents be provided with a free source of water that meets EPA standards.

Mr. Phelps, meanwhile, complained that the Department of Environmental Quality denied and the Department of Treasury ignored a Freedom of Information Act request for documents related to the city's switch from

Detroit water to river water. Anytime there is a change in water systems of the course of water, the community has to apply to the state for that authority.
But Brad Wurfel, with the DEQ, said Flint did not have to file that application because the city had always listed the Flint River as its back-up should it need it for a water supply.
However, there are other documents that are available - to Mr. Phelps or anyone - dealing with the process the city and state took preparing for the switch, Mr. Wurfel said.
Mr. Phelps said a DEQ official contacted him and said there were documents available and that they would be sent to him. The official asked that he drop his FOIA request, Mr. Phelps said.
On the advice of his lawyers, Mr. Phelps said he did not drop the request. But he had also asked the department for any documents that might have to do with the switch. After his request was denied, he received several documents dealing with the system, but the documents were from 2007 and did not have to do with the switch. Mr. Phelps was surprised by the refusal and was planning what steps to next take.
In terms of what the state should do to help in the situation, Senate Minority Leader Jim Ananich (D-Flint) told reporters after session on Thursday that he thought the state should first help with distributing filters to residents, especially those who may be most vulnerable, listing pregnant women, children, women that are nursing, those with immune system issues and the elderly among them.
"That should be done immediately," Mr. Ananich said. "I think we need to have corrosion control put in place as quickly as possible. Unfortunately, I think we need some independent, outside testers to come in and develop the confidence level that's just not there with traditional people in place. And I think we need to have a serious look at reconnecting with Detroit. I think the state needs to help us find a new source of water."
He said he would reserve judgment about how well the state has responded to the situation until after the administration makes its recommendations and remains unsure about any estimates on how much it might cost for Flint to reconnect to Detroit water.
"There's been some negotiations going on at the local level, but I think it's important to get the real cost because it's a public health issue. And I'm hopeful we'll find that. Situational awareness.

University of Michigan-Flint

8 mins ·
Dear Campus Community:

Genesee County has just issued the attached Public Health Emergency Declaration this afternoon. Among other things, the declaration states:

The County is issuing an Emergency Advisory recommending that people not drink the water coming in from the City of Flint using the Flint River as the water source unless:
• It has been tested to assure it does not contain elevated levels of lead
• It is being filtered through a National Sanitation Foundation (NSF) approved filter certified to remove lead that meets ANSI standard 53.
We are fortunate that the university has been testing/monitoring the water quality on campus and proactively installing filters and/or filtered water.

Where sampling, investigation and analysis have shown poor water quality exceeding the regulatory maximum contaminant levels, further testing, corrective actions and/or filtration has been installed (NSF 42 & 53). Additionally, the campus has and is continuing to aggressively install filtration in all remaining locations as an added measure of public health protection, even for fixtures that do not exceed MCLs.

Special attention has been given to our youngest members on campus, including the installation of filters for the Early Childhood Development Center in June.

Environment, Health, and Safety will continue to conduct water testing and monitor water quality on campus. As always, if you have further questions please do not hesitate to contact me.

Subject: Genesee County Board of Commissioners Declaration

The following is provided as requested...

At 4:04 PM, Genesee County Emergency Management created the following incident in MI-CIMS:

> Genesee County Health Department has Declared a Public Health Emergency for persons on the Flint City Water System due to a recent report of increased lead levels in children within the City of Flint.
> ****Jenifier Boyer - County of Genesee MGT EM Coordinator - jboyer@co.genesee.mi.us at 16:01:21 on 10/1/2015****

The document associated with this incident (attached) references a "Public Health Emergency Declaration" issued by the Genesee County Board of Commissioners. I spoke with Dr. Jackie Scott of MDHHS, who informed me that there is no such term under public health code. Similarly, this term does not exist under PA 390, where the correct term would be a "Local State of Emergency," which would be issued by the Chair of the Genesee County Board of Commissioners. The attachment states the "County is issuing an "Emergency Advisory" recommending people not drink water coming from the city of Flint using the Flint River as the water source..." It would appear the board is simply issuing a statement not tied to any type of formal emergency declaration.

EMHSD has not received the standard form associated with a Local State of Emergency declaration and the county EOC is not activated. I will pass along key developments as they occur. Please let me know if anything further is needed at this time.

At 4:04 PM, Genesee County Emergency Management created the following incident in MI-CIMS:

> Genesee County Health Department has Declared a Public Health Emergency for persons on the Flint City Water System due to a recent report of increased lead levels in children within the City of Flint.
> ****Jenifier Boyer - County of Genesee MGT EM Coordinator - jboyer@co.genesee.mi.us at 16:01:21 on 10/1/2015****

The document associated with this incident (attached) references a "Public Health Emergency Declaration" issued by the Genesee County Board of Commissioners. I spoke with Dr. Jackie Scott of MDHHS, who informed me that there is no such term under public health code. Similarly, this term does not exist under PA 390, where the correct term would be a "Local State of Emergency," which would be issued by the Chair of the Genesee County Board of Commissioners. The attachment states the "County is issuing an "Emergency Advisory" recommending people not drink water coming from the city of Flint using the Flint River as the water source..." It would appear the board is simply issuing a statement not tied to any type of formal emergency declaration.

EMHSD has not received the standard form associated with a Local State of Emergency declaration and the county EOC is not activated. I will pass along key developments as they occur. Please let me know if anything further is needed at this time.

MEDIA MONITORING REPORT

10/01/2015

Issues:

- Several Flint area media outlets are reporting that the Michigan Legislative Black Caucus is asking Gov. Rick Snyder to declare a "state of emergency" to open federal assistance for Flint's water issues. No local state of emergency has been declared by Genesee County.

Summary:

- Almost a week after news broke that more Flint kids have been lead poisoned, two weeks after state data confirmed that lead levels in Flint's water had spiked, more than a year after residents first noticed something was hinky with the water coming out of their taps, Gov. Rick Snyder has publicly acknowledged that Flint's water supply "appears" to have problems.
- The consequences of using the Flint River for the city's drinking water weren't "fully understood," Gov. Rick Snyder said Wednesday as he again pledged to take action later this week in response to significant levels of lead.
- Water is on the minds of every voter in the upcoming mayoral election in Flint.
- Fewer and fewer people are paying their water bills in Flint.
- Flint hasn't been using any corrosion-control method since it switched from Detroit's water system in April 2014. Corrosion-control treatment helps keep lead out of drinking water. Since the switch, more kids are showing up with elevated levels of lead in their blood.
- The Michigan Legislative Black Caucus is putting pressure on **Gov. Rick Snyder** to issue a state of emergency for the city of **Flint's water problems**.
- A long-time Flint tavern is offering free drinks, both alcoholic and non-alcoholic, for water donations.
- Donations have started to pour in -- some from across the state -- after the Flint School District requested bottled water for students **because of a local lead advisory**.

- If you have concerns about what may be in your city water, City of Flint officials want you to know you can get your water tested for free.
- Governors up and down the East Coast are warning residents to prepare for drenching storms as flooding killed one person Thursday in South Carolina.
- Disaster assistance would benefit from oversight through regular federal evaluation so Congress should consider creating an independent, external oversee of the American Red Cross, according to a new report by the Government Accountability Office (GAO).
- The Department of Homeland Security is demanding the return of a $32.4 FEMA grant awarded to a Houston hospital to repair damages from Hurricane Ike in 2008 after a new audit revealed most of the grant money had been misused.
- Weather across the state: Cool with highs in the 60s, rain possible this weekend.
- TV/Radio Reports: Flint water issues.

Analysis:

- Flint water issues continue to escalate. Members of the Michigan Legislative Black Caucus are asking for the Governor to declare a "state of emergency" for assistance.
- Social media chatter is mobilizing under the #flintwater and #waterworries hashtags on Twitter.
- We will continue to closely monitor the situation.

FLINT WATER

Kaffer: Snyder finally says lead in Flint water may be a problem

Detroit Free Press, Sept. 30, 2015

Almost a week after news broke that more Flint kids have been lead poisoned, two weeks after state data confirmed that lead levels in Flint's water had spiked, more than a year after residents first noticed something was hinky with the water coming out of their taps, Gov. Rick Snyder has publicly acknowledged that Flint's water supply "appears" to have problems.

Publicly, because despite his office's repeated efforts to downplay the severity of the situation, an anonymous water-filter distribution to Flint residents shepherded by Snyder's office earlier this month, suggests that privately, the governor may have understood that something was amiss in this impoverished town.

It's a welcome, if weak, concession from Snyder.

Gov. Rick Snyder: Consequences of using Flint River water weren't 'fully understood' in 2014

Associated Press, Sept. 30, 2015

FLINT, Michigan — The consequences of using the Flint River for the city's drinking water weren't "fully understood," Gov. Rick Snyder said Wednesday as he again pledged to take action later this week in response to significant levels of lead.

Separately, The Flint Journal reported that Snyder's office worked with a donor last month to arrange 1,500 water filters for Flint, which were distributed free to people by churches. The governor's involvement was never publicized, the newspaper reported, because pastors said they were told to stay quiet.

"If the water was OK, why would the governor work with someone to provide the filters?" the Rev. Alfred Harris told the newspaper. "I think the state working with the private donor is an admission the people needed some help."

City's water woes may play big role in upcoming mayoral election

WNEM-TV 5 (Saginaw), Oct. 1, 2015

FLINT, MI (WNEM) -

No doubt about it. Water is on the minds of every voter in the upcoming mayoral election in Flint.

"Flint's water problem is the number one issue that everyone is talking about," said Flint Mayor Dayne Walling.

Numerous problems with Flint River water have plagued the vehicle city since 2014. Now residents are living with high amounts of lead in their tap water.

Many of those people have pinned the blame on Walling including former emergency manager Darnell Early.

In a statement he said he was only implementing the plan laid out by the mayor and city council and said the decision to switch to Flint River water was made long before he became EFM.

Walling disagrees.

"The decision about the flint river was made by prior emergency managers. It was before the time of Darnell Early, he's accurate on that point. But city council and I were just simply not involved," Walling said.

Walling's opponent, Karen Weaver, paints a much different picture.

"He wants to say that it wasn't his decision to do that," Weaver said. "Well, if it wasn't, he sure never spoke out about it not being his decision. He was the one that said it was fine. He was the one that said we could stay with the flint water. He was the one that said brown water was OK to drink."

Fewer Flint water customers are paying their bills

Michigan Radio, Oct. 1, 2015

Fewer and fewer people are paying their water bills in Flint.

Flint's water bill collections are down by $1.75 million since a judge issued an injunction in August rolling back rates and ordering an end to disconnections.

Judge Archie Hayman ruled that Flint illegally raised rates by 35% in 2011.

In his order, the judge told the city to roll back the rate hike on future bills, stop disconnecting customers who are delinquent on the bills through August 2015, and stop placing liens on property owned by delinquent customers.

The water bills with the new rate schedule went out this month.

Flint mayor to state: Approve plan "as fast as humanly possible" to help keep lead out of water

Stateside with Cynthia Canty (Michigan Radio), Sept. 30, 2015

Flint hasn't been using any corrosion-control method since it switched from Detroit's water system in April 2014. Corrosion-control treatment helps keep lead out of drinking water. Since the switch, more kids are showing up with elevated levels of lead in their blood.

Flint Mayor Dayne Walling says he wants to put corrosion-control treatment back in place, but he needs state approval first. The state says it's going to take a little while to implement.

"One of my requests to (Michigan's) Department of Environmental Quality director is that (approval) be accelerated as fast as humanly possible," Walling said.

"Whatever decisions are coming next, we need that corrosion control in the water treatment process that we have now," he said.

Walling was a guest today on Stateside with Cynthia Canty.

Flint water woes seep into city, state politics

The Detroit News, Sept. 30, 2015

Flint — The questionable quality of the city's drinking water made headlines again this week, but not much of it has been news to Ashley Holt.

For almost a year, the water from her faucet has looked "like urine," smelled "like the sewer" and, if you're brave enough to sip it, hasn't tasted "normal," the 25-year-old Flint resident said. It's why she's limited for months how often her children — ages 5, 6 and 12 — come in contact with it.

But following last week's revelation that Flint children are showing higher amounts of lead in their blood, the situation has escalated for her cash-strapped family.

In a city where 41.5 percent of the population is below the poverty line, a lack of money is the reason Holt was walking instead of driving downtown this week to pick up her children from school. She scrambles to find enough to buy them bottled water.

"The only option I've got is just to not drink the water and stick with pop and juice," Holt said. "(I) go to the store and get a gallon of water a day, if I can afford it at the time."

The hardships experienced by residents here are having public health and political ripple effects that are being felt from city hall to the governor's office. Gov. Rick Snyder said Tuesday he could unveil "more action steps" as early as the end of this week.

Legislative Black Caucus urges state of emergency for Flint water

MLive, Sept. 30, 2015

FLINT, MI — The Michigan Legislative Black Caucus is putting pressure on **Gov. Rick Snyder** to issue a state of emergency for the city of **Flint's water problems**.

The organization announced in a Wednesday, Sept. 30, release that its members are concerned about the residents of Flint and lead exposure from the city's water.

The release cited blood samples from Genesee County children that show **lead levels have increased** since the city severed ties from the Detroit Water and Sewerage Department and began using water from the Flint River last year.

According to the release, state Rep. Sheldon Neeley, D-Flint, is working with local, state and federal officials to find solutions and resources.

"Issuing a health emergency is the most responsible thing to do," said Neeley, first vice chairman of the Legislative Black Caucus. "This is a public health crisis, and our children are most at risk. We urge Gov. Snyder to issue the state of emergency so the city of Flint can get immediate monetary relief."

If Snyder declares a state of emergency, the city could gain access to federal funding, the caucus said.

Flint tavern offering free drinks for water donations

MLive, Sept. 30, 2015

FLINT, MI – A long-time Flint tavern is offering free drinks, both alcoholic and non-alcoholic, for water donations.

A Facebook post from the West Court Street bar reads as follows:

"Let's bring clean water to Flint Schools!

Starting today through Friday (Oct 2) - Bring in a case of water between 4 and 7pm, receive your favorite drink on the house*! All donations will be delivered to Durant Tuuri Mott Elementary School. Thank you for your support!

*Qualifying beverages include beer bottles, draft beer, wine, liquor (single pour) and all non-alcoholic beverages."

Chris Poulos, an owner at the West Court Street bar, said his daughter put up the post after they came up with the idea upon hearing about other donation drives taking place in the city.

"I hope to be able to deliver them 20, 25 cases next week," he said, with the business in the process of making some changes to their filtering system for everyday use.

Water donations start to pour in for Flint schools after lead advisory

MLive, Sept. 30, 2015

FLINT, MI – Donations have started to pour in -- some from across the state -- after the Flint School District requested bottled water for students **because of a local lead advisory**.

The city and county have **issued lead advisories** related to the city's drinking water. A recent **study by a Hurley Medical Center doctor** says infants and children are being found with elevated levels of lead in their blood since the city switched to using the Flint River as its water source.

On Monday, Superintendent Bilal Tawwab **asked for the community to donate** bottled water to aid the cash-strapped district, which has stopped using tap water in the buildings.

The Flint School District is in the midst of a $16.4 million deficit and all of its spending is guided through its deficit elimination plan.

On Wednesday, Sept. 30, the district received more than 4,000 bottles of water from the 1st Congregational United Church of Christ in Kalamazoo.

How to get your water tested in Flint

WJRT-TV 12 in Flint, Sept. 30, 2015

FLINT (WJRT) - (09/30/15) - If you have concerns about what may be in your city water, City of Flint officials want you to know you can get your water tested for free.

Mike Glasgow, utilities administrator for the City of Flint Water Plant, tells ABC12 more than 250 people have asked to get their water tested just in the past week.

If you're worried about Flint treating the water, this fact might give you some peace of mind.

"We don't do any of the testing here. We're kind of acting as a middle man just to pay and fill out the all the paperwork for the residents to get this testing done," Glasgow said.

EMERGENCY MANAGEMENT AND HOMELAND SECURITY

Hurricane Joaquin could add to rainy mess along East Coast

Associated Press, Oct. 1, 2015

RALEIGH, N.C. (AP) - Governors up and down the East Coast are warning residents to prepare for drenching storms as flooding killed one person Thursday in South Carolina.

The rains could cause power outages and close roads in a region already walloped by rain. Hurricane Joaquin's approach could intensify the damage, but rain is forecast across the region regardless of the storm's path.

"Our state has seen the damage that extreme weather can cause time and time again - and I am urging New Yorkers to take precautions for more heavy storms in the coming days," New York Gov. Andrew Cuomo said in a news release Wednesday.

Red Cross Targeted in Federal Oversight Legislation

The Nonprofit Times, Sept. 16, 2015

Disaster assistance would benefit from oversight through regular federal evaluation so Congress should consider creating an independent, external oversee of the American Red Cross, according to a new report by the Government Accountability Office (GAO).

The 57-page report released today was in response to a request by Rep. Bennie Thompson (D-Miss.), ranking member of the House Committee on Homeland Security, to examine the agency's involvement in disaster relief. The Washington, D.C.-based, federally-charted nonprofit has come under fire in recent months after stories by NPR and ProPublica have raised questions regarding its effectiveness in response to disasters such as the 2010 Haiti earthquake and Hurricane Sandy in 2012.

Evaluation of the Red Cross could be performed by a federal agency such as Department of Homeland Security (DHS), by an Inspector General (IG) office such as the DHS IG, or by a private research firm under contract to a federal agency, according to the report's recommendations.

Thompson also has introduced legislation today that would require audits at least once every three years by the Treasury Inspector General for Tax Administration (TIGTA), Homeland Security Inspector general, and USAID Inspector General; annual reports by DHS to Congress about its partnerships with the Red Cross; and the Red Cross to provide information on its website about how to contact the Office of the Ombudsman.

Houston hospital squandered $32.4M FEMA grant meant for rebuilding after hurricane: report

The Washington Times, Oct. 1, 2015

The Department of Homeland Security is demanding the return of a $32.4 FEMA grant awarded to a Houston hospital to repair damages from Hurricane Ike in 2008 after a new audit revealed most of the grant money had been misused.

Officials at Riverside General Hospital could not account for Federal Emergency Management Agency (FEMA) grant funds when it spent $17.6 million of the $32.4 million, according to the report from DHS' Office of Inspector General released Wednesday.

Hospital management used the money to pay for normal operating expenses, legal fees, federal taxes, insurance, gift cards, a new grant management system and fire alarm repairs — all unrelated to the 2008 hurricane damage, the audit said.

"This is an unconscionable misuse of Federal disaster resources. The entire amount of this grant should be recovered to protect these funds from further abuse," Inspector General John Roth wrote in a statemen

Hi Shanon,

Here's the latest for this month. I'm compiling everything into a structured communications plan for the quarter.

Most of the cybersecurity products have been crafted. We're waiting on various approvals and coordination with DTMB and the Governor's Office. Once I have the agreed content, I'll be passing it along for final approval.

I'll also be passing along a social media package (e.g., Twitter and Facebook copy, images, etc.) to Sierra. Trevor is still working on the weekly graphics. The copy has been drafted.

(Yes, I will be at HQ at 11 a.m. today.)

Thanks,

Ron

FLINT WATER

Kaffer: Snyder finally says lead in Flint water may be a problem

Detroit Free Press, Sept. 30, 2015

Almost a week after news broke that more Flint kids have been lead poisoned, two weeks after state data confirmed that lead levels in Flint's water had spiked, more than a year after residents first noticed something was hinky with the water coming out of their taps, Gov. Rick Snyder has publicly acknowledged that Flint's water supply "appears" to have problems.

Publicly, because despite his office's repeated efforts to downplay the severity of the situation, an anonymous water-filter distribution to Flint residents shepherded by Snyder's office earlier this month, suggests that privately, the governor may have understood that something was amiss in this impoverished town.

It's a welcome, if weak, concession from Snyder.

Gov. Rick Snyder: Consequences of using Flint River water weren't 'fully understood' in 2014

Associated Press, Sept. 30, 2015

FLINT, Michigan — The consequences of using the Flint River for the city's drinking water weren't "fully understood," Gov. Rick Snyder said Wednesday as he again pledged to take action later this week in response to significant levels of lead.

Separately, The Flint Journal reported that Snyder's office worked with a donor last month to arrange 1,500 water filters for Flint, which were distributed free to people by churches. The governor's involvement was never publicized, the newspaper reported, because pastors said they were told to stay quiet.

"If the water was OK, why would the governor work with someone to provide the filters?" the Rev. Alfred Harris told the newspaper. "I think the state working with the private donor is an admission the people needed some help."

City's water woes may play big role in upcoming mayoral election

WNEM-TV 5 (Saginaw), Oct. 1, 2015

FLINT, MI (WNEM) -

No doubt about it. Water is on the minds of every voter in the upcoming mayoral election in Flint.

"Flint's water problem is the number one issue that everyone is talking about," said Flint Mayor Dayne Walling.

Numerous problems with Flint River water have plagued the vehicle city since 2014. Now residents are living with high amounts of lead in their tap water.

Many of those people have pinned the blame on Walling including former emergency manager Darnell Early.

In a statement he said he was only implementing the plan laid out by the mayor and city council and said the decision to switch to Flint River water was made long before he became EFM.

Walling disagrees.

"The decision about the flint river was made by prior emergency managers. It was before the time of Darnell Early, he's accurate on that point. But city council and I were just simply not involved," Walling said.

Walling's opponent, Karen Weaver, paints a much different picture.

"He wants to say that it wasn't his decision to do that," Weaver said. "Well, if it wasn't, he sure never spoke out about it not being his decision. He was the one that said it was fine. He was the one that said we could stay with the flint water. He was the one that said brown water was OK to drink."

Fewer Flint water customers are paying their bills

Michigan Radio, Oct. 1, 2015

Fewer and fewer people are paying their water bills in Flint.

Flint's water bill collections are down by $1.75 million since a judge issued an injunction in August rolling back rates and ordering an end to disconnections.

Judge Archie Hayman ruled that Flint illegally raised rates by 35% in 2011.

In his order, the judge told the city to roll back the rate hike on future bills, stop disconnecting customers who are delinquent on the bills through August 2015, and stop placing liens on property owned by delinquent customers.

The water bills with the new rate schedule went out this month.

Flint mayor to state: Approve plan "as fast as humanly possible" to help keep lead out of water

Stateside with Cynthia Canty (Michigan Radio), Sept. 30, 2015

Flint hasn't been using any corrosion-control method since it switched from Detroit's water system in April 2014. Corrosion-control treatment helps keep lead out of drinking water. Since the switch, more kids are showing up with elevated levels of lead in their blood.

Flint Mayor Dayne Walling says he wants to put corrosion-control treatment back in place, but he needs state approval first. The state says it's going to take a little while to implement.

"One of my requests to (Michigan's) Department of Environmental Quality director is that (approval) be accelerated as fast as humanly possible," Walling said.

"Whatever decisions are coming next, we need that corrosion control in the water treatment process that we have now," he said.

Walling was a guest today on Stateside with Cynthia Canty.

Flint water woes seep into city, state politics

The Detroit News, Sept. 30, 2015

Flint — The questionable quality of the city's drinking water made headlines again this week, but not much of it has been news to Ashley Holt.

For almost a year, the water from her faucet has looked "like urine," smelled "like the sewer" and, if you're brave enough to sip it, hasn't tasted "normal," the 25-year-old Flint resident said. It's why she's limited for months how often her children — ages 5, 6 and 12 — come in contact with it.

But following last week's revelation that Flint children are showing higher amounts of lead in their blood, the situation has escalated for her cash-strapped family.

In a city where 41.5 percent of the population is below the poverty line, a lack of money is the reason Holt was walking instead of driving downtown this week to pick up her children from school. She scrambles to find enough to buy them bottled water.

"The only option I've got is just to not drink the water and stick with pop and juice," Holt said. "(I) go to the store and get a gallon of water a day, if I can afford it at the time."

The hardships experienced by residents here are having public health and political ripple effects that are being felt from city hall to the governor's office. Gov. Rick Snyder said Tuesday he could unveil "more action steps" as early as the end of this week.

Legislative Black Caucus urges state of emergency for Flint water

MLive, Sept. 30, 2015

FLINT, MI — The Michigan Legislative Black Caucus is putting pressure on **Gov. Rick Snyder** to issue a state of emergency for the city of **Flint's water problems**.

The organization announced in a Wednesday, Sept. 30, release that its members are concerned about the residents of Flint and lead exposure from the city's water.

The release cited blood samples from Genesee County children that show **lead levels have increased** since the city severed ties from the Detroit Water and Sewerage Department and began using water from the Flint River last year.

According to the release, state Rep. Sheldon Neeley, D-Flint, is working with local, state and federal officials to find solutions and resources.

"Issuing a health emergency is the most responsible thing to do," said Neeley, first vice chairman of the Legislative Black Caucus. "This is a public health crisis, and our children are most at risk. We urge Gov. Snyder to issue the state of emergency so the city of Flint can get immediate monetary relief."

If Snyder declares a state of emergency, the city could gain access to federal funding, the caucus said.

Flint tavern offering free drinks for water donations

MLive, Sept. 30, 2015

FLINT, MI – A long-time Flint tavern is offering free drinks, both alcoholic and non-alcoholic, for water donations.

A Facebook post from the West Court Street bar reads as follows:

"Let's bring clean water to Flint Schools!

Starting today through Friday (Oct 2) - Bring in a case of water between 4 and 7pm, receive your favorite drink on the house*! All donations will be delivered to Durant Tuuri Mott Elementary School. Thank you for your support!

*Qualifying beverages include beer bottles, draft beer, wine, liquor (single pour) and all non-alcoholic beverages."

Chris Poulos, an owner at the West Court Street bar, said his daughter put up the post after they came up with the idea upon hearing about other donation drives taking place in the city.

"I hope to be able to deliver them 20, 25 cases next week," he said, with the business in the process of making some changes to their filtering system for everyday use.

Water donations start to pour in for Flint schools after lead advisory

MLive, Sept. 30, 2015

FLINT, MI – Donations have started to pour in – some from across the state – after the Flint School District requested bottled water for students **because of a local lead advisory**.

The city and county have **issued lead advisories** related to the city's drinking water. A recent **study by a Hurley Medical Center doctor** says infants and children are being found with elevated levels of lead in their blood since the city switched to using the Flint River as its water source.

On Monday, Superintendent Bilal Tawwab **asked for the community to donate** bottled water to aid the cash-strapped district, which has stopped using tap water in the buildings.

The Flint School District is in the midst of a $16.4 million deficit and all of its spending is guided through its deficit elimination plan.

On Wednesday, Sept. 30, the district received more than 4,000 bottles of water from the 1st Congregational United Church of Christ in Kalamazoo.

How to get your water tested in Flint

WJRT-TV 12 in Flint, Sept. 30, 2015

FLINT (WJRT) - (09/30/15) - If you have concerns about what may be in your city water, City of Flint officials want you to know you can get your water tested for free.

Mike Glasgow, utilities administrator for the City of Flint Water Plant, tells ABC12 more than 250 people have asked to get their water tested just in the past week.

If you're worried about Flint treating the water, this fact might give you some peace of mind.

"We don't do any of the testing here. We're kind of acting as a middle man just to pay and fill out the all the paperwork for the residents to get this testing done," Glasgow said.

EMERGENCY MANAGEMENT AND HOMELAND SECURITY

Hurricane Joaquin could add to rainy mess along East Coast

Associated Press, Oct. 1, 2015

RALEIGH, N.C. (AP) - Governors up and down the East Coast are warning residents to prepare for drenching storms as flooding killed one person Thursday in South Carolina.

The rains could cause power outages and close roads in a region already walloped by rain. Hurricane Joaquin's approach could intensify the damage, but rain is forecast across the region regardless of the storm's path.

"Our state has seen the damage that extreme weather can cause time and time again - and I am urging New Yorkers to take precautions for more heavy storms in the coming days," New York Gov. Andrew Cuomo said in a news release Wednesday.

Red Cross Targeted in Federal Oversight Legislation

The Nonprofit Times, Sept. 16, 2015

Disaster assistance would benefit from oversight through regular federal evaluation so Congress should consider creating an independent, external oversee of the American Red Cross, according to a new report by the Government Accountability Office (GAO).

The 57-page report released today was in response to a request by Rep. Bennie Thompson (D-Miss.), ranking member of the House Committee on Homeland Security, to examine the agency's involvement in disaster relief. The Washington, D.C.-based, federally-charted nonprofit has come under fire in recent months after stories by NPR and ProPublica have raised questions regarding its effectiveness in response to disasters such as the 2010 Haiti earthquake and Hurricane Sandy in 2012.

Evaluation of the Red Cross could be performed by a federal agency such as Department of Homeland Security (DHS), by an Inspector General (IG) office such as the DHS IG, or by a private research firm under contract to a federal agency, according to the report's recommendations.

Thompson also has introduced legislation today that would require audits at least once every three years by the Treasury Inspector General for Tax Administration (TIGTA), Homeland Security Inspector general, and USAID Inspector General; annual reports by DHS to Congress about its partnerships with the Red Cross; and the Red Cross to provide information on its website about how to contact the Office of the Ombudsman.

Houston hospital squandered $32.4M FEMA grant meant for rebuilding after hurricane: report

The Washington Times, Oct. 1, 2015

The Department of Homeland Security is demanding the return of a $32.4 FEMA grant awarded to a Houston hospital to repair damages from Hurricane Ike in 2008 after a new audit revealed most of the grant money had been misused.

Officials at Riverside General Hospital could not account for Federal Emergency Management Agency (FEMA) grant funds when it spent $17.6 million of the $32.4 million, according to the report from DHS' Office of Inspector General released Wednesday.

Hospital management used the money to pay for normal operating expenses, legal fees, federal taxes, insurance, gift cards, a new grant management system and fire alarm repairs — all unrelated to the 2008 hurricane damage, the audit said.

"This is an unconscionable misuse of Federal disaster resources. The entire amount of this grant should be recovered to protect these funds from further abuse," Inspector General John Roth wrote in a statemen

Gongwer for Sept. 28.

Ananich Looking To Snyder, State For Action In Flint

As the city of Flint continues to see problems with the safety of its water, and specifically with increased levels of lead in children, Senate **Minority Leader Jim Ananich** is calling on **Governor Rick Snyder**and the state to assist.
"My constituents and I believe the state must act urgently to provide concrete solutions to the public health crisis in the city of Flint. In speaking with Governor Snyder and his key aides today, I stressed the need to work together on a number of initiatives that will ensure safe water for Flint residents," he said in a statement.
Mr. Ananich (D-Flint) continued, "My **formal request** included immediate and long-term solutions, including strong consideration for switching back to the Detroit water source until the Karegnondi Pipeline Authority project is complete. Anything less than an aggressive, comprehensive approach is simply unacceptable."
Mr. Ananich sounded the alarm last week when health professionals from area medical centers gave a presentation suggested that the water is having a direct impact on Flint's residents (See **Gongwer Michigan Report, September 24, 2015**). Flint began drawing water out of the Flint River as a cost-saving measure while under a state-appointed emergency manager. The city had previously drawn water from the Detroit Water and Sewerage Department. The Karegnondi pipeline will eventually draw water from Lake Huron.
Mr. Ananich has set up a **website** where residents can go to get more information if they are concerned that they or their children have been exposed to lead from the water.
Snyder deputy press secretary Dave Murray said the governor has been and will continue to work with Mr. Ananich on the situation. He said the two spoke this morning about how the state can continue working with Flint city leaders, but the governor is still reviewing Mr. Ananich's suggestions.
"We deeply share the senator's commitment to making sure all state residents have access to clean and safe water. The governor and state agencies have been closely working with Flint leaders on their infrastructure challenges for months, including about providing $4.2 million in grants and restructured loan financing to provide resources needed to locate and fix infrastructure problems and add the carbon filtration system," Mr. Murray said.
"It's important that people have accurate information about their health and water. The Department of Environmental Quality and the Department of Health and Human Services are testing water and working with Flint residents on issues related to what they can do if they have concerns about the pipes in their homes," he said.

Subject: Situational Awareness: Lead Issues in Flint Water

Capt and Tony,

Situational Awareness: The city of Flint is putting restrictions on its water due to lead levels. A study lead by a Hurley Children's Hospital pediatrician found that children drinking the city of Flint water have an elevated amount of lead in their blood when compared to than other area residents.

This is the latest saga in an ongoing issue with the city's water supply. The city switched to from the city of Detroit water system a year or so ago. Afterward, there have been many issues. Both the Free Press and The Flint Journal have called for the city move back to city of Detroit water.

Thanks,

Ron

Flint to issue lead in water warning after push from doctors, health officials
The Flint Journal
09.24.2015

FLINT, MI – The city of Flint is expected to advise its water customers on ways to minimize exposure to lead in its tap water -- particularly for children -- after a group that includes doctors and health officials strongly suggested the step.

Flint Mayor Dayne Walling confirmed the move on Wednesday, Sept. 23, after The Flint Journal-MLive learned the Greater Flint Health Coalition approved a resolution two days prior urgently asking the city to issue the advisory.

Representatives of the coalition met privately with Walling and other city officials to express their concerns about the safety of Flint water, and issued a statement saying "not enough was being done to alert the public to potential risks of consuming Flint city water that could lead to elevated levels of lead."

Walling's statement said the city "will be issuing an advisory" on the matter "in cooperation with health partners promoting ways to minimize the exposure to lead such as flushing pipes when the water has been sitting." He did not specify when the advisory would be issued.

Walling, who earlier this month asked Gov. Rick Snyder for $30 million for Flint's infrastructure, including $10 million to replace lead service lines to homes, said in an email that he "will continue to pursue funding for a comprehensive healthy homes initiative that addresses lead in paint and pipes."

"We have to get the lead out of our community to eliminate the threat of childhood lead poisoning," the statement says. "I am extremely concerned to hear from doctors about any elevated blood lead levels in Flint's children."

The Journal could not immediately reach Walling for more information on the concerns expressed to him by doctors about lead.

Kirk D. Smith, president and chief executive officer of the Greater Flint Health Coalition, and state Senate Minority Leader Jim Ananich, the chairman of the group's board of directors, issued a statement to The Journal about the coalition's recommendation on issuing precautions.

"As a coalition of concerned physicians, health care professionals and county leaders, we are compelled to inform the public when there is a possible threat to their health so they can take appropriate precautions and actions to protect themselves and their families," the joint statement says.

"At our last meeting and in recent days we have heard from numerous physicians who shared strong concerns that not enough was being done to alert the public to potential risks of consuming Flint city water that could lead to elevated levels of lead."

A resolution approved by the nonprofit coalition's board of directors, which includes representatives of Flint area hospitals, universities, physicians and unions, comes after researchers from Virginia Tech University reported their testing here shows a far-reaching problem with lead in water.

Ten percent of Flint homes tested by Virginia Tech had 25 parts per billion of lead or more, far more than the allowable level -- 15 ppb -- set in federal guidelines, according to the university researchers.

City and state officials have said their testing shows Flint's water supply meets all health and safety regulations, never rising above 11 ppb in more than 10 percent of homes during the last 16 months, but data from the state Department of Environment Quality shows lead levels have spiked since the city began using the Flint River as its water source in April 2014.

At the urging of state and federal officials, the city announced three weeks ago that it would speed up the development of plans aimed at making Flint water less corrosive.

Professor Marc Edwards of Virginia Tech has said treated river water is currently far more corrosive than water the city had used for decades -- Lake Huron water that was treated and piped here by the city of Detroit.

Edwards has criticized the city and the state for not having developed a plan for reducing the corrosiveness of Flint's water because an estimated 15,000 homes in the city have lead or lead solder in service lines and plumbing, making the homes much more susceptible to lead leaching into water.

City Councilman Scott Kincaid, also a member of the GFHC, said he supported the organization's request for further action -- particularly after physicians raised concerns about how high lead levels could affect infants and young children.

"I'm supporting the resolution. I think we need to advise people that there is a potential concern," Kincaid said. "Lead isn't good for anybody, but the effect on infants" is especially disturbing.

Although the city has yet to issue its lead advisory, Walling's mention of allowing water to flush through pipes is the same advice given by Virginia Tech earlier this month.

Researchers at the university have also recommended that infants not be fed formula made with unfiltered Flint tap water and that residents who are not flushing water for five minutes before using it for drinking or cooking should use a filter certified to remove lead.

The Journal could not reach Dr. Lawrence Reynolds, president and CEO of Mott Children's Health Center, for comment Wednesday. Other coalition members said Reynolds led the push for additional, quick action by the city.

Lead is a toxic metal that was used for many years in products found in and around homes, according to the U.S. Environmental Protection Agency. Even at low levels, lead may cause health effects such as behavioral problems and learning disabilities.

Current regulations for lead in water began in 1992 and require a limited amount of testing to measure the degree to which lead leaches into tap water after flowing through lead service lines and lead solder in home plumbing.

Flint has struggled with its water quality since switching to the Flint River as its primary water source in April 2014. Previously, the city had purchased water through the city of Detroit, which got its water from Lake Huron.

Flint was required to step up its testing of water in homes after it shifted to the Flint River, which is intended to be a temporary move as the city and Genesee County are partners in building a new water pipeline to Lake Huron through a partnership called the Karegnondi Water Authority.

The city has been using -- and Walling and state emergency managers have supported continuing to use -- the Flint River as a stopgap water source until the KWA pipeline is expected to be completed in 2016.

In state testing of city water samples, Flint has stayed below the federal threshold for lead, with less than 10 percent of tap water samples exceeding 15 ppb.

Water systems can be required to take steps like making water less corrosive or replacing lead service lines if sampling shows such elevated lead levels.

But after the Virginia Tech testing showed lead was much more prevalent than Flint's testing showed, Edwards and U.S. Rep. Dan Kildee each raised doubts about the water testing by the city and DEQ.

Kildee said in a news release Sept. 21 that "the city, DEQ and (U.S. Environmental Protection Agency) have not adequately answered my questions on their testing methods to ensure the safety of Flint's water."

Subject: URGENT: Michigan Emergency Management Assistance Compact (MEMAC) Request for Assistance from Marquette County

To all MEMAC signatories:

The Michigan State Police, Emergency Management and Homeland Security Division (MSP/EMHSD) is in receipt of a formal request for resources from Marquette County via the Michigan Emergency Management Assistance Compact (MEMAC). Marquette County invoked implementation of the MEMAC and is requesting assistance with resources to

respond to "continued widespread and severe water and sewer freeze ups" throughout the county. Please see the attached MEMAC Assistance Request form identifying the specific resources needed.

Those agencies willing to assist Marquette County with this resource request should complete the attached MEMAC Assistance Confirmation form and return the signed and completed form to the MSP/EMHSD to the attention of F/Lt. Michael Johnson. Please do not respond to this email. The completed form should be returned via email to the following email address: MSP-seoclgc@michigan.gov.

Only those agencies willing and able to provide requested resources need to respond to this request. F/Lt. Michael Johnson will forward all MEMAC Assistance Confirmation forms to Marquette County for their review and acceptance. Marquette County will contact your agency direct to make arrangements to receive your resources.

Thank you,

F/Lt. Michael Johnson

MEDIA MONITORING REPORT

07/24/2015

Issues:

- No issues to report.

Summary:

- John Russell Houser, 59, the man police identified Friday as the shooter who killed two people at a movie theater, was described as "kind of a drifter" who had been living out of a motel.
- Pilots fighting wildfires in California are encountering a mission-stopping obstacle: drones.
- Mass shootings as defined by the FBI happen about every two weeks in America. For nearly a decade, USA Today has been tracking these incidents on a website that paints a grim picture.
- Ten years after Hurricane Katrina exposed the widespread neglect of children in U.S. emergency planning, most recommendations of the national commission created to address those gaps remain unfulfilled, a Save the Children report shows.
- As crews work to restore power to parts of Troy, the city says a number of municipal facilities will be closed for a second day on Friday.
- With August recess and the end of the fiscal year looming, congressional leaders say they are focused on cyber security. They are focused on the private sector as they work to collaborate on legislation, which would bolster information sharing between the government and corporations.
- Last week's shooting in Chattanooga that claimed five lives has some senators questioning policies that, if reversed, may have prevented the tragedy.
- The Environmental Protection Agency may penalize Enbridge Inc. with the stiffest fine ever imposed under the Clean Water Act for an oil pipeline disaster, based on an InsideClimate News review of EPA enforcement data covering the past 15 years.
- A Washington Post columnist examines National Weather Service radar shortfalls.
- Jack Lessenberry, Michigan Radio and Toledo Blade commentator, writes that it's concerning that Enbridge wasn't transparent to the Michigan Pipeline Task Force.
- National Weather Service Forecasts: Nice weather today, showers possible this weekend.
- TV/Radio: Trooper recruit school graduation on Friday.

Analysis:

- Media coverage is neutral.
- Coverage continues about the Lafayette, La., theater shooting.

- Hobbyist UAS pilots are disrupting wildfire firefighting missions in California. Will continue to monitor.
- Save the Children has issued its annual report about children and disasters. Michigan only meets one of four federal recommendations. This topic gains media interest each year during National Preparedness Month. Will continue to monitor and proactively plan for inquires.

LOUISIANA THEATER SHOOTING

Police ID Louisiana theater shooter who killed 2, wounded 9 others

RNN, July 24, 2015

LAFAYETTE, LA (RNN) - John Russell Houser, the man police identified Friday as the shooter who killed two people at a movie theater, was described as "kind of a drifter" who had been living out of a motel.

Chief Jim Craft with the Lafayette Police Department said Houser, 59, had previously lived in Phenix City, AL, but had been in Lafayette since early July. He used a .40-caliber handgun and had parked his blue 1995 Lincoln Continental outside the theater Thursday before the shooting.

"It is apparent that he was intent on shooting and then escaping," Craft said. "What happened is the quick law enforcement actions forced him back into the theater, at which time he shot himself.

Police: Gunman kills two, wounds seven in Louisiana theater before killing himself

Reuters, July 24, 2015

A lone gunman opened fire inside a crowded movie theater in Lafayette, Louisiana, on Thursday evening, killing two people and wounding seven before taking his own life, police said.

Gunfire erupted during a 7 p.m. CDT (0000 GMT) showing of the film "Trainwreck". Two people died in the hail of bullets before the 58-year-old suspect killed himself with a handgun as officers rushed to the scene, Lafayette Police Chief Jim Craft said.

The shootings took place almost three years to the day after 12 people were killed at a cinema in Aurora, Colorado, and follows several mass shootings in the United States in recent weeks.

Gunman in La. theater kills 2, then himself

USA Today, July 24, 2015

A gunman described as white and middle aged stood up during a packed screening of the movie "Trainwreck" Thursday evening in Lafayette, La., and opened fire, killing two people and injuring at least nine others before killing himself as police moved in, authorities said.

The victims range in age from their late teens to their 60s, Lafayette Police Chief Jim Craft said.

Authorities know the identity of the 58-year-old alleged gunman, but were not yet releasing it, said Sgt. Brooks David of the Louisiana State Police. The man did have a criminal record, but it was "pretty old," said Craft.

"The information we have at this time indicates that he was by himself, sat by himself and the first two people he shot were sitting right in front of him," Craft said.

EMERGENCY MANAGEMENT AND HOMELAND SECURITY

In the heat of the moment, drones are getting in the way of firefighters

NPR, July 24, 2015

Soon after the Lake Fire started last month, it threatened hundreds of homes. Fire officials in Southern California's San Bernardino National Forest, where the wildfire raged, responded quickly by sending helicopters — and more than a thousand firefighters — to combat the blaze on the ground.

Mike Eaton was one of the pilots called upon to help fight the fire. On the evening of June 24, he recalls, they noticed a drone. The aerial attack was immediately called off, out of fear of a midair collision; the three air tankers attacking the Lake Fire were parked the rest of the day. And the fire grew as a result.

Mass shootings in America by the numbers

NPR, July 24, 2015

Mass shootings as defined by the FBI happen about every two weeks in America. For nearly a decade, USA Today has been tracking these incidents on a website that paints a grim picture.

Save the Children Report Finds U.S. Children Still at Risk 10 Years After Hurricane Katrina

Save the Children Press Release, July 14, 2015

Washington, D.C. (July 14, 2015) — Ten years after Hurricane Katrina exposed the widespread neglect of children in U.S. emergency planning, most recommendations of the national commission created to address those gaps remain unfulfilled, a new Save the Children report shows.

Nearly four in five of the recommendations issued by the National Commission on Children and Disasters in its 2010 final report have not been fully met, according to the new national disaster report card, titled: "Still at Risk: U.S. Children 10 Years After Hurricane Katrina."

New report: Disaster planning still not meeting children's needs decade after Hurricane Katrina

Fierce Homeland Security, July 23, 2015

A new Save the Children report found that nearly 80 percent of federal recommendations – issued in 2010, five years after Hurricane Katrina – aimed at better protecting children during and after disasters still have not been fully met.

Of the 81 recommendations in the National Commission on Children and Disasters report, Save the Children found that only 17 have been fully met with 44 still in progress and 20 yet to be addressed. The child advocacy group said its report, which was released July 14, is the first formal review of the federal recommendations since they were issued five years ago.

"In an era when disasters are growing in frequency and impact, these findings indicate that much work remains to be done – both by Congress and the executive branch – to ensure children are protected when crisis strikes," according to the group. "A decade after the nation's Katrina wake-up call, America's children remain far more vulnerable to disaster than they need be."

Man vows to shoot police with sniper rifle after making bomb threat in Detroit

MLive, July 23, 2015

DETROIT, MI – State police and other law enforcement responded to frightening bomb threat in Detroit Wednesday night.

According to state police, the caller said he planted a bomb at the Michigan National Guard Armory on Eight Mile near Ryan in Detroit.

The man also said he had a sniper rifle and planned to kill anyone responding to the call.

Despite the threat, members of the FBI Joint Terrorist Task Force, state police Bomb Squad and Wayne State University Police Department responded. They used K-9s to sweep the area and discovered no explosives in the area.

The call came in about 6:45 p.m. and the scene was cleared about 9 p.m.

No suspects have been identified nor arrests made.

Some Troy municipal facilities to remain closed Friday as DTE works to restore power

WXYZ-TV 7, July 24, 2015

TROY, Mich. (WXYZ) - As crews work to restore power to parts of Troy, the city says a number of municipal facilities will be closed for a second day on Friday.

The closures will apply to Troy City Hall, the Troy Library, the Troy Community Center, Troy Family Aquatic Center and the 52-4 District Court. The Troy Police Department, Troy Fire Department and Troy Department of Public Works will remain open.

At last check, about 3,700 DTE Energy customers are still without power in the Troy and Clawson area.

CONGRESS/LEGISLATURE

Cyber leadership void in Congress

The Hill, July 23, 2015

With August recess and the end of the fiscal year looming, congressional leaders say they are focused on cyber security. They are focused on the private sector as they work to collaborate on legislation, which would bolster information sharing between the government and corporations. They are focused on the executive branch as they review the results of the White House's 30-day "cybersecurity sprint." But to truly address our cybersecurity vulnerabilities Congress must turn its focus within.

Consider three recent cybersecurity issues and Congress' response. As the government has disclosed, the cyber-attack on the Office of Personnel Management ("OPM") compromised the personal information of over 21 million federal employees, contractors, and legislative leaders. Congress is now running a read and react playbook, scrambling to get movement on any cyber security bill. The most viable bill appears to be the cybersecurity Information Sharing Act ("CSIA"), which would bolster information sharing between the government and the private sector through liability protection. A good policy to implement however, it remains unclear what—if anything—the CSIA would do to prevent another cyber-attack on the federal government. Furthermore, the CSIA is at best a piecemeal fix at a time when comprehensive reform is desperately needed.

Senators pushing to eliminate 'gun free zones' in light of Chattanooga tragedy

WJRT-TV 12, July 24, 2015

WASHINGTON, D.C. (WJRT) - (07/23/15) - Last week's shooting in Chattanooga that claimed five lives has some senators questioning policies that, if reversed, may have prevented the tragedy.

Military recruiting centers are "gun free zones", but last week's Chattanooga attack has some lawmakers pushing to eliminate the restrictions. The five servicemen killed were trained to use firearms, but prohibited from doing so at the time of the attack.

Senator Jerry Moran (R-KS) has introduced the 'Safeguarding Service Members' Second Amendment Rights Act', which would repeal bans on military personnel carrying firearms on Armed Forces military installations and Department of Defense sites.

Senator Steve Daines (R-MT) finds it imperative that these vulnerable service members be able to protect themselves.

"I think it's morally wrong to not allow our men and women, who can defend themselves if they're given the proper tools to do that," Daines said. "And that's why I believe they should be able to carry a firearm at a recruitment center."

ENVIRONMENT

Documentary searches for hope in nuclear waste

Great Lakes Echo, July 24, 2015

Hope isn't a word most people associate with high-level radioactive nuclear waste.

But an upcoming documentary on its storage in Ontario takes an optimistic perspective on a depressing subject. It's called Nuclear Hope.

"Hope can have a very positive meaning – we hope for a better future, we hope for a better life, all of those things," said the independent film's co-director, Collin Scheyen. "Hope can also be misguided. Without the right knowledge behind it, hope can be very shortsighted.

"Hope is a perfect word to use toward nuclear energy."

Enbridge Expects $40 Million Fine, EPA's Stiffest Ever for a Pipeline Spill

InsideClimate News, July 22, 2015

The Environmental Protection Agency may penalize Enbridge Inc. with the stiffest fine ever imposed under the Clean Water Act for an oil pipeline disaster, based on an InsideClimate News review of EPA enforcement data covering the past 15 years.

Enbridge, a Canadian pipeline operator, expects a $40 million penalty for spilling 1 million gallons of tar sands oil into Michigan's Kalamazoo River five years ago, according to a filing with the Securities and Exchange Commission. Under federal law, the EPA could levy $100 million or more, depending on whether the agency finds that the pipeline rupture resulted from negligence, and other factors. Enbridge, Canada's largest transporter of crude oil, is worth an estimated $30 billion.

Enbridge Oil Spill: Five Years Later, Michigan Residents Struggle To Move On

International Business Times, July 24, 2015

On the Kalamazoo River this weekend, Michigan residents will kayak down the sparkling waters and cast their lines for smallmouth bass. The relaxing summer day will bear little resemblance to July 25, 2010, when a ruptured pipeline spewed a million gallons of crude oil into a nearby creek.

Five years and billions of cleanup dollars after the worst inland oil spill in U.S. history, the river is largely revitalized. Resuscitated wetlands hug the river, while three new boat launches and man-made rapids draw paddlers, fishers and weekenders.

"We're looking forward to promoting it as a destination, instead of it being a liability," said Brad Wurfel, a spokesman for the Michigan Department of Environmental Quality, the agency leading the pipeline response for the state. "We're proud of the cleanup effort here."

How a Chinese Company Slipped on Canada's Oil Sands

Wall Street Journal, July 22, 12015

Weeks after the state-controlled oil company bought Nexen for $15 billion, its executives were in Calgary with a blunt message for the Canadian company, which had struggled for years to extract crude from the oil sands in the Alberta wilderness. Cnooc Chief Executive Li Fanrong told staffers Nexen provided just 2% of Cnooc's profits, say attendees, warning that "2% is not enough."

Two years later, Cnooc is still trying to fix Nexen, its troubles compounded by low crude prices. And now Cnooc must explain an oil spill: This month, a pipeline Nexen installed last year ruptured, spilling nearly 31,500 barrels of a mixture of crude oil, wastewater and sand in northern Alberta.

Nexen's chief executive, Fang Zhi, on Wednesday stood by the oil-spill site near the hamlet of Anzac. "It is very disappointing that this has happened," he said, the scent of petroleum wafting. "I therefore personally apologize."

OPINION

Commentary: U.S. radars have come a long way, but gaps in coverage remain a big risk

The Washington Post, July 22, 2015

What do you do when you hear a rumble of thunder? Storm chasers would dart out the door, camera in-hand, but most people — including those not in the weather business — would check the radar to see what storm is lurking around the corner. We load our apps and click links to see nearby storms without giving the technology behind it a second thought. Radar is a supreme convenience if you want to know whether you need an umbrella for the commute, but it also serves as vital, life-saving technology to the millions of people threatened by severe weather every year.

We're fortunate to have a robust network of Doppler radars in the U.S., but that spaced-out array is slowly aging and prone to failures at inopportune times. We desperately need to invest in expanding our network of weather radars before its flaws become a serious issue.

Commentary: Save Great Lakes from farm pollution the Michigan way

Detroit Free Press, July 21, 2015

Michigan farmers are among the hardest-working individuals we represent in the U.S. House. They are also the original environmentalists, because no one takes better care of the Earth than someone who makes a living from it.

Healthy and sustainable land, water and air are a necessary prerequisite for a successful farm. And a successful future for their children and grandchildren.

Farmers across Michigan have long led the way in conservation practices. Over the past several years, their efforts have been boosted by the Michigan Agricultural Environmental Assurance Program (MAEAP).

MAEAP is proven to help farmers voluntarily develop sound environmental practices aimed at limiting the impact of excess runoff from fertilizers and pesticides, protecting our water, our soil and air. The program provides farmers with official environmental certification accompanied by financial assistance.

It's time to take the Michigan success story on the road.

Commentary: Secrecy of Straits of Mackinac pipeline's condition fuels concerns

Toledo Blade, July 24, 2015

CHARLEVOIX, Mich. — There may not be a more important natural resource than the Great Lakes. They hold 84 percent of all the fresh water in North America, and are crucial for fishing, boating, and transportation.

Nobody doubts that a major oil spill could be devastating. But every day, 540,000 barrels of oil and liquefied natural gas are pumped through a 4½-mile pipeline at the bottom of the Straits of Mackinac, between Michigan's two peninsulas. The straits connect lakes Michigan and Huron.

The pipeline is old; it has been there since 1953. The condition of the pipeline, known as Line 5, is not widely known. Enbridge Energy Partners, the Canadian-based firm that owns the pipeline, says it is safe. But it won't release reports on the pipeline's condition.

Michigan officials were able to get only a small amount of data from Enbridge. This month, a Michigan Petroleum Pipeline Task Force released a report on pipeline safety that complained about this lack of openness.

"While Enbridge has listed the numbers and types of pipeline inspections that it or its contractors have performed," the report said, "it has not fully disclosed the actual results of most of the inspections or the limitations of the test methods used."

That, the report noted, makes it hard to assess the company's claim that everything is fine. And given Enbridge's track record, there is reason to worry.

FEMA Federal Emergency Management Agency

19 hrs ·

"I've listened to many people with disabilities who have been impacted by disasters. After Hurricane Sandy, for example, I heard from people with disabilities who were without power for days and even weeks. Some of them relied on social media for help – connecting with neighbors, friends or family members online for solutions. Others had a harder time. What I've learned from this experience is that everyone must be prepared to be their own 'emergency manager.'" A great overview of emergency preparedness tips for people with disabilities from Marcie Roth, the director of FEMA's Office of Disability Integration and Coordination:

Everyone Must Be Prepared For Emergencies | FEMA.gov
The importance of preparing ourselves for disasters is universal. Emergencies can happen anywhere - at home or at work - and everyone must take action to prepare for emergencies in case something unexpected happens.

MEDIA MONITORING REPORT

06/30/2015

Issues:

- No issues to report.

Summary:

- The Village of Dundee is encouraging residents and business owners to take precaution as the water levels of the River Raisin continue to rise.
- Both east and west directions of M-50 in Dundee have been closed to traffic.
- Dozens came out to the banks of the River Raisin in the Village of Dundee Monday night to take pictures of the steadily rising waters, some in awe, others concerned.
- Pumping has begun on the **flooded Homer Stryker baseball field**, said John Bollinger, assistant general manager for the Kalamazoo Growlers.
- Ann Arbor has been feeling soggy as it nears the end of one of the wettest Junes on record.
- A short-lived thunderstorm in western Ottawa County produced a small funnel cloud around 8:50 p.m. Monday.
- DTE Energy says three line crews have been robbed at gunpoint of cash and cellphones while trying to restore power in Detroit after weekend storms.
- The Detroit News opines that the Michigan State Police's community outreach activities are building trust.
- National Weather Service Forecasts: Rain possible in the north through today, but temperatures will rebound for a pleasant holiday weekend.

Analysis:

- Media coverage is positive and neutral.
- The Detroit News' editorial reflects positively on the department.
- Flooding is a concern in Dundee and Monroe County. The River Raisin in Dundee is under a flood warning until 2 p.m. July 2.
- Kalamazoo is having ongoing flooding issues, specifically with the Growlers' ballpark.
- Portland continues to recover after last week's tornado. A citizen wrote a #PortlandStrong song about the sense of community citizens displayed in wake of a disaster.
- Public Information will continue to monitoring the flooding issues.

WEATHER

Dundee preparing for flooding

Monroe News, June 30, 2015

DUNDEE — The Village of Dundee is encouraging residents and business owners to take precaution as the water levels of the River Raisin continue to rise.

Dave Uhl, village manager, said if the weather forecast stays as predicted, the water levels will continue to rise.

"The prediction is for the river to rise six more feet," Mr. Uhl said Monday. "And if it does, the water will be over the road at the bridge."

If forecasters are correct, Michigan Department of Transportation will close the bridge at M-50 late Tuesday or early Wednesday when the water is expected to be over the roadway, Mr. Uhl said.

"If that prediction sticks, the water level will be higher than it was in 2011," he said.

The village is trying to be proactive about the potential flooding situation.

Mr. Uhl said on the east side of the river, the Dundee Police have its army equipment and mobile unit established. The mobile command will be fully staffed so that law enforcement can respond to calls on the east side of the village. The west side will continue to be serviced from the police station.

In addition, the village has sandbags ready to give to residents and business owners to use to protect against flooding.

"We want people to be proactive too because it's too late to sandbag if you are already flooded," Mr. Uhl said.

Residents and businesses from Oak St. west to the downtown area are likely the ones who will be impacted by the flooding and are encouraged to take precautionary measures to reduce or stop flooding in their homes and businesses, Mr. Uhl said.

Sandbags can be picked up or delivered by calling the Village Office at (734) 529-3430

Part of M-50 closed for flooding

Monroe News, June 30, 2015

DUNDEE- Both east and west directions of M-50 in Dundee have been closed to traffic.

The bridge in downtown Dundee has be closed due to rising levels of the River Raisin, which are close to the roadway.

The Michigan Department of Transportation issued a statement Tuesday morning saying M-50 between US-23 in Dundee and Lewis Ave. will be closed to both east and westbound traffic.

On Monday, Dave Uhl, The Village of Dundee Manager said sandbags would be available for residents and business owners to prevent flooding into their homes and businesses.

As of late Monday, Mr. Uhl said the forecast expected the River Raisin to rise an additional 6 feet and that the bridge in town would likely close late Tuesday.

Water rose faster than initially anticipated forcing an earlier closure of the area.

A mobile command unit has been stationed on the east side of the bridge along with fire personnel and Monroe Community Ambulance so services will not be disrupted to residents living east of the bridge.

As of 9 a.m. Tuesday, officials are projecting the river to crest between 9 p.m. Tuesday and midnight.

What you need to know about the river flood

Monroe News, June 30, 2015

The National Weather Service posted the following forecast at 4:20 a.m. today (Tuesday June 30).

Heavy rain from this past weekend resulted in flooding along the River Raisin. The potential for precipitation will increase this afternoon and evening but no widespread heavy rainfall is anticipated at this time.

The river at Dundee continues to rise at a quicker rate and will reach flood stage this morning. Further upstream...the gauge near Adrian crested above record level yesterday afternoon.

At Blissfield...the river has crested with a gradual receding of levels now underway. High water upstream will continue to work through the River Raisin system toward Dundee and Monroe.

At Monroe...the river will continue to rise today. People along the river and on small tributaries close to the river should be prepared for possible flooding.

Road closures

MDOT announced about 5:45 a.m. today that eastbound and westbound M-50 (Custer Rd.) is closed between US-23 and Lewis Ave. because of roadway flooding.

This closure includes the M-50 bridge at the River Raisin in Dundee. Village officials say detour signs around the bridge are posted in the village; and additional barricades may be posted by the Monroe County Road Commission.

Volunteers

Village of Dundee posted this notice on Facebook at 8:40 a.m. today: "We may need assistance with filling additional sandbags. If you are able to assist we ask that you call the Village Office at (734) 529-3430 and provide your name, contact number and the times that you are available. If assistance is needed we will reach out to you. For health and safety reasons we strongly urge everyone to stay out of the flood waters."

Flood levels and stages

A flood warning remains in effect for the River Raisin in Dundee and Monroe.

In Dundee, flood stage is 650 feet above sea level. Waters are expected to crest at 652.0 feet this evening.

At 4 a.m. today, the stage was 650.0 feet and rising.

In Monroe, flood stage in the city is 9 feet depth. The waters are expected to crest at 9 feet this evening.

At 4 a.m. today, the stage was 8.4 feet and rising.

NWS weather statements for Monroe County and southeast Michigan are posted at www.weather.gov/dtx/

VIDEO: Rains cause flooding of River Raisin in Dundee

WXYZ-TV 7, June 29, 2015

Dozens came out to the banks of the River Raisin in the Village of Dundee Monday night to take pictures of the steadily rising waters, some in awe, others concerned.

Jim Thornton, who works in Ann Arbor, said his commute will likely take a little longer once the river reaches flood stage sometime near midnight and the M-50 bridge is shut down. Village officials say the bridge could be shut down Tuesday evening into Wednesday morning - if the weather forecast stays as predicted.

The police department's mobile command vehicle is in place on the east side of the bridge.

For others, the rising waters are already causing problems.

Terra Deaton of Blissfield Township drove 25 miles north to Dundee to do her laundry because flooding closed her local laundromat.

Police officers went door to door Monday evening and drove around the village to warn neighbors to be prepared. Village officials say they are fully stocked with sandbags and are urging residents and business owners to be proactive and get sandbags in place before the flooding.

Sandbags can be picked up or delivered by calling the village office at 734-529-3430.

Michael Salib, a volunteer corporal with the Dundee Police Department, also urged caution for those visiting the river near its banks.

"Stand back, take some pictures, zoom in with your camera, just don't zoom in with your body," he said.

The Dundee Township Fire Department will be staging rescue and fire equipment on both sides of the river.

The Monroe County Road Commission will be setting up barricades Tuesday morning to detour traffic around the village.

Flooding could move Kalamazoo Growlers July 4 game, fireworks to Battle Creek

MLive, June 29, 2015

KALAMAZOO, MI — Pumping has begun on the **flooded Homer Stryker baseball field**, said John Bollinger, assistant general manager for the Kalamazoo Growlers.

Whether the field will be dry enough to host the ball games and fireworks planned for the July 4 weekend will depend a lot on this week's weather. But the show will go on, even if that means moving it to Battle Creek, the clubs management said.

Last Saturday, June 26, the Kalamazoo River **flooded out of its banks**, leaving the field and its dugouts under water. The Kalamazoo Growlers rescheduled the team's weekend and Monday night games, tentatively trying double-headers this coming weekend.

Sean Fletcher, director of parks and recreation for the city of Kalamazoo, said that's an optimistic plan.

"We'll do whatever we can do," Fletcher said of getting the field ready for the Fourth of July.

Ann Arbor sees nearly double average rainfall in June

MLive, June 30, 2015

Ann Arbor has been feeling soggy as it nears the end of one of the wettest Junes on record.

More than 7 inches of rain have drenched the Ann Arbor area since the month began, according to University of Michigan staff meteorologist Dennis Kahlbaum.

Kahlbaum's readings are based on a National Weather Service station on U-M's North Campus that is monitored twice daily. He said some areas could have received slightly less or more precipitation based on the path of specific storms that swept through the region.

"This ranks as the sixth wettest since 1880," Kahlbaum said. "And we're expected to get some more rain today and tomorrow so we could potentially move up even more."

The wettest June since measurements began being taken in the area was in 1968, when 8.45 inches of rain were dumped on the city.

"So it looks unlikely we'll take the crown this year," Kahlbaum said.

Storms have relentlessly pounded Southeast Michigan throughout the month, and even non-storming days have seemed to have their fair share of rainfall. A **major rainstorm caused flooding June 14**, and **two waves of storms June 22** brought heavy rains in addition to the **tornado that touched down near Manchester** in the southwest corner of Washtenaw County.

Funnel cloud spotted over Ottawa Co.; no tornado

WOOD-TV 8, June 29, 2015

A short-lived thunderstorm in western Ottawa County produced a small funnel cloud around 8:50 p.m. Monday.

A viewer reported the funnel in the area of Borculo was visibly rotating before dissipating.

There was very little threat of an actual tornado from this storm since it pulsed up and died so rapidly. Generally, a tornado is produced by a more mature, longer-lasting storm with a sustained rotating updraft.

Radar estimated cloud heights at the time of the storm were near 21,000 feet before the storm rapidly dissipated.

Outages to affect some NE Indiana customers until Tuesday

Daily News (Indiana), June 30, 2015

FORT WAYNE — A power company warned some of its northeastern Indiana customers Sunday that they might not have electricity for two more days.

More than 13,000 customers still had no service as of Sunday afternoon, Indiana Michigan Power Co. reported Sunday afternoon. After bringing in extra crews from Kentucky and Ohio, the utility said it expected to have power restored to about 95 percent of its customers by Monday night.

At one point, more than 30,000 Fort Wayne-area residents were left without electricity; the utility said.

Utility: Crews robbed at gunpoint restoring power in Detroit

Associated Press, June 30, 2015

DETROIT (AP) -- A utility says three line crews have been robbed at gunpoint of cash and cellphones while trying to restore power in Detroit after weekend storms.

Michael Lynch, chief security officer for DTE Energy Co., tells the Detroit Free Press each robbery involved two or three suspects and it's possible the robberies are related. The Detroit News reports one happened Saturday and the others were Monday.

No employees were injured. Lynch says they're advised to avoid carrying cash.

The Detroit-based utility is offering a $2,500 reward. Lynch says: "We're not going to stand for this nonsense of our employees getting held up at gunpoint."

Crews are working Tuesday to restore power to the last of 158,000 of homes and businesses it serves that lost service. Lynch says security will accompany crews.

EMERGENCY MANAGEMENT AND HOMELAND SECURITY

Editorial: Michigan State Police efforts build trust

The Detroit News, June 30, 2015

Across the country, and in Michigan, high-profile cases of police abusing their power have dominated the news in recent months. Consequently, it's good to see a number of Michigan State Police programs in local communities that are striving to improve relationships with citizens.

One program, the Secure Cities Partnership, has the state police working with local law enforcement and community organizations in Flint, Detroit, Pontiac and Saginaw to reduce crime. Since these are some of Michigan's most violent cities, that's the right call.

Shannon Banner, spokeswoman for the State Police, says the cities use crime data to determine where to best use resources while staying within the state police budget. She notes the program is expanding to include, at least for the summer, Inkster, Muskegon Heights and Benton Harbor.

Meanwhile, the Community Action United Team In Our Neighborhoods (CAUTION), established about a year go by the State Police, is a partnership with clergy to offer support in critical incidents. Under this program, a city's clergy are part of a quick response team that provides a calming influence to individuals. And the team serves as a liaison between law enforcement and the community.

In addition, Advocates and Leaders for Police and Community Trust (ALPACT) was established about 20 years ago and is the oldest of the community engagement efforts. It includes the MSP but is under the Michigan Department of Civil Rights.

Director Matthew Wesaw says the goal is to build a relationship of trust between law enforcement and the community.

ALPACT has a diverse membership that includes leaders and members of the community, civil rights and civil liberties organizations, and leaders from law enforcement. Members meet regularly to examine issues affecting police and community relations.

Also, the State Police are trying to diversify their ranks through minority recruiting. Since 2012, the State Police have had funds to hire new officers and has conducted more than 350 job fairs — nearly three-fourths in urban areas.

Realizing that changing community attitudes starts with the young, the MSP has several programs geared toward children and teenagers. The Michigan Youth Leadership Academy is a one-week residential camp held in the summer at State Police headquarters in Lansing. It provides mentoring for the youth.

Another program is TEAM — Teaching, Educating and Mentoring — and involves school-based classes taught by State Police troopers for grades K-12. Officers discuss bullying and teen dating, among other topics.

All of these efforts are supported by Gov. Rick Snyder, who has made them a part of his criminal justice initiative. At this point, the programs haven't needed any legislative action.

However, one project that will eventually require help from lawmakers is the use of body cameras.

Banner says the department is evaluating the cameras in test programs.

Cost is a factor. In addition to the initial expense of about $1,000 per camera, storing the videos is costly. During an eight-hour shift, each officer uses about 16 gigabytes of storage, which is equivalent to the capacity of a cell phone. Funding would have to be approved by the Legislature.

Also, privacy issues will demand establishing policies and legislation that exempts some data from the Freedom of Information Act.

These State Police programs are important steps to building trust with communities, and focus law enforcement resources in the places that need them most.

Residents pick through charred remains of Washington homes

Associated Press, June 20, 2015

WENATCHEE, Wash. (AP) - Tom Bryant watched a wildfire charge up a hillside toward his home, then turned and told his wife it was time to go.

That's when the front door burst open and a firefighter rushed in.

"He doesn't knock," Bryant recalled Monday. "He ran in the door and said to get out."

Bryant, his wife and pets jumped into their vehicle and got out safely. But their home was one of two dozen destroyed in a fast-moving wildfire Sunday night in this central Washington city about 120 miles east of Seattle. A handful of businesses also were destroyed when flames spread to the downtown core.

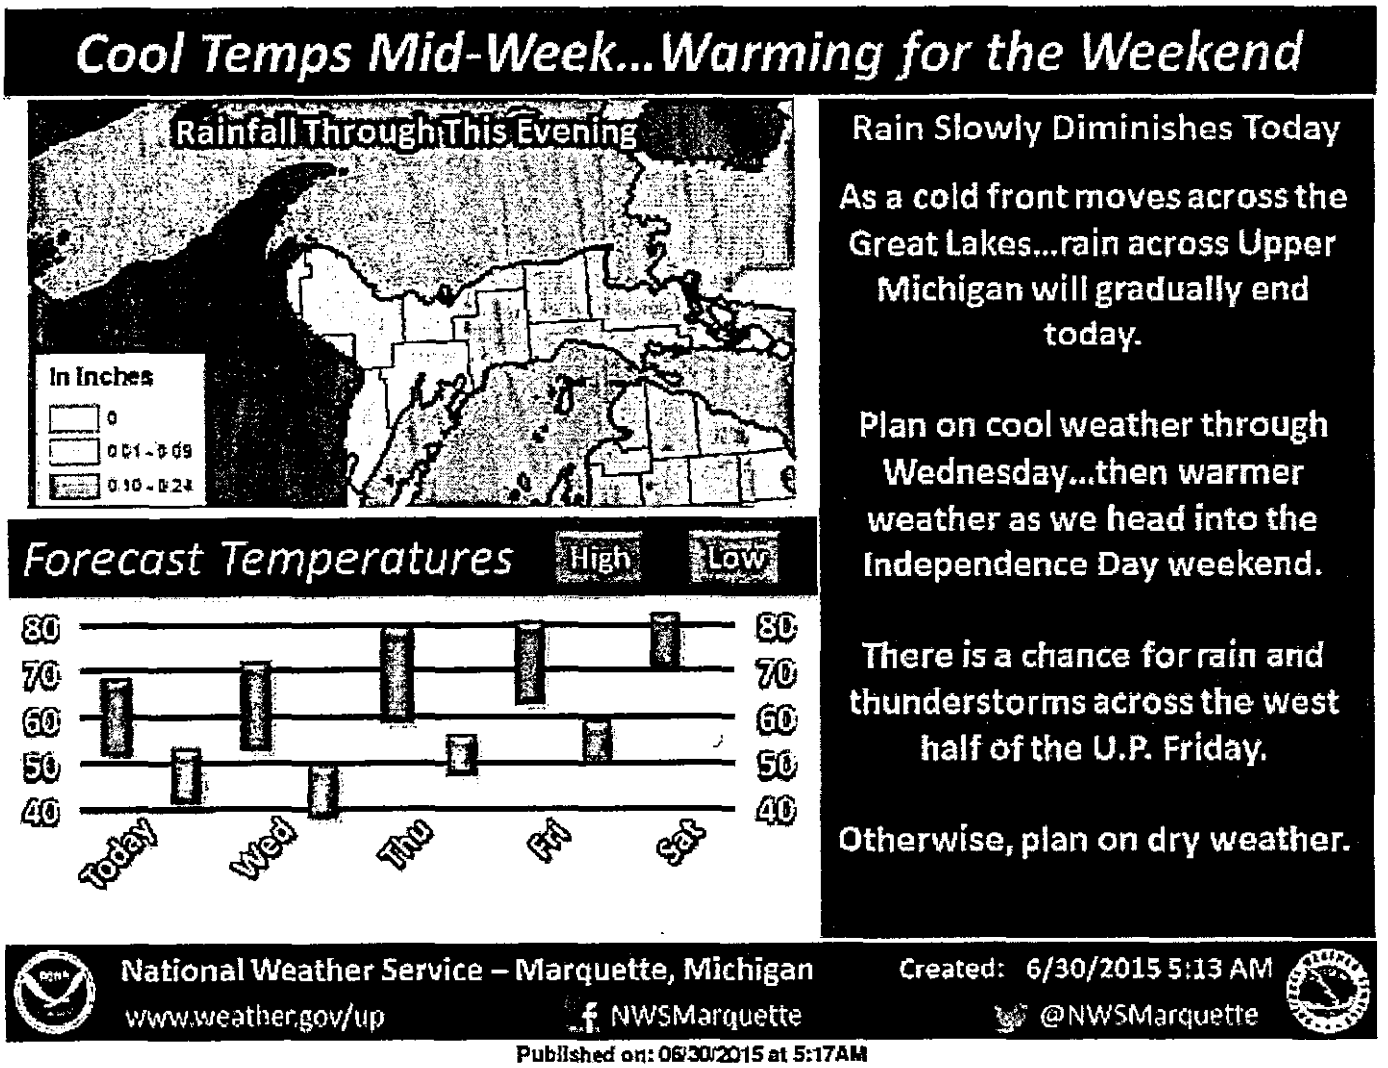
Firefighters on Monday kept a close eye on the blaze, which has burned more than 4 square miles. It was considered corralled enough to allow evacuees back to their homes, and the Red Cross closed a shelter that housed 155 people Sunday night at a local high school.

The season's worst wildfire struck as the state struggles with a severe drought. Mountain snowpack is extremely low, and about one-fifth of the state's rivers and streams are at record low levels.

Washington Gov. Jay Inslee issued an emergency proclamation last week that allows state resources to be brought in quickly to respond to wildfires.

NATIONAL WEATHER SERVICE FORECASTS

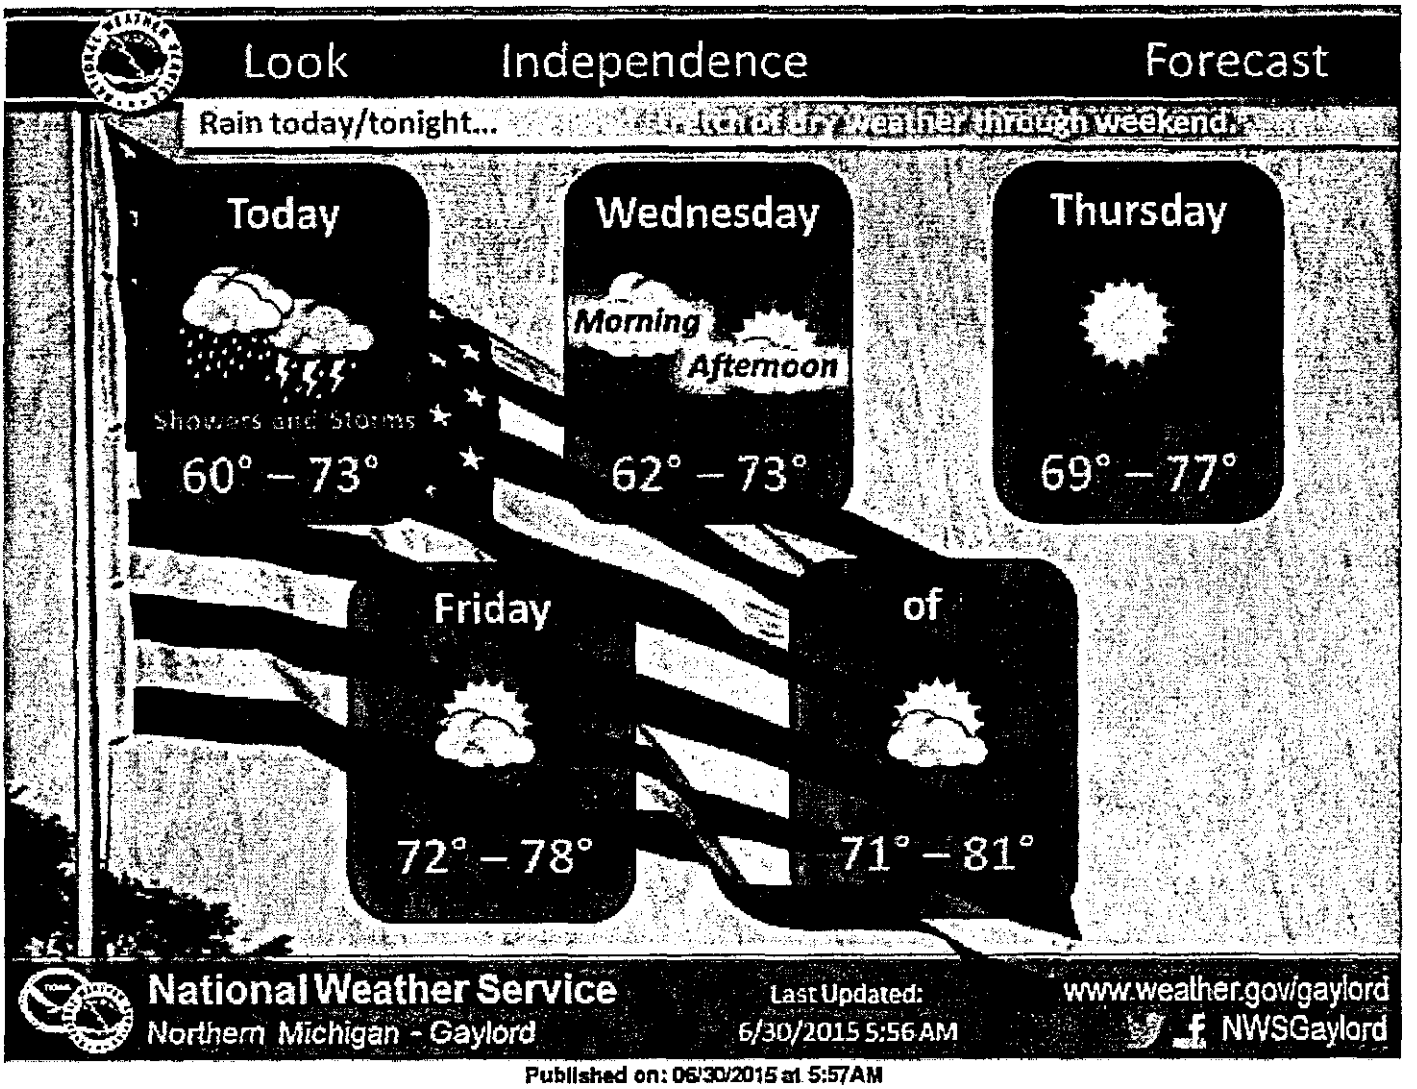
Marquette



Published on: 06/30/2015 at 5:17AM

As a cold front passes to the south and east of the area, expect north winds and light drizzle or very light rain showers to slowly diminish from northwest to southeast. High pressure will build across the west half of the Upper Peninsula tonight allowing for clearing skies and calm winds. Highs today will only be in the upper 50s to low 60s with overnight lows falling into the low 40s west to upper 40s east. Temperatures are expected to moderate toward the upcoming holiday weekend.

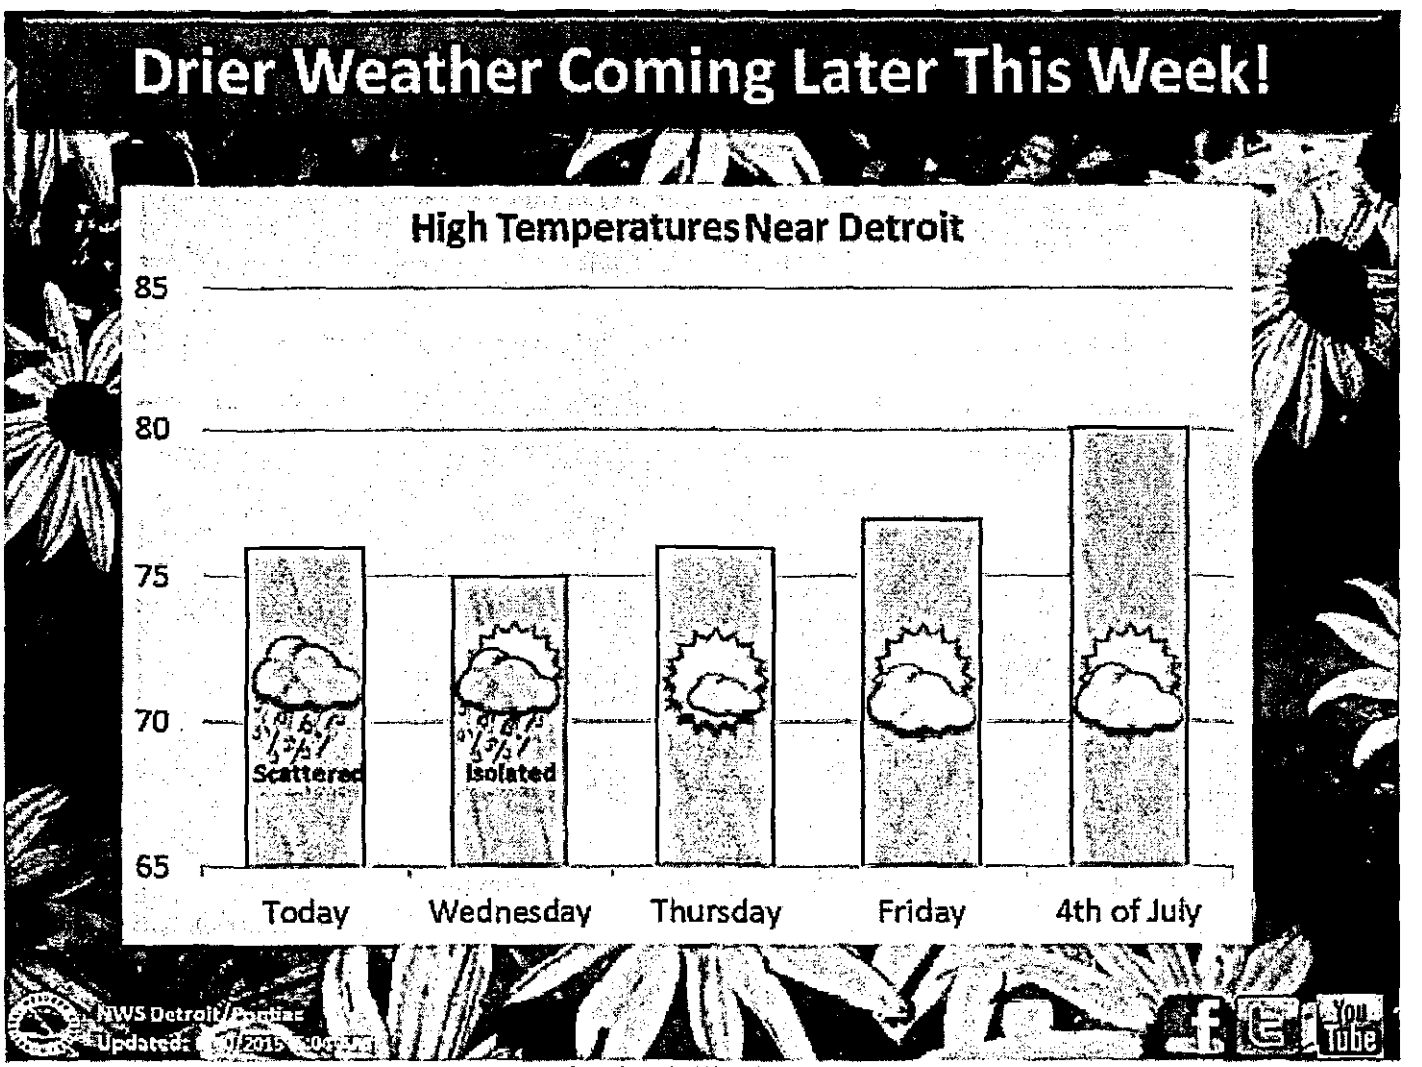
Gaylord



Published on: 06/30/2015 at 5:57AM

Heading into a nice stretch of weather for the Independence Day weekend...but will have to put up with showers and a few thunderstorms today and tonight...and morning clouds Wednesday. Mostly sunny skies and seasonable temperatures are forecast for the Fourth of July on Saturday.

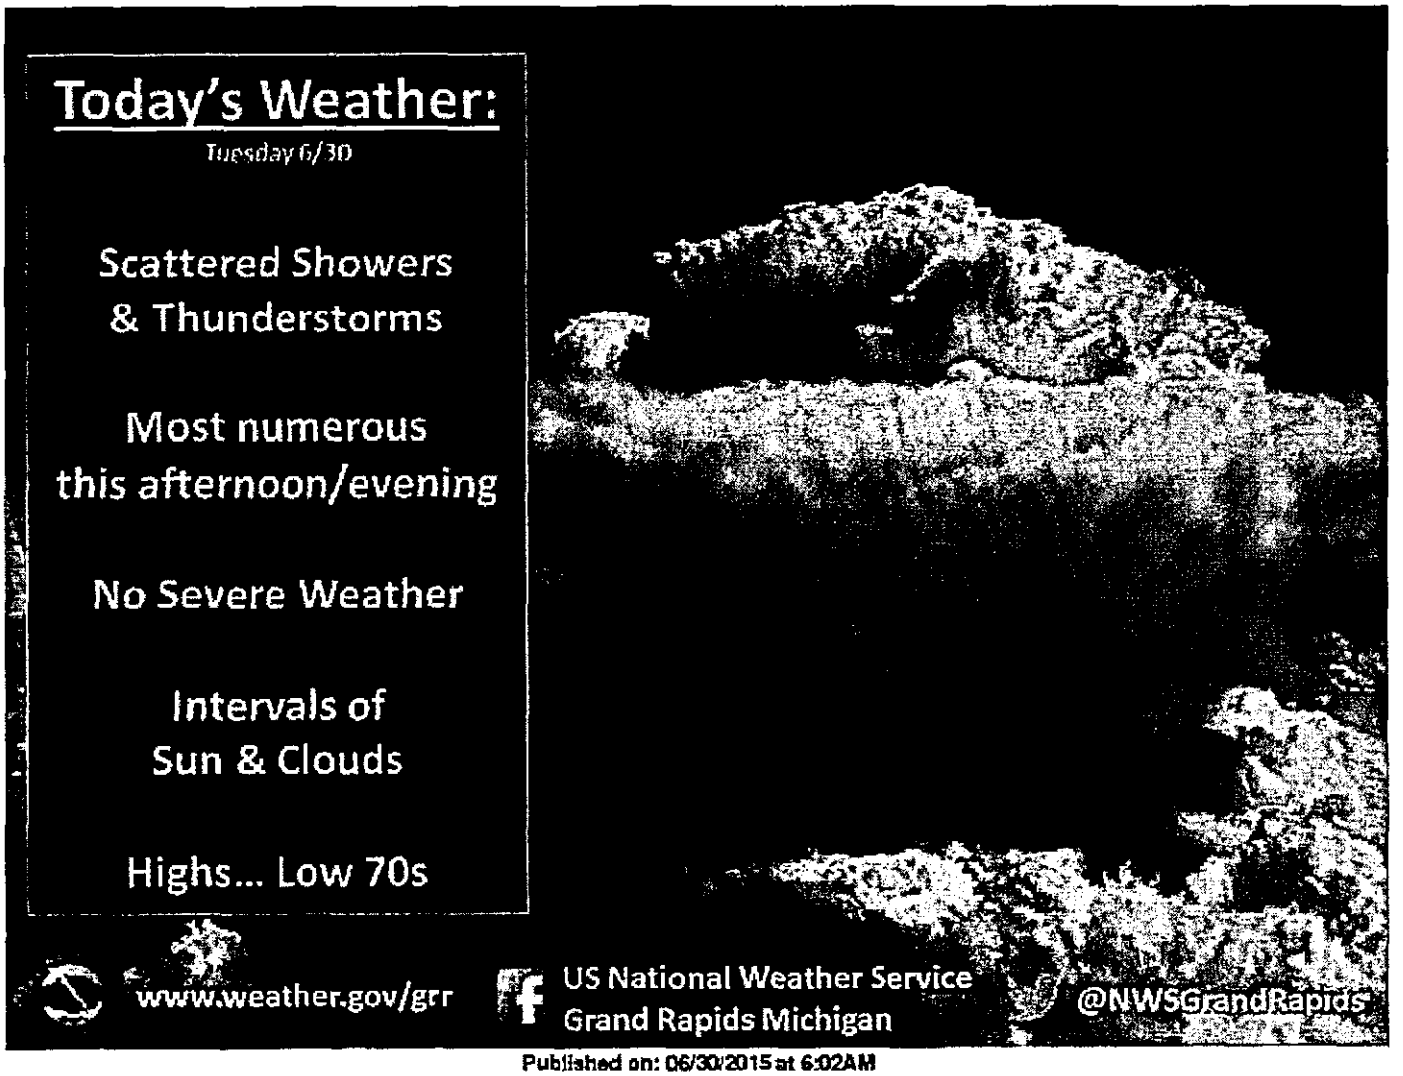
Detroit



Published on: 06/30/2015 at 5:21AM

Another weak low pressure system will track across Michigan today, bringing a good chance for showers and thunderstorms. Lingering moisture behind the system will provide just a small chance for showers and storms tomorrow. High pressure will then build over the Great Lakes by Thursday, providing dry weather into the holiday weekend.

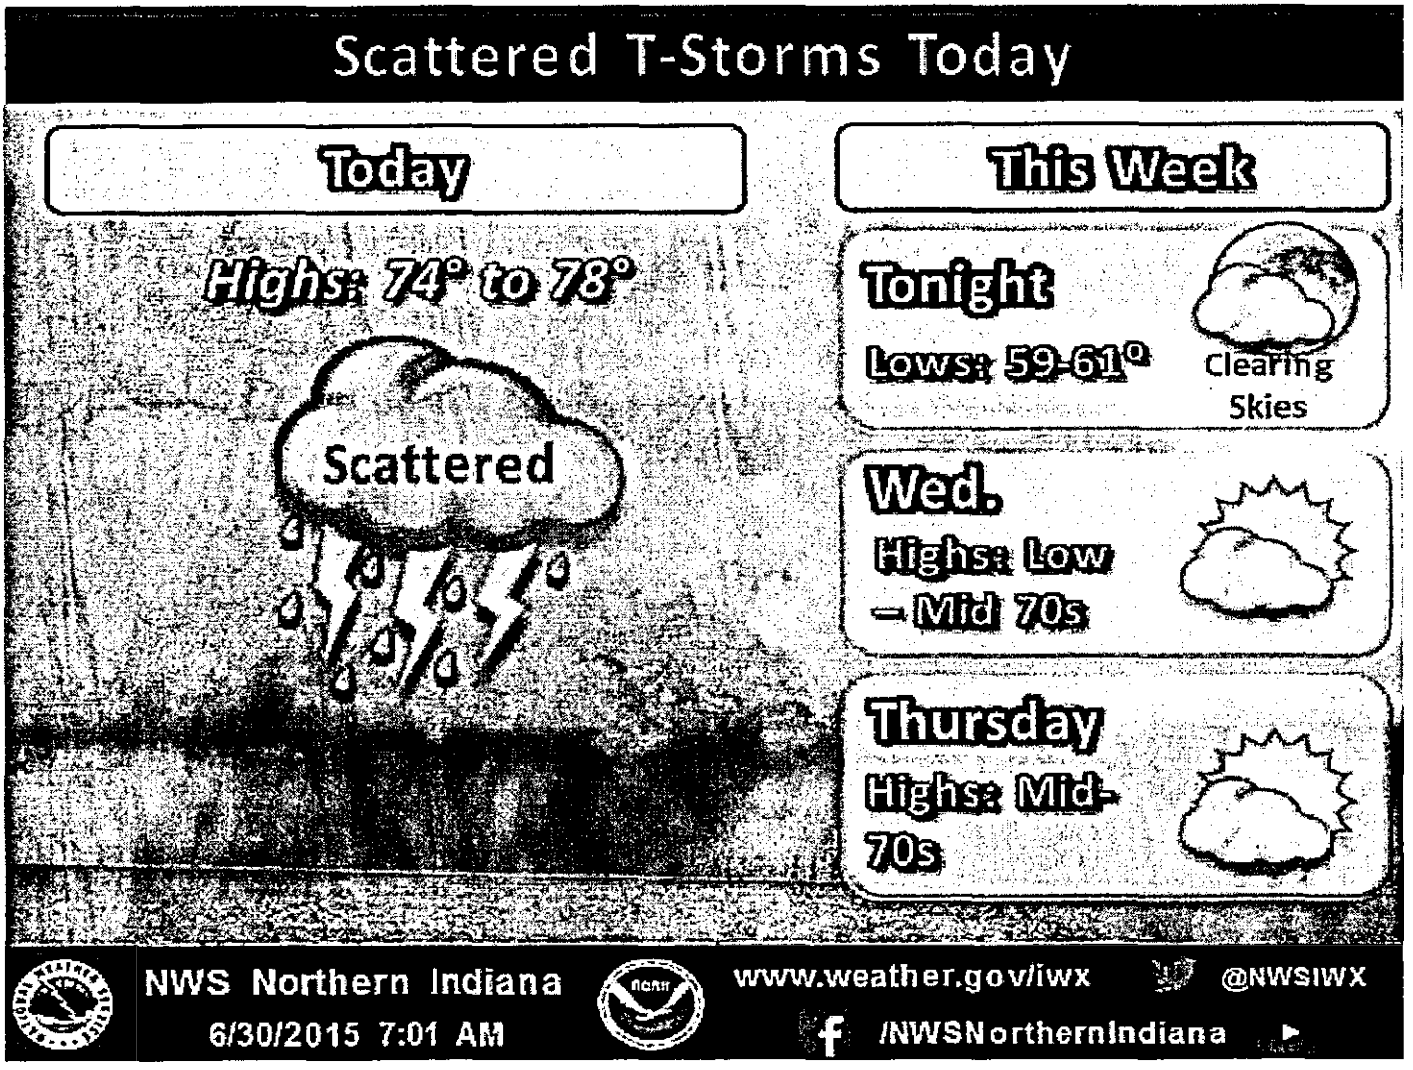
Grand Rapids



Published on: 06/30/2015 at 6:02AM

Another day with scattered showers and storms is expected. A low pressure system moving through the region today may actually bring a bit more in the way of coverage of precipitation as compared to yesterday. Much like yesterday... storms will be capable of cloud to ground lightning...locally heavy rain and small hail. Intervals of clouds and sun can be expected with highs in the lower 70s in most locales.

Northern Indiana



Scattered showers and thunderstorms are possible today with high temperatures in the mid 70s. Drier conditions are expected for the second half of the week.

MEDIA MONITORING REPORT

06/30/2015

Issues:

- No issues to report.

Summary:

- The Village of Dundee is encouraging residents and business owners to take precaution as the water levels of the River Raisin continue to rise.
- Both east and west directions of M-50 in Dundee have been closed to traffic.
- Dozens came out to the banks of the River Raisin in the Village of Dundee Monday night to take pictures of the steadily rising waters, some in awe, others concerned.
- Pumping has begun on the **flooded Homer Stryker baseball field**, said John Bollinger, assistant general manager for the Kalamazoo Growlers.
- Ann Arbor has been feeling soggy as it nears the end of one of the wettest Junes on record.
- A short-lived thunderstorm in western Ottawa County produced a small funnel cloud around 8:50 p.m. Monday.
- DTE Energy says three line crews have been robbed at gunpoint of cash and cellphones while trying to restore power in Detroit after weekend storms.
- The Detroit News opines that the Michigan State Police's community outreach activities are building trust with citizens.
- National Weather Service Forecasts: Rain possible in the north through today, but temperatures will rebound for a pleasant holiday weekend.

Analysis:

- Media coverage is positive and neutral.
- The Detroit News' editorial reflects positively on the department.
- Flooding is a concern in Dundee and Monroe County. The River Raisin in Dundee is under a flood warning until 2 p.m. July 2.
- Kalamazoo is having ongoing flooding issues, specifically with the Growlers' ballpark.
- Portland continues to recover after last week's tornado. A citizen wrote a #PortlandStrong song about the sense of community citizens displayed in wake of a disaster.
- Public Information will continue to monitoring the flooding issues.

WEATHER

Dundee preparing for flooding

Monroe News, June 30, 2015

DUNDEE — The Village of Dundee is encouraging residents and business owners to take precaution as the water levels of the River Raisin continue to rise.

Dave Uhl, village manager, said if the weather forecast stays as predicted, the water levels will continue to rise.

"The prediction is for the river to rise six more feet," Mr. Uhl said Monday. "And if it does, the water will be over the road at the bridge."

If forecasters are correct, Michigan Department of Transportation will close the bridge at M-50 late Tuesday or early Wednesday when the water is expected to be over the roadway, Mr. Uhl said.

"If that prediction sticks, the water level will be higher than it was in 2011," he said.

The village is trying to be proactive about the potential flooding situation.

Mr. Uhl said on the east side of the river, the Dundee Police have its army equipment and mobile unit established. The mobile command will be fully staffed so that law enforcement can respond to calls on the east side of the village. The west side will continue to be serviced from the police station.

In addition, the village has sandbags ready to give to residents and business owners to use to protect against flooding.

"We want people to be proactive too because it's too late to sandbag if you are already flooded," Mr. Uhl said.

Residents and businesses from Oak St. west to the downtown area are likely the ones who will be impacted by the flooding and are encouraged to take precautionary measures to reduce or stop flooding in their homes and businesses, Mr. Uhl said.

Sandbags can be picked up or delivered by calling the Village Office at (734) 529-3430

Part of M-50 closed for flooding

Monroe News, June 30, 2015

DUNDEE- Both east and west directions of M-50 in Dundee have been closed to traffic.

The bridge in downtown Dundee has be closed due to rising levels of the River Raisin, which are close to the roadway.

The Michigan Department of Transportation issued a statement Tuesday morning saying M-50 between US-23 in Dundee and Lewis Ave. will be closed to both east and westbound traffic.

On Monday, Dave Uhl, The Village of Dundee Manager said sandbags would be available for residents and business owners to prevent flooding into their homes and businesses.

As of late Monday, Mr. Uhl said the forecast expected the River Raisin to rise an additional 6 feet and that the bridge in town would likely close late Tuesday.

Water rose faster than initially anticipated forcing an earlier closure of the area.

A mobile command unit has been stationed on the east side of the bridge along with fire personnel and Monroe Community Ambulance so services will not be disrupted to residents living east of the bridge.

As of 9 a.m. Tuesday, officials are projecting the river to crest between 9 p.m. Tuesday and midnight.

What you need to know about the river flood

Monroe News, June 30, 2015

The National Weather Service posted the following forecast at 4:20 a.m. today (Tuesday June 30).

Heavy rain from this past weekend resulted in flooding along the River Raisin. The potential for precipitation will increase this afternoon and evening but no widespread heavy rainfall is anticipated at this time.

The river at Dundee continues to rise at a quicker rate and will reach flood stage this morning. Further upstream...the gauge near Adrian crested above record level yesterday afternoon.

At Blissfield...the river has crested with a gradual receding of levels now underway. High water upstream will continue to work through the River Raisin system toward Dundee and Monroe.

At Monroe...the river will continue to rise today. People along the river and on small tributaries close to the river should be prepared for possible flooding.

Road closures

MDOT announced about 5:45 a.m. today that eastbound and westbound M-50 (Custer Rd.) is closed between US-23 and Lewis Ave. because of roadway flooding.

This closure includes the M-50 bridge at the River Raisin in Dundee. Village officials say detour signs around the bridge are posted in the village; and additional barricades may be posted by the Monroe County Road Commission.

Volunteers

Village of Dundee posted this notice on Facebook at 8:40 a.m. today: "We may need assistance with filling additional sandbags. If you are able to assist we ask that you call the Village Office at (734) 529-3430 and provide your name, contact number and the times that you are available. If assistance is needed we will reach out to you. For health and safety reasons we strongly urge everyone to stay out of the flood waters."

Flood levels and stages

A flood warning remains in effect for the River Raisin in Dundee and Monroe.

In Dundee, flood stage is 650 feet above sea level. Waters are expected to crest at 652.0 feet this evening.

At 4 a.m. today, the stage was 650.0 feet and rising.

In Monroe, flood stage in the city is 9 feet depth. The waters are expected to crest at 9 feet this evening.

At 4 a.m. today, the stage was 8.4 feet and rising.

NWS weather statements for Monroe County and southeast Michigan are posted at www.weather.gov/dtx/

VIDEO: Rains cause flooding of River Raisin in Dundee

WXYZ-TV 7, June 29, 2015

Dozens came out to the banks of the River Raisin in the Village of Dundee Monday night to take pictures of the steadily rising waters, some in awe, others concerned.

Jim Thornton, who works in Ann Arbor, said his commute will likely take a little longer once the river reaches flood stage sometime near midnight and the M-50 bridge is shut down. Village officials say the bridge could be shut down Tuesday evening into Wednesday morning - if the weather forecast stays as predicted.

The police department's mobile command vehicle is in place on the east side of the bridge.

For others, the rising waters are already causing problems.

Terra Deaton of Blissfield Township drove 25 miles north to Dundee to do her laundry because flooding closed her local laundromat.

Police officers went door to door Monday evening and drove around the village to warn neighbors to be prepared. Village officials say they are fully stocked with sandbags and are urging residents and business owners to be proactive and get sandbags in place before the flooding.

Sandbags can be picked up or delivered by calling the village office at 734-529-3430.

Michael Salib, a volunteer corporal with the Dundee Police Department, also urged caution for those visiting the river near its banks.

"Stand back, take some pictures, zoom in with your camera, just don't zoom in with your body," he said.

The Dundee Township Fire Department will be staging rescue and fire equipment on both sides of the river.

The Monroe County Road Commission will be setting up barricades Tuesday morning to detour traffic around the village.

Flooding could move Kalamazoo Growlers July 4 game, fireworks to Battle Creek

MLive, June 29, 2015

KALAMAZOO, MI — Pumping has begun on the **flooded Homer Stryker baseball field**, said John Bollinger, assistant general manager for the Kalamazoo Growlers.

Whether the field will be dry enough to host the ball games and fireworks planned for the July 4 weekend will depend a lot on this week's weather. But the show will go on, even if that means moving it to Battle Creek, the clubs management said.

Last Saturday, June 26, the Kalamazoo River **flooded out of its banks**, leaving the field and its dugouts under water. The Kalamazoo Growlers rescheduled the team's weekend and Monday night games, tentatively trying double-headers this coming weekend.

Sean Fletcher, director of parks and recreation for the city of Kalamazoo, said that's an optimistic plan.

"We'll do whatever we can do," Fletcher said of getting the field ready for the Fourth of July.

Ann Arbor sees nearly double average rainfall in June

MLive, June 30, 2015

Ann Arbor has been feeling soggy as it nears the end of one of the wettest Junes on record.

More than 7 inches of rain have drenched the Ann Arbor area since the month began, according to University of Michigan staff meteorologist Dennis Kahlbaum.

Kahlbaum's readings are based on a National Weather Service station on U-M's North Campus that is monitored twice daily. He said some areas could have received slightly less or more precipitation based on the path of specific storms that swept through the region.

LT. GOVERNOR'S ACTIVITIES

Survey: Companies have sunnier views of Michigan's business climate (Crain's Detroit Business)
Nearly two-thirds of the companies that operate in Michigan say the state has a positive business climate and they would be likely to promote Michigan to friends or co-workers as a place to start a business, according to a new state survey released today.

Portland banding together, rebuilding following tornado (WWMT)
"People will be out and about helping out until it's done," said Lieutenant Governor Brian Calley, who calls Portland home. "Everyone had some place to go, no one had to go into a shelter, that is an indication of how strong this community really is."

Church communities in Portland gather to help counteract feelings of loss, setback (WWMT)
Wednesday night, we heard from Lieutenant Governor Brian Calley, the Portland City Manager, the American Red Cross, and pastors of the damaged churches in town.

Church Damage Doesn't Stop Services (WILX-TV)
"Standing together, the pastors standing together is a picture of the whole community standing together to solve problems," said Lt. Gov. Brian Calley. "All doing their part in order to move the community forward after a horrible disaster."

Portland looks to God after tornado's fury (Fox 17)
Lt. Governor, Brian Calley, joined the community in prayer with a focus on how resilient Portland has been after the tornado. "It's the idea that something terrible happened in our community and it brought out the best in everybody," said Lt. Gov. Calley.

First video of tornado hitting Portland (WOOD-TV)
As the small community of Portland works to rebuild damaged buildings, they took some time Wednesday night to rebuild their spirits. Church leaders, hundreds of community members, and even Lt. Gov. Brian Calley gathered inside Portland High School to worship and praise.

Two Michigan Career and Technical Institute graduates from Branch County to receive their diplomas Saturday (WTVB)
MCTI training programs and supportive services are directly geared toward business markets where there's a need for employees. Lt. Gov. Brian Calley says these students have a lot to offer employers and they leave MCTI with skills that are in high demand. Calley calls it a win-win situation for the students and for Michigan employers.

MEDIA MONITORING REPORT

06/19/2015

Issues:

- No issues to report.

Summary:

- The future of 911 in Wexford County will mean high tech upgrades as well as increased cost to fund it but it also might mean consolidation with other counties.
- U.S. Senators Debbie Stabenow and Gary Peters today announced $64,629 for the Marquette Fire Department. This grant, which comes through the U.S. Department of Homeland Security's Assistance to Firefighters Grant Program, will be used to purchase 12 self-contained breathing apparatuses.
- A Mt. Pleasant man is being remembered Thursday as a dedicated worker who was very good at his job and an important part of the staff at the Soaring Eagle Resort.
- The Detroit News opines that burial is best for nuclear waste.
- FBI Director James Comey said Thursday his agency does not yet have the capabilities to limit ISIS attempts to recruit Americans through social media.
- The Michigan State Police-Iron Mountain Post held its first weekly public meeting in Iron County on Thursday.
- The remnants of a tropical storm that moved in from the Gulf of Mexico this week focused most of its fury Thursday on Oklahoma and Arkansas, pushing rivers to record-high levels and causing flooding as it crawled northward through the central U.S.
- Storms ripped through some parts of the state on Thursday, causing minor damage and a tornado warning in Tuscola County.
- The Mining Journal in Marquette opines on the lingering effects of the 2013-14 winter.
- Board members for the Emmet-Charlevoix County Fair are meeting Thursday night to discuss a solution for 4H participants who aren't allowed to bring their poultry or waterfowl to the fair this year.
- There's some egg-cellent news for Ionia County: Herbruck's Poultry Ranch, the largest egg producer in Michigan and the 13th largest in the U.S., is planning a $43-million expansion.
- South Korea's outbreak of Middle East respiratory syndrome, the largest outside Saudi Arabia, appears to be easing, a senior government health official said on Friday.
- Missteps contributed to the spread of the deadly virus known as MERS at the prestigious hospital where South Korea's richest man is receiving treatment.

- Several Michigan places of worship are looking at security measures after Dylann Roof, 21, confessed to killing nine people in a Charleston, S.C., church.
- National Weather Service: Cooler and less humid today, thunderstorms possible this weekend.
- TV/Radio: Allstate to may use drones for damage assessment; Marquette firefighters grants; Severe storms in mid-Michigan.

Analysis:

- Media coverage is neutral.
- Weather appears to be breaking for now. Severe weather may be possible this weekend.
- The extremely cold 2013-14 winter still lingers in the news. Generally positive editorial about the state providing financial assistance to Upper Peninsula communities affected by the extreme cold.

EMERGENCY MANAGEMENT AND HOMELAND SECURITY

Options discussed regarding future of 911 services in Wexford County

Cadillac News, June 19, 2015

CADILLAC — Changes are coming to 911 services in Wexford County.

What those changes entail, how they will impact first responders and ultimately how much they will cost taxpayers have yet to be determined.

To get an idea of what options are available, a meeting was held Thursday, and those who attended were a veritable who's who in the landscape of Wexford County fire, EMS and law enforcement.

They included members of the Michigan State Police, Wexford County Sheriff's Department, Cadillac Police Department, North Flight EMS, Boon, Buckley, Cadillac, Haring, Selma, and Haring fire departments, as well as Mesick Rescue and Wexford County Emergency Management. Elected officials from the city of Cadillac, Cherry Grove Township as well as Wexford County commissioners also attended the meeting.

These men and women crowded into the Wexford County Courthouse Commissioner's Room first to listen and then ask questions of attorney Douglas Van Essen. He is one of the foremost authorities in Michigan on 911 consolidation and has been involved with helping municipalities incorporate 911 since the service started back in the 1980s.

Van Essen told the group the county essentially has two options. The first is to consolidate its central dispatch services with Meceola Central Dispatch. The other was to form a professional dispatch authority. If in the coming years the county fails to do either, Van Essen said he believes the service will be taken over by the state.

In his opinion, the best option for the county is to consolidate its dispatch services with Meceola Central Dispatch.

"The most important thing that I hope they understand is I think you want to preserve local dispatch, and I think the best way to do that is in a three-county system. I think it gives you the organizational strength and political strength to fend off the state control of this important function," Van Essen said.

For the past few years, Wexford County has been involved in discussions about a possible consolidation with Meceola Central Dispatch. In 1993, Mecosta and Osceola counties decided to consolidate 911 services in the two counties. The two were the first in the state to consolidate, but since then, Mason and Oceana counties have consolidated as well as Charlevoix, Cheboygan and Emmet.

Recently, the entire Upper Peninsula did a virtual consolidation, which connected all dispatch centers by using the same software and phone system. It also allowed for the number of call centers to be cut in half. The consolidation was facilitated by Van Essen.

To fund the current service, the county spent about $863,000 for its central dispatch in 2014. Of the total, $160,000 was supplied by a state-funded surcharge, roughly $140,000 from the 42 cent surcharge collected locally and the remaining $511,000 came out of the county's general fund budget. Van Essen said that general fund commitment will not be sustainable by the county.

To help fund the upgrades needed for the next generation of technology, taxpayers would either need to approve a millage or vote to allow it to raise the local surcharge from the base level of 42 cents to likely over $2. That surcharge is paid by communication service suppliers, which bills and collects a state 911 charge from all users, except users of prepaid wireless service.

For comparison, the local surcharge in Mecosta and Osceola counties is $2.25. That negates the need for either county to use general fund dollars to help pay for the service. There is, however, the potential that the surcharge could be raised, which would also have to be approved by voters. Unlike a millage, however, it would never need to be renewed once it is passed.

Wexford County Board of Commissioners Vice Chairman John Fuscone said he thought Van Essen did a good job of explaining the issues. He also said it will ultimately be up to county voters to decide what happens.

"We have to be sure we are doing the right thing for this county," Fuscone said. "The people in the county need to be educated because we have funding problems. We may have to raise the surcharge. I would say the surcharge is the best way because it is fair for everyone instead of putting a millage in place."

Although no formal decision has been made, Cadillac Fire Capt. Fred Osbon said he hopes the county will form an advisory board and allow it to meet to discuss both consolidation and the board's options.

Marquette Fire Department receives federal grant

UpMatters.com, June 18, 2015

U.S. Senators Debbie Stabenow and Gary Peters today announced $64,629 for the Marquette Fire Department. This grant, which comes through the U.S. Department of Homeland Security's Assistance to Firefighters Grant Program, will be used to purchase 12 self-contained breathing apparatuses.

"Our firefighters put their lives on the line every day to keep our families, homes, and communities safe," said Senator Stabenow. "These new resources will help the Marquette Fire Department buy the breathing sets they need to keep their firefighters safe and protect their community."

"It is critical that first responders have the most up to date tools and equipment to effectively respond to emergencies, and I applaud this funding, which will ensure Marquette has the necessary resources to continue protecting its community," said Senator Peters.

"Being a smaller department we can't overemphasize the importance of this grant program," said City of Marquette Fire Chief Tom Belt. "We are grateful for Senator Stabenow and Senator Peters' constant efforts in support of first responders like ourselves."

UPDATED: Missing man's body found in river

The Morning Sun, June 18, 2015

A Mt. Pleasant man is being remembered Thursday as a dedicated worker who was very good at his job and an important part of the staff at the Soaring Eagle Resort.

Musician Kevin Chamberlain said he always looked forward to seeing Joshua VanHorn at work at the resort, and that he was hospitable and will be missed.

VanHorn, 35, died Tuesday night in the Chippewa River during a tubing trip with his girlfriend sometime after the two stopped at Nelson Park to rest and he went back into the water alone, planning to meet back up at the Michigan Vietnam Memorial in nearby Island Park.

State View: Burial best option for nuclear waste

Detroit News, June 9, 2015

Nuclear power is one of the greenest forms of energy. Producing electricity at nuclear plants adds no carbon to the atmosphere. But the plants do produce waste, and that has to be dealt with. There are no really great options for storing the radioactive byproduct. So really good solutions must be embraced.

That is what's motivating Canadian officials as they seek to develop a nuclear waste dump in Kincardine, Ontario.

And the fact that the underground facility would be just about a mile from Lake Huron, which along with the other Great Lakes is the source of drinking water for 40 million people, is what is motivating opponents who are worried about the potential for contamination.

About 150 communities in both Canada and the United States have passed resolutions objecting to the project and at least 77,000 people signing an online petition at the Stop The Great Lakes Nuclear Dump website.

Canada's environmental regulators recently announced a decision on whether to allow the project is being delayed until December to accommodate a 90-day comment period. A ruling had been expected by Sept. 3.

There is a lot of misinformation about the dump. It will not hold contaminated liquids, but rather 200,000 cubic meters of low and intermediate radioactive waste, including gloves, mops and other items used at nuclear plants. It will be buried more than 2,200 feet below ground in rock that is 450 million years old. That's nearly three times the depth of Lake Huron.

The underground dump will be at the sprawling Bruce County nuclear facility, which has been operating since 1971. Currently, much of the waste is stored at the facility in a manner far less secure than the proposed permanent dump.

"We've been safely transporting to the Bruce site these waste materials," notes Neal Kelly, media director for Ontario Power Generation, which would build the dump. Kelly says half the material that would be buried is already at the site but is stored in above ground buildings. It comes from the 20 nuclear reactors that OPG owns in Ontario. High level, spent fuel that is being stored at individual nuclear plants in Canada won't go into the dump. Disposal of that sort of waste is a problem yet to be resolved in both countries.

The power company says the proposal and site have been thoroughly vetted by scientists and geologists, who confirmed "the rock at this site is ideal for this type of repository."

Brad Wurfel, a spokesman for the Michigan Department of Environmental Quality, says after reviewing the technical merits of the project, the department doesn't have any concerns.

The Great Lakes should not be placed casually at risk. But the reality is that the failure of both the U.S. and Canada to develop comprehensive and coordinated nuclear waste disposal policies means the lakes are already being threatened by waste stored above ground at sites that are less secure than is desirable.

Getting this waste below ground and into permanent storage should be a high priority. Unless scientific evidence suggests that the Ontario dump site presents a real threat to the Great Lakes, it is a better option than pretending that nuclear power can continue to be a viable means of energy production without a strategy for dealing with dangerous waste.

FBI chief: We can't limit ISIS on social media

CNN, June 19, 2015

WASHINGTON (CNN) - FBI Director James Comey said Thursday his agency does not yet have the capabilities to limit ISIS attempts to recruit Americans through social media.

It is becoming increasingly apparent that Americans are gravitating toward the militant organization by engaging with ISIS online, Comey said, but he told reporters that "we don't have the capability we need" to keep the "troubled minds" at home.

"Our job is to find needles in a nationwide haystack, needles that are increasingly invisible to us because of end-to-end encryption," Comey said. "This is the 'going dark' problem in high definition."

Comey said ISIS is increasingly communicating with Americans via mobile apps that are difficult for the FBI to decrypt. He also explained that he had to balance the desire to intercept the communication with broader privacy concerns.

It is a really, really hard problem, but the collision that's going on between important privacy concerns and public safety is significant enough that we have to figure out a way to solve it," Comey said.

The FBI director has previously said these apps are constantly reminding potential supporters to carry out attacks. One of the gunmen who carried out an attack at a "Draw Mohammed" cartoon contest in Texas last month is believed to have used Twitter to communicate with ISIS.

"It's almost as if there is a devil sitting on the shoulder saying 'Kill, Kill, Kill, Kill!' all day long," Comey said then.

State Police host weekly public meetings in Iron County

WLUC-TV 6, 06.18.2015

IRON COUNTY – The Michigan State Police-Iron Mountain Post held its first weekly public meeting in Iron County on Thursday.

Since the Iron River State Police Post closed in 2011, there's been less face-to-face interactions between state police and Iron County residents.

"The only time they've been able to see us is either at a traffic stop, or on a complaint that the call in or they have to stop in Iron Mountain or call us on the phone," said First Lieutenant Christine Grabowski, of the Michigan State Police, Iron Mountain Post. "This is an opportunity for them to stop by and voice any concerns that they might have."

Crystal Falls Mayor Patrick Sommers said the public meetings are a good way to get to know state police officers that patrol in the area.

"When you have that one-on-one feel with them, it's a lot easier to see them out on the road and not be afraid of them, that they're going to pull you over for something just to harass you, so it might give somebody an opportunity to say hey why are you doing this, why are you picking on us, and that's sometimes what it feels like," said Sommers.

Citizens voiced concerns about traffic problems and drug-related issues in their community at Thursday's meetings.

"It's a place for people to stop by, you don't have to leave your name, you can talk with us, whatever you want to talk about, there's no agenda," said F/Lt. Grabowski. "If you have an issue, a question or any type of concern, please stop by, we're here to help."

The public meetings will happen every Thursday. Officers will be in Iron River from 9 a.m. to 11 a.m. central time in the basement of the Iron River City Hall, across from the police department. Later in the day, they'll be in Crystal Falls from 1 p.m. to 3 p.m. central time in the council room at Crystal Falls City Hall.

For more information, contact the Michigan State Police, Iron Mountain Post at 906-774-2122.

WEATHER

Bill's remnants flood Oklahoma along path to US midsection

Associated Press, June 18, 2015

The remnants of a tropical storm that moved in from the Gulf of Mexico this week focused most of its fury Thursday on Oklahoma and Arkansas, pushing rivers to record-high levels and causing flooding as it crawled northward through the central U.S.

The storm has claimed at least one life since it came ashore Tuesday in southeastern Texas as Tropical Storm Bill before settling down into a tropical depression. A 2-year-old southern Oklahoma boy was pulled from his father's arms by floodwaters late Wednesday.

An estimated 10 inches of rain fell overnight on that area north of the Texas border and also forced the partial closure of an interstate.

Farther north, Missouri, Illinois and Indiana were bracing for flooding throughout the weekend.

Severe storms cause damage across northern Michigan

UpNorthLive, June 18, 2015

A string of storms quickly turned severe right across the middle of our viewing area Thursday afternoon.

That storm left behind some pretty significant damage in multiple counties.

The damage went all the way from Grand Traverse County to Oscoda County with those areas seeing high winds of up to 70 miles per hour.

It moved through the area in a couple hours, but it also caused a lot of damage. Fife Lake saw many trees down near US-131, causing several power outages. "Pretty strong winds came by and blow the tree from the root all the way across the wires and it's a pretty big tree," said Bryan Oblinski with Trees, Inc.

The storm then moved into Crawford County, and crews worked for hours to untangle power lines that wrapped around trees to make sure no one got hurt from them.

"The power lines could be de-energized one minute and then energized next so you don't know when they're live or when they're dead until Consumers Power or Great Lakes Energy arrives to make sure that they're disconnected and grounded," said Frederic Fire Department Chief Doug Pratt.

Oscoda County was also hit hard, most of Mio was without all power throughout the afternoon. The high winds and heavy rain caused customers at a hardware store to take cover and stay inside as it blew over.

Some say it was the strongest storm they've seen in years.

"We were right on the fringe of it," said Ace Hardware owner Randy Lanski. "Must have been an inch or so of water come down in a short period of time. As one customer remarked it was like a hurricane."

No one was injured in the storms Thursday afternoon.

Editorial: Severe winter of 2013-14 has lingering effects

Mining Journal, June 19, 2015

As the summer season draws near, thoughts of picnics, swimming, boating and other warm-weather activities come to mind, with any thoughts of the winter season far behind us.

However, Marquette city officials have been thinking about winter weather - and not even from the winter of 2014-15, but rather the deep-freeze of 2013-14.

That horrid winter that we all want to forget was brought to the forefront this week in a positive light - at least partially positive.

The Marquette City Commission discussed the winter at this week's meeting when it held a public hearing to signal completion of a nearly $500,000 state grant that helped defray the costs associated with the frigid weather.

Receiving a $495,588 Michigan Community Development Block Grant helped lower the cost to the city caused by the deep-freeze, which totaled about $2.5 million, according to city officials.

A good chunk of that, more than $1 million, was incurred from the water let-run policy issued to city residents. The let-runs were to prevent more freeze-ups, which the repair of would have probably added up to much more than the cost of allowing excess water to run down the drain.

With the block grant, and another grant from the Michigan Emergency Management Act for roughly $100,000 and taking out the let-run costs, the city spent about $937,000 to deal with the weather. Included in that amount was costs for equipment, labor, materials and supplies related to water, sewer and storm water repairs.

These costs are for the city of Marquette only, with many other communities across the area also unexpectedly spending huge amounts of money during the winter of 2013-14. Many of these communities receive grant funds to help them out, as well.

The cost of dealing with a normal winter in the U.P. is high enough, so it's good to see the state willing to cough up some cash to assist communities during excessively expensive winters.

In addition, there is probably some good lessons from the winter of 2013-14 for local governments to heed, such as be prepared for the worst of what Mother Nature can throw at us.

AVIAN INFLUENZA

County fair finds solutions for poultry shows

UpNorthLive, June 18, 2015

EMMET CO. – Board members for the Emmet-Charlevoix County Fair are meeting Thursday night to discuss a solution for 4H participants who aren't allowed to bring their poultry or waterfowl to the fair this year.

This comes after the Michigan Department of Agriculture and Rural Development canceled all shows in the state earlier this month to prevent the spread of avian flu.

The solution they have decided on is to use fake stuffed birds.

"The bird is just a substitute for the real thing but they are close enough anatomically so the kids can still have the same experience presenting that chicken to the judge," said Diane Brazier, 4H Program Coordinator for Emmet County MSU Extension.

The participants will be able to bring in posters that will hang on the cages with pictures of them and their birds. The stuffed birds will be used to show off their skills in the showmanship category.

"They'll present whatever bird they choose, the actual stuffed bird, to that judge," said Brazier.

Fair Manager, Agnes Shaw says they are also considering allowing the participants to bring in video recordings of themselves interacting with their birds at home.

"People will get an education about why we can't have chickens at the fair," said Shaw.

MSU Extension and the fair are covering the cost of the stuffed birds, and multiple northern Michigan counties say they're also on board with the idea.

"Some fairs have already happened this summer, so the kids have reported that it worked very well for them and the staff are pleased with how well it went," said Brazier.

Michigan's largest egg producer plans $43M expansion

Detroit Free Press, June 18, 2015

Here's some egg-cellent news for Ionia County: Herbruck's Poultry Ranch, the largest egg producer in Michigan and the 13th largest in the U.S., is planning a $43-million expansion.

The capital investment also translates into 50 new jobs, according to the Ionia County Economic Alliance, the Grand Rapids-based economic development organization the Right Place and the Michigan Economic Development Corp.

"Quality organic, cage-free eggs are in high demand, and Herbruck's is uniquely positioned to capitalize on this growth opportunity," executive vice president Herb Herbruck said in a written statement. "We are very proud of our Ionia heritage and look forward to continued growth and investment in the community."

The Saranac farm business will add new egg-laying and pullet growing capacity to its organic and cage-free production facilities.

In the last month, egg prices have skyrocketed in the U.S. because of concerns about bird flu. According to the U.S. Department of Agriculture's weekly National Retail report, the average price for a dozen large white eggs Grade A or better is $1.95 this week, up from $1.22 a month ago.

Because of the egg shortage, some quick casual restaurants in several states are limiting or have cut back on breakfast hours.

HEALTH

South Korean Official Says MERS Outbreak Seems to Be Easing

New York Times, June 19, 2015

SEOUL, South Korea — South Korea's outbreak of Middle East respiratory syndrome, the largest outside Saudi Arabia, appears to be easing, a senior government health official said on Friday.

The official, Kwon Deok-cheol, gave that cautious assessment after reporting just one new case of the syndrome, known as MERS, as well as the country's 24th death from the disease.

Since its first case was reported on May 20, South Korea has had 166 confirmed cases of MERS, which emerged in Saudi Arabia in 2012. The number of new cases reported daily reached a peak of 23 on June 7 and has generally declined since then.

In recent days, South Korean officials have expressed increasing confidence that the outbreak was coming under control. But they have also cautioned that new cases would continue to emerge in the coming weeks, saying that enforcement of quarantine and disease-control measures needed to continue.

"As things stand now, we believe that the outbreak is easing," said Mr. Kwon, a chief coordinator of policy for the government's response to the outbreak. "But we need to watch those hospitals under our scrutiny to see if there will be further transmissions."

MERS cases have been traced to 14 South Korean hospitals, but infected patients went to many others before their cases were formally diagnosed, raising the possibility that transmissions may have occurred in some of those hospitals, too.

South Korea MERS Outbreak Brings Focus on Samsung Hospital

Wall Street Journal, June 18, 2015

SEOUL—Missteps contributed to the spread of the deadly virus known as MERS at the prestigious hospital where South Korea's richest man is receiving treatment.

Samsung Medical Center is the epicenter of the country's fight against Middle East respiratory syndrome. In May, an infected man spent two nights in the emergency room there without being diagnosed, and health officials say he transmitted the virus to at least 80 people in the hospital before being quarantined.

"During that time, it is clear this person was coughing a lot and was also mobile in the emergency room," Keiji Fukuda, assistant director-general for health security at the World Health Organization, said at a briefing on Wednesday.

South Korea's MERS outbreak is in its fifth week. Officials on Thursday said four more people nationwide had died, taking the total number of deaths to 23. There were also three new MERS cases, taking the total to 165. Most patients who died were elderly and had other serious illnesses.

SOUTH CAROLINA CHURCH SHOOTING

Detroit pastors watchful after South Carolina shooting

Detroit Free Press, June 18 , 2015

The Rev. Nicholas Hood III was finishing a service just a couple of years ago at Plymouth United Church of Christ when a large man charged down the aisle and threw his weight against him.

Hood said he thought to himself, "I'm either going to die right now, or I'm going to make a great friend."

The fear turned out to be unwarranted. The man was grieving and embraced Hood in an ill-timed hug. But the pastor was alarmed to realize that the congregation, which was facing the front, never saw him coming.

"Suppose he really wanted to hurt me," Hood said. "I was very vulnerable."

Detroit pastors are re-evaluating the safety of their churches after Wednesday night's fatal shooting of nine people at a Bible study at a historic black church in Charleston, S.C.

Churches are inherently easy targets for violence — some are open late, they have no fee to enter and they are open to strangers. Most of Detroit's large churches have had some type of security for years, but the shooting made some wonder whether more is needed.

"This Sunday will be a tense Sunday," said the Rev. Charles Williams, pastor of King Solomon Baptist Church in Detroit. "We will all be on guard.".

Security at West Michigan churches

WOOD-TV 8, June 18, 2015

GRANDVILLE, Mich. (WOOD) — A place of worship should be a safe place. But the massacre of nine people at a historic black church in Charleston, S.C. raises the question of how much security churches should have.

On any given Sunday, about 7,000 people walk through the doors of Resurrection Life Church in Grandville. With so many in the congregation, the church takes security very seriously.

"Our goal is to keep people safe. When they come to church here, they ought to know it's a safe place to worship," said Joe Tucker, executive pastor at Resurrection Life Church.

The church has a full "security team," surveillance cameras are spread throughout the campus, and greeters are trained to spot suspicious or strange behavior, among other security measures.

"We do have people on site who are authorized to carry. We have a lot of officers who attend here, so obviously they carry. And we do have some that are authorized by the church to carry," Tucker said.

But what about smaller churches without the same resources?

"We don't have any real tight securities that we have around our church. We are supposed to be open to people who want to come in and have fellowship with God," said Rev. Nathaniel Moody, the senior pastor for Brown-Hutcherson Ministries, which has a congregation of a few hundred people.

But now, even the small churches are starting to rethink their strategies.

"For this to happen, it puts a whole new light on how we fellowship and how we worship and how we receive people," said Moody.

And the statistics reveal a startling reality. The number of violent incidents and deaths at churches has risen significantly in the past decade. There were 176 violent incidents at U.S. Churches in 2014 alone, causing 74 deaths.

Tucker said all church leaders need to take notice.

"They need to acknowledge it. They need to say this is a problem," he said. "If they don't take care of things, I think they're being negligent to their congregation."

W. MI rallies around Charleston after church shooting

WOOD-TV 8, June 18, 2015

KALAMAZOO, Mich. (WOOD) — Following the shooting deaths of nine people in a church in South Carolina, dozens of people gathered on a West Michigan college campus Thursday for a vigil.

"We couldn't not be here," said Briana Wolverton, who attended the vigil at Kalamazoo College with her friend CristiEllen Zarvas.

They say there must be a change in the way people are treated based upon who they are or what they look like.

"We need the young people, we're 24, it's got to come from us," said Zarvas. "It's an absolute tragedy. This really picks apart at our very humanity and if we're not addressing racism in our city and our country, we're lying. We're lying to ourselves about reality."

Dylann Roof allegedly **gunned down nine people in a historic black church in Charleston** Wednesday night. He sat with the people he is accused of killing for an hour of prayer before opening fire on them. Charleston's police chief called the shootings a hate crime.

"I am a mother first. I have a 7-year-old. He is growing up in this world, and not only that, I am a sister to five brothers so it is very impactful to me. It just hurts to even think what I read about is happening right before my eyes," Wolverton said.

During a prayer at the end of Thursday's vigil, all who were gathered with arms around one another — white, black, old and young — joined together as one in an unbroken circle, sending thoughts, prayers and love to a city hurt by unspeakable tragedy.

"We stand with you. We feel your pain. It's real, it's real pain. We are standing with you, Christi and I, everyone else, we're willing to do the work to make our nation better. We want to do the work," Wolverton said.

"We stand with you, we're ready to do the work, we need to do the work, and we want others to join us," Zarvas said.

Damage Assessment and Emergency Status Report

Incident: 2015-10-01-City of Flint-Water Contamination / Shortage

Operational Period

Operational Period Begin:	01/06/2016 08:00:00
Operational Period End:	01/08/2016 17:00:00
Situation Report No.	3
SEOC Status:	Full
SEOC Hours of Operation Begin:	01/8/2016 08:00:00
SEOC Hours of Operation End:	01/8/2016 17:00:00

Executive Summary

By early May 2014, the City of Flint switched from the Detroit Water and Sewerage Department (DWSD) to water from its own water treatment plant drawn from the Flint River as its primary water source. The different characteristics of the water resulted in leaching of lead from lead pipes in the city's water infrastructure into the water supply. Increased exposure to lead can cause immediate negative health effects. However, the main health concerns are long-term effects in children such as developmental and cognitive delays, and behavioral disorders. Increased water lead levels and elevated blood lead levels in young children were observed in the City of Flint and confirmed by the State Chief Medical Officer.

On October 1, 2015 the Genesee County Health Department declared a Public Health Emergency due to the elevated blood lead levels in citizens. In response to this the City of Flint declared a local State of Emergency on December 15, 2015 and activated their Emergency Operations Center.

To mitigate the effects of the new source of water on the infrastructure in the City of Flint, the city switched back to DWSD water on October 16, 2015. Funding to reconnect to DWSD was provided from the City of Flint, the Charles Stewart Mott Foundation, and the State of Michigan. Water is now treated with a supplemental phosphate addition to rebuild the protective layer in the distribution system and reduce the leaching of lead into the water supply.

For the mitigation of negative health effects, over 24,000 water filters and replacement cartridges have been distributed to residents in the City of Flint. Approximately 13,000 water filters, water pitchers and replacement cartridges were distributed by the Michigan Department of Health and Human Services (MDHHS) in the timeframe of October 1 to December 31, 2015 alone.

MDHHS has increased surveillance of blood lead levels in children and is addressing water issues in environmental investigations to identify lead sources in the environment of affected children and provide health education and information to residents, health care providers, and daycare/educational institutions.

Local nonprofit organizations have provided potable water to Flint residents. MSP/EMHSD GIS staff is supporting county and local GIS staff by consolidating data from local sources into comprehensive databases and providing mapping services to support incident analysis and forecasting. Data and maps regarding the location of water pipes, affected schools, filter distribution locations, water monitoring results, and predictive blood lead levels for affected areas will be made available with demographics.
Before December 16, 2015, $9.35 million was provided by the State of Michigan and $6 million by local agencies and nonprofit partners to manage the effects of the corroded pipes. While the source water has been switched back to DWSD, water in the City of Flint is still not safe to drink, unless specifically filtered.

On January 5, 2016, Governor Snyder declared a State of Emergency for the City of Flint and Genesee County. Genesee County requested the Governor's declaration on January 5, 2016, following the declaration of a State of Emergency in the county in response to the presence of lead in the public water supply and the detection of elevated blood lead levels exceeding governmental standards.

Since the declaration by the Governor on January 5th, the State Emergency Operations Center (SEOC) has been fully activated and working with local and state agencies to ensure a coordinated response to the incident. Since the activation, the SEOC has activated command staff, state agency EMC's, and implemented the Recovery Branch under the Operations Section.

SEOC Update:
Accomplished today (January 8):
- Recovery Branch is working to develop a enhanced method for outreach to all individuals.
- DHHS is working to develop a method for distribution of water.
- Conducted briefing with local EOC and county executive.
- Conducted briefing with state agencies (daily updates).
- Held first legislative call today.
- JIC continued to develop messaging and has implemented a co-located JIC in the City of Flint.
- SEOC staff provided input to local EOC regarding best methods of identifying health and non-structural impacts for damage assessment process.
- Deployed 3 EMHSD/SEOC liaisons to assist the local EOC.
- Worked on developing incident objectives for the next operational period.
- FEMA Liaison Officers are on site at the SEOC and are assisting and providing technical expertise as needed.

The SEOC continues to provide:
- Situational awareness.
- Common operating picture/objectives.
- Coordination with city/county.
- Potential coordination with federal agencies.
- Incident prioritization.
- Coordination of life/health safety measures.
- Provide resources.
- Public Information Control.

MSP/EMHSD GIS Section Updates
Accomplished Today (January 8):
- Produced Water Point of Distribution Map (POD).
- Produced Filter Point of Distribution Map (POD).
- Met with Genesee County Emergency Manager to discuss POD locations, and hours of operation. He will also be sending us data on new facilities serving as POD's with hours of operations.
- Attempted to geocode list of properties that have received a water filtration system. Geocoding encountered a problem due to original database format. We continue to clean up the database.
- Attempted to get data on the zip codes; local contact has not yet responded.
- Met with GIS from Flint to discuss data and methods.
- U of M contacted us to set up a meeting on how best to proceed with digitizing water lines
- Received account from City of Flint for their ArcGIS online.

Tasks for Tomorrow (January 9):
- Finalize updated list on water filter distributions map.
- Update Water and Filter POD's with updated information from Genesee County Emergency Manager.
- Establish time to meet with U of M.
- Finalize water filter distributions map.
- Finalize plan for data distribution methods.

Volunteer and Donations Management:
- SEOC staff, Local EOC, and local organizations had a call with General Motors about possible donations.

Local EOC Update:
The following actions have been coordinated and supported through the Genesee County EOC since activation:

Genesee County Sheriff's Office:
- Distribute filter and water to affected population (172 attempted contacts with 27 personnel on 01/07/2016).
- Provide security at EOC and incident facilities.
- Sheriff Pickell is serving as the PIO for Genesee County.
- Operate EOC and manage incident through Emergency Management & Homeland Security Office.

Genesee County Health Department:
- Developing messaging (health education) for affected population.
- Provide nutritional counseling.
- Elevated blood level case management.
- Provide IT support for filter distribution database and GIS mapping.
- Developing Lead Poison Prevention Plan.

Genesee County Equalization Department:
- Provide addresses, demographic, socioeconomic data for incident planning and forecasting.
- Provide GIS mapping services.
- Preliminary assessed damages on public and private infrastructure impacts in coordination with City of Flint.

Genesee County Community Action Resource Department (GCARD):
- Warehousing/staging of filters for distribution to affected population.
- Distribution of filters to affected population from two locations in the City of Flint.

City of Flint Fire Department:
- *5 Fire stations will serve as PODs for water and filter equipment on Saturday, 01/08/2016, 0900AM to 1600PM.*

Flint Community Schools:
- Nothing reported at this time.

Michigan Department of Health and Human Services:
- Filter distribution at one location in the City of Flint.

United Way of Genesee County:
- Receive and manage donations (cash and goods).
- Public information through 211.
- Facilitating coordination and control among local agencies.

Foodbank of Eastern Michigan:
- Warehousing/staging of water for distribution to affected populations.
- Identify and operate PODs for water (8 sites identified by 12:00 noon, 01/08/2016).
- Water inventory by end of day, 01/07/2015: Food bank has 376 cases of water.

Hurley Medical Center:
- Nothing reported at this time.

The county EOC has issued five resource requests to the SEOC (all in progress) by 12:00 noon on 01/08/2016.

Upcoming Forecast
Forecast Update for Flint, MI area: Saturday 1/9 through Thursday 1/14:

* Saturday (Jan 9): rain with mild temperatures
* Sunday (Jan 10): snow, cold, wind and hazardous travel
* Monday (Jan 11) through Thursday (Jan 14): very cold with a few snow showers

Rain will occur on and off through Saturday evening. Saturday will see high temperatures around 45 degrees. Temperatures will fall quickly overnight Saturday night, with temperatures in the mid 20s by noon Sunday and in the teens by Sunday evening. Strong winds Sunday will result in wind chill values near zero and time to frostbite from exposure of 30 minutes or less.

Snow is expected to develop around or just before sunrise Sunday. Around 2 to 4 inches of snow will be possible in the Flint area Sunday with the heaviest snow expected Sunday late morning/early afternoon.

Snow and cold will result in icy roads and hazardous travel conditions Sunday. Wet roads may ice up in the middle of the night Saturday night before snow begins on Sunday. A few power outages due to snow and wind may be possible Sunday.

Monday (1/11) through Thursday (1/14): On and off snow showers. Very cold air will be in place. Daytime high temperatures will only climb to around 20 degrees with overnight low temperatures around 10 or colder. Wind chill values Monday (1/11) through Thursday (1/14) will be in the teens and single digits above zero with time to frostbite from exposure of 15 to 30 minutes.

Damage Assessment Summary

Agency Summaries

Joint Information Center / Public Information Officer

Jan 7, 2016

The Joint Information Center (JIC) was operational at 1 p.m. on Jan. 6 and operational from 8 a.m. to 5 p.m. on Jan. 7. State agencies at the JIC included the Departments of Licensing and Regulatory Affairs, Health and Human Services, Agriculture and Rural Development, Environmental Quality, and Michigan State Police.

During the 8 a.m. to 5 p.m. operational period, Gov. Rick Snyder held a press availability with Flint Mayor Karen Weaver. In addition, a round-table press briefing occurred at 1 p.m. at the 4000 Collins Road facility.

Objectives included:

- Oversaw and managed the state of Michigan public information duties due to emergency declaration.
- Held a 4 p.m. conference call with Genesee County PIO Sheriff Robert Pickell and city of Flint PIO Lead Sean Kammer.

Information Gathering
- Created media monitoring reports about the disaster as needed.
- Crafted talking points about the ongoing disaster, including a better description of the emergency declaration process.
- Crafted social media posts about state efforts underway during the disaster recovery process.
- Created graphics for social media efforts.

Information Dissemination
- Answered phones and manage media inquiries in regards to the Flint Water situation.
- Worked to establish a GovDelivery account; post link of website to sign up.
- Finalized details, media invite list and host a media roundtable.

External Affairs
- Worked on planing a conference call between command staff and affected state legislators and congressional Jan. 8, 2015.

Administrative
- Worked on filling staffing for the next operational period.

Logistics
- Worked on fixing email accounts.
- Worked to established a location with Genesee County and the city of Flint for a Unified Joint Information Center by the end of the week.
- Established a conference call line for the media roundtable.

Agriculture and Rural Development (MDARD)

Two areas MDARD is monitoring:
1). Water usage in food processing, food retail, and food service (restaurants). Guidance document has been available since October; MDARD surveyed food processors in October and did not find issues.
2). Water consumption by pets / animals. There has been some evidence of lead toxicity in dogs, and there has been guidance about pets & water included in the Q & A.
Jan 7th 2016 4pm update:
MDARD and Genesee Local Health Dept. agreed to move guidance on water to a regulatory requirement. New language (after JIC approval) will be going out to retail food establishments and restaurants with follow up inspections and sampling. Planning will continue on logistics for sampling.
Jan 8th 2016 4pm update:
Animals - Shelter Director Paul Wallace has obtained some documents to help ascertain what entities (that are not tracked via licensing and registration) that would be housing animals: 1) All the City of Flint street (physical) addresses that are on City of Flint water, 2) All the "Out-County" (physical) addresses that are on City of Flint water. The Shelter Director is also pulling the possible animal holding/gathering facilities in reference to that listing which will provide the rest of the contacts. MDARD will be getting copies of all of these lists soon. Other shelters are not on City of Flint water.

American Red Cross (ARC)

The American Red Cross will be standing up a 'limited' Disaster Relief Operation by the end of today. This will enable us to provide a more comprehensive response to community needs in Flint as they are made known. We will now be more readily able to bring in resources from outside the Flint area.

Civil Rights (MDCR)

Monitor and support agencies with issues surrounding outreach and engagement of marginalized populations within the City of Flint impacted by the current water crisis.

Community Health (MDCH)

MDHHS is collaborating with the MDHHS PIO in the JIC to provide health related information for the document that will be delivered to all homes in Flint.

Collaborated with LARA to obtain a contact list of all health professionals in Genesee County for distribution of Guidelines for Lead Testing in Children.

Per Genesee County Health Department, all inquiries about lead testing are being referred to 211 or their individual healthcare provider.

Dr. Eden Wells, Chief Medical Executive, participated in the Congressional Briefing.

Corrections (MDOC)

Administration for the MDOC has been notified and is updated on current situation. There are approximately 75 staff members working in the affected area. Potable water has been provided to the offices in the affected area since the beginning of this situation and will continue to be provided. This water is available for people working there and those that have been required to go the office. We will continue to monitor this situation for any developing issues.

Environmental Quality (MDEQ)

The DEQ laboratory is prepared to accept and process 400 water samples pre day, 7 days a week. DEQ Incident Management Team staff are supporting the local Emergency Operations Center with personnel in Incident Command positions.

Human Services (MDHS)

Participated in 9:30 State Agency briefing,
Updated resource requests.
Local MDHHS staff active in local EOC.
Sent MCSC to Genesee Co to coordinate various volunteer efforts.
Helping with donation management efforts at the local level.
Gathering information on water filter acquisition, distribution, installation, life span and replacement.
CHECC remains at Level 1 Activation - Normal Operations

Licensing and Regulatory Affairs (LARA)

Communicating with DEQ regarding additional water testing in Flint schools.

Gathering information from the Plumbing Division regarding plumbing authority within the city of Flint.

National Weather Service (NWS)

Jim Maczko from NWS Grand Rapids participating in morning SEOC briefings via phone call and will coordinate support with local forecast office that serves Flint - NWS Detroit/Pontiac.

Natural Resources (MDNR)

MDNR is fully participating in all SEOC activities. Situational awareness is being maintained and the department stands ready to assist as needed.
Department POC's include:
Chief Gary Hagler, F/Lt. Jennifer Wolf, F/Lt. Steven B. Burton.

Services to the Aging (OSA)

Valley Area Agency on Aging - Region 5 (VAAA), in partnership with other local community agencies such as the Genesee County Health Department and MDHHS, has helped organize local meetings and distribute water and water filters. VAAA is an access point for receiving calls from homebound seniors who are not able to pick up water filters or need assistance installing water filters. VAAA reports they continue to receive calls from seniors who need assistance.

VAAA has distributed 2 bottles of water with each home delivered meal to each HDM client within the City of Flint. Water. VAAA also provided water to homebound seniors who needed water to prepare food as they had limited support to pick up bottled water. Congregate meal participants also have access to water and filters as needed. Once water filters were installed, VAAA discontinued including water with home delivered meals.

VAAA also contacted the Grandparents Raising Grandchildren program to ensure that they were aware of educational efforts and confirm the program had received water filters to distribute to program participants.

State Police (MSP)

Insp. Bolger is monitoring the incident via MICIMS and participating in State Agency Briefings.

Supreme Court

08:50 - State Judiciary EMC John Ort reported to the SEOC regarding the Flint water emergency. Nothing to report from the Judiciary regarding the emergency. DEQ website resources shared with our State Court Administrative Office (attn: Region II) in case our Genesee County courts have any questions regarding the emergency.

Technology, Management and Budget (MDTMB)

Provided update to management on morning briefing.
Co-located JIC has been setup for the public information officers, along with a media meeting room. Facilities supervisor assisted with unloading and equipment setup.
Received list of agency public information officers to have access to the Flint Office Building added to their ID cards.
Resource request received for a truck and driver needed to pick-up pallets of water and cartridges within the city and deliver them to five city fire stations on Saturday.
Resource request received to locate warehouse space within the city to act as a distribution and intake site for donated water, cartridges and filters. DTMB Real Estate Division contacting resources within the city for available locations.

State of Michigan Joint Information Center Now Operational

LANSING, Mich. – Today the State of Michigan launched its Joint Information Center (JIC) to coordinate public information from the State Emergency Operations Center, set up to help with health and safety issues caused by lead in the city of Flint's drinking water. The emergency operations center was activated after Gov. Rick Snyder declared a state of emergency for Genesee County on Jan. 5.

Public information and updates, including resources for residents such as how to obtain free water filters and lead testing, are available at www.michigan.gov/FlintWater.

The JIC will serve as the state's central communications hub for this emergency and is staffed by public information officers (PIO) from several state agencies. Hours of operation will be 9 a.m. – 5 p.m., Monday – Friday, until further notice.

It is operating out of the Michigan State Police Emergency Management and Homeland Security Division in Lansing. State officials have been in contact with Flint and Genesee County officials to move the JIC to the city of Flint to better partner and coordinate with local agencies.

The declaration makes available all state resources in cooperation with local response and recovery operations.

Genesee County declared a "local state of emergency" on Jan. 4, activating local emergency response and recovery plans. By requesting a governor's declaration, the county has determined local resources are insufficient to address the situation and state assistance is required to protect public health, safety and property to lessen or avert the threat of a crisis.

The city of Flint has been under a local emergency declaration since Dec. 14, 2015.

Mayor Weaver & City Officials Address Media after Governor Declares Emergency

January 5, 2016 – Flint, MI Mayor Dr. Karen Weaver began Tuesday evening's press conference by saying, "We're thankful. We didn't expect this to happen so fast."

Weaver declared a State of Emergency for the City of Flint December 14, 2016. January 4, 2016 the Genesee County officials declared a local state of emergency and requested the governor's declaration. This afternoon, Governor Rick Snyder showed his support officially declaring a State of Emergency for Genesee County.

In a news release, Governor Snyder said, "The health and welfare of Flint residents is a top priority and we're committed to a coordinated approach with resources from state agencies to address all aspects of this situation."

Mayor Weaver said, "This is what Flint deserves. I thank the governor for signing off on this so quickly." Many people have worked to get to this point, but Flint city council president Kerry Nelson gave the new mayor credit for her vision. "There was a dark cloud hanging over this city. Now, I can see beams of light busting through," said Nelson.

Mayor Weaver is also pleased by the progress that's been made since she took office last year. However, she made it clear there is a lot more work that needs to be done to see real results in the City of Flint. "We're looking forward to going to the federal level so we can get the funding that the citizens deserve," Weaver stated.

Now that the governor has declared an emergency the State Emergency Operations Center in Lansing will be open. Additional staff will be available to assist the mayor and other local officials in acquiring adequate resources to protect the public health and safety put at risk by the man-made disaster that's resulted from switching to the Flint River as a water source in 2014.

FLINT WATER

State health fund needed in response to Flint water crisis, congressman says

MLive, December 23, 2015

FLINT, MI -- As questions continue to swirl about who should be held responsible for the Flint water crisis, U.S. Rep. Dan Kildee said the state needs to step forward and fund a program to benefit the health of the city's youngest residents.

Kildee, D-Flint Township, continued to call for a state-financed program during a Tuesday, Dec. 22, meeting with The Flint Journal editorial board that would be used to continually monitor potential health ramifications for those exposed to elevated lead levels in the city's water supply.

University professor says officials knew about Flint water crisis before it became public

WXYZ, December 22, 2015

(WXYZ) - New details are emerging in the Flint Water Crisis as a university professor is saying the state health department knew all about the problems - before they were made public.

Genesee County medical society supports Flint declaration of water emergency

MLive, December 23, 2015

FLINT, MI -- The Genesee County Medical Society is backing Mayor Karen Weaver's push for a federal disaster declaration because of Flint's lead in water crisis.

In a letter to Weaver today, Dec. 22, Dr. Pino Colone, president of the Medical Society, says his group "supports your call to the Genesee County Board of Commissioners and the state of Michigan to perform a damage assessment consistent with that which is needed to declare a state of emergency ..."

City officials meet with county, other agencies over state of emergency

City of Flint, December 22, 2015

Mayor Karen Weaver hosted the first meeting in the City's Emergency Operations Center (EOC) where City officials met with partners from other agencies to discuss the City's Water Emergency. In addition to City Officials, the EOC meeting included members of the Genesee County Board of Commissioners, the Michigan State Police's Emergency Management Division, the United Way, and the

Genesee County Health Department. The purpose of the meeting was to discuss next steps for the city as it continues to implement its Support Emergency Operations Plan, construct an Incident Response Plan, and coordinate their efforts with outside agencies and governments.

"It was a productive meeting, where we coordinated with several agencies and levels of government. We are a step closer to bringing permanent solutions to Flint," said the Mayor, who declared a State of Emergency on Monday December 14 over ongoing problems with lead contamination in the City's water.

EMERGENCY MANAGEMENT AND HOMELAND SECURITY

Michigan State Police release list of emergency preparedness gift ideas

WXYZ, December 22, 2015

(WXYZ) - If you need to buy a last-minute Christmas gift, consider getting someone an item that could help save their life.

The Michigan State Police has released its annual list of emergency preparedness gift ideas. Think practical items that could come in handy in the event of an emergency.

State Police suggest gifts to help prepare for an emergency

WSJM, December 22, 2015

If you're having trouble figuring out what to buy a loved one this Christmas, how about something that will help them stay prepared for an emergency? The Michigan State Police Emergency Management Division has released a list of practical gift ideas, things which spokesperson Ron Leix says people often wish they had when it's too late.

"It's not a bunch of flair to give," Leix told WSJM. "It's a practical gift idea that gets that conversation started about preparing for an emergency or a disaster."

MSP suggests emergency preparedness gift ideas

ABC 57, December 23, 2015

If you still have some more holiday shopping to do, an unlikely source may have a few ideas for that perfect gift.

On Tuesday, Michigan State Police released their 2015 emergency preparedness gift list.

According to Michigan State Police, tornados and flooding have ravaged the state over the past two years.

Practical gift ideas for the holiday season

WLNS, December 22, 2015

LANSING, Mich. (WLNS) – It's an annual trend this time of year, practical gifts for the holiday season.

"I think if you're going to give a gift this actually presents the opportunity for you to save someone's life, " said Lieutenant Gabriel Covey with State Police.

Covey says facing an emergency head-on before it happens is the best thing you can do for your loved ones.

"It gets people talking it gets that conversation started about being prepared and a lot of us wait till the last minute or until it's too late man I wish I had this my house just flooded."

MICHIGAN POLITICS

Gov. Rick Snyder goes 1 for 4 on fall priorities as Michigan Legislature calls it a year

MLive, December 23, 2015

LANSING, MI — The Michigan Legislature took its time in 2015, completing just one of Gov. Rick Snyder's top four fall priorities and sending him the fewest number of bills since Republicans took full control of state government five years ago.

Snyder, who remains relentlessly positive a year into his second term, attributes the low batting average to the big swings on road funding, which included a whiff on Proposal 1 in May before lawmakers knocked a final deal over to his desk in November.

Michigan Republican Party official shares inflammatory social media post

Michigan Radio, December 22, 2015

The Michigan Republican Party is standing behind a party official who shared an offensive post about Muslims on several social media platforms.

Wayne Bradley, the GOP's state director of African-American Engagement, said he apologizes if he offended anybody.

Michigan cities may soon get more federal funding to fight blight

Michigan Radio, December 22, 2015

Michigan may soon apply for tens of millions of dollars in federal funding to tear down blighted homes.

Michigan U.S. Senators Debbie Stabenow and Gary Peters met with Congressman Dan Kildee in Flint today to discuss the transfer of $2 billion into the federal Hardest Hit Fund.

Peters says the evidence that this program works is "overwhelming".

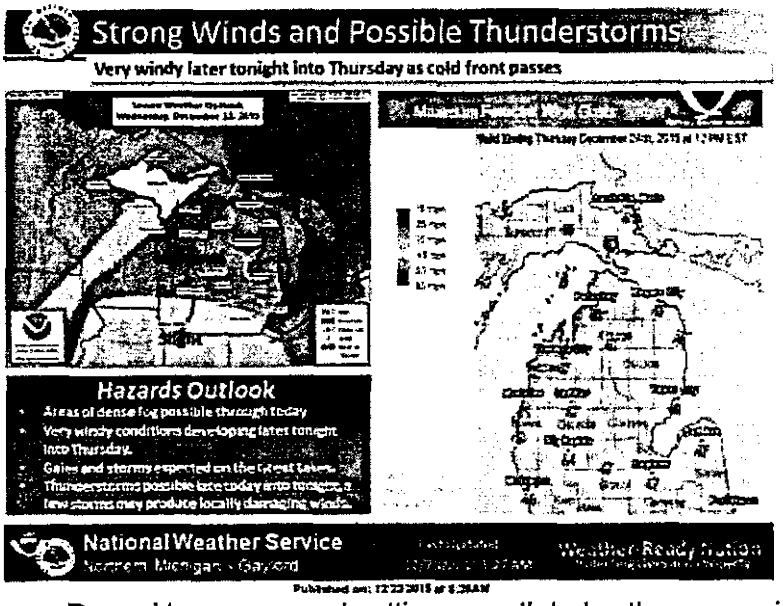
"Whenever you knock down blighted homes in a neighborhood, those property values stabilize. Those properties go up in value. People move back into the neighborhood," says Peters.

NATIONAL WEATHER SERVICE FORECASTS

Marquette

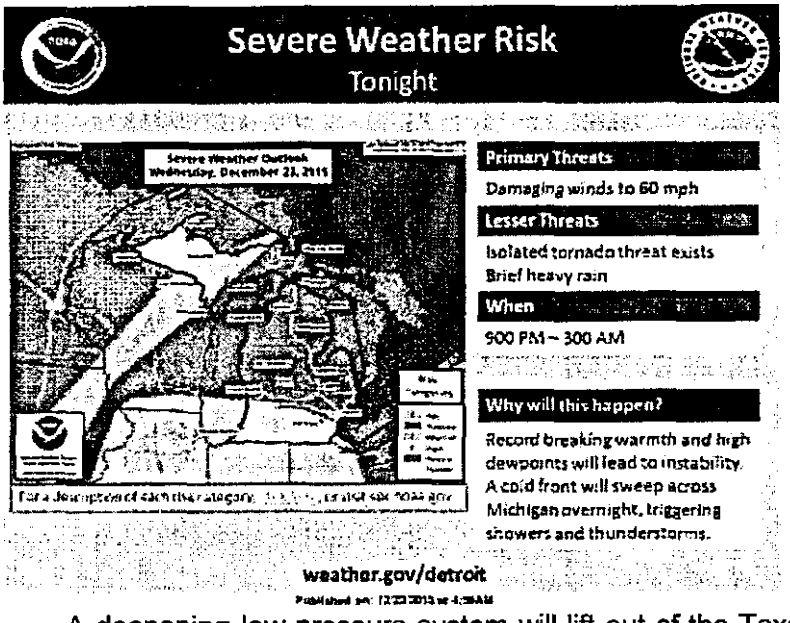
Light snow accumulation expected through Christmas Day. Warm temperatures continue and will be wet through tonight.

Gaylord



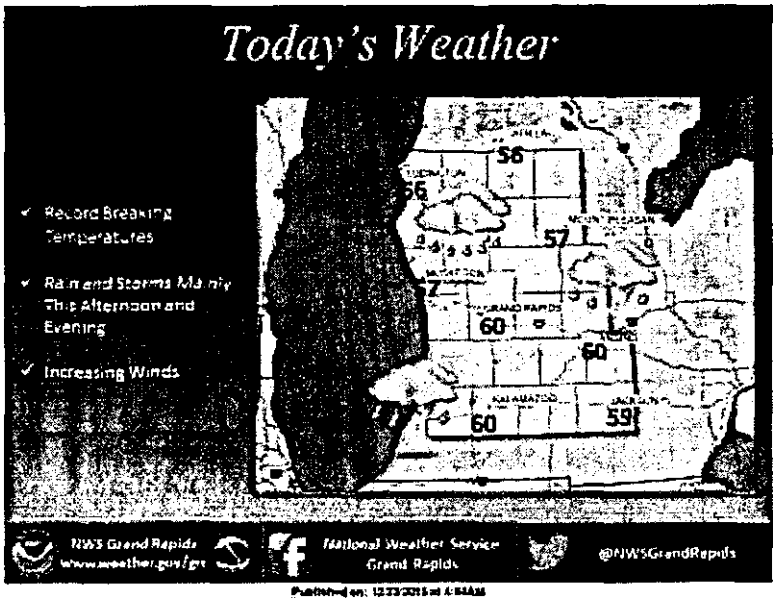
Record to near record setting warmth today then very windy later tonight into Thursday.

Detroit



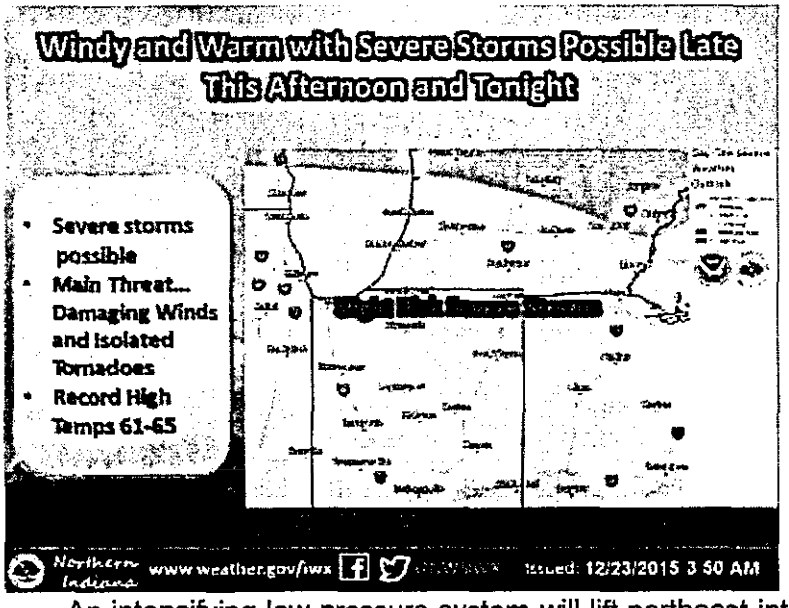
A deepening low pressure system will lift out of the Texas panhandle this morning and through the western Great Lakes this evening. Warm and humid air, drawn northward into lower Michigan, will fuel showers and the potential for thunderstorms beginning this evening. Some of the storms may become severe with damaging wind gusts to 60 mph the primary threat. The most favorable time period for thunderstorms is between 9pm and 3 am EST. Strong westerly winds will also develop in the wake of the cold front passage. A high potential then exists for west winds to exceed 40 mph, particularly north of Interstate 69 between 3 AM and 9 AM EST.

Grand Rapids



Today's record highs are 57 in both Grand Rapids, Lansing, and 54 in Muskegon. We should exceed all these values! However rain and storms will move in toward mid day and continue into the evening. Some storms could be strong with damaging winds. An isolated tornado could even occur. Winds will remain strong through tonight and into Thursday, occasionally gusting to 50 mph.

Northern Indiana



An intensifying low pressure system will lift northeast into the upper Midwest this afternoon causing unseasonably warm/moist air to move into our area. As the cold front associated with this system moves east late this afternoon and tonight, showers are expected with thunderstorms possible. Some of the storms could be severe with damaging winds and isolated tornadoes. Record highs in the lower to middle 60s are expected today with lows tonight only in the 40s.

MEDIA MONITORING REPORT

Statewide Severe Winter Storm No. 1
12/28/2015

Issues:

- No issues to report.

Summary:

- The National Weather Service has issued a Winter Storm Warning through Tuesday morning for Montcalm, Gratiot, Ionia, Clinton, Barry, Eaton, Ingham, Calhoun and Jackson Counties.
- A winter storm is forecast to move across Illinois bringing high winds, icy precipitation and waves up to 20-feet high along the shores of Lake Michigan.
- The Monroe County Emergency Management Division is encouraging area residents to plan ahead for potential hazards.
- Meteorologists are predicting some potentially hazardous weather that could cause roads to ice over and floods Monday.
- All non-essential state of Michigan workers in the Lower Peninsula are being sent home at 1 p.m. today, joining many local government workers who went home at noon in advance of the ice storm moving into the region.
- Genesee County travelers shouldn't worry when the raindrops start Monday, Dec. 28, but after 4:30 p.m. when the sun goes down and ice formation starts, according to John Daly, Genesee County Road Commission manager-director.
- As freezing rain, sleet and wind gusts close to 50 mph hit the Jackson area, the National Weather Service has upgraded the winter weather advisory to a winter storm warning.
- MLive reports on how stores are gearing up for the need of generators and emergency supplies for the winter storm in Michigan.
- Area libraries are among local organizations closing early today as a severe winter storm approached West Michigan.
- Travel conditions across Michigan are expected to be difficult today as much of the state is under a Winter Storm Warning, Freezing Rain Advisory or Winter Weather Advisory.
- Gov. Rick Snyder activated the State Emergency Operations Center due to the hazardous winter storm expected to affect Michigan.
- TV clips: Road crews prepare for storm.

Analysis:

- Media coverage is neutral.
- Multiple media outlets report on Gov. Rick Snyder activiating the SEOC for the winter storm and sending non-essential state workers home.
- Media outlets reporting on updated conditions for storm throughout day.
- Will continue to monitor the situation.

MICHIGAN SEVERE WEATHER

Snow/sleet and freezing rain this afternoon

WILX, December 28, 2015

The National Weather Service has issued a Winter Storm Warning through Tuesday morning for Montcalm, Gratiot, Ionia, Clinton, Barry, Eaton, Ingham, Calhoun and Jackson Counties. A Winter Weather Advisory has been issued through early Tuesday morning for Shiawassee, Livingston, Washtenaw and Lenawee Counties. A Freezing Rain Advisory has been issued for Branch and Hillsdale Counties through Monday evening.

Snow, sleet and freezing rain over the area at noon will continue through the afternoon. As low pressure gets closer to the Michigan winds will be picking up in speed. Computer models are saying ice accumulations could be around a quarter inch in Mid-Michigan. Sleet accumulations of around a half inch are possible. The ice and sleet teamed up with wind gusts near 45 MPH late this afternoon into the evening hours will more than likely cause scattered power outages.

Winter Storm to bring icy weather, high winds to Illinois

WEBZ 91.5, December 28, 2015

A winter storm is forecast to move across Illinois bringing high winds, icy precipitation and waves up to 20-feet high along the shores of Lake Michigan.

The National Weather Service on Monday morning had storm warnings, freezing rain advisories and flood warnings across Illinois. Forecasters predicted heavy icing in the northern half of Illinois. Heavy rain and flooding is expected in central Illinois with river flooding likely to continue for several days.

Monroe County EMD shares winter safety tips

Monroe News, December 28, 2015

With winter weather starting to settle in for the season, the Monroe County Emergency Management Division is encouraging area residents to plan ahead for potential hazards. Here is the list of tips that the EMD issued Monday morning: BE PREPARED FOR COLDER TEMPERATURES & WINTER STORMS While we have not yet experienced it yet this season, Michigan winters can bring extremely cold temperatures, large amounts of snow and bursts of freezing rain. With severe winter weather events likely to occur sometime in the next couple of months, now is the time to prepare for the unexpected. The start of a new year is the perfect time for Monroe County residents to plan ahead and make

arrangements before severe winter weather strikes. We strongly encourage everyone to take a few steps to get "winter ready."

Weather Service issues flood warning for Metro Detroit

MLive, December 28, 2015

DETROIT, MI – Meteorologists are predicting some potentially hazardous weather that could cause roads to ice over and floods Monday.

The National Weather Service issued a lakeshore flood warning about 10 a.m. for Wayne and Monroe counties stemming from possible rising water levels.

"Water levels will rise quickly along the Lake Erie shore," the Weather Service said.

State workers going home at 1pm

Lansing State Journal, December 28, 2015

LANSING - All non-essential state of Michigan workers in the Lower Peninsula are being sent home at 1 p.m. today, joining many local government workers who went home at noon in advance of the ice storm moving into the region.

A winter storm warning called for up to a quarter-inch of ice this afternoon and evening, making travel hazardous and prompting the cities of Lansing and East Lansing to close facilities at noon today. Ingham County also closed at noon and Clinton County at 12:15 p.m. Eaton County had not yet made a decision to close offices, although Delta Township closed its offices at noon.

Ice accumulation on Genesee County roads to start when sun goes down

MLive, December 28, 2015

FLINT, MI – Genesee County travelers shouldn't worry when the raindrops start Monday, Dec. 28.

It's the sun falling from the sky that's going to be the problem, according to John Daly, Genesee County Road Commission manager-director.

"After 4:30 p.m., and the sun starts to go down, that's when we're going to get ice formation," Daly said. "That's going to be the big problem with this one."

Live updates: Freezing rain, gusts near 50 mph hit the Jackson area

MLive, December 28, 2015

JACKSON, MI — As freezing rain, sleet and wind gusts close to 50 mph hit the Jackson area, the National Weather Service has upgraded the winter weather advisory to a winter storm warning.

The warning will remain in effect until 4 a.m. Tuesday, Dec. 29, the NWS reports. Freezing rain is expected to continue through Monday evening before temperatures start to rise above freezing. In addition, the NWS projects between one- and three-tenths of an inch of ice accumulation with a steady wind between 20 and 30 mph.

Stores gearing up for the storm's rush on generators, emergency supplies

MLive, December 28, 2015

GRAND RAPIDS, MI – Between a long electrical outage over Christmas Eve and a big storm moving in today, Rylee's Ace Hardware put an order in for more generators.

Good thing, because there has been a run on them over the last few days.

Generators are currently sold out at both the Grand Rapids area Menards in Comstock Park and Wyoming. More should arrive tonight or tomorrow morning, say staff.

Libraries shut down as storm approaches, check first before heading out

MLive, December 28, 2015

MUSKEGON COUNTY, MI – Area libraries are among local organizations closing early today as a severe winter storm approached West Michigan.

Hackley Public Library, Muskegon Area District Library branches, Spring Lake District Library, Loutit Library in Grand Haven, Fremont Area District Library and Newaygo Area District Library all have closed for the day.

A winter storm with high winds and freezing rain is expected to hit the area early this afternoon. A half-inch of ice could accumulate, making travel in the area treacherous.

Sleet and freezing rain hitting southeast Michigan

Monroe News, December 28, 2015

Travel conditions across Michigan are expected to be difficult today as much of the state is under a Winter Storm Warning, Freezing Rain Advisory or Winter Weather Advisory. Monroe County falls into the Winter Weather Advisory area, according to the National Weather Service in Detroit, with that alert expected to be in effect until 9 p.m. Precipitation began late this morning as sleet mixed with some freezing.

Gov. Snyder activates State Emergency Operations Center due to winter storm

Up North Live, December 28, 2015

WPBN/WGTU — Gov. Rick Snyder activated the State Emergency Operations Center due to the hazardous winter storm expected to affect Michigan.

The National Weather Service is forecasting about a foot of heavy, wet snow for the Upper Peninsula and freezing rain for some areas of the Lower Peninsula. Power outages are likely to happen.

"The safety of all Michiganders is our top priority, and the heavy snowfall and freezing rain could create hazardous conditions in much of our state," Snyder said. "Residents should pay close attention to advisories and stay off the roads if at all possible. State authorities continue to closely monitor the situation and are sharing information and coordinating with communities to keep everyone as safe as possible."

Storm prompts Michigan to activate Emergency Operations Center

WNDU, December 28, 2015

LANSING, Mich. (AP) The state's Emergency Operations Center has been activated as a winter storm is expected to bring heavy wet snow to the Upper Peninsula and freezing rain and high winds to other parts of Michigan.

Gov. Rick Snyder also says state offices in the Lower Peninsula are to close at 1 p.m. Monday due to the storm.

Winter storm warnings and advisories have been issued for a number of areas. The Emergency Operations Center coordinates response and recovery efforts by state and local agencies.

Storm prompts state to activate Emergency Operations Center

Fox 17, December 28, 2015

LANSING, Mich. (AP) — The state's Emergency Operations Center has been activated as a winter storm is expected to bring heavy wet snow to the Upper Peninsula and freezing rain and high winds to other parts of Michigan.

Gov. Rick Snyder also says state offices in the Lower Peninsula are to close at 1 p.m. Monday due to the storm.

Winter storm warnings and advisories have been issued for a number of areas. The Emergency Operations Center coordinates response and recovery efforts by state and local agencies.

Storm prompts state to activate Emergency Operations Center

PLAN COORDINATION

The following agencies are overall responsible for coordinating the Genesee County Emergency Action Guidelines:

AGENCY	TITLE OF CONTACT
Office of Genesee County Sheriff	Sheriff
Office of Genesee County Sheriff	Emergency Management Manager
Board of Commissioners	Chairperson

The Sheriff of Genesee County (or his/her designated representative) is overall responsible for maintaining and coordinating the Sections of the Genesee County Emergency Action Guidelines:

SIGNATURE	DATE
Sheriff Robert J. Pickell	9-30-15

CERTIFICATION

I (we) certify these guidelines are the official Emergency Action Guidelines (EAG) for Genesee County. The policies contained herein do not discriminate on the basis of race, color, national origin, religion, sex, age, handicap, or political beliefs.

SIGNATURE OF CHIEF EXECUTIVE OFFICIAL, GENESEE COUNTY, MICHIGAN	DATE
Jamie Curtis, Chairperson, Genesee County Board of Commissioners	9-24-15

CHIEF EXECUTIVE OFFICIAL LINE OF SUCCESSION

The Line of Succession for the Chief Executive Official of Genesee County is:

1. **Chairperson, Genesee County Board of Commissioners**
2. **Vice-Chairperson, Genesee County Board of Commissioners**
3. **Government Operations Chair, Genesee County Board of Commissioners**

HOW TO USE THESE GUIDELINES

Emergency Action Guidelines are a roadmap for Emergency Operations Center (EOC) Staff to refer to when responding to a severe emergency or disaster. Each Section of the EAG refers to a function that must be performed during response and recovery activities. The EAG is an "all hazards" document. Each agency listed in the EAG is responsible for developing internal procedures to support these guidelines.

Each Section of the EAG contains the following:

- A cover sheet, listing who (by title) is responsible for developing and maintaining the EAG Section and who (by title) is responsible for representing the agency during an EOC activation. Each responsible agency must list a primary and two alternate positions for these purposes. The cover sheet of each Section must be signed by the individual responsible for the activities listed in the Section.
- Paragraph I, a General Checklist of Considerations
- Paragraph II, a Natural Disaster Checklist of Considerations
- Paragraph III, a Technological Disaster Checklist of Considerations
- Paragraph IV, a WMD/Terrorism Checklist of Considerations
- Paragraph V, Supporting Documents to the Section

PLANNING PROCESS

These Guidelines were developed utilizing the following guidance and standards:

- Planning Standards, required by Michigan State Police, Emergency Management Division Pub 201, are included in this document (Appendix III). By matching a Planning Standard to a portion of the EAG, or to a Supporting Document, responsible agencies can ensure they have planned for everything required by the State of Michigan.
- Homeland Security Presidential Directive 5 (HSPD-5), requires all levels of government to utilize NIMS in planning for, responding to, and recovering from domestic incidents regardless of cause, size, or complexity. The Incident Command System (ICS) is an integral component of the NIMS.
- The National Response Framework (NRF).
- State of Michigan Emergency Management Plan.
- Superfund Amendments and Reauthorization Act (SARA) Title III.

Functional specific committees were formed for the development and review of the annexes. These committees included government, non-government, and private sector representation as needed.

NOTE: FOR EMPHASIS, SOME CONSIDERATIONS MAY BE LISTED IN MORE THAN ONE PARAGRAPH OF A SECTION.

Controlled Distribution List (Email copies)

1. 3rd District Emergency Management Coordinator (MSP-EMHSD)
2. Communications Official
3. Damage Assessment Official
4. Direction & Control Official
5. Emergency Medical Services Official
6. Fire Services Official
7. Genesee County Board of Commissioners, Chairperson
8. Genesee County Board of Commissioners, Vice Chairperson
9. Genesee County Clerk
10. Genesee County Emergency Management Manager
11. Genesee County Hazmat Administrator
12. Genesee County Medical Examiner
13. Genesee County Sheriff
14. Human Services Official
15. Law Enforcement Official
16. Public Health Official
17. Public Information Official
18. Public Works Official
19. Warning Official
20. All 32 Genesee County Municipalities' Emergency Coordinator
21. Bishop International Airport, Director of Public Safety

Note:

The Genesee County Emergency Management Division maintains e-mail notification lists of representatives of departments, agencies and organizations that are responsible for implementation of the task assignments contained within the plan, or that otherwise need a copy for operational or reference purposes. These representatives are provided an electronic copy of the plan by e-mail once the plan is revised and finalized. All other agencies or stakeholders that would like an electronic copy of the plan is free to request a copy.

Part 1 - GENERAL

I. Municipalities included in these Guidelines:

All municipalities in Genesee County have elected to be a part of the County Emergency Management Program. They have opted to be included in this EAG; coordinating their mitigation, preparedness, response and recovery activities through the county coordinator. In each of these municipalities emergency management liaisons have been appointed. These liaisons work with the county coordinator on emergency management activities within their respective. Genesee County contains the following municipalities:

City of Burton*
City of Clio
City of Davison
City of Fenton*
City of Flint*
City of Flushing
City of Grand Blanc
City of Linden
City of Montrose
City of Mt. Morris
City of Swartz Creek

Township of Argentine
Township of Atlas
Township of Clayton
Township of Davison*
Township of Fenton*
Township of Flint*
Township of Flushing*
Township of Forest
Township of Gaines
Township of Genesee*
Township of Grand Blanc*
Township of Montrose
Township of Mt. Morris*
Township of Mundy*
Township of Richfield
Township of Thetford
Township of Vienna*

Village of Gaines
Village of Goodrich
Village of Lennon
Village of Otisville

*Indicates those Cities and Townships with a population of over 10,000 (2010 census data) who have elected to fall under Genesee County's EAG; as allowed in Public Act 390. These jurisdictions maintain a Support Operations Plan which meets Public Act 390 requirements and are supporting documents of the EAG.

(See the Genesee County Hazard Mitigation Plan for a complete profile of Genesee County.)

II. SAFETY:

It is the responsibility of each emergency response agency to ensure all responders are briefed on the dangers associated with the event, i.e., hazardous materials, fire, explosion, etc.

III. RESPONSE PROCEDURES & THE DISASTER DECLARATION PROCESS

1. The primary responsibility for response and recovery to an emergency/disaster rests with the governing body of the local municipality in which the emergency/disaster occurs.

2. If the incident requires the involvement and coordination of various agencies or requires a somewhat unique response, the Emergency Management Manager (EM) may become involved.

3. The local Elected Official is responsible for coping with emergency or disaster situations that affect the jurisdiction. The EM assists the Chief Executive in managing the overall response.

4. Upon assessment by the local municipality that the emergency/disaster is beyond their capabilities and additional assistance and specialized resources are needed, assistance from the County may be requested. At this time the local municipal Chief Elected Official should declare a "Local State of Emergency" for the municipality and this Declaration shall be filed with the County and the State of Michigan MSP-EMHSD. This declaration provides certain authorities as described in the local resolution and Public Act 390, of 1976, as amended. [MCL 30.401-30.420] A "Local State of Emergency" is terminated by the Chief Executive Official after a period not exceeding *seven days* except with the consent of the governing body of the municipality.

5. Existing agencies of local government, other local agencies, volunteer agencies, and the private sector, augmented by State and Federal agencies, constitute the basic response framework. Some of these agencies must perform special activities related to response and recovery. Individuals designated to perform these activities are detached from their regular assignment when activated. Mutual aid agreements are also relied upon.

6. Unless previously agreed upon in written Mutual Aid Agreements, if a municipality requests County assistance, the first recourse for disaster related expenses shall be to funds of the municipality. If the demands placed upon the funds of the municipality in coping with a particular disaster or emergency are unreasonably great, the governing body of the municipality may apply, by

resolution of the local governing body, for a grant from the County. If County requests the use of municipal resources the municipality will provide them and, except as otherwise provided in a Mutual Aid Agreement, the County will absorb the cost. [MCL 30.419]

7. Upon the County receiving a Local State of Emergency Declaration and a request for assistance, the County Board Chair in consultation with the County Emergency Management Coordinator and the MSP-EMHSD Third District Coordinator assess that the incident is beyond the capabilities of the county, the County Board Chair will declare a "State of Disaster" or "State of Emergency" to provide support from the County and request assistance from the State of Michigan and a Governor's Declaration.

8. This request is then sent to the State EMHSD District Coordinator. Affected municipalities may also request this assistance on an individual basis through the county channels addressed above. NOTE: The Chief Executive must declare a "Local State of Emergency" prior to requesting a Governor's Declaration of Emergency or Disaster.

9. The Department of State Police, EMHSD District Coordinator, in conjunction with the local EMHSD, analyzes the incident to determine necessary actions. The State EMHSD makes recommendations and, through channels, this information is reported to the Governor, who may declare a "State of Disaster" or a "State of Emergency". The Governor may take action deemed necessary within the authority granted in Act 390, P.A. 1976, as amended, and other applicable statutes. Appropriate state agencies may be notified and mobilized. Local Emergency Action Guidelines (EAG) may be activated if not activated previously. At this time, local government assigns and makes available for duty employees, property, or equipment for disaster relief purposes if requested by the Governor. The Governor utilizes these resources as is reasonably necessary to cope with the disaster. The District Coordinator coordinates State response and recovery activities at the scene with the EM. The declaration of emergency or disaster remains in effect for *fourteen days* or unless terminated or extended by the executive order or proclamation and approved by the legislature.

10. If the Governor determines that Federal assistance is necessary to supplement the efforts and available resources of State and local governments, he/she may request that the President of the United States declare a major disaster or emergency for the affected area under provisions of the appropriate Federal law.

11. It is important that the executive, legislative, and judicial branches of government continue to function under emergency conditions. In severe disaster situations, continuity of government may be jeopardized. Provisions have been made for emergency authorities and succession of these branches of government. For example, if the Chief Executive Official (Chairperson of

the Board of Commissioners) is unavailable or unable to exercise the powers and duties of the office, the next in the line of succession for this position is the Vice Chairperson of the Board of Commissioners. This line of succession provides for continuous leadership, authority, and responsibility.

IV. THE INCIDENT COMMAND SYSTEM (ICS) AND NATIONAL INCIDENT MANAGEMENT SYSTEM (NIMS)

County EOC Staff must be aware of the Incident Command System (ICS) and the National Incident Management System (NIMS) and how they are used to interface between the Incident Commander (IC) [on scene] and the Emergency Operations Center (EOC). Information on ICS and NIMS organizational chart with roles and responsibilities can be found in Appendix I and II of this document.

V. EVACUATION

P.A. 390 of 1976 as amended, Michigan's Emergency Management Act, authorizes the Governor to direct and compel the evacuation of all or part of the population from a stricken or threatened area within the state if necessary for the preservation of life or other mitigation, response, or recovery.

P.A. 368 of 1978, Michigan's Public Health Code, authorizes the Genesee County Health Officer to: 1) issue orders to a person to immediately act to avoid, correct, or remove an imminent danger; or, 2) to establish procedures to be followed by persons, including a governmental entity.

An Incident Commander, under certain circumstances, may decide it is in the best interest to evacuate an area. The Incident Commander would be responsible for making this evacuation decision, but it would be considered a voluntary evacuation. The EOC Staff will provide the IC with the necessary administrative and logistical support needed to make an informed decision. When necessary, the EOC Staff will assist the IC by plotting primary and alternate evacuation routes.

VI. THE EMERGENCY OPERATIONS CENTER (EOC)

PRIMARY EOC LOCATION	
GENESEE COUNTY ADMININSTRATION BUILDING	**1101 BEACH, ROOM G-25 FLINT, MICHIGAN**
ALTERNATE EOC LOCATION	
UNIVERSITY OF MICHIGAN - FLINT HUBBARD BUILDING	**602 MILL STREET FLINT, MICHIGAN**

VII. GUIDELINE SECTION RESPONSIBILITIES

Each organization responsible for a Supporting Section of these Emergency Action Guidelines shall:

1. Participate in its development.
2. Maintain a capability to carry out emergency assignments, including assigning auxiliary personnel as needed.
3. Provide for the delivery of emergency services including staff, equipment, and facilities.
4. Ensure that the designated department liaison responding to the EOC has the following NIMS training: IS 100, IS 200, IS 700, IS 800, ICS 300 and ICS 400.
5. This plan is reviewed annually with designated department liaisons to ensure in its completeness and is updated.
6. Develop and maintain internal procedures to safeguard vital records, relocate essential personnel and equipment, carry out assigned tasks, alert personnel, and maintain resource inventory.
7. Ensure that the designated department liaison promptly reports to the emergency coordination facility as instructed by the EM.
8. Participate in drills and exercises to test the Emergency Action Guidelines (EAG) and related procedures.
9. Ensure that personnel are assigned to emergency tasks and are properly trained.
10. Provide information to the EMHSD/Damage Assessment Team for use in damage assessment.
11. Establish a staging area, as necessary, to provide for the operational, logistical, and administrative support needs of response personnel at the scene.

VIII. LINE OF SUCCESSION

In accordance with Emergency Management Division Publication 201 and the Genesee County Emergency Management Resolution, [11-164] each department responsible for a Section in these Emergency Action Guidelines must provide a Line of Succession that includes a primary representative and a minimum of two alternates.

IX. SUPPORTING SECTION ASSIGNMENTS

The EAG establishes the following supporting sections. The emergency assignments and the responsibility for developing and implementing each section are detailed in each Section:

SECTION	RESPONSIBLE AGENCY
GENERAL COORDINATION	OFFICE OF SHERIFF
COMMUNICATIONS	GENESEE COUNTY DISPATCH and/or CITY OF FENTON 911
DAMAGE ASSESSMENT	EQUALIZATION
DIRECTION & CONTROL	OFFICE OF SHERIFF
EMERGENCY MEDICAL SERVICES	GENESEE COUNTY MEDICAL CONTROL AUTHORITY
FIRE SERVICES	PRESIDENT, FIRE CHIEFS ASSOCIATION
HUMAN SERVICES	AMERICAN RED CROSS DEPARTMENT OF HUMAN SERVICES
LAW ENFORCEMENT	OFFICE OF SHERIFF
PUBLIC HEALTH	HEALTH DEPARTMENT
PUBLIC INFORMATION	OFFICE OF SHERIFF
PUBLIC WORKS	ROAD COMMISSION DRAIN COMMISSION
WARNING	GENESEE COUNTY 911 OFFICE OF SHERIFF

THE INCIDENT COMMAND SYSTEM (ICS)

I. Need for an Incident Command Management System

The complexity of incident management, coupled with the growing need for multi-agency and multi functional involvement on incidents, has increased the need for a single standard incident management system that can be used by all emergency response disciplines. ICS provides an important framework from which all state agencies can work together. In any major incident many local, state and federal agencies may become involved. The challenge is to get the various agencies to work together in the most efficient and effective manner. The principles of the Incident Command System will enable State and local emergency response agencies to utilize common terminology, span of control, organizational flexibility, personnel accountability, comprehensive resource management, unified command and incident action plans.

II. History of ICS Development

Although the basic theory behind ICS is derived from the military, ICS, as we know it today, resulted from the obvious need for a new approach to the problem of managing rapidly moving wildfires in the early 1970s. At that time, emergency managers faced a number of problems: Too many people reporting to one supervisor; Different emergency response organizational structures; Lack of reliable incident information; Inadequate and incompatible communications; Lack of a structure for coordinated planning between agencies; Unclear lines of authority; Terminology differences between agencies; and unclear or unspecified incident objectives. Designating a standardized emergency management system to remedy the problems listed above took several years and extensive field testing. The Incident Command System was developed by an interagency task force working in a cooperative local, state, and federal interagency effort called FIRESCOPE (Firefighting Resources of California Organized for Potential Emergencies).

III. Essential Elements of ICS

Early in the development process, four essential requirements became clear:

1. The system must be organizationally flexible to meet the needs of incidents of any kind and size.

2. Agencies must be able to use the system on a day-to-day basis for routine situations as well as for major emergencies.

3. The system must be sufficiently standard to allow personnel from a variety of agencies and diverse geographic locations to rapidly meld into a common management structure.

4. The system must be cost effective.

IV. ICS Applications

Initial ICS applications were designed for responding to disastrous wildland fires. It is interesting to note that the characteristics of these wildland fire incidents are similar to those seen in many law enforcement, hazardous materials, and other kinds of situations.

They occur with no advance notice. They develop rapidly. Unchecked, they may grow in size or complexity. Personal risk for response personnel can be high. There are often several agencies with some on-scene responsibility. They can very easily become multi-jurisdictional. They often have high public and media visibility. Risk of life and property loss can be high. Cost of response is always a major concern. ICS is now widely used throughout the United States by fire agencies, and is increasingly used for law enforcement, other public safety applications, and for emergency and event management.

V. Evolution of ICS

ICS applications and users have steadily increased since the system's original development. In 1980, the ICS that was originally developed in California under the FIRESCOPE program made the transition into a national program called the National Incident Management System (NIMS). At the time ICS became the backbone of a wider-based system for all federal agencies with wildland fire management responsibilities. The following agencies and entities, among others, have endorsed the use of ICS: Federal Emergency Management Agency (FEMA). National Curriculum Advisory Committee on Incident Command Systems/Emergency Operations Management System recommends adoption of ICS as a multi hazard/all-agency system. FEMA's National Fire Academy (NFA) has adopted ICS as a model system for fire services. FEMA's Urban Search and Rescue Response System, a component of the Federal Response Plan, uses ICS as its on site management structure.

NFPA Standard 1405 (Land-Based Firefighters who respond to marine vessel fires) was developed at the request of, and in cooperation with, the U.S. Coast Guard and calls for the use of ICS. The U.S. Coast Guard also is incorporating ICS basic structure and management principles into the National Response System used for oil and hazardous material pollution response. The Occupational Safety and Health Administration (OSHA) requires that all governmental and private organizations that handle hazardous materials use ICS. The National Fire Protection Association

(NFPA) Standard 1500 states that all departments should establish written procedures for use of ICS.

Environmental Protection Agency (EPA) rules require non-OSHA states to use ICS at hazardous materials incidents. The National Wildfire Coordinating Group (NWCG) has formally adopted ICS for use by all federal and state wildfire management organizations.

VI. Application of the Incident Command System

The Incident Command System has considerable flexibility. It can grow or shrink to meet different needs. This makes it a very cost-effective and efficient management system. The system can be applied to a wide variety of emergency and non-emergency situations. Listed below are some examples of these kinds of incidents and events that can use the Incident Command System: Fires, HAZMAT, and multi-casualty incidents, multi-jurisdictional and multi-agency disasters, wide-area search and rescue missions, pest eradication programs, oil spill response and recovery incidents, single and multi-agency law enforcement incidents, air, rail, water, or ground transportation accidents. Planned events; e.g., celebrations, parades, concerts, private sector emergency management programs, state or local major natural hazards management

VII. ICS Organization

Every incident or event has certain major management activities or actions that must be performed. Even if the event is small, and only one or two people are involved, these activities will still always apply to some degree.

The organization of the Incident Command System is built around five major management activities. They are:

COMMAND Sets objectives and priorities Has overall responsibility at the incident or event
OPERATIONS Conducts tactical operations to carry out the plan Develops the tactical objectives Directs all resources
PLANNING Develops the action plan to accomplish the objectives Collects and evaluates information Maintains resource status
LOGISTICS Provides support to meet incident needs Provides resources and all other services needed to support the incident
FINANCE/ADMINISTRATION Monitors costs related to incident Provides accounting Procurement Time recording Cost analyses

These five major management activities are the foundation upon which the ICS organization develops. They apply whether you are handling a routine emergency, organizing for a major event, or managing a major response to a disaster. On small incidents, these major activities may be managed by one person, the Incident Commander (IC). Large incidents usually require that they be set up as separate Sections within the organization as shown above.

Each of the primary ICS Sections may be sub-divided as needed. The ICS organization has the capability to expand or contract to meet the needs of the incident.

A basic ICS operating guideline is that the person at the top of the organization is responsible until the authority is delegated to another person. Thus, on smaller situations where additional persons are not required, the Incident Commander will directly manage all aspects of the incident organization.

Genesee County

Supplemental Specification for
Incorporation of the National Incident Management System into the
Genesee County Emergency Action Guidelines

AMENDMENT PROCEDURE

Updates and revisions to the **Genesee County Emergency Action Guidelines** will be processed in accordance to **Genesee County** amendment procedures.

INTRODUCTION

The intention of this supplement is to satisfy the need for the **Genesee County Emergency Action Guidelines** to be concurrent with the language and structure of the National Incident Management System (NIMS) to ensure operations are managed efficiently and effectively across agencies.

Per Homeland Security Presidential Directive No. 5 (HSPD-5), it is mandated that all emergency plans and procedures be revised to incorporate NIMS language to be compliant with the NIMS and be eligible to receive federal preparedness funding. It is the intention of the Emergency Management and Homeland Security Division (EMHSD) of the Michigan State Police (MSP) to provide full guidance and support in enhancing Emergency Operations Plans or Action Guidelines for accuracy and sufficiency with applicable entities in the forthcoming months to include the NIMS and current data. Therefore, this supplement is an interim revision to the plan to meet the NIMS requirements due to scheduled plan enhancements per the state's strategic implementation plan for local emergency agencies.

AMENDMENTS

Make the following amendments to the jurisdiction's Emergency Operations Plan or Action Guidelines.

1.1: Key Legal Authorities

Federal Government
HSPD-5, Management of Domestic Incidents, February 28, 2003.
State Government
Executive Directive No. 2005-09: Adoption of the NIMS.
Local Government
Genesee County Resolution 05-197

1.2: Federal guidance

NIMS, January 1, 2008
The National Response Framework (NRF) January 2008
Letter from Secretary Ridge to Governors, September 8, 2004

1.3: "Concept of Operations"
Operations occurring day-to-day, even those not involving federal participation, will be managed and coordinated using NIMS and the Incident Command System (ICS) as detailed in Section 1.5 of this supplement to effectively and efficiently respond to and recover during emergency incidents.

1.4: "The National Incident Management System"

On February 28, 2003 President Bush issued HSPD-5 which directed the Secretary of Homeland Security to develop and administer the NIMS. This system will provide a consistent nationwide approach for federal, state, local and tribal governments to work effectively and efficiently together to prepare for, prevent, respond to, and recover from domestic incidents regardless of cause, size, or complexity.

While most incidents are generally handled on a daily basis by a single jurisdiction at the local level, there are important instances in which successful domestic incident management operations depend on the involvement of multiple jurisdictions, functional agencies, and emergency responder disciplines. These instances require effective and efficient coordination across this broad spectrum of organizations and activities. NIMS uses a systems approach to integrate the best of existing processes and methods into a unified national framework for incident management. This framework forms the basis for interoperability and compatibility that will, in turn, enable a diverse set of public and private organizations to conduct well-integrated and effective incident management operations. It does this through a core set of concepts, principles, procedures, organizational processes, terminology, and standards requirements applicable to a broad community of NIMS users.

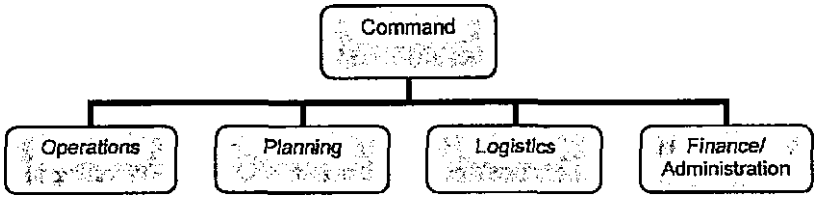
NIMS has six major components, which work together to form the national framework for preventing, responding to, and recovering from all types of domestic incidents:

Command and Management
Preparedness
Resource Management
Communications and information management
Supporting technologies
Ongoing management and maintenance

1.5: *"The Incident Command System"*

An integral component of the National Incident Management System is the Incident Command System (ICS). It is designed to enable effective and efficient domestic incident management by integrating a combination of facilities, equipment, personnel, procedures, and communications operating within a common organizational structure. It is widely applicable and used to organize both near-term and long-term field-level operations for a broad spectrum of emergencies, from small to complex incidents, both natural and manmade. ICS is used by all levels of government – Federal, State, local, and tribal and across all disciplines. The ICS structure has five major functions, as described below.

These are: command, operations, planning, logistics, and finance and administration.



1.6: "Incident Management Team"

An Incident Management Team (IMT) is a group of command and general staff in an ICS organization that are often pre-designated members to ensure that they have the necessary training and experience to fulfill the roles and responsibilities of the ICS position. The level of training and experience of the IMT members, coupled with the identified formal response requirements and responsibilities of the IMT, are factors in determining the "Type", or level, of IMT. The following indicates these factors in the composition of the Incident Management Team established for the jurisdiction per FEMA standards.

RESOURCE:	Incident Management Team					
CATEGORY:	Resource Management	KIND:	Team			
MINIMUM CAPABILITIES:		TYPE I	TYPE II	TYPE III	TYPE IV	OTHER
COMPONENT	METRIC					
Personnel	Incident Commander	Yes	Yes	Yes	Yes	
Personnel	Operations Section Chief	Yes	Yes	Yes	Yes	
Personnel	Planning Section Chief	Yes	Yes			
Personnel	Logistics Section Chief	Yes	Yes	Yes		
Personnel	Finance/Admin Section Chief	Yes	Yes	Yes	Yes	
Personnel	Specialized Functions (i.e., HazMat, Insurance, etc.)	Yes	Optional	Optional	Optional	

COMMENTS:

A command team comprised of the Incident Commander, appropriate command and general staff personnel assigned to an incident. (*Source: FIRESCOPE*)

Components and Capabilities: Variations may also be based on level and type of disaster experience. (i.e., local event experience vs. national event experience).

The Incident Commander's responsibility is the overall management of the incident (to which they are assigned). In most incidents, the command activity is carried out by a single Incident Commander. The Incident Commander is selected by qualifications and experience. The Incident Commander may have a deputy, who may be from the same agency, or from an assisting agency. Deputies may also be used at section and branch levels of the ICS organization. Deputies must have the same qualifications as the person for whom they work, as they must be ready to take over that position at any time. Depending on the extent of the Incident Management team needed, this area of management may also have under its purview an Information Officer, Liaison Officer, Agency Representative(s), and Safety Officer.

The Operations Section Chief, a member of the General Staff, is responsible for the management of all operations directly applicable to the primary mission. The Operations Chief activates and supervises organization elements in accordance with the Incident Action Plan and directs its execution. The Operations Chief also directs the preparation of unit operational plans; requests or releases resources; makes expedient changes to the Incident Action Plan as necessary; and reports such to the Incident Commander. Depending on the extent of the Incident Management team needed, this area of management may also have under its purview a Branch Director, Division/Group Supervisor, Strike Team/Task Force Leader, Single Resource Coordinator, and Staging Area Manager.

The Planning Section Chief is responsible for the collection, evaluation, dissemination, and use of information about the development of the incident and status of resources. Information is needed to: (1) understand the current situation, (2) predict probable course of incident events, and (3) prepare alternative strategies and control operations for the incident. This section serves as the Incident Commander's "clearing house" for information. The Section Chief's goal is to plan ahead of current events and to identify the need for resources before they are needed. Depending on the extent of the Incident Management team needed, this area of management may also have under its purview a Resources Unit Leader, Situation Unit Leader, Documentation Unit Leader, Demobilization Unit Leader, and Technical Specialists

The Logistics Section Chief is responsible for providing facilities, services, and materials in support of the incident, and is accountable for all personnel working in the hazard zone of the incident. The Section Chief participates in development and implementation of the Incident Action Plan and activates and supervises the Branches and Units within the Logistics Section. Depending on the extent of the Incident Management team needed, this area of management may also have under its purview a Service Branch Director, Support Branch Director, Facilities Unit Leader, and Ground Support Unit Leader.

The Finance/Administration Section Chief is responsible for all financial, administrative, and cost analysis aspects of the incident and for supervising members of the Finance/Administration section. Depending on the extent of the Incident Management team needed, this area of management may also have under its purview a Time Unit Leader, Procurement Unit Leader, Compensation/Claims Unit Leader, and Cost Unit Leader.

1.7: Mutual Aid and Resource Typing

Resource Typing

The whole idea of NIMS is based on the need for standard definitions and practices; differing definitions will in effect negate the fundamental idea that all responders should be using common definitions when ordering or receiving assets through mutual aid. Systems that do not conform to these common definitions are not compliant with NIMS

Mutual Aid and Resource Typing supports the NIMS by establishing a comprehensive, integrated national mutual aid and resource management system that provides the basis to type, order, and track all (federal, state and local) response assets. Specifically, it allows emergency management personnel to quickly and effectively facilitate the response of resources to the requesting jurisdiction

The FEMA/NIMS Integration Center Resource Typing Definitions provide emergency responders with the information and terminology they need to request and receive the appropriate resources during an emergency or disaster. The Center is urging that federal, state, territory and local officials use the 121 Resource Typing Definitions as they develop or update response assets inventories. They are intended to help make the resource request and dispatch process more accurate and efficient.

The 121 typed response assets are organized by:

Category – function for which the resource is most useful (firefighting, law enforcement, health and medical, etc.);
Kind – broad class of characterization, such as teams, personnel, equipment, and supplies – metrics have been developed for each kind and are measurements of capability or capacity; and
Type – measure of minimum capabilities to perform its function – Type I implies a higher capability than Type II.

Michigan Emergency Management Assistance Compact

The statewide mutual-aid assistance compact, authorized under 1976 PA 390, as amended that allows participating jurisdictions to render or receive assistance in time of crisis and share vital public safety services and resources more effectively and efficiently. The MEMAC is designed specifically for those situations in which a participating jurisdiction has exhausted its local resources (including those available through local / regional mutual aid or reciprocal aid compacts or agreements), or its resources are inadequate or overwhelmed in response to a threat or event being faced, and it requires additional resources (provided in a timely manner) to protect public health and safety, property or the environment.

The MSP/EMHSD administers MEMAC on behalf of the state of Michigan and is responsible for processing requests for resources by participating jurisdictions. Requests for assistance under MEMAC by a participating jurisdiction are communicated to the MSP operations center, which then notifies EMHSD of the request. MSP/EMHSD processes the request by conducting a search of available and relevant resources, contacting other participating jurisdictions or mobilizing state assets for assistance, and coordinating the mobilization of the assistance. MSP/EMHSD also administers the reimbursement process between the requesting and assistance-providing jurisdictions in accordance with the procedures established in the Compact.

1.8: Terms and Acronyms

ALS	Advanced Life Support
DOC	Department Operations Center
DOD	Department of Defense
DRC	Disaster Recovery Center
EMAC	Emergency Management Assistance Compact
EMHSD	Emergency Management Homeland Security Division
EOC	Emergency Operations Center
EOP	Emergency Operations Plan
ERT-A	Emergency Response Team – Advance Element
FEMA	Federal Emergency Management Agency
FIN	Finance/Admin Section Chief
FOG	Field Operations Guide
GIS	Geographic Information System
HAZMAT	Hazardous Material
HSPD-5	Homeland Security Presidential Directive-5, Management of Domestic Incidents
HSPD-8	Homeland Security Presidential Directive-8, National Preparedness
IAP	Incident Action Plan
IC	Incident Commander
ICP	Incident Command Post
ICS	*Incident Command System*
IC or UC	Incident Command or Unified Command
IMT	Incident Management Team
JFO	Joint Field Office
JIC	Joint Information Center
JIS	Joint Information System
LNO	Liaison Officer
LOG	Logistics Section Chief
MAC	Multi-Agency Coordination Group
MACS	Multi-Agency Coordination Systems
MICIMS	Michigan Critical Incident Management System
NDMS	National Disaster Medical System
NGO	Nongovernmental Organization
NIMS	National Incident Management System
NOC-NRCC	National Operation Center and Response Coordination Center
NRF	National Response Framework
Ops	Operations
POLREP	Pollution Report
PIO	Public Information Officer
PVO	*Private Voluntary Organizations*
R&D	Research and Development
RESTAT	Resources Status
ROSS	Resource Ordering and Status System
SCO	State Coordinating Officer
SDO	Standards Development Organizations
SITREP	Situation Report
SO	Safety Officer
SOP	Standard Operating Procedure
UC	Unified Command
US&R	Urban Search and Rescue

Note: The following acronyms have been revised in accordance with NIMS and NRP:
Joint Public Information Center (JPIC) with Joint Information Center (JIC)
MSP/EMD with MSP/EMHSD
Federal Response Plan (FRP) with National Response Framework (NRF)

1.9: Terms and Definitions

Access Control Point: A point established by law enforcement officials to control access to a hazardous or potentially hazardous area.

Agency: A division of government with a specific function offering a particular kind of assistance. In ICS, agencies are defined either as jurisdictional (having statutory responsibility for incident management) or as assisting or cooperating (providing resources or other assistance).

Agency Representative: A person assigned by a primary, assisting, or cooperating federal, state, local, or tribal government agency or private entity that has been delegated authority to make decisions affecting that agency's or organization's participation in incident management activities following appropriate consultation with the leadership of that agency.

Area Command (Unified Area Command): An organization established (1) to oversee the management of multiple incidents that are each being handled by an ICS organization; or (2) to oversee the management of large or multiple incidents to which several Incident Management Teams have been assigned. Area Command has the responsibility to set overall strategy and priorities, allocate critical resources according to priorities, ensure that incidents are properly managed, and ensure that objectives are met and strategies followed. Area Command becomes Unified Area Command when incidents are multi-jurisdictional. Area Command may be established at an emergency operations center facility or at some location other than an incident command post.

Assessment: The evaluation and interpretation of measurements and other information to provide a basis for decision-making.

Assignments: Tasks given to resources to perform within a given operational period that are based on operational objectives defined in the IAP.

Assistant: Title for subordinates of principal command staff positions. The title indicates a level of technical capability, qualifications, and responsibility subordinate to the primary positions. Assistants may also be assigned to unit leaders.

Assisting Agency: An agency or organization providing personnel, services, or other resources to the agency with direct responsibility for incident management. See also Supporting Agency.

Available Resources: *Resources assigned to an incident, checked in, and available for a* mission assignment, normally located in a staging area.

Badging: Based on credentialing and resource ordering, provides incident-specific credentials and can be used to limit access to various incident sites.

Backup Management Information Systems: Management information systems should have redundancy of power supply and communication lines. But resource managers should also identify alternate backup systems to manage resources, in the event that the primary resource management system is disrupted by incident conditions.

Biological Agents: Living organisms or the toxic materials derived from them that cause disease or harm to humans, animals or plants, or cause deterioration of material. Biological agents may be used as liquid droplets, aerosols, or dry powders.

Branch: The organizational level having functional or geographical responsibility for major aspects of incident operations. A branch is organizationally situated between the section and the division or group in the Operations Section, and between the section and units in the Logistics Section. Branches are identified by the use of Roman numerals or by functional area.

Catastrophic Incident (EVENT): Any natural or manmade incident, including terrorism, that results in extraordinary levels of mass casualties, damage, or disruption severely affecting the population, infrastructure, environment, economy, national morale, and/or government functions. A catastrophic incident could result in sustained national impacts over a prolonged period of time; almost immediately exceeds resources normally available to state, local, tribal and private sector authorities in the impacted area; and significantly interrupts governmental operations and emergency services to such an extent that national security could be threatened.

Categorizing Resources: Resources are categorized by size, capacity, capability, skill, and other characteristics. This makes the resource ordering and dispatch process within jurisdictions, across jurisdictions, and between governmental and non-governmental entities more efficient and ensures that Incident Command receives resources appropriate to their needs.

CBRNE Weapons: Weapons of Mass Destruction are also commonly referred to as "CBRNE" Weapons – an acronym for chemical, biological, radiological, nuclear and explosives / incendiary devices.

Certifying Personnel: Personnel certification entails authoritatively attesting that individuals meet professional standards for the training, experience, and performance required for key incident management functions.

Chain of Command: A series of command, control, executive, or management positions in hierarchical order of authority.

Check-In: The process through which resources first report to an incident. Check-in locations include the incident command post, resources unit, incident base, camps, staging areas, or directly on the site.

Chemical Agents: A chemical substance that is intended for use in military operations to kill, seriously injure, or incapacitate people through it physiological effects. The agent may be employed as a vapor, aerosol, or liquid; it can be either a casualty / toxic agent or an incapacitating agent.

Chief: The ICS title for individuals responsible for management of functional sections: Operations, Planning, Logistics, Finance/Administration, and Intelligence (if established as a separate section).

Command: The act of directing, ordering, or controlling by virtue of explicit statutory, regulatory, or delegated authority.

Command Staff: In an incident management organization, the Command Staff consists of the Incident Command and the special staff positions of Public Information Officer, Safety Officer, Liaison Officer, and other positions as required, who report directly to the Incident Commander. They may have an assistant or assistants, as needed.

Common Operating Picture: A broad view of the overall situation as reflected by situation reports, aerial photography, and other information or intelligence.

Common Terminology: Normally used words and phrases—avoiding the use of different words/phrases for same concepts—to ensure consistency and to allow diverse incident management and support organizations to work together across a wide variety of incident management functions and hazard scenarios.

Communications Unit: An organizational unit in the Logistics Section responsible for providing communication services at an incident or an EOC. A Communications Unit may also be a facility (e.g., a trailer or mobile van) used to support an Incident Communications Center.

Comprehensive Emergency Management (CEM): An integrated approach to the management of programs and activities that encompasses all phases (prevention, mitigation, preparedness, response, and recovery) of incident management, all types of emergencies and disasters (natural, technological, human-related, and WMD attack), all levels of government (local, state, and federal), nongovernmental organizations, and the private sector. (Note: CEM was a commonly used term prior to development of the National Response Framework. Now, the term "domestic incident management" is preferred. However, CEM is still widely used in the emergency management field and the two terms mean essentially the same thing.)

Consequence Management: Measures to protect public health and safety, restore essential government services, and provide emergency relief to governments, businesses and individuals affected by the consequences of terrorism.

Contamination: The deposit of chemical, biological or radioactive material on the surfaces of structures, objects, or persons following a nuclear incident/explosion or a hazardous material incident.

Continuity of Operations: An effort within individual organizations to ensure that Primary Mission Essential Functions continue to be performed during a wide range of emergencies.

Cooperating Agency: This entity supplies assistance other than direct operational or support functions or resources to the incident management effort.

Coordinate: To advance systematically an analysis and exchange of information among principals who have or may have a need to know certain information to carry out specific incident management responsibilities.

Corrective Action and Mitigation Plans: Corrective action plans are designed to implement procedures that are based on lessons learned from actual incidents or from training and exercises. Mitigation plans describe activities that can be taken prior to, during, or after an incident to reduce or eliminate risks to persons or property or to lessen the actual or potential effects or consequences of an incident.

County or Local Emergency Management Coordinator (EMC): A person appointed pursuant to 1976 PA 390, as amended, to coordinate emergency management activities for a county or municipal emergency management program. Also commonly called County or Local "Emergency Manager."

Credentialing: Involves providing documentation that can authenticate and verify the certification and identity of designated incident managers and emergency responders.

Crisis Management: Measures to identify, acquire, and plan the use of resources needed to anticipate, prevent, and/or resolve a threat or act of terrorism.

Critical Infrastructure: Systems and assets, whether physical or virtual, so vital to the United States that the incapacity or destruction of such systems and assets would have a debilitating impact on security, national economic security, national public health or safety, or any combination of those matters.

CYBER: Pertaining to computers and their support systems, such as servers, routers, and switches, which support critical infrastructure.

Damage Assessment: The systematic process of determining and appraising the nature and *extent of the loss, suffering, or harm to a community resulting from an emergency or disaster.*

Decontamination: The reduction or removal of contaminating material from a structure, area, object, or person. Decontamination may be accomplished by: 1) treating the surface so as to remove or decrease the contamination; 2) letting the material stand so that the contamination is decreased as a result of natural decay; and 3) covering the contamination.

Decontamination Center: A location with shower facilities and a large parking area used to monitor evacuees for contamination and to decontaminate evacuees and their belongings, if necessary. Several of these centers may be established on the periphery of the hazard area. They may also double as reception centers.

Deputy: A fully qualified individual who, in the absence of a superior, can be delegated the authority to manage a functional operation or perform a specific task. In some cases, a deputy can act as relief for a superior and, therefore, must be fully qualified in the position. Deputies can be assigned to the Incident Commander, General Staff, and Branch Directors.

Department of Homeland Security (DHS): A Cabinet-level agency established within the federal government in 2002 to coordinate and report directly to the President on all issues related to domestic terrorism preparedness. The mission of the Department of Homeland Security is to oversee and coordinate a comprehensive national strategy to safeguard the country against terrorism and other homeland security threats, and to respond to any attacks that may occur.

Disaster: An occurrence or threat of widespread or severe damage, injury, or loss of life or property resulting from a natural or human-made cause, including, but not limited to, fire, flood, snowstorm, ice storm, tornado, windstorm, wave action, oil spill, water contamination, utility failure, hazardous peacetime radiological incident, major transportation accident, hazardous materials incident, epidemic, air contamination, blight, drought, infestation, explosion, or hostile military or paramilitary action, or similar occurrences resulting from terrorist activities, riots, or civil disorders, as defined in 1976 PA 390, as amended.

Disaster Mitigation Act (DMA) OF 2000: Public Law 106-390, signed into law on October 30, 2000, which amended sections of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (Stafford Act) and placed new hazard mitigation planning requirements on states and local governments in order to obtain Stafford Act disaster relief assistance.

Disaster Recovery Center (DRC): A satellite component of the JFO that provides a central facility where individuals affected by a disaster can obtain information on disaster recovery

assistance programs from various Federal, State, local, tribal, private-sector, and voluntary organizations.

Disaster Relief Forces: All agencies of state, county and municipal government, private and volunteer personnel, public officers and employees, and all other persons or groups of persons having duties or responsibilities under 1976 PA 390, as amended, or pursuant to a lawful order or directive authorized under this act.

Dispatch: The ordered movement of a resource or resources to an assigned operational mission or an administrative move from one location to another.

District Coordinator: The State Police Emergency Management and Homeland Security Division employee serving at any of eight State Police District Headquarters, whose primary job is to work directly with local communities on emergency management activities.

Division: The partition of an incident into geographical areas of operation. Divisions are established when the number of resources exceeds the manageable span of control of the Operations Chief. A division is located within the ICS organization between the branch and resources in the Operations Section.

Emergency: Absent a presidentially declared emergency, any incident(s), human-caused or natural, that requires responsive action to protect life or property. Under the Robert T. Stafford Disaster Relief and Emergency Assistance Act, an emergency means any occasion or instance for which, in the determination of the President, federal assistance is needed to supplement state and local efforts and capabilities to save lives and to protect property and public health and safety, or to lessen or avert the threat of a catastrophe in any part of the United States.

Emergency Action Level Classification System: A system for classifying emergencies or disasters according to their level of severity. State and local emergency response organizations use this classification system as a basis for emergency actions in accordance with the appropriate emergency operations plan.

Emergency Coordination Center (ECC): The site, established by each state agency, where agency officials gather to provide logistical support, policy direction and technical assistance to the agency representative in the State Emergency Operations Center (SEOC), and to strategically plan and implement the agency's disaster response and recovery activities. Each state agency is tasked to identify, develop and maintain an ECC as part of its emergency and business continuity planning efforts.

Emergency Management Assistance Compact (EMAC): The interstate agreement that streamlines the assistance one governor can lend to another after a natural, technological or human-caused disaster (including a terrorist attack) by providing a framework for flexible response. The EMAC was first introduced in 1993 and the National Emergency Management Association (NEMA) administers the program on behalf of the member states. The EMAC is an arrangement of the states, by the states, and for the states. It addresses all the issues associated with requesting assistance, reimbursement of services, workman's compensation insurance, and liability in advance of a disaster. (In January 2001, Michigan became the 43rd state to join the EMAC.)

Emergency Management Coordinator (EMC): The person appointed pursuant to 1976 PA 390, as amended, to coordinate emergency management activities for an emergency management program. Also commonly called County or Local "Emergency Manager."

Emergency Management Homeland Security Division (EMHSD/MSP): The division within the Department of State Police that coordinates the homeland security and emergency management activities (prevention / mitigation, preparedness, response and recovery) of state and local government and maintains the Michigan Emergency Management Plan. The commanding officer of the division is designated the Deputy State Director of Homeland Security and Emergency Management.

Emergency Management Program: The basic emergency planning and operational entity at the local government level. Each county has an appointed emergency manager and enabling legislation creating an emergency management program. In accordance with the provisions of 1976 PA 390, as amended, municipalities with a population of 10,000 or more may elect to also appoint an emergency manager and maintain a separate emergency management program from the county in which they are located.

Emergency Operating Facility (EOF): The nuclear power plant operator's emergency operating center, in which representatives from the plant owner/operator and the Nuclear Regulatory Commission gather.

Emergency Operations Centers (EOCs): The physical location at which the coordination of information and resources to support domestic incident management (on-scene operations) activities normally takes place. An EOC may be temporary, or may be located in a more central or permanently established facility, perhaps at a higher level of organization within a jurisdiction. EOCs may be organized by major functional disciplines (e.g., fire, law enforcement, and medical services), by jurisdiction (e.g., federal, state, regional, county, city, tribal), or some combination thereof.

Emergency Operations Plan: The plan developed and maintained by an emergency management program as a counterpart to the Michigan Emergency Management Plan for the purpose of organizing and coordinating the emergency management activities of the jurisdiction(s) under the plan. An EOP usually consists of a basic plan or other introductory section with various supporting annexes (sections) for each service or function. (Note: in EMD/MSP Publication 201 – "Local Emergency Planning Workbook," EOPs are referred to as "Emergency Action Guidelines" or "EAGs." Although differing slightly in format and level of content, EOPs and EAGs are, for all intents and purposes, identical documents.)

Emergency Planning Zone (EPZ): The area around a nuclear power plant for which planning is required to assure that prompt and effective action will be taken to protect the public in the event of an accident.

Emergency Public Information: Information that is disseminated primarily in anticipation of an emergency or during an emergency. In addition to providing situational information to the public, it also frequently provides directive actions required to be taken by the general public.

Emergency Response Provider: Includes federal, state, local, and tribal emergency public safety, law enforcement, emergency response, emergency medical (including hospital emergency facilities), and related personnel, agencies, and authorities. See Section 2 (6), Homeland Security Act of 2002, Pub. L. 107-296, 116 Stat. 2135 (2002). Also known as Emergency Responder.

Emergency Support Function (ESF) – A grouping of state agency capabilities into an organizational structure to provide the support, resources, program implementation, and services that are most likely to be needed to prevent injuries, save lives, protect property and the environment, restore essential services and critical infrastructure, and help victims and communities return to normal, when feasible, following a disaster or emergency. The ESFs serve as the primary operational-level mechanism through which state agencies provide assistance to

local communities. The Michigan Emergency Management Plan (MEMP) has eight ESFs and the National Response Framework (NRF) has a total of 15 ESFs.

Essential Resource: Any facility, supply, or piece of equipment considered vital to emergency operations and which should be protected either by movement away from a direct risk or securing it in place.

Evacuation: Organized, phased, and supervised withdrawal, dispersal, or removal of civilians from dangerous or potentially dangerous areas, and their reception and care in safe areas.

Event: A planned, non-emergency activity. ICS can be used as the management system for a wide range of events, e.g., parades, concerts, or sporting events.

EXECUTIVE DIRECTIVE 2002-1 – A Michigan Executive Directive issued by Governor John Engler on January 24, 2002 that 1) designated the State Director of Emergency Management as the State Director of Homeland Security, 2) designated the Emergency Management Division, Department of State Police as the focal point for homeland security issues in Michigan, 3) redefined the mission of the Michigan Homeland Security Task Force, and 4) directed state agencies to actively support the Task Force and its ongoing activities. (Note: ED 2002-1 was repealed by Executive Order 2003-6 – see below.)

EXECUTIVE DIRECTIVE 2005-9 – A Michigan Executive Directive issued by Governor Jennifer Granholm on September 29, 2005 that adopted the National Incident Management System (NIMS) as the state standard for incident management in Michigan.

EXECUTIVE ORDER 1998-5 – A Michigan Executive Order issued by Governor John Engler on July 29, 1998 that established the Michigan Hazard Mitigation Coordinating Council (MHMCC) and assigned administrative functions associated with the council to the Emergency Management Division, Department of State Police.

EXECUTIVE ORDER 2003-6 – A Michigan Executive Order issued by Governor Jennifer Granholm on April 15, 2003 that established 1) the office of Assistant Adjutant General for Homeland Security (within the Department of Military and Veterans Affairs) to advise the Governor and state agency directors on the development of homeland security policies, programs and procedures, 2) the Michigan Homeland Protection Board (within the Department of State Police) to develop, implement and revise a state homeland security strategy, and 3) the Michigan Homeland Security Advisory Council to advise the Board and to provide input, advice and recommendations on homeland security issues. EO 2003-6 also abolished the Michigan Homeland Security Task Force established by Executive Directive 2002-1, re-affirmed the existing homeland security roles and responsibilities within the Department of State Police, and directed state agencies to actively participate in state homeland security efforts.

Federal: Of or pertaining to the federal government of the United States of America. Function: Function refers to the five major activities in ICS: Command, Operations, Planning, Logistics, and Finance/Administration. The term function is also used when describing the activity involved, e.g., the planning function. A sixth function, Intelligence, may be established, if required, to meet incident management needs.

Federal Coordinating Officer (FCO): The federal officer appointed by the President to manage federal resource support activities related to Stafford Act major disasters and emergencies – including the provision of individual assistance, public assistance, and hazard mitigation assistance. The FCO is responsible for coordinating the timely delivery of federal disaster

assistance resources and programs to the affected state and local governments, individuals and families, and the private sector.

Federal Emergency Management Agency (FEMA): The primary federal agency that coordinates emergency planning, preparedness, mitigation, response and recovery within the federal government, and administers the President's Disaster Relief Program. FEMA is housed within the federal Department of Homeland Security.

Federal Resource Coordinator (FRC): The federal official appointed to manage federal resource support activities related to non-Stafford Act incidents. The FRC is responsible for coordinating support from other federal departments and agencies using interagency agreements and memorandums of understanding.

Field Operations Guide or Handbook: A durable pocket or desk guide that contains essential information required to perform specific assignments or functions.

First Responder: Local and nongovernmental police, fire, and emergency personnel who in the early stages of an incident are responsible for the protection and preservation of life, property, evidence, and the environment, including emergency response providers as defined in section 2 of the Homeland Security Act of 2002 (6 U.S.C. 101), as well as emergency management, public health, clinical care, public works, and other skilled support personnel (such as equipment operators) who provide immediate support services during prevention, response, and recovery operations. First responders may include personnel from federal, state, local, tribal and nongovernmental organizations.

General Shelter Area: The "General Shelter Area" comprises all of the area outside the 2 psi ring of a nuclear attack aiming point. The primary threat in this area is fallout radiation with a potential one-week unprotected radiation dose range from 3,000R to 6,000R. Protective fallout shelter with a protection factor of PF40 or better is a necessity for all persons. The primary shelter source would be home basements and national fallout shelter survey facilities.

General Staff: A group of incident management personnel organized according to function and reporting to the Incident Commander. The General Staff normally consists of the Operations Section Chief, Planning Section Chief, Logistics Section Chief, and Finance/Administration Section Chief.

Group: Established to divide the incident management structure into functional areas of operation. Groups are composed of resources assembled to perform a special function not necessarily within a single geographic division. Groups, when activated, are located between branches and resources in the Operations Section. (See Division.)

Hazard: *Something that is potentially dangerous or harmful, often the root cause of an unwanted* outcome.

Hazard Mitigation: Any action taken to reduce or permanently eliminate the long-term risk to human life and property from natural, technological and human related hazards.

HOMELAND SECURITY PRESIDENTIAL DIRECTIVE (HSPD)-3 – A Presidential directive issued on March 11, 2002 that established policy for the creation of the Homeland Security Advisory System (HSAS) to provide a comprehensive and effective means to disseminate information regarding the risk of terrorist acts to federal, state and local authorities and to the American people. The HSAS provides warnings in the form of a set of graduated "Threat

Conditions" that increase as the risk increases. At each Threat Condition, federal departments and agencies are responsible for implementing a corresponding set of protective measures to further reduce vulnerability or increase response capability during a period of heightened alert.

HOMELAND SECURITY PRESIDENTIAL DIRECTIVE (HSPD)-5 – A Presidential directive issued on February 28, 2003 that is intended to enhance the ability of the United States to manage domestic incidents (which include terrorist attacks, major disasters, and other emergencies) by establishing a single, comprehensive National Incident Management System (NIMS). Refer to the National Incident Management System and National Response Framework (NRF) definitions for additional information.

HOMELAND SECURITY PRESIDENTIAL DIRECTIVE (HSPD)-7 – A Presidential directive issued on December 17, 2003 that established a national policy for federal departments and agencies to identify and prioritize U.S. critical infrastructure and key resources and to protect them from terrorist attacks. (Note: the State of Michigan is actively involved in the critical infrastructure protection process. Refer to the Weapons of Mass Destruction Attack Procedures section.)

HOMELAND SECURITY PRESIDENTIAL DIRECTIVE (HSPD)-8 – A Presidential directive issued on December 17, 2003 that established policies to strengthen the preparedness of the United States to prevent and respond to threatened or actual domestic terrorist attacks, major disasters, and other emergencies by requiring a national domestic all-hazards preparedness goal, establishing mechanisms for improved delivery of federal preparedness assistance to states and local governments, and outlining actions to strengthen preparedness capabilities of federal, state and local entities.

Incident: An occurrence or event, natural or human-caused, that requires an emergency response to protect life or property. Incidents can, for example, include major disasters, emergencies, terrorist attacks, terrorist threats, wild land and urban fires, floods, hazardous materials spills, nuclear accidents, aircraft accidents, earthquakes, hurricanes, tornadoes, tropical storms, war-related disasters, public health and medical emergencies, and other occurrences requiring an emergency response.

Incident Action Plan (IAP): An oral or written plan containing general objectives reflecting the overall strategy for managing an incident. It may include the identification of operational resources and assignments. It may also include attachments that provide direction and important information for management of the incident during one or more operational periods.

Incident Command Post (ICP): The field location at which the primary tactical-level, on-scene incident command functions are performed. The ICP may be collocated with the incident base or other incident facilities and is normally identified by a green rotating or flashing light.

Incident Command System (ICS): A standardized on-scene emergency management construct specifically designed to provide for the adoption of an integrated organizational structure that reflects the complexity and demands of single or multiple incidents, without being hindered by jurisdictional boundaries. ICS is the combination of facilities, equipment, personnel, procedures, and communications operating within a common organizational structure, designed to aid in the management of resources during incidents. It is used for all kinds of emergencies and is applicable to small as well as large and complex incidents. Various jurisdictions and agencies, both public and private, use ICS to organize field-level incident management operations.

Incident Commander (IC): The individual responsible for all incident activities, including the development of strategies and tactics and the ordering and the release of resources. The IC has

overall authority and responsibility for conducting incident operations and is responsible for the management of all incident operations at the incident site.

Incident Communications: Incident Command manages communications at an incident, using a common communications plan and an incident-based communications center established solely for use by the command, tactical, and support resources assigned to the incident. All entities involved in managing the incident will utilize common terminology, prescribed by NIMS, for communications.

Incident Management Team: An Incident Commander and the appropriate Command and General Staff personnel assigned to an incident. The level of training and experience of the IMT members, coupled with the identified formal response requirements and responsibilities of the IMT, are factors in determining "type," or level, of IMT.

Incident Objectives: Statements of guidance and direction necessary for selecting appropriate strategy(s) and the tactical direction of resources. Incident objectives are based on realistic expectations of what can be accomplished when all allocated resources have been effectively deployed. Incident objectives must be achievable and measurable, yet flexible enough to allow strategic and tactical alternatives.

Incident of National Significance: An actual or potential high-impact event that requires robust coordination of the federal response in order to save lives and minimize damage, and provide the basis for long-term community and economic recovery.

- The secretary of Homeland Security, in consultation with other departments and agencies, and the White House, as appropriate, declares Incidents of National Significance.
- There are no automatic triggers for an Incident of National Significance.
- The secretary of Homeland Security will manage the federal government's response following the declaration of an Incident of National Significance.

Infrastructure: The manmade physical systems, assets, projects, and structures, publicly and/or privately owned, that are used by or provide benefit to the public. Examples of infrastructure include utilities, bridges, levees, drinking water systems, electrical systems, communications systems, dams, sewage systems, and roads.

Initial Action: The actions taken by those responders first to arrive at an incident site. Initial Response: Resources initially committed to an incident.

In-Place Sheltering: A population protection strategy that provides for the sheltering indoors of people to prevent contact with a hazard.

Intelligence Officer: The intelligence officer is responsible for managing internal information, intelligence, and operational security requirements supporting incident management activities. These may include information security and operational security activities, as well as the complex task of ensuring that sensitive information of all types (e.g., classified information, law enforcement sensitive information, proprietary information, or export-controlled information) is handled in a way that not only safeguards the information, but also ensures that it gets to those who need access to it to perform their missions effectively and safely.

Interoperability - Ability of systems, personnel, and equipment to provide and receive functionality, data, information and/or services to and from other systems, personnel, and

equipment, between both public and private agencies, departments, and other organizations, in a manner enabling them to operate effectively together. Interoperability allows emergency management/response personnel and their affiliated organizations to communicate within and across agencies and jurisdictions via voice, data, or video-on-demand, in real time, when needed, and when authorized.

Job Aid: A checklist or other aid that is useful in performing or training for a job.

Joint Field Office (JFO): A temporary federal facility established locally to provide a central point for federal, state, local, and tribal executives with responsibility for incident oversight, direction, and/or assistance to effectively coordinate protection, prevention, preparedness, response, and recovery actions.

Joint Field Office Coordination Group: The JFO Coordination Group functions as a multi-agency coordination entity and works jointly to establish priorities (single or multiple incidents) and associated resource allocation, resolve agency policy issues, and provide strategic guidance to support federal incident management activities. When activated, the JFO works in coordination with the state, county, and local EOCs to support incident management efforts.

Joint Information Center (JIC): A facility established to coordinate all incident-related public information activities. It is the central point of contact for all news media at the scene of the incident. Public information officials from all participating agencies should collocate at the JIC.

Joint Information System (JIS): Integrates incident information and public affairs into a cohesive organization designed to provide consistent, coordinated, timely information during crisis or incident operations. The mission of the JIS is to provide a structure and system for developing and delivering coordinated interagency messages; developing, recommending, and executing public information plans and strategies on behalf of the IC; advising the IC concerning public affairs issues that could affect a response effort; and controlling rumors and inaccurate information that could undermine public confidence in the emergency response effort.

Joint Operations Center (JOC): A Federal Bureau of Investigation (FBI) facility established to manage a terrorist threat based upon a graduated and flexible response. The JOC is the focal point for all federal investigative law enforcement activities during a terrorist or potential terrorist incident or any other significant criminal incident. It is managed by the Senior Federal Law Enforcement Official (SFLEO) – normally the FBI Senior Agent-in-Charge (SAC). The JOC consists of four functional groups: Command; Operations; Support; and Consequence Management. The Consequence Management Group consists of representatives from federal, state and local consequence management organizations to address pre-release and post-release consequence operations. The JOC becomes a component of the JFO when the National Response Plan is activated.

Jurisdiction: A range or sphere of authority. Public agencies have jurisdiction at an incident related to their legal responsibilities and authority. Jurisdictional authority at an incident can be *political* or *geographical* (e.g., city, county, tribal, state, or federal boundary lines) or *functional* (e.g., law enforcement, public health).

Liaison: A form of communication for establishing and maintaining mutual understanding and cooperation.

Liaison Officer: A member of the Command Staff responsible for coordinating with representatives from cooperating and assisting agencies.

Local Government: A county, municipality, city, town, township, local public authority, school district, special district, intrastate district, council of governments (regardless of whether the council of governments is incorporated as a nonprofit corporation under state law), regional or interstate government entity, or agency or instrumentality of a local government; an Indian tribe or authorized tribal organization, or in Alaska a Native village or Alaska Regional Native Corporation; a rural community, unincorporated town or village, or other public entity. See Section 2 (10), Homeland Security Act of 2002, Pub. L. 107-296, 116 Stat. 2135 (2002).

Local State of Emergency: A declaration by a county or municipality with an appointed emergency manager (pursuant to 1976 PA 390, as amended), when circumstances indicate that the occurrence or threat of widespread or severe damage, injury, or loss of life or property from natural or human-made cause exists.

Logistics: Providing resources and other services to support incident management.

Logistics Section: The section responsible for providing facilities, services, and material support for the incident.

Major Disaster: As defined under the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5122), a major disaster is any natural catastrophe (including any hurricane, tornado, storm, high water, wind-driven water, tidal wave, tsunami, earthquake, volcanic eruption, landslide, mudslide, snowstorm, or drought), or, regardless of cause, any fire, flood, or explosion, in any part of the United States, which in the determination of the President causes damage of sufficient severity and magnitude to warrant disaster assistance under this Act to supplement the efforts and available resources of states, tribes, local governments, and disaster relief organizations in alleviating the damage, loss, hardship, or suffering caused thereby.

Management by Objective: A management approach that involves a four-step process for achieving the incident goal. The Management by Objectives approach includes the following: establishing overarching objectives; developing and issuing assignments, plans, procedures, and protocols; establishing specific, measurable objectives for various incident management functional activities and directing efforts to fulfill them, in support of defined strategic objectives; and documenting results to measure performance and facilitate corrective action.

Management Information Systems: Used to collect, update, and process data; track resources; and display their readiness status. Management information systems should incorporate resource accounting that anticipates reimbursement requirements.

Metrics: Measurable standards which are useful in describing a resource's capability.

Michigan Emergency Management Assistance Compact (MEMAC): The statewide mutual-aid assistance compact, authorized under 1976 PA 390, as amended, that allows participating jurisdictions to render or receive assistance in time of crisis and share vital public safety services and resources more effectively and efficiently. The MEMAC is designed specifically for those situations in which a participating jurisdiction has exhausted its local resources (including those available through local / regional mutual aid or reciprocal aid compacts or agreements), or its resources are inadequate or overwhelmed in response to a threat or event being faced, and it requires additional resources (provided in a timely manner) to protect public health and safety, property or the environment. (The EMHSD/MSP administers the MEMAC on behalf of the State

of Michigan and is responsible for processing requests for resources by participating jurisdictions.)

Michigan Emergency Management Plan (MEMP): The plan developed and continuously maintained by the Emergency Management Division, Department of State Police, pursuant to 1976 PA 390, as amended, for the purpose of coordinating the homeland security and emergency management activities of prevention, mitigation, preparedness, response and recovery within the state.

Mitigation: The activities designed to reduce or eliminate risks to persons or property or to lessen the actual or potential effects or consequences of an incident. Mitigation measures may be implemented prior to, during, or after an incident. Mitigation measures are often informed by lessons learned from prior incidents. Mitigation involves ongoing actions to reduce exposure to, probability of, or potential loss from hazards. Measures may include zoning and building codes, floodplain buyouts, and analysis of hazard related data to determine where it is safe to build or locate temporary facilities. Mitigation can include efforts to educate governments, businesses, and the public on measures they can take to reduce loss and injury.

Mobilization: The process and procedures used by all organizations (federal, state, local, and tribal) for activating, assembling, and transporting all resources that have been requested to respond to or support an incident.

Multi-agency Coordination Entity: A multi-agency coordination entity functions within a broader Multi-agency Coordination System. It may establish the priorities among incidents and associated resource allocations, eliminate agency policy conflicts, and provide strategic guidance and direction to support incident management activities.

Multi-agency Coordination (MAC) Group: A group of administrators or executives, or their appointed representatives, who are typically authorized to commit agency resources and funds. A MAC Group can provide coordinated decision-making and resource allocation among cooperating agencies, and may establish the priorities among incidents, harmonize agency policies, and provide strategic guidance and direction to support incident management activities. MAC Groups *may also be known as multi-agency committees, emergency management committees,* or as otherwise defined by the Multi-agency Coordination System.

Multi-agency Coordination Systems: Multi-agency Coordination Systems provide the architecture to support coordination for incident prioritization, critical resource allocation, communications systems integration, and information coordination. The components of Multi-agency Coordination Systems include facilities, equipment, emergency operations centers (EOCs), specific multi-agency coordination entities, personnel, procedures, and communications. These systems assist agencies and organizations to fully integrate the subsystems of the NIMS.

Multi-jurisdictional Incident: An incident requiring action from multiple agencies that each have jurisdiction to manage certain aspects of an incident. In ICS, these incidents will be managed under Unified Command.

Mutual-Aid Agreement: Written agreement between agencies and/or jurisdictions that they will assist one another on request, by furnishing personnel, equipment, and/or expertise in a specified manner.

National: Of a nationwide character, including the federal, state, local, and tribal aspects of governance and polity.

National Database of Incident Reports: Through the NIMS Integration Center, federal, state, local, and tribal organizations responsible for receiving initial incident reports will work collaboratively to develop and adopt a national database of incident reports that can be used to support incident management efforts.

National Disaster Medical System (NDMS): This cooperative, asset-sharing partnership involves four federal agencies: The departments of Health and Human Services, Veterans Affairs, Homeland Security, and Defense. NDMS provides resources for meeting the continuity of care and mental health services requirements of the Emergency Support Function 8 in the Federal Response Plan. NIMS: A system mandated by HSPD-5 that provides a consistent nationwide approach for federal, state, local, and tribal governments; the private-sector, and nongovernmental organizations to work effectively and efficiently together to prepare for, respond to, and recover from domestic incidents, regardless of cause, size, or complexity. To provide for interoperability and compatibility among federal, state, local, and tribal capabilities, the NIMS includes a core set of concepts, principles, and terminology. HSPD-5 identifies these as the ICS; Multi-agency Coordination Systems; training; identification and management of resources (including systems for classifying types of resources); qualification and certification; and the collection, tracking, and reporting of incident information and incident resources.

National Incident Management System (NIMS): A system mandated by Homeland Security Presidential Directive (HSPD)-5 that provides a consistent nationwide approach for federal, state, tribal, and local governments to work effectively and efficiently together to prepare for, respond to, and recover from domestic incidents (which includes terrorist attacks, major disasters, and other emergencies), regardless of their cause, size or complexity. To provide for interoperability and compatibility among federal, state and local capabilities, the NIMS includes a core set of concepts, principles, and terminology. HSPD-5 identifies these as the incident command system; multi-agency coordination systems; unified command; training; identification and management of resources (including systems for classifying types of resources); qualifications and certifications; and the collection, tracking, and reporting of incident information and incident resources. (Note: the Incident Management System [IMS] for the State Emergency Operations Center, as described in the Direction and Control ESF of the MEMP, is compatible with the NIMS as currently developed.)

National Response Framework (NRF): The framework developed by the federal Department of Homeland Security (DHS), pursuant to Homeland Security Presidential Directive (HSPD)-5, which integrates the family of federal domestic prevention, preparedness, response and recovery plans into a single, all-discipline, all-hazards plan for domestic incident management. The NRF is built on the template of the National Incident Management System (NIMS), which provides a standardized framework for incident management at all jurisdictional levels -- regardless of the cause, size or complexity of the incident.

National Response Plan: A plan mandated by HSPD-5 that integrates federal domestic prevention, preparedness, response, and recovery plans into one all-discipline, all-hazards plan.

Nongovernmental Organization: *An entity with an association that is based on interests of its* members, individuals, or institutions and that is not created by a government, but may work cooperatively with government. Such organizations serve a public purpose, not a private benefit. Examples include faith-based charity organizations and the American Red Cross.

Operational Period: The time scheduled for executing a given set of operation actions, as specified in the Incident Action Plan. Operational periods can be of various lengths, although usually not over 24 hours.

Operations Section Chief: The Operations Section Chief directly manages all incident tactical activities and implements the Incident Action Plan.

Operations Section: The section responsible for all tactical incident operations. In ICS, it normally includes subordinate branches, divisions, and/or groups.

Personnel Accountability: The ability to account for the location and welfare of incident personnel. It is accomplished when supervisors ensure that ICS principles and processes are functional and that personnel are working within established incident management guidelines.

Planned Evacuation Area: The "Planned Evacuation Area" is defined by known land features (streets, railroads, rivers, etc.) from the center of a nuclear attack aiming point out to approximately 7 to 5 psi. This area is further divided into sectors or zones to facilitate evacuation, population estimates, route designations, and shelter area identification.

Planning Meeting: A meeting held as needed prior to and throughout the duration of an incident to select specific strategies and tactics for incident control operations and for service and support planning. For larger incidents, the planning meeting is a major element in the development of the Incident Action Plan (IAP).

Planning Section: Responsible for the collection, evaluation, and dissemination of operational information related to the incident, and for the preparation and documentation of the IAP. This section also maintains information on the current and forecasted situation and on the status of resources assigned to the incident.

Preliminary Damage Assessment (PDA): An assessment conducted by teams of federal, state and local officials to determine the severity and magnitude of a disaster and also to identify capabilities and resources of state, local and other federal agencies.

Preparedness: The range of deliberate, critical tasks and activities necessary to build, sustain, and improve the operational capability to prevent, protect against, respond to, and recover from domestic incidents. Preparedness is a continuous process. Preparedness involves efforts at all levels of government and between government and private-sector and nongovernmental organizations to identify threats, determine vulnerabilities, and identify required resources. Within the NIMS, preparedness is operationally focused on establishing guidelines, protocols, and standards for planning, training and exercises, personnel qualification and certification, equipment certification, and publication management.

Preparedness Organizations: The groups and forums that provide interagency coordination for domestic incident management activities in a non-emergency context. Preparedness organizations can include all agencies with a role in incident management, for prevention, preparedness, response, or recovery activities. They represent a wide variety of committees, planning groups, and other organizations that meet and coordinate to ensure the proper level of planning, training, equipping, and other preparedness requirements within a jurisdiction or area.

Preparedness Programs: Individual jurisdictions establish programs that address the requirements for each step of the preparedness cycle (planning, training, equipping, exercising, evaluating, and taking action to correct and mitigate). These programs should adopt relevant NIMS standards, guidelines, processes, and protocols.

Presidential Decision Directive (PDD) 39: Presidential Decision Directive 39, U.S. Policy on Counterterrorism, establishes policy to reduce the nation's vulnerability to terrorism, deter and respond to terrorism, and strengthen capabilities to detect, prevent, defeat, and manage the

consequences of terrorist use of weapons of mass destruction (WMD). (See separate definition of WMD.)

Presidential Decision Directive (PDD) 62: Presidential Decision Directive 62, Combating Terrorism, reinforces the missions of federal departments and agencies charged with roles in defeating terrorism.

Prevention: Actions to avoid an incident or to intervene to stop an incident from occurring. Prevention involves actions to protect lives and property. It involves applying intelligence and other information to a range of activities that may include such countermeasures as deterrence operations; heightened inspections; improved surveillance and security operations; investigations to determine the full nature and source of the threat; public health and agricultural surveillance and testing processes; immunizations, isolation, or quarantine; and, as appropriate, specific law enforcement operations aimed at deterring, preempting, interdicting, or disrupting illegal activity and apprehending potential perpetrators and bringing them to justice.

Private Sector: Organizations and entities that are not part of any governmental structure. It includes for-profit and not-for-profit organizations, formal and informal structures, commerce and industry, and private voluntary organizations.

Press Secretary: Someone typically associated with a political official, who will typically conjoin politician's interest with the apparent success of incident response.

Processes: Systems of operations that incorporate standardized procedures, methodologies, and functions necessary to provide resources effectively and efficiently. These include resource typing, resource ordering and tracking, and coordination.

Protective Actions: Emergency measures taken to protect the population from the effects of a hazard. These may include in-place sheltering or evacuation.

Protection Action Guides (PAGs): Guides for protective action in the event of a nuclear accident based on the projected or committed dose values of individuals in the general population. Protective actions would be warranted provided the reduction in individual dose expected from these actions is not offset by excessive risks to safety in taking the protective actions.

Public Affairs Officer: A press attaché representing an agency who is charged with maintaining positive relationships between the agency and the public.

Public Information Officer: A member of the Command Staff responsible for interfacing with the public and media or with other agencies with incident-related information requirements.

Public Information Systems: Processes, procedures, and systems for communicating timely and accurate information to the public during crisis or emergency situations.

Public Relations Officer: Similar to a press secretary, but representing an agency.

Publications Management: The publications management subsystem includes materials development, publication control, publication supply, and distribution. The development and distribution of NIMS materials is managed through this subsystem. Consistent documentation is

critical to success, because it ensures that all responders are familiar with the documentation used in a particular incident regardless of the location or the responding agencies involved.

Pulled Resources: Resources requested by Incident Command through communication with a dispatcher, EOC, or other resource coordination unit.

Qualification and Certification: This subsystem provides recommended qualification and certification standards for emergency responder and incident management personnel. It also allows the development of minimum standards for resources expected to have an interstate application. Standards typically include training, currency, experience, and physical and medical fitness.

Reception Area: This refers to a location separate from staging areas, where resources report in for processing and out-processing. Reception areas provide accountability, security, situational awareness briefings, safety awareness, distribution of IAPs, supplies and equipment, feeding, and bed down.

Recovery: The development, coordination, and execution of service- and site-restoration plans; the reconstitution of government operations and services; individual, private sector, non-governmental and public-assistance programs to provide housing and to promote restoration; long-term care and treatment of affected persons; additional measures for social, political, environmental, and economic restoration; evaluation of the incident to identify lessons learned; post-incident reporting; and development of initiatives to mitigate the effects of future incidents.

Recovery Plan: A plan developed by a state, local, or tribal jurisdiction with assistance from responding federal agencies to restore the affected area.

Regional Response Coordination Center (RRCC): A standing facility operated by DHS/FEMA that coordinates regional response efforts, establishes federal priorities, and implements local federal program support until a JFO is established in the field and/or other key DHS incident management officials can assume their NRP coordination responsibilities. The RRCC establishes communications with the affected State Emergency Operations Center (EOC) and the NOC-NRCC, coordinates deployment of the (Federal Advanced Teams/Individuals) to field locations, assesses damage information, develops situation reports, and issues initial mission assignments.

Reimbursement: Reimbursement provides a mechanism to fund critical needs that arise from incident-specific activities. Reimbursement processes also play an important role in establishing and maintaining the readiness of resources.

Resources: Personnel and major items of equipment, supplies, and facilities available or potentially available for assignment to incident operations and for which status is maintained. Resources are described by kind and type and may be used in operational support or supervisory capacities at an incident or at an EOC.

Resource Identification and Ordering: Resource managers use standardized processes and methodologies to order, identify, mobilize, dispatch, and track the resources required to support incident management activities.

Resource Management: Efficient incident management requires a system for identifying available resources at all jurisdictional levels to enable timely and unimpeded access to resources needed to prepare for, respond to, or recover from an incident. Resource management

under the NIMS includes mutual-aid agreements; the use of special federal, state, local, and tribal teams; and resource mobilization protocols.

Resource Tracking: A standardized, integrated process conducted prior to, during, and after an incident by all emergency management/response personnel and their associated organizations.

Resources Unit: Functional unit within the Planning Section responsible for recording the status of resources committed to the incident. This unit also evaluates resources currently committed to the incident, the effects additional responding resources will have on the incident, and anticipated resource needs.

Response: Activities that address the short-term, direct effects of an incident. Response includes immediate actions to save lives, protect property, and meet basic human needs. Response also includes the execution of EOPs and of mitigation activities designed to limit the loss of life, personal injury, property damage, and other unfavorable outcomes. As indicated by the situation, response activities include applying intelligence and other information to lessen the effects or consequences of an incident; increased security operations; continuing investigations into the nature and source of the threat; ongoing public health and agricultural surveillance and testing processes; immunizations, isolation, or quarantine; and specific law enforcement operations aimed at preempting, interdicting, or disrupting illegal activity, and apprehending perpetrators and bringing them to justice.

Safety Officer: A member of the command staff responsible for monitoring and assessing safety hazards or unsafe situations and for developing measures for ensuring personnel safety.

Section: The organizational level having responsibility for a major functional area of incident management, e.g., Operations, Planning, Logistics, Finance/Administration, and Intelligence. The section is organizationally situated between the branch and the Incident Command.

Shelter: A facility in an area safe from the effects of a hazard that may be used to house and care for evacuees.

Span of Control: The number of individuals a supervisor is responsible for, usually expressed as the ratio of supervisors to individuals. (NIMS calls for a span of control between 1:3 and 1:7.)

Special Needs Population - A population whose members may have additional needs before, during, and after an incident in functional areas, including but not limited to: maintaining independence, communication, transportation, supervision, and medical care. Individuals in need of additional response assistance may include those who have disabilities; who live in institutionalized settings; who are elderly; who are children; who are from diverse cultures, who have limited English proficiency, or who are non-English-speaking; or who are transportation disadvantaged.

Staging Area: Location established where resources can be placed while awaiting a tactical assignment. The Operations Section manages Staging Areas.

Standard Operating Procedure (SOP) or Operations Manual: A complete reference document that details procedures for performing a single function or a number of interdependent functions.

State: When capitalized, refers to any state of the United States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, Guam, American Samoa, the Commonwealth of the Northern Mariana Islands, and any possession of the United States. See Section 2 (14), Homeland Security Act of 2002, Pub. L. 107-296, 116 Stat. 2135 (2002).

State Coordinating Officer (SCO): The person appointed by the Governor to manage all aspects of a federally declared disaster, in cooperation with the Federal Coordinating Officer (FCO). The Division Commander or Assistant Division Commander of the Emergency Management and Homeland Security Division, Department of State Police is normally appointed to this position.

State Director of Homeland Security and Emergency Management: The Director of the Department of State Police or his authorized representative. The Division Commander of the Emergency Management and Homeland Security Division, Department of State Police is the designated Deputy State Director of Homeland Security and Emergency Management.

State Emergency Operations Center (SEOC): The primary center for coordination of state government response and recovery operations in time of disaster or emergency. The SEOC is maintained and operated by the Emergency Management and Homeland Security Division, Department of State Police.

State of Disaster or State of Emergency: A declaration by executive order or proclamation by the Governor under the provisions of 1976 PA 390, as amended, which activates the response and recovery aspects of state and local emergency operation plans

Strategic: Strategic elements of incident management are characterized by continuous long-term, high-level planning by organizations headed by elected or other senior officials. These elements involve the adoption of long-range goals and objectives, the setting of priorities; the establishment of budgets and other fiscal decisions, policy development, and the application of measures of performance or effectiveness.

Strike Team: A set number of resources of the same kind and type that have an established minimum number of personnel.

Strategy: The general direction selected to accomplish incident objectives set by the IC.

Status Reporting: All levels of government initiate status reports (e.g., Situation Reports, [SITREPS] and pollution reports [POLREPS]) and then disseminate them to other jurisdictions.

Supporting Technologies: Any technology that may be used to support NIMS is included in this subsystem. These technologies include orthophoto mapping, remote automatic weather stations, infrared technology, and communications, among various others.

Task Force: Any combination of resources assembled to support a specific mission or operational need. All resource elements within a task force must have common communications and a designated leader.

Technical Assistance: Support provided to state, local, and tribal jurisdictions when they have the resources but lack the complete knowledge and skills needed to perform a required activity (such as mobile-home park design and hazardous material assessments).

Technology Standards: National standards for key systems may be required to facilitate the interoperability and compatibility of major systems across jurisdictional, geographic, and functional lines.

Technology Support: Facilitates incident operations and sustains the research and development (R&D) programs that underpin the long-term investment in the nation's future incident management capabilities.

Technology Use: Agencies must plan in advance for the effective and efficient use of information management technologies (e.g., computers and networks) to tie together all command, tactical, and support units involved in incident management and to enable these entities to share information critical to mission execution and the cataloguing of required corrective actions.

Terrorism: Under the Homeland Security Act of 2002, terrorism is defined as activity that involves an act dangerous to human life or potentially destructive of critical infrastructure or key resources and is a violation of the criminal laws of the United States or of any state or other subdivision in which it occurs, and is intended to intimidate or coerce the civilian population or influence a government or affect the conduct of a government by mass destruction, *assassination, or kidnapping.* See Section 2 (15), Homeland Security Act of 2002, Pub. L. 107-296, 116 Stat. 213 5 (2002).

Threat: An indication of possible violence, harm, or danger.

Tools: Those instruments and capabilities that allow for the professional performance of tasks, such as information systems, agreements, doctrine, capabilities, and legislative authorities.

Tracking and Reporting: Resources: Standardized, integrated process conducted throughout the life cycle of an incident. This process provides incident managers with a clear picture of where resources are located, helps staff prepare to receive resources, protects the safety or personnel and security of supplies and equipment, and enables the coordination of movement of personnel, equipment, and supplies.

Tribal: Any Indian tribe, band, nation, or other organized group or community, including any Alaskan Native Village as defined in or established pursuant to the Alaskan Native Claims Settlement Act (85 stat. 688) [43 U.S.C.A. and 1601 et seq.], that is recognized as eligible for the special federal programs and services provided to Indians because of their status as Indians.

Type: A classification of resources in the ICS that refers to capability. Type 1 is generally considered to be more capable than Types 2, 3, or 4, respectively, because of size; power; capacity; or, in the case of incident management teams, experience and qualifications. Unified Area Command: A Unified Area Command is established when incidents under an Area Command are multi-jurisdictional. (See Area Command.)

Unified Approach: A major objective of preparedness efforts is to ensure mission integration and interoperability in response to emergent cries across functional and jurisdictional lines, as well as between public and private organizations.

Unified Area Command: A Unified Area Command is established when incidents under an Area Command and multi-jurisdictional. (See Area Command)

Unified Command: An application of ICS used when there is more than one agency with incident jurisdiction or when incidents cross political jurisdictions. Agencies work together through the designated members of the UC, often the senior person from agencies and/or disciplines participating in the UC, to establish a common set of objectives and strategies and a single IAP.

Unit: The organizational element having functional responsibility for a specific incident planning, logistics, or finance/administration activity.

Unity of Command: The concept by which each person within an organization reports to one and only one designated person. The purpose of unity of command is to ensure unity of effort under one responsible commander for every objective.

Unsolicited Goods: Donated items offered by and/or sent to the incident area by the public, the private sector, or other source, that have not been requested by government or nonprofit disaster relief coordinators.

Volunteer: For purposes of NIMS, a volunteer is any individual accepted to perform services by the lead agency, which has authority to accept volunteer services, when the individual performs services without promise, expectation, or receipt of compensation for services performed. See, e.g., 16 U.S.C. 742f(c) and 29 CFR 553.101.

Weapon of Mass Destruction (WMD): Under Title 18, U.S.C. § 2332a, "(1) Any explosive, incendiary, or poison gas, bomb, grenade, rocket having a propellant charge of more than four ounces, or missile having an explosive or incendiary charge of more than one-quarter ounce, or mine or similar device; (2) any weapon that is designed or intended to cause death or serious bodily injury through the release, dissemination, or impact of toxic or poisonous chemicals or their precursors; (3) any weapon involving a disease organism; or (4) any weapon that is designed to release radiation or radioactivity at a level dangerous to human life." Weapons of Mass Destruction are also commonly referred to as "CBRNE" Weapons – an acronym for chemical, biological, radiological, nuclear and explosives / incendiary devices.

Integration of the National Incident Management System
Concepts and Principles

GENERAL INFORMATION:

Purpose Statement

The purpose of this document is to guide the incident management functions of Genesee County to conduct efficient, effective, and coordinated emergency operations for all-hazards involving the use of all resources belonging to Genesee County or available to them. The document provides the jurisdiction's basic operations - defining policies, authorities, and protocols, with annexes and appendices attached that assigns the agencies who are involved in a coordinated response with primary responsibilities.

Scope

This document seeks to provide one common all-hazards emergency operations document to be utilized by Genesee County and the communities within. It provides the actions/guidelines to take at the time an incident occurs to the recovery phase, or until an emergency declaration has been terminated. Genesee County has taken various preparedness and incident management steps to enhance its capabilities in responding to emergency incident using this document as guidance. Steps taken include training and exercising emergency responders in the NIMS and ICS concepts and principles. The jurisdiction has also identified its capabilities, looking at resources, personnel, and agencies, and implements the NIMS compliance activities amongst all participating agencies.

Plan Development and Maintenance

This document has been prepared by a planning team consisting of individuals from agencies who have been assigned responsibility in the implementation of this document. These members are authorized representatives of their agency and are capable of committing agency resources, making changes in their organization, and the authority to speak on behalf of their agency. Per P.A. 390, the document shall be updated continuously and in compliance with the planning requirement contained in Pub 201a "Review Guide for Local Emergency Response Plans/Guidelines" provided by the MSP/EMHSD. The chief elected official shall review and approve the document by signing and dating the document. The document shall be approved by MSP/EMHSD if current and placed on file.

Comprehensive Preparedness Guide (CPG) 101, March 2009

SITUATION AND ASSUMPTIONS:

Situation

Refer to Genesee County's hazard mitigation plan for a complete description of the hazards affecting the jurisdiction and their impact, as well as population characteristics and vulnerable facilities.

Assumptions

a. The proper implementation of this document will reduce or prevent the loss of lives and damage to property in Genesee County.

b. Depending on the severity and magnitude of the situation, local resources may not be adequate to deal with every occurrence. It may be necessary to request assistance through volunteer organizations, the private sector, mutual aid agreements, and/or state and federal sources.

c. Emergency Planning is a work in progress, periodically reviewed and updated.

d. All emergency response agencies within the jurisdiction of the Plan are considered to be available to respond to emergency incidents.

e. All planning for care, housing, transportation, and treatment of the special needs population is included in the four phases of emergency management.

CONCEPT OF OPERATIONS

General

a. The legal authority and basis for this document and emergency operations is in Act 390, of the P.A. 1967 as amended, and in the Genesee County Emergency Management Resolution of May 4, 2011.

b. All incidents will be managed using the concepts and principles of NIMS/ICS for the coordination and control of multi-jurisdictional emergency response organizations to an incident.

c. The identified agencies listed in the Annexes/Sections of this document have assigned agency representatives to report to the EOC and serve for coordinating the agency's resources and capabilities in response to an incident within the jurisdiction.

d. ICS will be established for managing and coordinating tactical on-scene operations for all responding disciplines.

Phases of Emergency Management

This document is concerned with all types of hazards that may develop in Genesee County and must account for activities before, during, and after an occurrence. The following phases and associated actions were established to be performed within the scope of this document:

Phase	Purpose	Actions
Mitigation	Reduce the potential for hazard events.	Write plans, train personnel, educate the public, prepare individuals and families, acquire hazard prone properties,
Preparedness	Establish emergency responsibilities and pre-arrange resources.	Publish the plan, test and update the plan, identify capabilities, acquire resources, train personnel, equip first responders, conduct planning workshops, conduct exercises, inventory and maintain resources.
Response	Take action to protect lives, property and stabilize the community.	Use ICS at site and EOC, use NIMS, activate mutual aid, develop incident action plan, and coordinate with multiple agencies and jurisdictions.
Recovery	Restore the community.	conduct damage assessments, review and update plans, apply for disaster assistance, upgrade equipment and communications systems,

Warning and Communications

See the Annexes/Sections for responsibilities and guidelines pertaining to public warning and communications.

GLOSSARY OF INCIDENT MANAGEMENT TERMS

Refer to standalone document provided by MSP/EMHSD, *Glossary of Incident Management Terms, February 2010.*

ADMINISTRATION AND LOGISTICS

a. The state's incident management system, MICIMS, will be utilized for resource management needs. The jurisdiction's resources have been typed and inventoried into MICIMS.

b. Accurate records of all actions taken in an emergency are essential for the design of mitigation activities, training, and possible litigation. Each department head, or that person responsible for an emergency function, must keep detailed, accurate records of all actions taken during an emergency.

c. Mutual aid agreements exist between several municipalities (Fire and Police departments included) the Red Cross, etc. and are used on a regular basis. In addition, effective mutual aid agreements are in place with other local jurisdictions through the Michigan Emergency Management Assistance Compact (MEMAC). Genesee County has signed the MEMAC agreement.

d. Memorandum of Agreements (MOA) or Memorandum of Understanding (MOU) exists throughout the county and Region 3 for multiple disciplines including Fire, Police, Red Cross, etc.

ORGANIZATION AND ASSIGNMENT OF RESPONSIBILITY

The Genesee County emergency management system consists of 14 disciplines to provide a coordinated response and recovery function for the jurisdiction using all resources owned and available to Genesee County. During an emergency, the jurisdiction uses a Functional structure to organize in accordance with the NIMS concepts, for the jurisdiction's incident management operations. The following is a list of the agencies involved who report to the EOC and their primary function(s) they have been assigned during an emergency.

Agency:	Function:
Genesee County 911/Flint 911/Fenton 911	Communications
Genesee County Equalization	Damage Assessment
Office of Genesee County Sheriff	Direction & Control
Medical Control	Emergency Medical Services
Genesee County Association of Fire Chiefs	Fire Services
Department of Human Services	Human Services
Office of Genesee County Sheriff	Law Enforcement
Genesee County Health Department	Public Health
Office of Genesee County Sheriff	Public Information
Genesee County Road Commission/Drain Commission	Public Works
Genesee County 911/ Office of Genesee County Sheriff	Warning

ANNEXES/SECTIONS & APPENDICES

Annexes/Sections

The following annexes/sections contained in this document identify the functions that the jurisdiction has determined to be critical to respond and recover from all-hazards. Each annex contains a signature page for the lead agency representative to approve the annex and ensure the maintenance of the functions. Also contains the activities and considerations that have been determined to respond and recover from an emergency. The following are the functional annexes/sections contained within this document.

Communications
Damage Assessment
Direction & Control
Emergency Medical Services
Fire Services
Human Services
Law Enforcement
Public Health
Public Information
Public Works
Warning

Appendices

The document contains supplemental appendices which depict the specific tasks to be conducted by the appropriate agencies for specific hazard incidents. These incidents have been chosen based on the hazard analysis conducted. The following is a list of the appendices.

ICS
NIMS
Planning Standards

Communications

The following agencies are responsible for this Communications Section:

AGENCY	TITLE OF CONTACT
Genesee County 911	Director
City of Fenton 911	Director

The Line of Succession for representing Communications during a response to an emergency or disaster situation is:

TITLE	AGENCY
Director	Genesee County 911 City of Fenton 911
Assistant Director	Genesee County 911 City of Fenton 911
Supervisor on Duty	Genesee County 911 City of Fenton 911

The Directors for Genesee County Central Communications, and City of Fenton 911 are responsible for coordinating and representing Communications. They will coordinate with the EOC, or delegate another from their agency, when it is activated for scheduled exercises or disasters.

SIGNATURE OF COMMUNICATIONS OFFICIAL	DATE
Dave Ackley - Genesee 911 interim Director	9-3-15
Rick Aro - City of Fenton 911 Director	9/3/2015

I. Checklist of Considerations (Communications):

GENERAL

CHECK BOX	CONSIDERATION
	a) Consider implementing additional radio resources through the local RACES, ARPSC, or Civil Air Patrol.
	b) Provide necessary support to Warning Official in contacting individuals to report to the Emergency Operations Center (EOC).
	c) Coordinate communications between shelters and the EOC.
	d) If normal telephone service is disrupted and emergency response equipment is unavailable, consider the following: • Cellular telephones, • Amateur Radio, • Citizens' band/road patrols have CB • 800 MHz Radio • CAD Messaging System
	e) Ensure Communications Group is available on a 24-hour basis
	f) Establish communications links with adjacent communities and higher levels of government
	g) Maintain accurate records and logs.
	h) Provide a system for augmenting existing resources as it relates to your function.
	i) Ensure proper RACES communications backup system is in working order at the EOC and 911 Center.
	j) Consider Code Red System notification to the public regarding the situation at hand.
	k) Consider EAS notification.
	l) The RACES Officer is responsible for coordinating all amateur radio volunteers and activities.
	m) Utilize MICIMS to record significant information and situation updates.

II. Checklist of Considerations (Communications):

Natural Disaster

CHECK BOX	CONSIDERATION
	a) Provide appropriate support listed under General Checklist of *Considerations*.
	b) Consider use of amateur radio as weather spotters and communications augmentation.
	c) Be aware of the effects of adverse weather on communications systems.

III. Checklist of Considerations (Communications):

Technological Disaster

CHECK BOX	CONSIDERATION
	a) Provide appropriate support listed under General Checklist of Considerations.
	b) Ensure proper reports are forwarded to MSP Operations and EMHSD. Exception – no encrypted communications.

IV. Checklist of Considerations (Communications):

Terrorism and Weapons of Mass Destruction

CHECK BOX	CONSIDERATION
	a) Provide appropriate support listed under General Checklist of Considerations.
	b) Is communications established between Genesee County EOC and State EOC?
	c) Is amateur radio being used for routine traffic to SEOC?
	d) Can High-Speed Internet be used?
	e) Will overuse of communications resources tie up normally dependable lines of communication?
	f) Consider effects of communications infrastructure by WMD and Terrorism events.
	g) Consider Central Dispatch, key communications towers, wire and fiber optic lines, etc. as potential targets in an attack.
	h) Consider the use of "cyber attacks" as it pertains to Communications.
	i) Consider the effects of "electro-magnetic pulse" in a radiological event.
	j) Consider vulnerability of off-site communications if another attack is imminent, expected or possible.

v. Supporting Documents (Communications):

DOCUMENT	AGENCY/ORGANIZATION
911 Standard Operating Procedures	Genesee County 911 City of Fenton 911
Genesee County Resource Manual	*Office of Genesee County Sheriff*
RACES Operating Procedures	RACES Officer
Genesee County EOC SOP	Office of Genesee County Sheriff

The following agencies are responsible for this Damage Assessment Section:

AGENCY	TITLE OF CONTACT
Genesee County Equalization Department	**Director**

The Line of Succession for representing Damage Assessment during a response to an emergency or disaster situation is:

TITLE	AGENCY
Director	**Genesee County Equalization Department**
Secretary	**Genesee County Equalization Department**
Mapping Technician	**Genesee County Equalization Department**

The Director of Genesee County Equalization Department is responsible for coordinating and representing Damage Assessment. He/she will report to the EOC, or delegate another from his/her agency to report to the EOC, when it is activated for scheduled exercises or disasters for the purpose of staffing the EOC and implementing the plan.

SIGNATURE OF DAMAGE ASSESSMENT OFFICIAL	DATE
Peggy Nolde Peggy Nolde	7/22/15

I. Checklist of Considerations (Damage Assessment):

General

CHECK BOX	
	a) It is the responsibility of the local municipality to provide trained staff to the Damage Assessment Officer to assist in damage assessment.
	b) Maintain current list of damage assessment field team members.
	c) Activate damage assessment field teams.
	d) Provide an initial assessment to the emergency operations center staff.
	e) Collect both public and private damage information.
	f) Compile and maintain a record of expenditures for personnel, equipment, supplies, etc.
	g) Maintain a status list of requested resources.
	h) Prominently display damage assessment information in the emergency operations center, to include: maps, situation updates and assessment data.
	i) Provide the public information official with current damage assessment information for release to the public.
	j) Provide and verify damage assessment information for the Chief Executive Official to use for deciding whether a local state of emergency declaration is needed.
	k) Prepare Jurisdiction Situation Report via MICIMS (FKA EMD-22)
	l) Prepare Incident Report via MICIMS (FKA Damage and Injury Assessment Report EMD-2)
	m) Provide and verify damage assessment information
	n) Maintain damage assessment field team supplies for contingency purposes, i.e. damage assessment handbook, blank forms, flashlights, cameras, pencils, paper, maps, etc.
	o) Provide a system for augmenting existing resources as it relates to your function
	p) Be prepared to augment damage assessment field teams as the situation dictates.
	q) Provide a shift schedule for EOC damage assessment staff.
	r) Provide a system for augmenting existing resources as it relates to your function
	s) Consider use of amateur radio for communications and field team members.
	t) Ensure public and private damage are reported separately.
	u) Consider use of GPS, cameras and other technological advantages.

II. Checklist of Considerations (Damage Assessment):

Natural Disaster

CHECK BOX	CONSIDERATION
	a) Provide appropriate support listed under General Checklist of Considerations
	b) Ensure damage assessment field teams have appropriate "adverse weather" gear
	c) Consider long-term effects of flooding. i.e., basement flooding, etc.

III. Checklist of Considerations (Damage Assessment):

Technological Disaster

CHECK BOX	CONSIDERATION
	a) Provide appropriate support listed under General Checklist of Considerations
	b) Consider prolonged effects of chemical exposure.
	c) Caution damage assessment field teams not to enter an unsafe zone involving a technological disaster, i.e. hazmat incident.
	d) Be aware of hot, warm and cold zones.

IV. Checklist of Considerations (Damage Assessment):

Terrorism and Weapons of Mass Destruction

CHECK BOX	CONSIDERATION
	a) Provide appropriate support listed under General Checklist of Considerations
	b) Never deploy damage assessment team to an unsafe zone. (safety is the utmost priority)
	c) Be aware of secondary devices.
	d) If chemical or biological agents are involved, ensure all contaminated members of damage assessment team have been decontaminated.
	e) Damage assessment will be conducted from safe zones only.
	f) Never interfere with responders/investigators.
	g) Remember, damage assessment of a Terrorism/WMD event is evidence. Precise documentation is essential!

Direction & Control

The following agencies are responsible for this Direction & Control Section:

AGENCY	TITLE OF CONTACT
Office of Genesee County Sheriff	Sheriff
Office of Genesee County Sheriff	Emergency Management Manager
Board of Commissioners	Chairperson

The Line of Succession for representing Emergency Management during a response to an emergency or disaster situation is:

TITLE	AGENCY
Sheriff	Office of Genesee County Sheriff
Emergency Management Manager	Office of Genesee County Sheriff
Chairperson	Board of Commissioners (CEO)

The Sheriff of Genesee County is responsible for coordinating and representing the County in all Direction & Control activities. He/she will report to the EOC, or delegate another from his/her agency to report to the EOC, when it is activated for scheduled exercises or disasters for the purpose of staffing the EOC and implementing the plan.

SIGNATURE	DATE
Sheriff Robert J. Pickell 	8-31-15

I. Checklist of Considerations: Direction & Control

GENERAL

CHECK BOX	ACTIVITY
	a) Open Emergency Operations Center. (Emergency Management Manager)
	b) Declare a Local "State of Emergency" and, if necessary, issue directives as to travel restrictions on jurisdiction or local roads. (Chief *Elected Official of jurisdiction)*
	c) Relieve jurisdiction employees of normal duties and temporarily reassign them to other duties and employ temporary workers as necessary. (CEO)
	d) Direct and coordinate response activities in accordance with this plan, including prioritizing allocation of scarce resources. (CEO)
	e) *Ensure staff maintains logs of actions taken and financial records.* (Emergency Management Manager)
	f) Activate Mutual Aid agreements with neighboring jurisdictions. (Emergency Management Manager)
	g) Provide aid to other communities as provided for in Mutual Aid agreements. (May be for 7 days without Board of Commissioners approval) (CEO)
	h) Recommend appropriate protective measures to provide for the health and safety of people and property. (Emergency Management Manager)
	i) Review and authorize the release of information given to the public via the Public Information Official. (CEO)
	j) Ensure all resources are made available for response. (Emergency Management Manager)
	k) Convene governing body as soon as practical for their participation in responding to the incident. (CEO)
	l) Keep County Board of Commissioners informed of measures taken. (CEO)

I. Checklist of Considerations: Direction & Control

GENERAL (CONT)

CHECK BOX	ACTIVITY
	m) Based on compiled data on the incident, request the Governor to declare a "State of Disaster or Emergency". (CEO)
	n) If a State of Disaster or Emergency is declared by the Governor, assign and make available for duty the employees, property, or equipment of the jurisdiction, as ordered by the Governor or the Director of the Department of State Police. (CEO)
	o) Amend or rescind ordinances or rules necessary for emergencies which supplement a rule, order or directive issued by the Governor or a State agency under a Governor's directive. (CEO)
	p) Maintain liaison with municipalities included in this plan. (Emergency Management Manager)
	q) Provide a system for augmenting existing resources as it relates to your function. (Emergency Management Manager)
	r) Ensure EMHSD assumes "Chief of Staff" to the Chief Executive Official duties. (Emergency Management Manager)
	s) Ensure appropriate emergency response personnel and EOC staff are notified. (Emergency Management Manager)
	t) Advise Michigan State Police District Coordinator of situation. (Emergency Management Manager)
	u) Fully or partially activate the Emergency Operations Center, incorporate frequent staff briefings, and ensure all groups function as planned. (Emergency Management Manager)
	v) Forward Incident Report via MICIMS to appropriate parties. (Must be done within 72 hours) (Emergency Management Manager)
	w) Establish communications with and provide support to Incident Command System (s). (Emergency Management Manager)

I. Checklist of Considerations: Direction & Control

GENERAL (CONT)

CHECK BOX	ACTIVITY
	x) Formulate specific assistance requests to adjacent jurisdictions and the State. (Emergency Management Manager)
	y) Review Jurisdiction Situation Report (formerly known as Damage and Injury Assessment Form EMD-2) and submit to the State through appropriate channels. (Emergency Management Manager & Damage Assessment Officer) – must be done within 72 hours
	z) Forward request for a Governor's Declaration of Disaster or Emergency to the State, when Chief Executive Official deems it appropriate. *(See example in EOC SOP & MICIMS)* (Emergency Management Manager) (CEO must sign request)
	aa) Maintain liaison with the State and adjacent jurisdictions. (Emergency Management Manager)
	bb) Coordinate with Public Information Officer to hold Emergency Operations Center briefings just prior to press briefings. (CEO)
	cc) Maintain logistical and administrative materials for the EOC, i.e., pencils, paper, maps, status boards, as appropriate. (Emergency Management Manager)
	dd) Ensure County Resource Manual, Emergency Action Guidelines, and Emergency Operations Center SOP's are available to EOC staff. (Emergency Management Manager)
	ee) Coordinate with Law Enforcement Official for EOC security. (Emergency Management Manager)
	ff) Coordinate with Law Enforcement Official for appropriate support. (Emergency Management Manager)

II. Checklist of Considerations: Direction & Control

Natural Disaster

CHECK BOX	CONSIDERATION
	a) Provide appropriate support listed under General Checklist of Considerations.
	b) Is it necessary to activate the EOC?
	c) Is an Incident Commander identified?
	d) Have damage assessment field teams been notified?
	e) Is a local State of Emergency necessary?
	f) Is a request for Governor's declaration of emergency or disaster necessary?
	g) Ensure the following reports are forwarded, as necessary via MICIMS as available: • Incident Report (Formerly Flash Report EMD – 22) • Local State of Emergency • Request for Governor's declaration • Jurisdictional Situation Report (Formerly Damage Assessment and Injury Report EMD – 2) (within 72 hours)
	h) Have public been notified via sirens, monitors, EAS, Press Releases, etc.?

III. Checklist of Considerations: Direction & Control

Technological Disaster

CHECK BOX	CONSIDERATION
	a) Provide appropriate support listed under General Checklist of Considerations.
	b) Are responders and support staff in all necessary Personal Protective Equipment?
	c) Has staging area been designated?
	d) Is a cleanup team needed?
	e) Is a Regional Response Team needed?
	f) Has all necessary Mutual Aid been activated?
	g) Refer to Fire Services section for detailed considerations for Incident Commander.
	h) What support can the EOC staff provide the Incident Commander without a request and without interfering at the scene?
	i) Ensure affected pipeline control center is contacted in pipeline emergencies.

IV. Checklist of Considerations: Direction & Control

Terrorism or WMD Disaster

CHECK BOX	CONSIDERATION
	a) Provide appropriate support listed under General Checklist of Considerations.
	b) Has Incident Command System/Unified Command been established at scene?
	c) Has Incident Command established a staging area?
	d) Have all surrounding hospitals been notified?
	e) Is the MSP bomb squad or MUSAR needed?
	f) Has HAZMAT Response Team been activated?
	g) Has County Health been notified?
	h) Is quarantine necessary?
	i) Have hot zones, warm zones and cold zones been established?
	j) Is public warning necessary?
	k) Has County Health Department, EMHSD, been notified?
	l) Has a Safety Officer been assigned at the scene?
	m) Is the scene evidence being safeguarded?
	n) Have secondary devices been considered?
	o) Is the Emergency Alert System needed?
	p) Ensure communications is established with the State using 800 MHZ and/or amateur radio.
	q) Activate EOC for all Terrorism/WMD events.
	r) Establish location for press conferences.
	s) Be prepared to declare a local "State of Emergency".

IV. Checklist of Considerations: Direction & Control

Terrorism or WMD Disaster (CONT)

CHECK BOX	CONSIDERATION
	t) Provide Incident Commander administrative and logistical support and start planning recovery operations.
	u) Is evacuation necessary? If so, where should evacuees be sheltered?
	v) Is decontamination necessary? If so, remind EMS not to transport contaminated patients to the hospital prior to decontamination.
	w) Notify the Federal Bureau of Investigation.
	x) Is there a possibility of another attack?
	y) Biological agents may produce delayed reactions.
	z) Radiological agents may produce delayed reactions.
	aa) Be prepared to request a Governor's Declaration of Emergency or Disaster.

Emergency Medical Services

The following agencies are responsible for the Emergency Medical Services Section:

Genesee County Medical Control Authority	**Executive Director**

The Line of Succession for representing Emergency Medical Services during a response to an emergency or disaster situation is:

Executive Director	**Genesee County Medical Control Authority**
Captain – Paramedic Division	**Office of Genesee County Sheriff**

The Genesee County Medical Control Authority Executive Director is responsible for coordinating and representing Emergency Medical Services. He/she will report to the EOC, or delegate another from his/her agency to report to the EOC, when it is activated for scheduled exercises or disasters for the purpose of staffing the EOC and implementing the plan.

Bruce Trevithick	7/22/15

I. & II. Checklist of Considerations (EMS):

General and Natural Disaster

	a)	Ensure that emergency medical teams responding on-scene have established an on-scene medical command post and a medical commander.
	b)	If necessary, establish a triage area in a location appropriate for the incident.
	c)	Ensure the triage area has adequate medical supplies.
	d)	Provide for medical supply inventory to determine what, if any, supplies are needed, and the number of ambulances needed and being used.
	e)	Prepare to augment medical supplies and resources. Activate MDRU or the Regional Medical Coordination Center (RMCC) as needed
	f)	Ensure that each ambulance unit, as well as paramedic units, are tracking resources used during the crisis.
	g)	Determine what, if any, medical resources and systems need augmenting at the on-scene medical command.
	h)	Determine whether scene is a hazardous area and take appropriate public and provider precautions based upon the hazard.
	i)	Ensure a casualty tracking system is established.
	j)	Ensure that on-scene EMS personnel are directed to appropriate registration center.
	k)	Provide the Public Information Official with data to release to the public regarding the number of injuries, deaths, etc.
	l)	Ensure there is adequate security for on-scene medical responders.
	m)	Ensure a Communications Officer has been appointed, who will be responsive for establishing and maintaining communications and coordination with all responding emergency teams and hospitals.
	n)	Assist Operations Group Chief with the evacuation planning of nursing homes and hospitals
	o)	Coordinate with hospitals and shelter managers to staff medical teams at shelters.
	p)	Act as chief emergency medical services advisor to the Executive Group of the EOC.
	q)	Provide a system for augmenting existing resources as it relates to your function.
	r)	Maintain liaison with Public Health Official

III. Checklist of Considerations (EMS):

Technological Disaster

CHECK BOX	CONSIDERATION
	a) Provide appropriate support listed under General Checklist of Considerations.
	b) Consider effects of personal protective equipment on voice communications.
	c) Ensure patients are decontaminated prior to transport.
	d) Ensure hospital is aware of potentially contaminated patients.
	e) Is it necessary to activate mutual aid with adjoining county ambulance services?
	f) Have all hospitals been notified?
	g) Are EMS assets utilizing the ICS/NIMS?
	h) Are EMS personnel wearing personal protective equipment?
	i) Have backup personnel been notified?
	j) Be aware of hot zones, warm zones and cold zones.
	k) Has a Safety Officer been assigned at the scene?
	l) Is the EMS Incident Commander working with the scene Incident Commander to establish a Unified Command?
	m) Are all responding resources aware of the staging area location?
	n) Can EMS field units communicate with the Incident Commander?
	o) Can EMS field units communicate with Central Dispatch?
	p) Can EMS field units communicate with the EOC?
	q) Are EMS field units aware of decontamination site location?

IV. Checklist of Considerations (EMS):

Terrorism and Weapons of Mass Destruction

	a) Provide appropriate support listed under General Checklist of Considerations.
	b) Determine necessity of activating mutual aid with adjoining county ambulance services.
	c) Ensure that EMS assets are utilizing the Incident Command System.
	d) Remind EMS personnel of evidence preservation.
	e) Remind EMS personnel of secondary devices.
	f) Ensure that EMS personnel are wearing personal protective equipment (PPE).
	g) Ensure that backup personnel are notified as needed.
	h) Remind EMS personnel to be aware of hot zones, warm zones and cold zones.
	i) Assign Safety Officer if EMS is primary Incident Command.
	j) Ensure that the EMS Incident Commander is working with the scene Incident Commander to establish a Unified Command.
	k) Ensure that all EMS responding resources are aware of the staging area location.
	l) Can EMS field units communicate with the Incident Commander?
	m) Can EMS field units communicate with Central Dispatch?
	n) Can EMS field units communicate with the EOC?
	o) Ensure that EMS field units are aware of decontamination site location.
	p) If appropriate, remind EMS personnel that biological and radiological agents may produce delayed reactions.

V. Supporting Documents (EMS):

The following agencies are responsible for the Fire Services Section:

Genesee County Association of Fire Chiefs	**President**

The Line of Succession for representing the Fire Services agencies during a response to an emergency or disaster situation is:

Representative #1	**Genesee County Association of Fire Chiefs**
Representative #2	**Genesee County Association of Fire Chiefs**
Representative #3	**Genesee County Association of Fire Chiefs**

The Genesee County Association of Fire Chiefs President is responsible for reviewing and signing this annex. The Genesee County Association of Fire Chiefs has appointed three representatives to represent the Fire Service in the EOC. The representatives will report to the EOC, or delegate another from his/her agency to report to the EOC, when it is activated for scheduled exercises or disasters for the purpose of staffing the EOC and implementing the plan.

Edward J. Blight Ed Blight / President Fire Chiefs Association	7/23/15

I. Checklist of Considerations (Fire Services):

General

	a)	Provide a Fire Services Representative at the EOC.
	b)	Has Incident Command or Unified Command been established or implemented?
	c)	Has a Safety Officer been assigned at the scene?
	d)	Can the Incident Commander communicate with State resources, i.e. 800Mhz, RACES?
	e)	Can the Incident Commander communicate with Central Dispatch?
	f)	Can the Incident Commander communicate with the EOC?
	g)	Activate Search and Rescue Teams as needed.
	h)	Activate Hazmat Team as needed?
	i)	Establish communications with utility companies and seek representation at EOC to assist with prioritization of requests.
	j)	Is evacuation or shelter-in-place necessary?
	k)	Request Fire Coordination and/or Mutual Aid.
	l)	Is the Urban Search and Rescue team (MUSAR) needed? (Request through 911)
	m)	Provide communications and other logistical supplies, as needed for Incident Operations.
	n)	Notify the appropriate utilities (gas, electric, water, sewer) of disruption of utilities.
	o)	Assist the Incident Commander in determining the location of staging areas. (Keep EOC Staff updated on staging area locations.)
	p)	Keep Emergency Service Organizations informed of existing dangers associated with a hazardous materials emergency.
	q)	Ensure all responder safety precautions are being observed.
	r)	Ensure all responders are in appropriate personal protective equipment (PPE).
	s)	Can the Red Cross, Salvation Army, or another agency, assist with canteen operations, Family Support Center, counseling or sheltering activities? If so, discuss with Human Services Official or notify Red Cross.
	t)	Coordinate Fire Departments' role in providing emergency medical services. If not yet established setup EMS division and staging.
	u)	Assist in warning the population. Loud speakers on fire vehicles or door-to-door warning may be utilized. (See Warning Section for more information)

I. Checklist of Considerations (Fire Services):

General (cont)

	v) Assist in traffic control by providing personnel to direct traffic at certain intersections, as requested by the law enforcement agency.
	w) Are all responding firefighters accounted for?
	x) Provide a system for augmenting existing resources as it relates to your function.
	y) Establish a single incident Information Center or press area at the scene.
	z) When the Emergency Operations Center is opened and a media center established through the emergency management program, the Information Officer will coordinate the release of information with the Public Information Representative.
	aa) Help EOC Staff determine firefighting related resources needed to assist Incident Commander.
	bb) Brief EOC Staff on Fire Services related issues (as determined by the EOC Chief-of-Staff).
	cc) Is a PIO needed at the scene? If so, has the IC assigned one?
	dd) Communicate severe weather information to Incident Command.
	ee) Notify MDEQ, Pollution Emergency Alert System, after duty hours. PEAS Hotline: (1-800-292-4706)
	ff) Provide and update disaster-related damage assessment information to appropriate Emergency Operations Center Staff. (EMHSD, Damage Assessment Official, etc.)
	gg) Notify Building Official to inspect damaged structure before Building Official permits entry or occupancy
	hh) The Incident Commander will determine the location of decontamination services and the necessary procedures, based upon the type of incident.
	ii) Ensure reports and updates are being entered into the MICIMS to provide appropriate documentation and communication to the State of Michigan MSP-EMHSD.
	jj) Provide technical advice on such issues as the removal of rubble, the structural integrity of buildings, etc.
	kk) Utilize MICIMS to record significant information and situation updates.

II. Checklist of Considerations (Fire Services):

Natural Disaster

	a) Provide appropriate support listed under General Checklist of Considerations
	b) Provide security at "downed wire" events.
	c) Do "Area Commands" need to be established due to size of incident?

III. Checklist of Considerations (Fire Services):

Technological Disaster

	a) Provide appropriate support listed under General Checklist of Considerations
	b) Consider "downwind" hazards.
	c) Has the HazMat Team been notified? (request through 911) If incident is on a MDOT trunkline, has MDOT been notified? (call Jim Gibson 653-7470 or 989-239-2632)
	d) Contamination area is secured and being controlled.
	e) Have hot, warm and cold zones been identified?
	f) Is the environment being controlled adequately, i.e. ventilation, HVAC, utilities?
	g) Does any of the following need to be notified? DEQ, MSP-EMHSD, National Response Center.
	h) Is technical information being shared with Command, EMS, hospitals, law enforcement?
	i) Is this possibly a WMD/Terrorism event? (If so go to section IV)

III. Checklist of Considerations (Fire Services):

Technological Disaster (CONT)

	j)	If effected facility has a response plan, has it been activated? If a 302 facility, has the appropriate response plan been activated?
	k)	Does Hazmat Team need additional detection, monitoring or DECON resources?
	l)	Have local hospitals been notified?
	m)	Has the health department been notified?
	n)	Is mass decontamination necessary?
	o)	Are control zones being reassessed continually?
	p)	Is a PIO needed on the scene?
	q)	Is evidence being preserved for illegal spill events?
	r)	Consider use of contractors for cleanup services.

Technological Disaster (Radiological)

	a)	Ensure exposure time for responders is being monitored.
	b)	Notify all responders/rescue personnel/hospitals of the presence of the radiological material.
	c)	Notify MDEQ, Hazardous Waste & Radiological Protection Section during normal working hours. (517-241-1223)
	d)	Verify that IC has established a control zone (minimum radius of 50 ft) and restricted access to the affected area and is preventing unnecessary handling of any debris.
	e)	Verify the IC is keeping the public away from the area as much as possible.
	f)	Verify that responders stay upwind of smoke, fumes, and dust wherever possible.
	g)	Verify that fires are being fought as if toxic chemicals are involved.

III. Checklist of Considerations (Fire Services):

Technological Disaster (Radiological) (CONT)

	h)	Verify that detailed records of actions and findings, including times, names locations, etc. are being maintained at the scene and at the EOC.
	i)	Verify that no eating, drinking or smoking takes place in the immediate affected area.
	j)	Ensure that heating, air conditioning and ventilation systems near the area have been shut down.
	k)	Verify that vehicles and radioactive devices/materials or wreckage are not being moved except where necessary to ensure life-safety.
	l)	Ensure that uninjured personnel near the site are decontaminated by the Hazardous Waste and Radiological Protection Section of MDEQ.
	m)	Verify that no material or equipment expected of being contaminated is removed from the area or handled unnecessarily until cleared to do so by MDEQ, Hazardous Waste and Radiological Protection Section.
	n)	Verify that clothing and tools used at the scene are checked for radiological contamination before being returned for normal use.
	o)	Verify that information concerning the building or area is inventoried for vehicle cargo placards, labels, inventory records, shipping documents, and other immediate available sources.

IV. Checklist of Considerations (Fire Services):

TERRORISM OR WMD DISASTER

	a) Provide appropriate support listed under General Checklist of Considerations.
	b) Isolate/secure scene, deny entry, establish control zones, and assign ICS positions as needed.
	c) Has FBI been notified?
	d) Is Regional Response Team (RRT) or 51st Civil Support Team activation necessary?
	e) Are secondary devices being considered? Is there a possibility of another attack?
	f) Is decontamination necessary? If so, where?
	g) Is evidence preservation being considered? Chain of custody?
	h) Consider: • BIO & Radiological agents may produce delayed reactions. • IC: Time, distance, and shielding. • IC: Minimize number of personnel exposed to danger.
	i) Is appropriate information being gathered; i.e. type of event, number of patients,severity of injuries, signs, & symptoms?

Human Services

Human Services

The following agencies are responsible for the Human Services Section of Genesee County Emergency Action Guidelines:

AGENCY	TITLE OF CONTACT
Department of Human Services	Director
American Red Cross	Disaster Program Manager

The Line of Succession for representing Human Services in an emergency or disaster situation in Genesee County is:

American Red Cross	Department of Human Services
Disaster Program Manager	Director
On Call DAT Coordinator	Child Welfare Director
EOC Representative	Program Manager

The Department of Human Services (DHS) Director is responsible for coordinating and representing Human Services. He/she will report to the EOC, or delegate another from his/her agency to report to the EOC, when it is activated for scheduled exercises or disasters for the purpose of staffing the EOC and implementing the plan.

SIGNATURE OF HUMAN SERVICES OFFICIAL	DATE
Sandi Mose, Director	6-23-15
Annette Swain, Disaster Program Manager	8/31/15

GENESEE COUNTY EMERGENCY ACTION GUIDELINES
HUMAN SERVICES ANNEX

PURPOSE/SCOPE

The purpose of the Human Services Annex is to provide for the coordination of human service organizations and agencies during a large scale emergency or disaster. This annex provides the broad framework for cooperation and support between human service organizations and agencies and the county emergency management agency for response.

Primary Agencies
Office of Genesee County Sheriff – Emergency Management Homeland Security Division
American Red Cross, Genesee/Lapeer County Chapter
Catholic Charities of Genesee County
Genesee County Department of Human Services

Human Service Providers within Genesee County
Catholic Charities of Genesee County
The Disability Network
Food Bank of Eastern Michigan
Genesee County Senior Services
Genesee Health Systems
Genesee Community Action Agency (GCCARD)
Genesee Intermediate School District (GISD)
Genesee/Shiawassee Michigan Works
Mass Transportation Authority (MTA)
Salvation Army of Genesee County
United Way of Genesee County
Valley Area Agency on Aging
American Red Cross Representative Genesee/Lapeer Chapter (ARC)
Genesee County Department of Human Services (DHS)

Out County / State / National Disaster Relief Organizations
MIVOAD 1-888-803-8858
2-1-1
Adventist Community Services
American Red Cross
Christian Reformed World Relief
HOPE Animal-Assisted Crisis Response
Lutheran Social Services of Michigan
Mennonite Disaster Services
Michigan Crisis Response Association
Presbyterian Disaster Assistance
The Salvation Army
Southern Baptist Convention Disaster Relief
United Methodist Committee on Relief
Baptist Missionary & Education State Convention

OPERATION AND ORGANIZATION

It is understood that all types of incidents, emergencies or disasters are not one in the same. Depending on various unknown variables of the type and time of a disaster, each response will have a uniqueness. This annex is written to coordinate those tasks and needs that we perceive will need to be met. Which this document provides a structure and guidance to the response however with the understanding that we will need to leave room for flexibility when needed to provide the intended services given the circumstances of the incident.

Due to the nature of the American Red Cross day to day response and services provided, the agency is in a situation where they are more likely to get phone calls from public safety officials regarding requests for assistance. Once the Red Cross as determined that the incident or needs are beyond their capabilities, the Red Cross will notify the County Emergency Management Agency of the current incident and situation. Through that communication an assessment the County Emergency Management Agency will determine whether to activate the Emergency Operations Center and/or this annex in whole or portions to properly respond to the needs of the situation. This annex shall be activated by the County Emergency Management Agency.

Families and individuals that are impacted by the emergency/disaster will need to register through the Red Cross in order to receive any type of disaster assistance by those agencies referenced in this annex.

HUMAN SERVICES EOC REPRESENTATIVE

The Disaster Program Manager of the Genesee County American Red Cross Chapter (ARC) serves as the EOC Representative. The EOC Representative serves as a resource person, identifying agencies that are best suited to provide a particular service, and coordinates associated activities. In the event that the disaster is such a caliber that coordination needs to be done above and beyond the capabilities of the Red Cross, the Director of Genesee County Human Services (DHS) will be the EOC representative. During this type of situation the Red Cross will also have a seat in the EOC to help support the Human Services Representative.

Line of Succession for each agency:

American Red Cross	Department of Human Services
Disaster Program Manager	County Director
On Call DAT Coordinator	Child Welfare Director
EOC Representative	Administrative Assistant

CLOTHING and CARE ITEMS

Lead Agency: Catholic Charities of Genesee and Shiawassee County

If clothing is required to meet immediate or longer term needs, Catholic Charities will coordinate the receiving and distribution of clothing and other basic supplies based on a needs assessment with the following human service support agencies.

Support Agencies:

American Red Cross
Carriage Town Ministries
Catholic Charities
Good Will Industries
Salvation Army
St. Vincent DePaul
Genesee County Department of Human Services (DHS)

DONATIONS

Lead Agency: *Catholic Charities*

The Emergency Human Services Organization generally discourages the donation of goods *unless absolutely necessary to meet the needs of affected individuals and families.* The distribution of vouchers to be used at local retailers is the preferred method of providing assistance. If donations are asked for by the Human Services Organization or provided unsolicited within the local community the Public Information Officer provides information to the public on how and where to make such donations, be they of food, clothing, cleaning supplies or other items. See attached donation items list.

When donated goods are sent from outside the community the receipt and distribution of those goods is coordinated through the Emergency Operations Center by the Department of Human Services and the American Red Cross. Direct receipt and distribution of donated goods occurs through these lead agencies:

Support Agencies:

American Red Cross
Carriage Town Ministries
Catholic Charities
Genesee County Department of Human Services (DHS)
Good Will Industries
Salvation Army
St. Vincent DePaul

FOOD

LEAD AGENCY: Catholic Charities

Catholic Charities will coordinate the preparing of meals and delivery of meals with supporting agencies. Site information is shared with the Public Information Officer when mass feeding becomes necessary.

The American Red Cross is responsible for sheltering and will coordinate feeding needs with Catholic Charities to provide food at shelters across Genesee County.

The Salvation Army is responsible for setting up mobile canteens at disaster sites to serve emergency workers, disaster workers and residents of the community impacted by the disaster. The Salvation Army will coordinate food with Catholic Charities.

Support Agencies:

Food Bank of Eastern Michigan
GCCARD
Southern Baptist

The Department of Human Services replaces Bridge Card benefits on an individual or widespread basis. Immediate food needs are provided to eligible persons according to standard operating procedures. The State Emergency Relief program is utilized.

MENTAL HEALTH NEEDS

LEAD AGENCY: Genesee Health System

The American Red Cross has an agreement with the National Transportation Safety Board (NTSB) to respond to transportation incidents and provide for mental health needs among other things. For all other types of incidents, Genesee Health System will be the lead agency and coordinate with the American Red Cross as necessary.

Genesee Health System and Genesee County has a signed Memorandum of Understanding that outlines Genesee Health System's roles and responsibilities in regards to providing crisis counseling and mental health services to those that have been affected by a disaster here in Genesee County. Genesee Health System will:

- Asses the affected population and work with other crisis counseling agencies to develop a plan to provide mental health resources, services and counseling referrals to the affected population.
- Identify clients that may need ongoing treatment and refer them to the appropriate resource.
- Tour the disaster area unobtrusively, talking to clients and offering assistance.
- Conduct educational workshops to advise the community on available services.
- Accommodate those with special needs to receive the services being provided.

The American Red Cross will have mental health trainer staff within shelters and other facilities that they are in to help identify individuals and inform these individuals of services available.

Support Agencies
Catholic Family Services
American Red Cross Genesee/Lapeer Chapter

RECEPTION CENTERS

LEAD AGENCY: American Red Cross

The American Red Cross is the responsible agency for a Reception Center. If evacuation is necessary or if people are made homeless by a disaster, they register at a reception center. At this location they inform officials if they have need for shelter or if they plan to stay with friends or relatives. This information is used to account for the safety of the population and inform residents when it is safe to return. Reception Centers are generally established at or adjacent to shelters. The American Red Cross manages these centers. Reception Center functions can be combines with shelter registration depending on the nature of the situation. Persons from the affected area who do not have shelter needs contact the American Red Cross to indicate their whereabouts. The primary means of reporting this information is the American Red Cross Safe and Well website. Other resources may be used as well, including asking people to report by calling 1-888-TELL-MORE or other designated telephone numbers, or registering through the internet at a County or City website.

SHELTERING

LEAD AGENCY: American Red Cross

The American Red Cross has the responsibility for the planning, implementation and operation of the county sheltering program. Shelter may be necessary for a short-term precautionary evacuation or for longer-term evacuations or disasters that leave people homeless. The American Red Cross establishes and managers shelters for short term needs. Shelters are generally located at churches, senior centers, public building that are familiar to local residents and accessible to people with disabilities and lastly schools.

Trained American Red Cross volunteers manage the shelters as long as necessary. Generally, food and supplies are provided by, or through, the American Red Cross, Catholic Charities, local businesses and churches. Shelter facilities are identified in advance of an emergency and are clearly marked when in use. A list of shelters sorted by jurisdiction are located in the American Red Cross office and are listed on the "NSS" National Shelter Systems.

In coordination with Emergency Management determine need and location for the safest and most convenient evacuation shelter and determine the short- and long-term housing needs of displaced public.

- ARC will determine the appropriate facility using the National Sheltering System (NSS)
- ARC will activate staff for set up and support of shelter activities/services
- ARC will notify the EOC when the shelter is ready to receive clients
- ARC will coordinate with the EOC to request law enforcement for shelter security
- ARC will ensure shelters are supplied with necessary resources to assist shelters residents.
- ARC will assess and provide services to those with disabilities.
- ARC will ensure service animals are provided adequate food, water and shelter with their owners.
- ARC will communicate with County EOC about the shelter including information about pet shelter, items not allowed in shelter with consideration of Functional and Access Needs (FNSS)
- ARC Behavioral Health and Physical Health will ensure staff according to the expected shelter population.

The Genesee/Lapeer Chapter works with a variety of agencies to track facilities and individuals who may need assistance in an emergency. Lists are kept of daycare centers and adult foster care facilities. Duplicate lists are provided to the Office of Emergency Management. Consumers Energy identifies individuals who use supplemental oxygen or other life support equipment requiring electricity. When notified of a life-support dependent person(s) in the community by Consumers Energy, Red Cross provides disaster preparedness information to them, so they can develop contingency plans for power outage emergencies.

Those agencies that house special populations (hospitals, correctional facilities, nursing homes, etc.) should have contingency plans in place for the transport, sheltering and feeding of these individuals.

SHELTERING OF ANIMALS

Shelters established for the general population will not provide accommodations for pets. However, in a significant event where sheltering of people and pets is an issue, arrangements will be made to assist pet owners. A facility provided to shelter household pets will be separated from any shelter intended for the general population. Pet owners must bring a crate for their animal, a blanket to cover the crate, food and a leash. Effort will be made to make the pet shelter reasonably accessible to pet owners. If as a result of the disaster it isn't possible for a pet owner to get their pet's crate or it has been destroyed, effort will be made to provide a crate for them. In some circumstances it may be necessary for a pet to be temporarily cared for outside on a leash or in the owner's vehicle. All animals are required to be on a leash when outside of their crate. Genesee County Emergency Management along with Genesee County Animal Control maintain an Emergency Response Plan Regarding Animals. This plan covers all animals that are not consider service animals. In the event that there is need to provide care for the animals, the plan will be activated.

TRANSPORTATION

LEAD AGENCY: Mass Transportation Agency (MTA)

The MTA will coordinate transportation with supporting transportation agencies during times of disaster and emergencies for; first responders, emergency workers, shelter individuals, and individuals with special needs etc.

It's desirable to provide transportation for emergency workers when a disaster requires numerous workers in a concentrated area. This practice limits vehicle congestion and provides for easier access control. Emergency workers leave their vehicles at a staging area and are bused to the disaster site. MTA coordinates the transportation. Debris and other factors may also limit access to disaster areas, thereby creating the need to mass-transport emergency workers. Law enforcement officials, fire officials, and the Emergency Management Coordinator assist the MTA representative identify and procure transportation resources necessary for special situations.

Special Population Facilities (hospitals, correctional facilities, nursing homes, etc.) generally have internal emergency plans, including evacuation plans. Some institutions contract for transportation services. Special transportation resources have been identified throughout the county and will be requested as needed.

Support Agencies:

Baker College
Genesee County Sheriff Reserves
Genesee County Intermediate School District
Mott Community College
Genesee County Senior Services
STAT EMS
University of Michigan Flint

VOLUNTEERS

Emergency Operations Center will identify the need for volunteers. Disaster Volunteer Agencies will be contacted as needed. Volunteers directly associated with an agency, such as Sheriff Reserve Deputies, remain under that agency's coordination and supervision.

HOUSING AND FEDERAL ASSISTANCE PROGRAMS

LEAD AGENCY: Genesee County Department of Human Services

Persons with inquiries about family members affected by an emergency or disaster are asked to check the American Red Cross Safe and Well website. Hospitals, reception centers and shelters provide the American Red Cross office with information on the whereabouts of people they are serving. DHS and/or American Red Cross will advise the 2-1-1 Central Michigan Call Center of emergency shelter locations and the family welfare inquiry resources established by the Chapter. The 2-1-1 Center will refer individuals to family welfare inquiry resources as appropriate. Persons arriving at a shelter in search of a family member will be assisted to the extent possible by the shelter staff. The shelter list will be checked, and telephones made available if necessary and appropriate. If the welfare of an elderly or special needs person is uncertain because family members or local agencies have been unable to make contact with them via telephone, efforts will be made to check their welfare through direct contact by law enforcement, fire services, or volunteer personnel, as arranged through the EOC.

Support Agencies:

American Red Cross Genesee/Lapeer Chapter
EOC Damage Assessment Officer
Law Enforcement Agencies
Fire Departments
2-1-1

The responsible agency for long-term housing assistance is the Federal Emergency Management Agency. Short-term housing assistance on a limited basis is coordinated by Genesee Land Bank and Genesee County Department of Human Services.

If federal assistance is offered as a result of a disaster, DHS administers specific programs that may be available. Individual and family grant applications are reviewed for eligibility.

- Assistance for the Unemployed
- Agencies with roles and responsibilities for the unemployed are:
- Genesee County Department of Human Services
- Genesee-Shiawassee Michigan Works!
- Career Alliance
- Michigan Unemployment Insurance Agency

DHS oversees the coordination of these tasks and makes referrals when necessary (along with other agencies) to the Michigan Unemployment Insurance Agency for unemployment insurance and to the Genesee-Shiawassee Michigan Works for job seeker services.

I. Checklist of Considerations (Human Services):

GENERAL

CHECK BOX	CONSIDERATION
	a) The Human Service representative will issue coordinated instructions and provide information to all Human Service providers involved in the *disaster or emergency response.*
	b) State human service support will be requested if local resources are exhausted.
	c) Interface with the existing incident command structure by providing representative at the incident command post if requested.
	d) Coordinate with other EOC Representatives to assess the situation and implement an appropriate plan based on the needs and resources available to effectively utilize volunteer organizations.
	e) Ensure supporting agencies are notified of incident and request action as needed.
	f) Maintain communication with the human services agencies in Genesee County. Amateur Radio operators are utilized when necessary to assist with communication.
	g) Ensure communications with State and Federal Human Services occurs. Utilize MICIMS to communicate current actions and updates as needed.
	h) Ensure communication is established between hospitals, shelters, dispatch agencies, and first responders. Establish a communications plan so that local agencies are coordination information through the County EOC when communicating with State and Federal agencies.
	i) Identify any functional and access needs groups including but not limited to the elderly, the homeless, people with disabilities and people communicating in a language other than English (including sign language) and ensure that their disaster related needs are met.
	j) Coordinate the activation of food and beverage services (mobile and fixed feeding) for disaster workers, volunteers and shelters with other agencies.
	k) Support immediate, short-term assistance including Crisis Counseling and Disaster Stress Debriefing for individuals, households and groups dealing with the anxieties, stress and trauma associated with the incident.
	l) Establish and coordinate shelters, family support centers and reunification centers as needed.

	m) Identify solutions for short- and long-term housing for displaced individuals and families, as appropriate. Housing assistance provided to victims may include rental assistance, temporary housing, loans for the repair and/or replacement of primary residences, etc.
	n) Coordinate efforts to provide transportation for displaced public and disaster workers as needed.
	o) Coordinate any safety information with the Safety Officer and Public Health Officer (food safety, flood safety, etc.). Inform Human Services Agencies to adhere to safety rules as established by incident command. Identify any decontamination needs and to be aware of cross contamination possibilities and evidence preservation.
	p) Encourage Human Service Agencies to maintain and preserve documentation of actions taken and financial records for expenditures for personnel, equipment, supplies and services. These records are essential for receiving potential reimbursement funding from state and federal governments.

II. Checklist of Considerations (Human Services):

NATURAL DISASTER

CHECK BOX	CONSIDERATION
	a) Provide appropriate support listed under General Checklist of Considerations.

III. Checklist of Considerations (Human Services):

TECHNOLOGICAL DISASTER

CHECK BOX	CONSIDERATION
	a) Provide appropriate support listed under General Checklist of Considerations.
	b) Inform Human Services personnel to adhere to Incident Commander instruction as regards to entering an unsafe area.
	c) Are any considerations in Paragraph IV (WMD and Terrorism) applicable in this event?

IV. Checklist of Considerations (Human Services):

Terrorism and Weapons of Mass Destruction

CHECK BOX	CONSIDERATION
	a) Provide appropriate support listed under General Checklist of Considerations
	b) American Red Cross will assist in determination of whether de-con is necessary at shelter locations. Are shelter managers guarding against cross-contamination of shelter victims?
	c) Remind Human Service Providers to be aware of evidence preservation.

[redacted]

The following agencies are responsible for the Law Enforcement Section of Genesee County Emergency Action Guidelines:

AGENCY	TITLE OF CONTACT
Office of Genesee County Sheriff	Sheriff

The line of succession for representing Law Enforcement in an emergency or disaster situation in Genesee County is:

TITLE	AGENCY
Sheriff	Office of Genesee County Sheriff
Undersheriff	Office of Genesee County Sheriff
Captain	Office of Genesee County Sheriff

The Sheriff of Genesee County is responsible for coordinating and representing Law Enforcement. He/she will report to the EOC, or delegate another from his/her agency to report to the EOC, when it is activated for scheduled exercises or disasters for the purpose of staffing the EOC and implementing the plan.

SIGNATURE	DATE
Sheriff Robert J. Pickell	8-31-16

I. Checklist of Considerations (Law Enforcement):

GENERAL

CHECK BOX	CONSIDERATION
	a) Provide security at the following: • Shelters • Temporary Morgue • EOC • Command Post • Jail • Disaster Site • Others, as required
	b) Secure unusable roads. (Use Fire Services and Public Works for support, if necessary.
	c) Identify routes that need barricades and signs. Request necessary assistance from Public Works.
	d) Coordinate with the Road Commission or Department of Public Works in rerouting traffic and putting the appropriate signs in place.
	e) Ensure security passes are being issued to appropriate personnel in secured areas.
	f) Implement any curfews ordered by the Governor or Chief Executive Official.
	g) Develop a method and a location for a "lost and found" service. Inform Public Information Official of the details of how the public can access this service.
	h) Assist families isolated by the effects of the disaster.
	i) Ensure vehicles on evacuation routes are removed. If necessary, request that Public Works Agencies or Road Commission trucks move vehicles off of the road. Maintain record of where vehicles are being taken. Inform Public Information Official of the details and how the public can access this service.

CHECK BOX	CONSIDERATION
	j) Ensure prisons, jails, GVRC are notified of potential threat and determine whether proper safety and security precautions are being taken.
	k) Increase Urban Search and Rescue capabilities.
	l) Monitor "over-time" of staff.
	m) Activate Mutual Aid agreements.
	n) Assist Warning Official when necessary.
	o) When Emergency Operations Center (EOC) is activated: • Act as Law Enforcement Official • Assist EMHSD in all matters relating to Law Enforcement
	p) Provide a system for augmenting existing resources as it relates to your function
	q) Does Public Health Official need assistance with quarantine, isolation, or other protective order during a public health emergency?
	r) Utilize MICIMS to record significant information and situation updates.

II. Checklist of Considerations (Law Enforcement):

NATURAL DISASTER

CHECK BOX	CONSIDERATION
	a) Provide appropriate support listed under General Checklist of Considerations
	b) Consider loss of communications due to overuse of the systems.
	c) Provide security at event locations.
	d) Consider possible looting at the scene of large disasters.

III. Checklist of Considerations (Law Enforcement):

TECHNOLOGICAL DISASTER

CHECK BOX	CONSIDERATION
	a) Provide appropriate support listed under General Checklist of Considerations.
	b) Provide security at event location.
	c) Ensure all Law Enforcement responders are in appropriate PPE.
	d) Ensure all Law Enforcement responders understand hot, warm and cold zones.
	e) Consider use of Unified Command.
	f) Assist fire department IC as needed.
	g) Are any considerations listed in Paragraph IV (WMD and Terrorism) appropriate for this event?

IV. Checklist of Considerations (Law Enforcement):

TERRORISM AND WEAPONS OF MASS DESTRUCTION

CHECK BOX	CONSIDERATION
	a) Provide appropriate support listed under General Checklist of Considerations
	b) Has Incident Command/Unified Command been established at the scene? Is Law Enforcement participating?
	c) Has a staging area been established?
	d) Has the scene been secured/isolated? Have control zones been established?
	e) Are all emergency responders aware of evidence preservation?
	f) Is it necessary for Law Enforcement to don Personal Protection Equipment at the scene?
	g) Is decontamination necessary? Who is conducting DECON?
	h) Have secondary devices been considered?
	i) Is there a possibility of another attack?
	j) Has the Federal Bureau of Investigation been notified?
	k) Has Michigan State Police, Operations, been notified?
	l) Is the Flint Bomb Squad needed?
	m) Are the MSP Bomb Squad or Search and Rescue Team needed?
	n) Consider victims as potential terrorists.
	o) Has ATF been notified?
	p) Has the outer perimeter been secured?
	q) Have entry/egress routes been established?

IV. Checklist of Considerations (Law Enforcement):

TERRORISM AND WEAPONS OF MASS DESTRUCTION (CONT)

CHECK BOX	CONSIDERATION
	r) Have hot, warm and cold zones been established? If so, are all Law Enforcement personnel aware of them?
	s) Is the Regional Response Team needed? Have they been requested through MSP Operations?
	t) Are all safety precautions being considered for Law Enforcement?
	u) Has Emergency Management been notified?
	v) Should Law Enforcement assist with Public Warning? (door-to-door, etc.)
	w) Can Law Enforcement communicate with the Incident Commander?
	x) Can Law Enforcement communicate with Central Dispatch?
	y) Can Law Enforcement communicate with responding units from other jurisdictions?
	z) Can Law Enforcement communicate with the EOC?
	aa) Has all necessary mutual aid been activated/requested?
	bb) Is evidence being secured properly: diagram of area, photograph of area, narrative description, evidence log?
	cc) Can Law Enforcement assist with control/isolation of patients?
	dd) Have public safety measures been initiated? Evacuation/in-place shelter?

The following agencies are responsible for the Public Health Section of Genesee County Emergency Action Guidelines:

AGENCY	TITLE OF CONTACT
Genesee County Health Department	Health Officer

The Line of Succession for representing the Public Health Official in the Emergency Operations Center during a response to an emergency or disaster situation is:

TITLE	AGENCY
Health Officer	Genesee County Health Department
Medical Director	Genesee County Health Department
Director of Nursing	Genesee County Health Department

The Genesee County Health Department Health Officer is responsible for coordinating and representing Health Services. He/she will report to the EOC, or delegate another from his/her agency to report to the EOC, when it is activated for scheduled exercises or disasters for the purpose of staffing the EOC and implementing the plan.

SIGNATURE OF PUBLIC HEALTH OFFICIAL	DATE

Genesee County Emergency Action Guidelines
Public Health Annex

Purpose

The purpose of the Public Health Annex to the Genesee County Emergency Action Guidelines is to outline how the Genesee County Health Department (GCHD) will coordinate the delivery of health services during disasters and major emergencies. The Public Health Annex assigns responsibilities to both private and public sector agencies. Responsibility for emergency medical response, disease control, environmental sanitation, mortuary services, ambulance coordination, and victim information are assigned to appropriate agencies.

The Public Health Annex outlines general response guidelines by the GCHD that are common to all disasters and emergencies to provide a coordinated effort to assure the public's health.

Concept of Operations

The Public Health Annex is activated by the GCHD Health Officer upon notification from the Chairperson of the Genesee county Board of Commissioners. The Health Officer will then activate the appropriate GCHD internal response mechanism(s).

The Health Officer will provide information to the Emergency Management Coordinator regarding public health hazards and the status of emergency medical care. Dispatch personnel, ambulance companies, paramedics, and hospital emergency room staff are involved with medical emergencies on a daily basis. Under ordinary circumstances, existing health care resources absorb emergency health care problems. Even under mass casualty situations, Genesee County is well protected by the Ambulance Mutual Aid Agreement and the Genesee County Medical Control Authority Mass Casualty Incident Protocol and the Genesee County Health Department Emergency Operations Plan. In the event that a disaster is extraordinarily large or requires and extended response, the Genesee County Emergency Operations Center (EOC) may be established. Under such circumstances, the GCHD Health Officer will serve as Health Services Coordinator. All Genesee County Health Department service deliverers will cooperate with and report to the Health Services Coordinator or his/her designee under such circumstances. Detailed procedures regarding emergency medical care, investigation of disease, the treatment of ill and injured, utilization of public and private medical resources, coordination of rescue, first aid, triage, and ambulance dispatch at the scene and information concerning casualties are contained in the Genesee County Medical Control Authority Mass Casualty Incident Protocol and the Genesee County Health Department Emergency Operations Plan.

Continuity of Operations

For detailed procedures regarding the operation of health services response on a 24 hour basis, refer to the GCHD Continuity of Operations Plan (COOP). During an emergency which requires additional resources to carry out the Public Health Annex responsibilities, the Health Services Coordinator will redistribute both public and private resources as necessary.

Communications

The Health Services Coordinator stationed at the EOC will communicate with field units via the guidelines set forth in the Genesee County Communications Annex, including the use of cellular, mobile, 800 MHz, and ARES communications resources.

Special Needs Populations

All health care operations will assure that all special needs populations are appropriately provided for. These efforts will be closely coordinated with the Human Resources Annex.

Organization

The Genesee County Health Services Coordinator shall represent and coordinate all health functions at the county EOC. The Health Officer will assure that a current internal personnel notification / call-down roster is maintained. The Emergency Management Coordinator will be provided copies of this procedure.

The succession line for the Health Services Coordinator is as follows:

Health Officer, Genesee County Health Department
Medical Director, Genesee County Health Department
Director of Nursing, Genesee County Health Department

I. Checklist of Considerations (Public Health):

GENERAL

	a) Monitor public and private water sources and issue appropriate public health warnings.
	b) Coordinate the identification, provision, and distribution of potable water (bulk or bottled). *NOTE: Consider the use of local milk producers as a source of bulk distribution.*
	c) Monitor public and private sewage disposal systems. Issue appropriate public health warnings.
	d) Provide for the inspection of licensed food service establishments or those temporarily established for emergency workers or disaster victims to ensure the safety of food products prior to sale and consumption.
	e) Work with Public Information Official to issue advisories on food preservation (in the event of power outages), disposal of adulterated products, or consumption of homegrown and other products.
	f) Provide measures and methods to inspect public swimming pools, camp grounds, public bathing beaches, etc. to ensure safe operations. Suspend operating licenses of such facilities until health standards can be met.
	g) Work with waste removal personnel to arrange for special pickup and disposal of waste items to minimize prolonged exposure of potential health and safety hazards.
	h) Prioritize and coordinate enforcement of nuisance abatement ordinances to keep debris (i.e. glass, brush, etc.,) from becoming a health hazard. Advise local government of the need for such emergency ordinances, if necessary.
	i) Monitor, investigate, and control epidemics. Monitor disease patterns and morbidity at hospitals and other health care providers.
	j) Organize and make arrangements for mass inoculations, prophylaxis, and specimen collection as necessary.

	k)	Coordinate distribution of antidotes, drugs, vaccines, etc., to shelters, homes, businesses, or other sites.
	l)	Provide a system for augmenting existing resources as it relates to this function.
	m)	Investigate and make recommendations for pest infestation control.
	n)	Provide direction, as requested, to the County Animal Control Unit on the need for the isolation, quarantine, and disposal of diseased animals.
	o)	Provide assistance, as requested, on the coordination of the care of pets belonging to persons who have evacuated their homes and are using public shelters.
	p)	Make Public Health Workers aware of the availability of crisis counseling and where that counseling can be obtained. NOTE: Crisis counseling is being coordinated by the Human Services Representative (DHS).
	q)	Identify resources to transport patients to temporary care centers and other medical facilities.
	r)	Inspect shelters for health hazards and to ensure that basic health standards are met.
	s)	Coordinate the monitoring of private citizens and emergency workers for exposure to chemical, radiological, or biological contaminants.
	t)	Coordinate the assessment of individuals for threats to their health.
	u)	Work with Medical Examiner to provide a mass casualty mortuary service.
	v)	Confirm with Medical Examiner a site for a temporary morgue. NOTE: The Medical Examiner is responsible for identifying the deceased. Law Enforcement and Emergency Medical Services may provide additional support in collecting and transporting.
	w)	Provide epidemiological support for on-going operations through statistical and geographical information systems.
	x)	Ensure appropriate Public Health representation in the EOC to participate in hazard identification and provide guidance and coordination of resources as necessary.

	y) Evaluate hazard and determine level of threat as requested by EOC Management.
	z) Make use of appropriate authorities granted under Michigan Public Health Code and Genesee County Environmental Health Regulations.
	aa) Prepare and coordinate with the PIO public information related to the agent, disease, or situation causing a public health issue or emergency..
	bb) Facilitate notifications to appropriate state and federal agencies.
	cc) Inspect and mitigate damaged food supplies.
	dd) Monitor contamination levels and health effects of hazardous / biological materials released during an incident and provide guidance on decontamination, evacuation, and treatment as necessary.
	ee) Protect records deemed essential for continuing government functions and conduct of emergency operations.
	ff) Ensure training of clinical, assigned response staff, and volunteers performing emergency functions.
	gg) Utilize Syndromic Surveillance System to identify exposure effects on population.
	hh) Implement as indicated, Non-Pharmaceutical Interventions (NPI) as a method to mitigate communicable disease. NPI include isolation and quarantine, restrictions on movement and travel, advisory warnings, social distancing, external decontamination, hygiene, and precautionary protective behaviors
	ii) Coordinate with local hospitals and the EOC to activate the modular emergency medical system and ensure the set up and operation of acute care centers when necessary.
	jj) Coordinate, as necessary, the setup and operations of a Neighborhood Emergency Help Center.
	kk) Utilize MICIMS to record significant information and situation updates.

II. Checklist of Considerations (Public Health):

NATURAL DISASTER

CHECK Box	CONSIDERATION
	a) In addition to General Checklist of Considerations:
	b) Consider contamination from septic systems and sewer systems related to back-ups and overflows.
	c) Consider contamination of wells and public water supplies.
	d) Consider food safety issues and spoilage related to power outages.
	e) Consider mold hazards related to water and sewage damage.

III. Checklist of Considerations (Public Health):

TECHNOLOGICAL DISASTER

CHECK Box	CONSIDERATION
	a) In addition to General Checklist of Considerations:
	b) Consider effect of chemical spills on affected population.
	c) Coordinate use of lab facilities to identify unknown chemicals.
	d) Ensure all needed Health Services personnel report to staging area, and receive explicit permission, prior to entering an active incident location.
	e) Provide assistance, as requested, in establishing hot zones, warm zones, and cold zones.
	f) Ensure all Health Services personnel are in appropriate Personal Protective Equipment prior to entering hot or warm zones.
	g) Ensure Health Services personnel understand hot, warm and cold zones.
	h) Consider any considerations listed under Paragraph IV (Terrorism and WMD) that might be appropriate for this event.

IV. Checklist of Considerations (Public Health):

Terrorism and Weapons of Mass Destruction

	a)	In addition to General Checklist of Considerations:
	b)	For a man-made (bio-terrorism) or natural biological event (such as pandemic or epidemic outbreak), coordinate county response at the EOC.
	c)	Conduct communicable disease investigations.
	d)	Evaluate the biological hazard and coordinate with EOC/MDHHS/EMHSD on appropriate laboratory tests and sites.
	e)	Identify and coordinate provision of appropriate personal protective equipment, instruments, antidotes, and clothing for citizens and response personnel.
	f)	Coordinate with appropriate agencies on evidence preservation.
	g)	Provide assistance, as requested, in establishing hot zones, warm zones, and cold zones.
	h)	Establish standing orders for care of patients related to the event.
	i)	Ensure notification of and coordination with area hospitals.
	j)	Coordinate communication with the Michigan Department of Community Health (MDHHS) and the Centers for Disease Control and Prevention (CDC) regarding event.

Public Health – Medical Examiner

The following agencies are responsible for the Public Health – Medical Examiner Section of Genesee County Emergency Action Guidelines:

AGENCY	TITLE OF CONTACT
Genesee County Medical Examiner Office	**Medical Examiner**

The Line of Succession for representing the Public Health Official in the Emergency Operations Center during a response to an emergency or disaster situation is:

TITLE	AGENCY
Medical Examiner	**Genesee County Medical Examiner Office**
Deputy Medical Examiner	**Genesee County Medical Examiner Office**
Chief Medical Examiner Investigator	**Genesee County Medical Examiner Office**

The Genesee County Medical Examiner is responsible for determining the cause and manner of death and for confirming the identification of the individuals who are fatally injured during a mass disaster. He/she will report to the EOC or delegate another person from his/her agency to report to the EOC, when it is activated for scheduled exercises or disasters for the purpose of staffing the EOC and implementing this plan.

SIGNATURE OF PUBLIC HEALTH – MEDICAL EXAMINER	DATE
Dr. Brian Hunter	07/23/2015

I. Checklist of Considerations (Public Health – Medical Examiner):

GENERAL

	a) Coordinating with first responders to determine the level of need for Medical Examiner services and to assess scene security.
	b) Coordinate with EOC members to relay number of fatalities and to provide information regarding identification of victims.
	c) Assist in moving and supervise the placement of identification tags on fatally injured victims at the scene
	d) Establish temporary storage location for fatalities at the scene
	e) Create a preliminary demographic/anatomic profile for each victim and catalog profile information
	f) Coordinate body transport to Hurley morgue or other temporary storage site.
	g) Catalog and process personal effects on each body and recovered from the scene
	h) Consult with other forensic disciplines to establish positive identification (e.g. Forensic Odontology and Forensic Anthropology)
	i) Determine the need for ancillary body storage and/or body examination sites (i.e. outside Hurley Hospital morgue) including the possible need for emergent embalming
	j) Consult with county funeral directors regarding available resources for body transport, embalming, and body storage pending locating and contacting next of kin
	k) Perform examination of victims and catalog fragmented human remains to determine cause and manner of death
	l) Retain tissues and body fluids necessary for cause of manner of death and manner of death determination and identification
	m) Release decedents to funeral homes following postmortem examination and confirmation of identification
	n) Produce a report for each examination
	o) Cooperate with law enforcement and prosecutor regarding death scene investigation
	p) Utilize MICIMS to record significant information and situation updates.

II. Checklist of Considerations (Public Health – Medical Examiner):

NATURAL DISASTER

CHECK BOX	CONSIDERATION
	a) Provide support/services listed under General Checklist of Considerations

III. Checklist of Considerations (Public Health – Medical Examiner):

TECHNOLOGICAL DISASTER

CHECK BOX	CONSIDERATION
	a) Provide support/services under General Checklist of Considerations
	b) If incident falls under federal jurisdiction (e.g. Homeland Security, FBI, and FAA), cooperate with federal agencies during investigation including cooperating with DMORT deployment

IV. Checklist of Considerations (Public Health – Medical Examiner):

Terrorism and Weapons of Mass Destruction

CHECK (✓)	CONSIDERATIONS
	a) Provide support/services under General Checklist of Considerations
	b) Determine level of risk to morgue personnel and the hospital environment (i.e. Hurley Hospital)
	c) Follow recommendations of county, state, and/or federal hazardous materials teams regarding safety precautions for all morgue personnel and coordinate with Hurley Hospital regarding safety recommendations
	d) Cooperate with federal agencies during investigation including cooperating with DMORT team personnel

Public Information

The following agencies are responsible for the Public Information Section of Genesee County Emergency Action Guidelines:

AGENCY	TITLE OF CONTACT
Office of Genesee County Sheriff	**Sheriff**

The line of succession of representing Public Information during an emergency or disaster in Genesee County is:

TITLE	AGENCY
Sheriff	**Office of Genesee County Sheriff**
Emergency Manager	**Office of Genesee County Sheriff**
Captain	**Office of Genesee County Sheriff**

The Sheriff of Genesee County is responsible for coordinating and representing Public Information. He/she will report to the EOC, or delegate another from his/her agency to report to the EOC, when it is activated for scheduled exercises or disasters for the purpose of staffing the EOC and implementing the plan.

SIGNATURE	DATE
Sheriff Robert J. Pickell 	8-31-15

I. Checklist of Considerations (Public Information):

GENERAL

CHECK BOX	CONSIDERATION
	a) Document all emergency messages released to public via EAS, press releases, monitors, etc.
	b) Develop and release updated EAS messages based on incoming information.
	c) Distribute prepared public educational materials explaining hazards and what people can do to protect themselves and to recover from the situation.
	d) Insure that written materials are developed for non-English speaking individuals or other special needs groups.
	e) Ensure that accurate information is disseminated describing such items as the locations of shelters, missing persons information hotline, volunteer hotline, rumor control hotline, etc.
	f) Prepare news releases.
	g) Schedule media briefings.
	h) Verify that information is accurate before releasing information to the media.
	i) Establish a location for a Joint Information Center (JIC). (The JIC can be used by agency representatives for releasing information to the news media.)
	j) Coordinate a media tour of disaster area.
	k) Schedule interviews between Chief Executive Official/Incident Commander and media agencies.
	l) Coordinate activities with Emergency Operations Center (EOC) Chief-of-Staff.
	m) Provide a system for augmenting existing resources as it relates to your function.
	n) It is essential to get the public timely and accurate information.
	o) Can the PIO communicate with the PIO at the scene?
	p) Can the PIO communicate with the EOC?
	q) Utilize MICIMS to record significant information and situation updates.

GENERAL (CONT)

CHECK BOX	CONSIDERATION
	r) Are press releases and press conferences effectively addressing rumor control?
	s) Is the media aware of press conference locations and times?
	t) Is the public aware of decontamination locations?
	u) Is the public aware of shelter locations?
	v) Is the PIO sharing information with the EOC staff?
	w) Is the public aware of which hospitals the victims have been transported to?
	x) Is the PIO ensuring victims' families are consulted prior to releasing personal information?
	y) Is the Executive Group of the EOC reviewing and approving all press releases?
	z) Have local hospitals activated their Public Information Plan, and can the PIO communicate with them?

II. Checklist of Considerations (Public Information):

NATURAL DISASTER

CHECK BOX	CONSIDERATION
	a) Provide appropriate support listed under General Checklist of Considerations
	b) Ensure public is notified of hazards as soon as possible.
	c) Ensure public is aware of "all clear" notifications as soon as possible.
	d) Ensure public is aware of areas to avoid.
	e) Ensure all press releases and "official information" are reviewed by the executive group in the EOC.

III. Checklist of Considerations (Public Information):

TECHNOLOGICAL DISASTER

CHECK BOX	CONSIDERATION
	a) Provide appropriate support listed under General Checklist of Considerations
	b) Provide "facts" to the public to control rumors.
	c) Review the North American Emergency Response Guide book to ensure personal knowledge of chemical in question.
	d) Ensure "on-scene" PIO is aware of your location and offer assistance to same.
	e) Are any considerations listed in Paragraph IV (WMD and Terrorism) appropriate for this event?
	f) Understand hot, warm and cold zones.
	g) Is a Joint Information Center (JIC) necessary?

IV. Checklist of Considerations (Public Information):

Terrorism and Weapons of Mass Destruction

CHECK BOX	CONSIDERATION
	a) Provide appropriate support listed under General Checklist of Considerations
	b) Is the public aware of the procedures for biological and chemical protection?
	c) Does the public understand "in-place-shelter"?

Public Works
(Road Commission - Water & Waste)

Public Works – Road Commission

The following agencies are responsible for the Public Works-Road Commission Section of Genesee County Emergency Action Guidelines:

AGENCY	TITLE OF CONTACT
Genesee County Road Commission	***Manager/Director***

The line of succession for representing Public Works-Road Commission during an emergency or disaster in Genesee County is:

TITLE	AGENCY
Manager/Director	**Genesee County Road Commission**
County Highway Engineer	**Genesee County Road Commission**
Maintenance Director	**Genesee County Road Commission**

The Genesee County Road Commission Manager/Director is responsible for coordinating and representing Public Works. He/she will report to the EOC, or delegate another from his/her agency to report to the EOC, when it is activated for scheduled exercises or disasters for the purpose of staffing the EOC and implementing the plan.

SIGNATURE OF PUBLIC WORKS OFFICIAL-ROAD COMMISSION	DATE
John H. Daly, III Ph.D.	07/30/15

I. Checklist of Considerations (Public Works/Road Commission):

GENERAL

CHECK BOX	CONSIDERATION
	a) Assist in rescue efforts by providing equipment and personnel as necessary. Maintain contact with Emergency Services to implement rescue operations.
	b) Provide barricades and signs for road closures and boundary identification. (to include activating mutual agreements if additional barricades are needed).
	c) Assist in identifying boundaries of areas in which access must be controlled.
	d) Provide technical expertise in road weight limits, road capacity, etc. to determine whether evacuation routes are adequate for traffic flow.
	e) Provide vehicles and personnel to transport essential goods such as food and medical supplies when directed by the EOC staff.
	f) In conjunction with Public Health, help identify sources of potable water.
	g) Notify Law Enforcement of the location (s) of disabled vehicles.
	h) Contact appropriate Michigan Department of Transportation Official to request travel restrictions on state highways, if necessary.
	i) Maintain Contact with Local Utilities to determine the extent and cause of damage and outages. Report this information and restoration schedules to Emergency Operations Center staff.
	j) Coordinate with utility companies in the restoration of essential services. Provide appropriate assistance, such as debris clearance and traffic control, to expedite restoration.
	k) Provide engineering expertise to inspect public structures to determine whether they are safe to use.
	l) Be prepared to assist the Damage Assessment Group by providing damage information for roads, bridges, buildings, infrastructures, etc.
	m) Prioritize and coordinate the use of emergency lights and other equipment
	n) Assist in identifying and obtaining the appropriate construction equipment to support disaster response and recovery operations.

I. Checklist of Considerations (Public Works/Road Commission):

GENERAL (CONT)

CHECK BOX	CONSIDERATION
	o) Determine interim and permanent debris collection points.
	p) Coordinate activities designed to control the flow of flood water.
	q) Provide sand for sandbagging.
	r) Identify personnel trained to work in a hazardous materials incident.
	s) Determine what support public work crews can provide during a hazardous materials incidents.
	t) Provide a system for augmenting existing resources as it relates to your function
	u) Ensure all personnel are NIMS compliant
	v) Utilize MICIMS to record significant information and situation updates.

II. Checklist of Considerations (Public Works/Road Commission):

NATURAL DISASTER

CHECK BOX	CONSIDERATION
	a) Provide appropriate support listed under General Checklist of Considerations
	b) Ensure public roads are cleared of debris.
	c) Ensure EOC is aware of status of road closures and other public works activities.
	d) Maintain close contact with PIO.
	e) Keep detailed records of man-hours and equipment used in response to the disaster.
	f) Provide list of contractors and heavy equipment providers to EOC staff, as needed.

III. Checklist of Considerations (Public Works/Road Commission):

TECHNOLOGICAL DISASTER

CHECK BOX	CONSIDERATION
	a) Provide appropriate support listed under General Checklist of Considerations
	b) Ensure Public Works personnel understand hot, warm and cold zones.
	c) Ensure all movement of Public Works personnel and equipment inside a potential hot or warm zone is closely coordinated with the Incident Commander and EOC.
	d) Are any considerations listed in Paragraph IV (WMD and Terrorism) appropriate for this event?
	e) In the case of spills, ensure all evidence of the spill has been retained prior to disposal of the agent (except for incidents involving life-safety and property protection).
	f) Has the chemical been identified prior to disposal?
	g) Has the spiller been identified prior to disposal?
	h) Is the contaminated material being disposed of in an authorized facility? ...and by a properly licensed individual or agency?

IV. Checklist of Considerations (Public Works/Road Commission):

TERRORISM AND WEAPONS OF MASS DESTRUCTION

CHECK BOX	CONSIDERATION
	a) Provide appropriate support listed under General Checklist of Considerations
	b) Never send a worker into an active scene without approval of the Incident Commander or appropriate EOC staff personnel.
	c) Can the Public Works Official communicate with agencies providing support?
	d) Has mutual aid been activated/requested?
	e) Can the Public Works Official communicate with the Logistics Officer at the scene/staging area?
	f) Can the Public Works Official communicate with agencies providing support at the state level; i.e. MDOT, etc?
	g) Are barricades necessary for this event?
	h) Are all Public Works responders aware of the hot, warm and cold zones?
	i) Are Public Works agencies aware of the staging area location?
	j) Do all Public Works agencies understand they "do not" report to the scene unless requested.
	k) Are sandbags needed to act as a barrier against an unexploded device?
	l) Are public works agencies aware of evidence preservation?

Jeffrey Wright	7.21.15

(See Also: Public Works / Road Commission)

I. Checklist of Considerations (Public Works / Division of Water & Waste Services):

GENERAL

CHECK BOX	CONSIDERATION
	a) Assist in rescue efforts by providing equipment and personnel as necessary.
	b) Determine the need for water system isolation.
	c) Determine need and extent of water use restrictions.
	d) Determine need for notification of member utilities.
	e) Provide outside contract assistance suppliers.
	f) Provide for emergency potable water supply provisions as necessary.
	g) Establish and provide emergency contact lists for water system operations.
	h) *Execute Emergency Operating Procedures to maximize potable* and fire service water during recovery.
	i) Assist in determining system sampling protocol and locations if water system is damaged or contaminated.
	j) Assist in determining system flushing protocol and locations if water system is damaged or contaminated.
	k) Provide personnel to the Genesee County Emergency Operations Center if necessary.
	l) Utilize MICIMS to record significant information and situation updates.

(See Also: Public Works / Road Commission)

II. Checklist of Considerations (Public Works / Division of Water & Waster Services):

NATURAL DISASTER

CHECK BOX	CONSIDERATION
	a) Provide appropriate support listed under General Checklist of Considerations.
	b) Assist in disaster recovery with equipment and personnel in a *non-hazardous incident.*

III. Checklist of Considerations (Public Works/Division of Water & Waste Management):

TECHNOLOGICAL DISASTER

CHECK BOX	CONSIDERATION
	a) Provide appropriate support listed under General Checklist of Considerations.
	b) Coordinate hazard response activities involving county water systems.

IV. Checklist of Considerations (Public Works/Division of Water & Waste Management):

Terrorism and Weapons of Mass Destruction

CHECK BOX	CONSIDERATION
	a) Provide appropriate support listed under General Checklist of Considerations.
	b) Provide personnel to the Genesee County Emergency Operations Center in activation of the Genesee County Bio Terrorism Response Guidelines. DWWS will provide personnel to the planning/intelligence and operations teams to provide system repair and recovery of DWWS labor force.

Warning

The Genesee County Communications Center will be the main activation site for the Civil Defense County-Wide Warning System according to their Policy #16. This enables the Center to put out a local alert or warning in cases of severe weather, pending disasters, or air attacks.

The following agencies are responsible for the Warning Section of Genesee County Emergency Action Guidelines:

AGENCY	TITLE OF CONTACT
Genesee County Central Communications	Director
Office of Genesee County Sheriff	Sheriff

The line of succession for representing Warning an emergency or disaster situation in Genesee County is:

TITLE	AGENCY
Director Assistant Director	Genesee County Central Communications
Sheriff	Office of Genesee County Sheriff

The Genesee County Central Communications Director and Office of Genesee County Sheriff are responsible for coordinating and representing Warning. He/she will report to the EOC, or delegate another from his/her agency to report to the EOC, when it is activated for scheduled exercises or disasters for the purpose of staffing the EOC and implementing the plan.

SIGNATURE	DATE
Dave Ackley, County 911 Interim Director	9-3-15
Sheriff Robert J. Pickell	9-8-15

I. Checklist of Considerations (Warning):

GENERAL

CHECK BOX	CONSIDERATION
	a) Report to the Emergency Operations Center if necessary when notified of an emergency or disaster or event.
	b) Ensure that all necessary officials have been notified and/or updated of the incident. Determine which Warning Representatives, if not all, should be contacted to staff the Emergency Operations Center and contact them.
	c) Ensure that warning messages received through the Law Enforcement Information Network (LEIN), National Warning System (NAWAS), Emergency Alert System (EAS), Local Weather Spotters, or other verifiable means are issued in a timely manner.
	d) Coordinate warning frequencies and procedures with adjacent communities and other Government Agencies.
	e) Notify neighboring jurisdictions of impending hazard or hazardous situations when instructed to do so by the Chief Executive Official, or Incident Commander.
	f) Determine which area is endangered by the incident and contact those facilities by Reverse 911.
	g) Activate public warning systems when instructed to do so by the Chief Executive Official, Incident Commander, or NWS. (Per County 911 SOP)
	h) Consider use of the following: • Sirens • Code Red (County 911/Fenton City 911) • Door-to-Door • Telephone • Central Dispatch Radio (For Emergency Responders)
	i) Activate EAS via EMNet system when notified a threat to the general public exists.

I. Checklist of Considerations (Warning):

GENERAL (CONT)

CHECK BOX	CONSIDERATION
	j) *Special populations can be notified of impending hazard by using Reverse 911 if appropriate information has been supplied.*
	k) If sirens or EAS are unavailable or unable to warn the public, consider using local police, fire departments, and road/citizens' patrols to warn the public door-to-door; and, when available, by bull horns and Reverse 911 System.
	l) Ensure that hazardous materials incidents are reported to the appropriate authorities.
	m) Provide a system for augmenting existing resources as it relates to your function.
	n) Consider Geographic Information System for maps or resources
	o) Contact appropriate state personnel including District Coordinator (Emergency Management Manager)
	p) Use MICIMS for notification to the state as soon as possible. (Emergency Management Manager)

II. Checklist of Considerations (Warning):

NATURAL DISASTER

CHECK BOX	CONSIDERATION
	a) Provide appropriate support listed under General Checklist of Considerations.
	b) Consider use of PIO for warnings not involving an immediate pending disaster.
	c) Notifications may also come directly from NOAA radios for weather warnings (NWS does not issue watches to the public via the EAS system)
	d) Local media & cable companies should receive an EAS message directly and they will also warn the public.
	e) EOC may also contact National Weather Service in White Lake for assistance as needed.

III. Checklist of Considerations (Warning):

TECHNOLOGICAL DISASTER

CHECK BOX	CONSIDERATION
	a) Provide appropriate support listed under General Checklist of Considerations.
	b) Review North American Response Guidebook for personal understanding of the hazard.
	c) Are any considerations listed in Paragraph IV (WMD and Terrorism) appropriate for this event?
	d) What is the evacuation zone?
	e) What is the vulnerable zone?
	f) What is the wind direction and wind speed? Consider contacting the National Weather Service to ensure warnings affected by the weather are given to appropriate populations.
	g) Ensure EOC staff is aware of all warnings issued to the public.
	h) Maintain close contact with PIO.

IV. Checklist of Considerations (Warning):

Terrorism and Weapons of Mass Destruction

CHECK BOX	CONSIDERATION
	a) Provide appropriate support listed under General Checklist of Considerations
	b) Has the public been warned of evacuation routes?
	c) Has the Emergency Alert System been activated?
	d) Is door-to-door warning necessary?
	e) Are there any Special Populations who need to be warned?
	f) Has Reverse 911 System been activated?
	g) Is another attack possible? Should the public be warned?
	h) Can the media assist in warning the public?
	i) Coordinate warning procedures with PIO for public dissemination.
	j) Coordinate biological and chemical attack warning procedures.
	k) Coordinate radiological warning procedures.
	l) Coordinate hazardous materials warning procedures.
	m) Ensure State and Federal Warning Officials are aware of local warning procedures. (EAG submitted to State)

MEDIA MONITORING REPORT

11/19/2015

Issues:

- No issues to report.

Summary:

- Over the next three days, Southeast Michigan is going to slowly descend from sunny skies and unseasonably warm temperatures into a rainy/snowy weekend.
- A wind advisory is in effect for the second half of the day in the Muskegon area, and snow could be on its way.
- Winter storm watches are posted in parts of five Midwest states as the first accumulating snow of the season for some in the Upper Midwest, Corn Belt, and Great Lakes will put an exclamation mark on a week of change in the weather pattern.
- A sexual discrimination complaint has been filed against Genesee County Sheriff Robert Pickell by the head of the sheriff's homeland security office.
- A mock active shooting training exercise last year at Romeo High School may have been the tipping point for identifying shortcomings with Macomb County's emergency communications system.
- Efforts are taking place to help deal with damage that remains from August 2014 flooding in Detroit.
- Gov. Rick Snyder announced that the state of Michigan has retained its accreditation by the Emergency Management Accreditation Program. This national accreditation reaffirms the ability of state government to prepare for and respond to all types of emergencies and disasters.
- The Belgian jihadi suspected of masterminding deadly attacks in Paris died along with his cousin in a police raid on a suburban apartment building, officials said Thursday.
- At least three dozen people in the United States suspected of ties to the Islamic State were under heavy electronic or physical surveillance even before the Paris attacks, senior American officials say.
- Governor Rick Snyder was the first governor in the nation to speak out on refugees following last week's terrorist attacks in Paris and Beirut. And he may have come to regret it as he tries to clarify his position vis a vis what a lot of the nation's other Republican governors are saying about refugees and immigration.
- Oakland County Executive L. Brooks Patterson has stepped into the Syrian refugee debate by urging Pontiac Mayor Deirdre Waterman to discontinue her support of housing Syrian refugees in Pontiac.
- A Republican legislator is renewing a push to lift Wisconsin's moratorium on new nuclear power plants, saying the state's manufacturers must have a reliable source of energy as burning fossil fuels grows more expensive.
- Leaders from the Flint area want stronger regulation of public drinking water systems to avoid more problems such as the lead contamination that has plagued the Michigan city.
- Elected officials and activists have delivered the story of Flint's lead in water crisis in person to the federal government, testifying Wednesday, Nov. 18, before a U.S. EPA advisory council.

Analysis:

- Media coverage is neutral.
- Snow is looking more and more likely this weekend. Confidence is great about having snow; however, the amount is uncertain at this time. Forecasts are ranging from 1 to 6 inches.
- Will continue to monitor the evolving weather conditions.

MICHIGAN WEATHER

Up to 6 inches of snow on way as Michigan's temps cool

The Detroit News, Nov. 19, 2015

Over the next three days, the metro area is going to slowly descend from sunny skies and unseasonably warm temperatures into a rainy/snowy weekend.

"Things are going to be turning cooler starting Thursday night into Friday," meteorologist Sara Schultz said. "Thursday will be pretty nice with highs in the lower 50s, but temperatures will begin to drop at night. On Thursday, we can also expect a little wind with gusts as high as the lower 30s."

Friday is expected to be dry with a high temperature in the low 40s while the nighttime low will be around 30 degrees.

"We have the potential for snow starting Friday night into Saturday," Schultz said. "We have a chance of one or two inches in the metro area, but it will most likely be rain mixed with snow."

Wild weather on its way with high winds, waves then snow predicted

MLive-Muskegon, Nov. 19, 2015

MUSKEGON, MI – A wind advisory is in effect for the second half of the day in the Muskegon area, and snow could be on its way.

The National Weather Service advisory, in effect from noon to midnight Thursday, Nov. 19, calls for wind gusts up to 50 mph, particularly along the lake. A gale warning is in effect for Lake Michigan, with waves expected to be 6 to 10 feet Thursday night.

Then on Friday, a storm system possibly bringing up to 9 inches of snow, will move into the area and linger through Wednesday, according to a hazardous weather outlook statement from the Weather Service.

First Snow of Season Ahead in Parts of the Midwest, Including Chicago, Detroit, Milwaukee; Winter Storm Watches Issued

Weather Channel, Nov. 19, 2015

Winter storm watches are posted in parts of five Midwest states as the first accumulating snow of the season for some in the Upper Midwest, Corn Belt, and Great Lakes will put an exclamation mark on a week of change in the weather pattern.

A swath from northeast Nebraska and southeast South Dakota into Iowa, southern Wisconsin and northern Illinois is covered by winter storm watches issued by local National Weather Service offices. In the much of the Upper Midwest, this means a potential for at least 6 inches of snow in 12 hours, or 8 inches of snow in 24 hours.

EMERGENCY MANAGEMENT AND HOMELAND SECURITY

County homeland security head files sexual discrimination claim against sheriff

MLive-Flint, Nov. 18, 2015

GENESEE COUNTY, MI – A sexual discrimination complaint has been filed against Genesee County Sheriff Robert Pickell by the head of the sheriff's homeland security office.

enifier Boyer filed a complaint against Pickell Nov. 13 claiming sexual discrimination at the workplace.

Boyer's attorney, Glen Lenhoff who is speaking on her behalf, declined to detail specifics of the complaint. The Flint Journal through the Freedom of Information Act has requested a copy of the complaint.

"Jenifier Boyer is a very honorable and highly educated woman," Lenhoff said. "Her sex discrimination complaint against Mr. Pickell must be taken very serious by the Genesee County commissioners. A complaint and un-biased investigation must be completed immediately. She is the highest female managerial person in the whole department."

Macomb County in Michigan Gets $10 Million Plan to Beef up Police Communications

Detroit Free Press, Nov.17, 2015

A mock active shooting training exercise last year at Romeo High School may have been the tipping point for identifying shortcomings with Macomb County's emergency communications system.

Officials were trying to show what the new communications center filled with video screens and dispatchers can do by infiltrating camera systems in local schools. Those watching at the communications center in Mt. Clemens could see what was happening live as the SWAT exercise unfolded, but they couldn't talk with the officers inside the school.

"Had it been real, it would have been disastrous," County Executive Mark Hackel said Thursday. "We need to enhance this. It enhances everyone's ability to communicate with each other."

Volunteer effort seeks to deal with 2014 flood damage

Associated Press, Nov. 17, 2015

DETROIT (AP) - Efforts are taking place to help deal with damage that remains from August 2014 flooding in Detroit.

The city says about 3,000 families still are living in homes damaged by the flooding despite more than $60 million in Federal Emergency Management Agency funds being distributed for city residents. Millions more has been made available in southeast Michigan.

A group called All Hands Volunteers, in partnership with Northwest Detroit Flood Recovery Project and United Methodist Committee on Relief, will be working to clean up at least 100 homes between Thursday and Dec. 1. The partnership is called All Hands On Detroit.

Those organizing the effort are seeking volunteers. Organizers will provide training and necessary safety equipment. Signup details are online.

State retains emergency management accreditation

Hillsdale Daily News, Nov. 18, 2015

Gov. Rick Snyder today announced that the state of Michigan has retained its accreditation by the Emergency Management Accreditation Program. This national accreditation reaffirms the ability of state government to prepare for and respond to all types of emergencies and disasters.

"The state of Michigan continues to be a national emergency management and homeland security leader," Snyder said. "In Michigan, we are committed to having a system in place that ensures our residents are prepared for all hazards, whether natural or human-made. I commend the Michigan State Police and the other state departments for their dedication and commitment in this arena."

PARIS ATTACKS

Suspected mastermind of Paris attacks killed

Associated Press, Nov. 19, 2015

Paris — The Belgian jihadi suspected of masterminding deadly attacks in Paris died along with his cousin in a police raid on a suburban apartment building, officials said Thursday.

Paris Prosecutor Francois Molins' office said 27-year-old Abdelhamid Abaaoud was identified based on skin samples, but authorities did not know how he died. His body was found in the apartment building targeted in the chaotic and bloody raid in the Paris suburb of Saint-Denis on Wednesday.

Three police officials say a woman who died in the raid was Abaaoud's cousin. One said Hasna Aitboulahcen is believed to have detonated a suicide vest after a brief conversation with police officers.

The official confirmed an audio recording, punctuated by gunshots, in which an officer asks: "Where is your boyfriend?" and she responded angrily: "He's not my boyfriend!" Then loud bangs are heard.

The exact relationship between Abaaoud and Aitboulahcen was not clear.

U.S. Investigators Struggle to Track Homegrown ISIS Suspects

New York Times, Nov. 19, 2015

WASHINGTON — At least three dozen people in the United States suspected of ties to the Islamic State were under heavy electronic or physical surveillance even before the Paris attacks, senior American officials say. But unlike the attackers in France, the officials say, the majority of those under investigation here never traveled to Syria to fight alongside the Islamic State or receive training from it.

In many ways, the officials say, that makes the American investigations even harder. Those under investigation typically have little terrorism expertise or support from a cell, which makes thwarting an Islamic State-inspired attack in the United States less like stopping a traditional terrorist plot and more like trying to prevent a school shooting.

SYRIAN REFUGEES

Syrian refugees controversy gets Lansing's attention

Lansing State Journal, Nov. 19, 2015

LANSING - The resettlement of Syrian refugees in Michigan is a controversial issue, but several Lansing area organizations and leaders are ready to help others get out of the warn-torn country.

St. Vincent Catholic Charities has resettled in Mid-Michigan over 20,000 refugees from around the world in the last 30 years and hopes to welcome up to 100 from Syria within the next year — if the federal government continues allowing the placements.

"We'll keep doing what we do and we'll see what happens," said Judi Harris, program director for refugee services at St. Vincent. "I think it's a little too early right now to change anything."

Students, faculty respond to Snyder's refugee stance

Michigan Daily (U of M), Nov. 19, 2015

In wake of terrorist attacks in Paris that left 129 dead, Michigan Gov. Rick Snyder joined 31 governors in vowing to pause the entry of Syrian refugees into their states.

Early reports indicated that one the attackers may have been a refugee from Syria, though officials now say that theory was likely incorrect. Even so, that notion stoked fears that ISIS fighters would enter the country along with the refugees fleeing their violent campaigns.

In response, LSA senior Sarah Raoof and Public Health students Tala Dahbour and Reem Kashlan launched a letter-writing campaign on Facebook. The campaign encourages students to visit the "Share your Opinion" page on the governor's website to send either a pre-written or personal letter expressing opposition to his plan to block Syrian refugees.

Snyder trying to clear his record in statements on refugees

Michigan Radio, Nov. 19, 2015

Governor Rick Snyder was the first governor in the nation to speak out on refugees following last week's terrorist attacks in Paris and Beirut. And he may have come to regret it as he tries to clarify his position vis a vis what a lot of the nation's other Republican governors are saying about refugees and immigration.

Following the attacks, Governor Snyder said he was hitting the "pause" button on efforts to get more visas for Middle Eastern refugees to settle in Michigan.

Oakland County Executive orders staff to end support of Pontiac Syrian housing project

Oakland Press, Nov. 18, 2015

Oakland County Executive L. Brooks Patterson has stepped into the Syrian refugee debate by urging Pontiac Mayor Deirdre Waterman to discontinue her support of housing Syrian refugees in Pontiac.

The development in question is proposed for a 10-block area near Franklin Road and South Boulevard.

The move follows calls from several governors' announcements — including one from Michigan Gov. Rick Snyder — to postpone accepting Syrian refugees.

Snyder can't legally refuse refugees, but he probably won't roll out the welcome mat

Michigan Radio, Nov. 18, 2015

When Gov. Rick Synder's office released a statement asking the Department of Homeland Security to review the vetting process for Syrian refugees seeking asylum in the United States after the terrorist attacks in Paris, the reaction was swift.

Soon dozens of governors declared their opposition or support of settling Syrian refugees in their respective states.

However, Detroit Free Press Capitol Hill reporter Todd Spangler tells Stateside host Cynthia Canty that state governors have no legal say when it comes to accepting refugees.

Kaffer: Snyder's political pandering on refugees shames us all

Detroit Free Press, Nov. 19, 2015

One of the worst things about terrorism is it works. Last week's deadly terrorist attacks in Paris did exactly what its perpetrators intended: killed innocent Parisians, surely, but caused people across the globe to worry that they'd be next, to fear sudden death or torment at the hands of anonymous, implacable attackers.

It's hard to argue with fear. It allows little room for cool-headed decision making.

And in that context, the "circle the wagons" response of many Americans after the Paris attacks is understandable. It is manifest most publicly in a resistance toward accepting refugees from Syria, where the Islamic State in Iraq and Syria holds territory.

The U.S. has taken in 1,800 Syrian refugees in the last two years. Because conflict in Syria is ongoing, and because the number of refugees has taxed that country's immediate neighbors, President Barack Obama has said the U.S. will take in 10,000 refugees by the end of 2016.

Compounded by the current story that one of the attackers entered France with a phony passport, with a trail indicating he'd entered France as a refugee, it's easy to understand why many Americans might fear an onrush of poorly vetted immigrants from Syria that could include criminals bent on harm.

But that's not how it works.

And it's impossible to understand why some elected officials -- like Gov. Rick Snyder -- have opted not to educate and inform, but to fan the flames of suspicion and intolerance. Snyder, along with 33 other governors, have said they will halt efforts to accept Syrian refugees, something they are not legally capable of doing. This boneheaded move is particularly startling in Snyder's case; for years, he's pitched Michigan as a destination for immigrants, suggesting that new residents from overseas could help reverse the state's population loss.

MICHIGAN NUCLEAR

Michigan legislators urge new Canadian PM to say 'no' to nuclear dump

The Voice, Nov. 19, 2015

Michigan's two U.S. senators and 10 of its 14 U.S. representatives wasted little time in signing a letter to new Canadian Prime Minister Justin Trudeau, urging his government to deny the necessary

permits to Ontario Power Generation to build a nuclear waste dump 2,200 feet underground less than a mile from Lake Huron.

The letter went out on Nov. 5, the day after Trudeau was sworn in as prime minister and proceeded to appoint a diverse cabinet comprising 15 men and 15 women.

After congratulating Trudeau on becoming Canada's 23rd prime minister, the U.S. politicians zeroed in on the issue at hand.

Wisconsin Republicans push to lift nuclear plant moratorium

Associated Press, Nov. 16, 2015

MADISON, Wis. (AP) — A Republican legislator is renewing a push to lift Wisconsin's moratorium on new nuclear power plants, saying the state's manufacturers must have a reliable source of energy as burning fossil fuels grows more expensive.

Under current Wisconsin law, state regulators can't grant permission for a new nuclear power plant unless a federal storage facility for the waste from nuclear plants across the country exists and the plant wouldn't burden state ratepayers. No such centralized storage facility exists, however. President Barack Obama's administration pulled funding for creating one at Nevada's Yucca Mountain, leaving nuclear plants to continue storing waste on-site in pools and casks.

FLINT WATER

Flint leaders seek tougher rules on lead in drinking water

Associated Press, Nov. 18, 2015

Leaders from the Flint area want stronger regulation of public drinking water systems to avoid more problems such as the lead contamination that has plagued the Michigan city.

U.S. Rep. Dan Kildee told the Environmental Protection Agency's National Drinking Water Council the lead pollution of Flint's water was a "failure of government." The council met Wednesday near Washington, D.C., to discuss revising a federal rule on lead and copper levels in water.

Story of Flint water crisis, 'failure of government,' unfolds in Washington

MLive-Flint, Nov. 18, 2015

FLINT, MI -- Elected officials and activists have delivered the story of Flint's lead in water crisis in person to the federal government, testifying Wednesday, Nov. 18, before a U.S. EPA advisory council.

"What happened in Flint is a failure of government, and we must ensure that it never happens again to Flint or any other community," U.S. Rep. Dan Kildee, D-Flint, said in opening testimony to the National Drinking Water Advisory Council. "The EPA has the ultimate responsibility to ensure that drinking water standards are followed."

In addition to Kildee, state Senate Minority Leader Jim Ananich, D-Flint; Dr. Mona Hanna-Attisha of Hurley Medical Center; Flint resident LeeAnne Walters; and professor Marc Edwards of Virginia Tech university all testified to the council, which is considering changes in federal rules on lead in water.

Flint doctor who exposed lead health crisis calls for change by the EPA

WJRT-TV 12 in Flint, Nov. 18, 2015

WASHINGTON, D.C. (WJRT) - (11/18/15) - The doctor who helped expose Flint's problem with lead in the drinking water spent Wednesday morning talking about the issue before leaders in Washington D.C.

Dr. Mona Hanna-Attisha testified before the Environmental Protection Agency, along with a Flint mother who claims her child has lead poisoning.

Hanna-Attisha used a PowerPoint presentation to showcase how something like this can happen anywhere across the country, not only in Flint.

MSU holds forum on Flint water

WJRT-TV 12 in Flint, Nov. 18, 2015

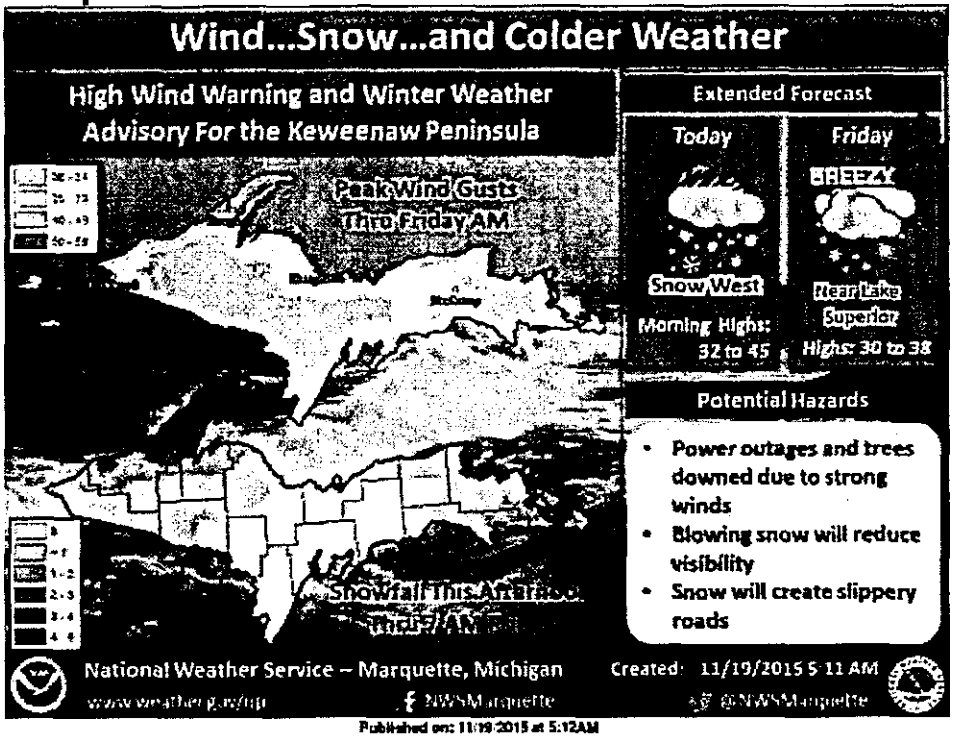
EAST LANSING (WJRT) - (11/18/15) - It's well beyond just the talk of the town.

It's the reason behind protests and the subject of mayoral debates, conversations in Lansing and now, hearings in Washington.

But ask a college student 50 miles away about Flint's water emergency and a lot of them will say they haven't heard about it.

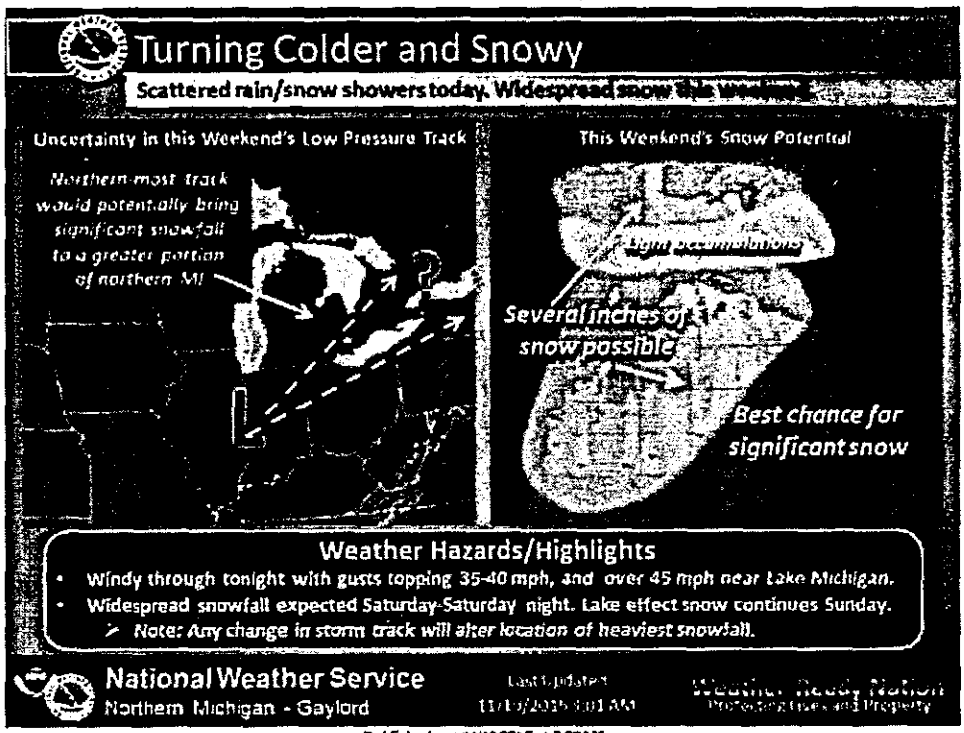
NATIONAL WEATHER SERVICE FORECASTS

Marquette



Gusty southwest winds will bring much colder air into the area today, along with lake effect snow this afternoon over the Keweenaw and tonight over the western U.P. The strong winds will lead to some power outages and when combined with the snow, visibilities will be greatly reduced over the Keweenaw Peninsula.

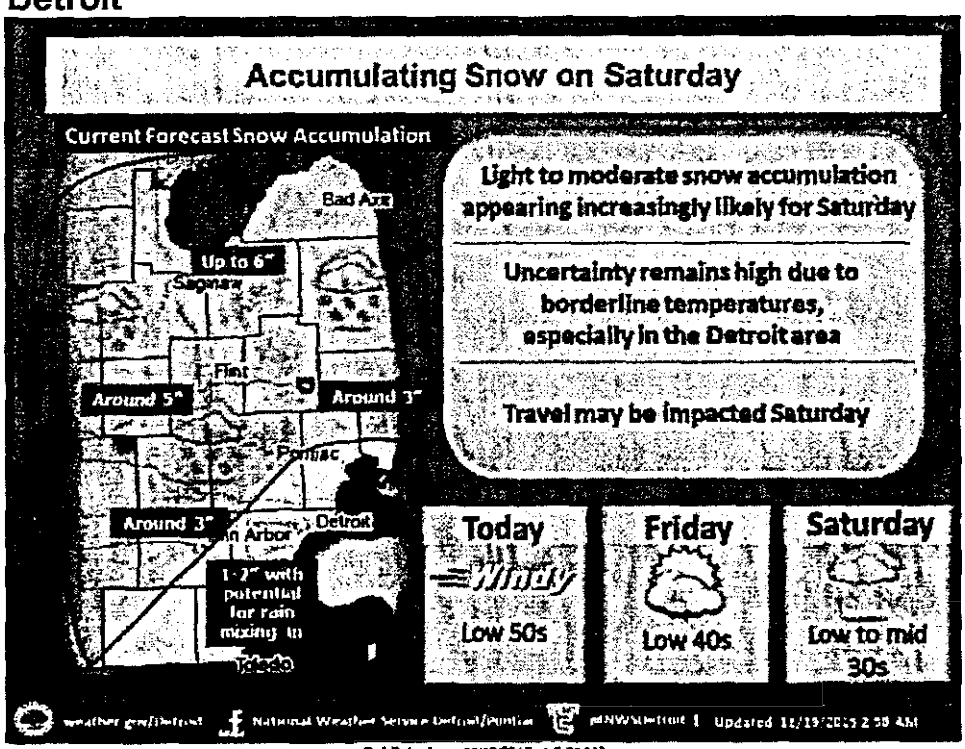
Gaylord



Published on: 11/19/2015 at 3:02AM

Scattered rain showers are expected to continue, mixing with snow on today. Potential is still for widespread snowfall across northern Michigan on Saturday with lake effect snow continuing Sunday.

Detroit



Published on: 11/19/2015 at 3:01AM

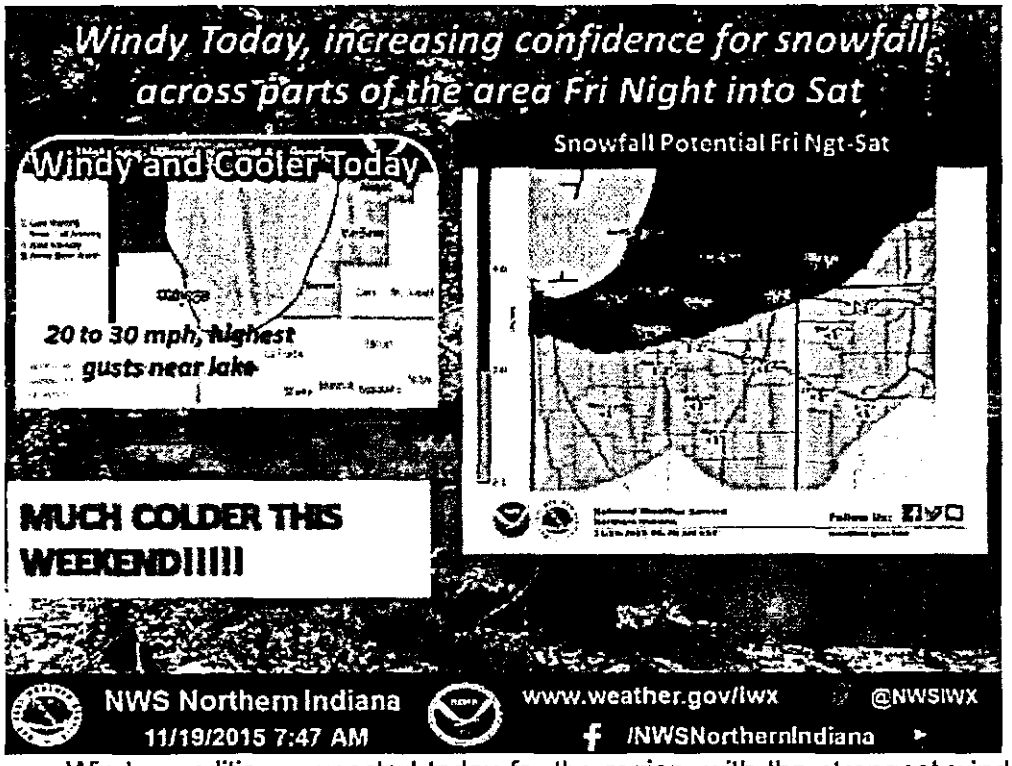
Gusty winds will be followed by falling temperatures this afternoon. A colder airmass in place for Friday will offset early day sunshine keeping highs near 40. Accumulating snow will move into the area during the day on Saturday. Uncertainty with regard to storm track and temperatures are still present, but

it appears that northwest portions of SE Michigan will see up to 6" of snow. Amounts will taper off further south, with the potential for warm temperatures to cause rain to mix in at times for Detroit.

Grand Rapids

It will be another windy day with gusts around 40 mph inland and 45 mph along the lakeshore. This could lead to some scattered power outages. The temperature will fall especially later this afternoon. There will also be some light showers around. Accumulating snow (about 3-6 inches) and inconvenient travel are expected on Saturday.

Northern Indiana



Windy conditions expected today for the region, with the strongest winds expected closer to Lake Michigan, especially in Berrien county. Sustained winds of 20 to 30 mph with gusts to 40 mph will be common. Locally higher gusts to 45 mph or more are possible in Berrien county, warranting a Wind Advisory. Of greater focus is the increasing likihood for accumulating snow across parts of the area late Friday night into Saturday. The majority of the snow will fall during the day Saturday, which may limit amounts as temperatures in the mid to upper 30s and warm ground temperatures cause some melting of the snow as it falls. In addition, the track of the system is still being fine tuned with the highest amounts potentially shifting north or south. Once this system passes, MUCH colder air will arrive with highs Sunday struggling to climb above freezing.

Fact Sheet

Emergency or Disaster Declaration Process

The Michigan Emergency Management Act (Public Act 390 of 1976, as amended) outlines the emergency management process for the state of Michigan. If an incident exhausts state resources, the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 USC §§ 5121-5207) establishes the process for requesting and obtaining a presidential disaster declaration and assistance from the federal government.

STEP BY STEP: Emergency or Disaster Declaration Process

1. *Disasters are first and foremost local events.* Most disasters are handled by local government with minimal or no state assistance. At the onset of a disaster or emergency, local emergency responders, joined by volunteers and the private sector, are the first to be involved.

2. A local jurisdiction may declare a "Local State of Emergency" exists when they have sustained widespread or severe damage, injury or loss of life or property. A local declaration ensures the response and recovery aspects of the emergency operations plan have been activated, and local resources are being utilized to the fullest extent possible. Authorities may authorize local aid and assistance.

3. If recovery efforts are beyond the ability of local government, the community may turn to the state to request assistance. All requests for assistance are channeled through the Michigan State Police, Emergency Management and Homeland Security Division.

4. The Michigan State Police, Emergency Management and Homeland Security Division reviews specific requests for state assistance and makes recommendations to the Governor's Office. The Governor's authority, granted by the Michigan Emergency Management Act, may include mobilizing state government agencies to provide necessary support and assistance to local authorities under a "State of Emergency" or "State of Disaster" declaration.

5. If state and local government resources are unable to cope with the emergency or disaster, the Governor may request assistance through the U.S. Department of Homeland Security (DHS), Federal Emergency Management Agency (FEMA), Region V Office in Chicago.

6. At the request of the Governor, FEMA may conduct a Preliminary Damage Assessment (PDA) in cooperation with state and local emergency management officials. The results of the PDA will be reviewed by state officials and the Governor's Office and used as a basis for determining whether to request federal financial assistance.

7. Should the state request federal disaster assistance, FEMA will review the request and make a recommendation to the president, who will make the final determination on any disaster aid to be provided to the state. The goal of disaster assistance is not to make individuals, businesses or government entities whole again, but to restore the community to a level that meets expected health and safety considerations.

MEDIA MONITORING REPORT

11/19/2015

Issues:

- No issues to report.

Summary:

- Over the next three days, Southeast Michigan is going to slowly descend from sunny skies and unseasonably warm temperatures into a rainy/snowy weekend.
- A wind advisory is in effect for the second half of the day in the Muskegon area, and snow could be on its way.
- Winter storm watches are posted in parts of five Midwest states as the first accumulating snow of the season for some in the Upper Midwest, Corn Belt, and Great Lakes will put an exclamation mark on a week of change in the weather pattern.
- A sexual discrimination complaint has been filed against Genesee County Sheriff Robert Pickell by the head of the sheriff's homeland security office.
- A mock active shooting training exercise last year at Romeo High School may have been the tipping point for identifying shortcomings with Macomb County's emergency communications system.
- Efforts are taking place to help deal with damage that remains from August 2014 flooding in Detroit.
- Gov. Rick Snyder announced that the state of Michigan has retained its accreditation by the Emergency Management Accreditation Program. This national accreditation reaffirms the ability of state government to prepare for and respond to all types of emergencies and disasters.
- The Belgian jihadi suspected of masterminding deadly attacks in Paris died along with his cousin in a police raid on a suburban apartment building, officials said Thursday.
- At least three dozen people in the United States suspected of ties to the Islamic State were under heavy electronic or physical surveillance even before the Paris attacks, senior American officials say.
- Governor Rick Snyder was the first governor in the nation to speak out on refugees following last week's terrorist attacks in Paris and Beirut. And he may have come to regret it as he tries to clarify his position vis a vis what a lot of the nation's other Republican governors are saying about refugees and immigration.
- Oakland County Executive L. Brooks Patterson has stepped into the Syrian refugee debate by urging Pontiac Mayor Deirdre Waterman to discontinue her support of housing Syrian refugees in Pontiac.
- A Republican legislator is renewing a push to lift Wisconsin's moratorium on new nuclear power plants, saying the state's manufacturers must have a reliable source of energy as burning fossil fuels grows more expensive.
- Leaders from the Flint area want stronger regulation of public drinking water systems to avoid more problems such as the lead contamination that has plagued the Michigan city.
- Elected officials and activists have delivered the story of Flint's lead in water crisis in person to the federal government, testifying Wednesday, Nov. 18, before a U.S. EPA advisory council.

Analysis:

- Media coverage is neutral.
- Snow is looking more and more likely this weekend. Confidence is great about having snow; however, the amount is uncertain at this time. Forecasts are ranging from 1 to 6 inches.
- Will continue to monitor the evolving weather conditions.

MICHIGAN WEATHER

Up to 6 inches of snow on way as Michigan's temps cool

The Detroit News, Nov. 19, 2015

Over the next three days, the metro area is going to slowly descend from sunny skies and unseasonably warm temperatures into a rainy/snowy weekend.

"Things are going to be turning cooler starting Thursday night into Friday," meteorologist Sara Schultz said. "Thursday will be pretty nice with highs in the lower 50s, but temperatures will begin to drop at night. On Thursday, we can also expect a little wind with gusts as high as the lower 30s."

Friday is expected to be dry with a high temperature in the low 40s while the nighttime low will be around 30 degrees.

"We have the potential for snow starting Friday night into Saturday," Schultz said. "We have a chance of one or two inches in the metro area, but it will most likely be rain mixed with snow."

Wild weather on its way with high winds, waves then snow predicted

MLive-Muskegon, Nov. 19, 2015

MUSKEGON, MI – A wind advisory is in effect for the second half of the day in the Muskegon area, and snow could be on its way.

The National Weather Service advisory, in effect from noon to midnight Thursday, Nov. 19, calls for wind gusts up to 50 mph, particularly along the lake. A gale warning is in effect for Lake Michigan, with waves expected to be 6 to 10 feet Thursday night.

Then on Friday, a storm system possibly bringing up to 9 inches of snow, will move into the area and linger through Wednesday, according to a hazardous weather outlook statement from the Weather Service.

First Snow of Season Ahead in Parts of the Midwest, Including Chicago, Detroit, Milwaukee; Winter Storm Watches Issued

Weather Channel, Nov. 19, 2015

Winter storm watches are posted in parts of five Midwest states as the first accumulating snow of the season for some in the Upper Midwest, Corn Belt, and Great Lakes will put an exclamation mark on a week of change in the weather pattern.

A swath from northeast Nebraska and southeast South Dakota into Iowa, southern Wisconsin and northern Illinois is covered by winter storm watches issued by local National Weather Service offices. In the much of the Upper Midwest, this means a potential for at least 6 inches of snow in 12 hours, or 8 inches of snow in 24 hours.

EMERGENCY MANAGEMENT AND HOMELAND SECURITY

County homeland security head files sexual discrimination claim against sheriff

MLive-Flint, Nov. 18, 2015

GENESEE COUNTY, MI – A sexual discrimination complaint has been filed against Genesee County Sheriff Robert Pickell by the head of the sheriff's homeland security office.

enifier Boyer filed a complaint against Pickell Nov. 13 claiming sexual discrimination at the workplace.

Boyer's attorney, Glen Lenhoff who is speaking on her behalf, declined to detail specifics of the complaint. The Flint Journal through the Freedom of Information Act has requested a copy of the complaint.

"Jenifier Boyer is a very honorable and highly educated woman," Lenhoff said. "Her sex discrimination complaint against Mr. Pickell must be taken very serious by the Genesee County commissioners. A complaint and un-biased investigation must be completed immediately. She is the highest female managerial person in the whole department."

Macomb County in Michigan Gets $10 Million Plan to Beef up Police Communications

Detroit Free Press, Nov.17, 2015

A mock active shooting training exercise last year at Romeo High School may have been the tipping point for identifying shortcomings with Macomb County's emergency communications system.

Officials were trying to show what the new communications center filled with video screens and dispatchers can do by infiltrating camera systems in local schools. Those watching at the communications center in Mt. Clemens could see what was happening live as the SWAT exercise unfolded, but they couldn't talk with the officers inside the school.

"Had it been real, it would have been disastrous," County Executive Mark Hackel said Thursday. "We need to enhance this. It enhances everyone's ability to communicate with each other."

Volunteer effort seeks to deal with 2014 flood damage

Associated Press, Nov. 17, 2015

DETROIT (AP) - Efforts are taking place to help deal with damage that remains from August 2014 flooding in Detroit.

The city says about 3,000 families still are living in homes damaged by the flooding despite more than $60 million in Federal Emergency Management Agency funds being distributed for city residents. Millions more has been made available in southeast Michigan.

A group called All Hands Volunteers, in partnership with Northwest Detroit Flood Recovery Project and United Methodist Committee on Relief, will be working to clean up at least 100 homes between Thursday and Dec. 1. The partnership is called All Hands On Detroit.

Those organizing the effort are seeking volunteers. Organizers will provide training and necessary safety equipment. Signup details are online.

State retains emergency management accreditation

Hillsdale Daily News, Nov. 18, 2015

Gov. Rick Snyder today announced that the state of Michigan has retained its accreditation by the Emergency Management Accreditation Program. This national accreditation reaffirms the ability of state government to prepare for and respond to all types of emergencies and disasters.

"The state of Michigan continues to be a national emergency management and homeland security leader," Snyder said. "In Michigan, we are committed to having a system in place that ensures our residents are prepared for all hazards, whether natural or human-made. I commend the Michigan State Police and the other state departments for their dedication and commitment in this arena."

PARIS ATTACKS

Suspected mastermind of Paris attacks killed

Associated Press, Nov. 19, 2015

Paris — The Belgian jihadi suspected of masterminding deadly attacks in Paris died along with his cousin in a police raid on a suburban apartment building, officials said Thursday.

Paris Prosecutor Francois Molins' office said 27-year-old Abdelhamid Abaaoud was identified based on skin samples, but authorities did not know how he died. His body was found in the apartment building targeted in the chaotic and bloody raid in the Paris suburb of Saint-Denis on Wednesday.

Three police officials say a woman who died in the raid was Abaaoud's cousin. One said Hasna Aitboulahcen is believed to have detonated a suicide vest after a brief conversation with police officers.

The official confirmed an audio recording, punctuated by gunshots, in which an officer asks: "Where is your boyfriend?" and she responded angrily: "He's not my boyfriend!" Then loud bangs are heard.

The exact relationship between Abaaoud and Aitboulahcen was not clear.

U.S. Investigators Struggle to Track Homegrown ISIS Suspects

New York Times, Nov. 19, 2015

WASHINGTON — At least three dozen people in the United States suspected of ties to the Islamic State were under heavy electronic or physical surveillance even before the Paris attacks, senior American officials say. But unlike the attackers in France, the officials say, the majority of those under investigation here never traveled to Syria to fight alongside the Islamic State or receive training from it.

In many ways, the officials say, that makes the American investigations even harder. Those under investigation typically have little terrorism expertise or support from a cell, which makes thwarting an Islamic State-inspired attack in the United States less like stopping a traditional terrorist plot and more like trying to prevent a school shooting.

SYRIAN REFUGEES

Syrian refugees controversy gets Lansing's attention

Lansing State Journal, Nov. 19, 2015

LANSING - The resettlement of Syrian refugees in Michigan is a controversial issue, but several Lansing area organizations and leaders are ready to help others get out of the warn-torn country.

St. Vincent Catholic Charities has resettled in Mid-Michigan over 20,000 refugees from around the world in the last 30 years and hopes to welcome up to 100 from Syria within the next year — if the federal government continues allowing the placements.

"We'll keep doing what we do and we'll see what happens," said Judi Harris, program director for refugee services at St. Vincent. "I think it's a little too early right now to change anything."

Students, faculty respond to Snyder's refugee stance

Michigan Daily (U of M), Nov. 19, 2015

In wake of terrorist attacks in Paris that left 129 dead, Michigan Gov. Rick Snyder joined 31 governors in vowing to pause the entry of Syrian refugees into their states.

Early reports indicated that one the attackers may have been a refugee from Syria, though officials now say that theory was likely incorrect. Even so, that notion stoked fears that ISIS fighters would enter the country along with the refugees fleeing their violent campaigns.

In response, LSA senior Sarah Raoof and Public Health students Tala Dahbour and Reem Kashlan launched a letter-writing campaign on Facebook. The campaign encourages students to visit the "Share your Opinion" page on the governor's website to send either a pre-written or personal letter expressing opposition to his plan to block Syrian refugees.

Snyder trying to clear his record in statements on refugees

Michigan Radio, Nov. 19, 2015

Governor Rick Snyder was the first governor in the nation to speak out on refugees following last week's terrorist attacks in Paris and Beirut. And he may have come to regret it as he tries to clarify his position vis a vis what a lot of the nation's other Republican governors are saying about refugees and immigration.

Following the attacks, Governor Snyder said he was hitting the "pause" button on efforts to get more visas for Middle Eastern refugees to settle in Michigan.

Oakland County Executive orders staff to end support of Pontiac Syrian housing project

Oakland Press, Nov. 18, 2015

Oakland County Executive L. Brooks Patterson has stepped into the Syrian refugee debate by urging Pontiac Mayor Deirdre Waterman to discontinue her support of housing Syrian refugees in Pontiac.

The development in question is proposed for a 10-block area near Franklin Road and South Boulevard.

The move follows calls from several governors' announcements — including one from Michigan Gov. Rick Snyder — to postpone accepting Syrian refugees.

Snyder can't legally refuse refugees, but he probably won't roll out the welcome mat

Michigan Radio, Nov. 18, 2015

When Gov. Rick Synder's office released a statement asking the Department of Homeland Security to review the vetting process for Syrian refugees seeking asylum in the United States after the terrorist attacks in Paris, the reaction was swift.

Soon dozens of governors declared their opposition or support of settling Syrian refugees in their respective states.

However, Detroit Free Press Capitol Hill reporter Todd Spangler tells Stateside host Cynthia Canty that state governors have no legal say when it comes to accepting refugees.

Kaffer: Snyder's political pandering on refugees shames us all

Detroit Free Press, Nov. 19, 2015

One of the worst things about terrorism is it works. Last week's deadly terrorist attacks in Paris did exactly what its perpetrators intended: killed innocent Parisians, surely, but caused people across the globe to worry that they'd be next, to fear sudden death or torment at the hands of anonymous, implacable attackers.

It's hard to argue with fear. It allows little room for cool-headed decision making.

And in that context, the "circle the wagons" response of many Americans after the Paris attacks is understandable. It is manifest most publicly in a resistance toward accepting refugees from Syria, where the Islamic State in Iraq and Syria holds territory.

The U.S. has taken in 1,800 Syrian refugees in the last two years. Because conflict in Syria is ongoing, and because the number of refugees has taxed that country's immediate neighbors, President Barack Obama has said the U.S. will take in 10,000 refugees by the end of 2016.

Compounded by the current story that one of the attackers entered France with a phony passport, with a trail indicating he'd entered France as a refugee, it's easy to understand why many Americans might fear an onrush of poorly vetted immigrants from Syria that could include criminals bent on harm.

But that's not how it works.

And it's impossible to understand why some elected officials -- like Gov. Rick Snyder -- have opted not to educate and inform, but to fan the flames of suspicion and intolerance. Snyder, along with 33 other governors, have said they will halt efforts to accept Syrian refugees, something they are not legally capable of doing. This boneheaded move is particularly startling in Snyder's case; for years, he's pitched Michigan as a destination for immigrants, suggesting that new residents from overseas could help reverse the state's population loss.

MICHIGAN NUCLEAR

Michigan legislators urge new Canadian PM to say 'no' to nuclear dump

The Voice, Nov. 19, 201`5

Michigan's two U.S. senators and 10 of its 14 U.S. representatives wasted little time in signing a letter to new Canadian Prime Minister Justin Trudeau, urging his government to deny the necessary

permits to Ontario Power Generation to build a nuclear waste dump 2,200 feet underground less than a mile from Lake Huron.

The letter went out on Nov. 5, the day after Trudeau was sworn in as prime minister and proceeded to appoint a diverse cabinet comprising 15 men and 15 women.

After congratulating Trudeau on becoming Canada's 23rd prime minister, the U.S. politicians zeroed in on the issue at hand.

Wisconsin Republicans push to lift nuclear plant moratorium

Associated Press, Nov. 16, 2015

MADISON, Wis. (AP) — A Republican legislator is renewing a push to lift Wisconsin's moratorium on new nuclear power plants, saying the state's manufacturers must have a reliable source of energy as burning fossil fuels grows more expensive.

Under current Wisconsin law, state regulators can't grant permission for a new nuclear power plant unless a federal storage facility for the waste from nuclear plants across the country exists and the plant wouldn't burden state ratepayers. No such centralized storage facility exists, however. President Barack Obama's administration pulled funding for creating one at Nevada's Yucca Mountain, leaving nuclear plants to continue storing waste on-site in pools and casks.

FLINT WATER

Flint leaders seek tougher rules on lead in drinking water

Associated Press, Nov. 18, 2015

Leaders from the Flint area want stronger regulation of public drinking water systems to avoid more problems such as the lead contamination that has plagued the Michigan city.

U.S. Rep. Dan Kildee told the Environmental Protection Agency's National Drinking Water Council the lead pollution of Flint's water was a "failure of government." The council met Wednesday near Washington, D.C., to discuss revising a federal rule on lead and copper levels in water.

Story of Flint water crisis, 'failure of government,' unfolds in Washington

MLive-Flint, Nov. 18, 2015

FLINT, MI – Elected officials and activists have delivered the story of Flint's lead in water crisis in person to the federal government, testifying Wednesday, Nov. 18, before a U.S. EPA advisory council.

"What happened in Flint is a failure of government, and we must ensure that it never happens again to Flint or any other community," U.S. Rep. Dan Kildee, D-Flint, said in opening testimony to the National Drinking Water Advisory Council. "The EPA has the ultimate responsibility to ensure that drinking water standards are followed."

In addition to Kildee, state Senate Minority Leader Jim Ananich, D-Flint; Dr. Mona Hanna-Attisha of Hurley Medical Center; Flint resident LeeAnne Walters; and professor Marc Edwards of Virginia Tech university all testified to the council, which is considering changes in federal rules on lead in water.

Flint doctor who exposed lead health crisis calls for change by the EPA

WJRT-TV 12 in Flint, Nov. 18, 2015

WASHINGTON, D.C. (WJRT) - (11/18/15) - The doctor who helped expose Flint's problem with lead in the drinking water spent Wednesday morning talking about the issue before leaders in Washington D.C.

Dr. Mona Hanna-Attisha testified before the Environmental Protection Agency, along with a Flint mother who claims her child has lead poisoning.

Hanna-Attisha used a PowerPoint presentation to showcase how something like this can happen anywhere across the country, not only in Flint.

MSU holds forum on Flint water

WJRT-TV 12 in Flint, Nov. 18, 2015

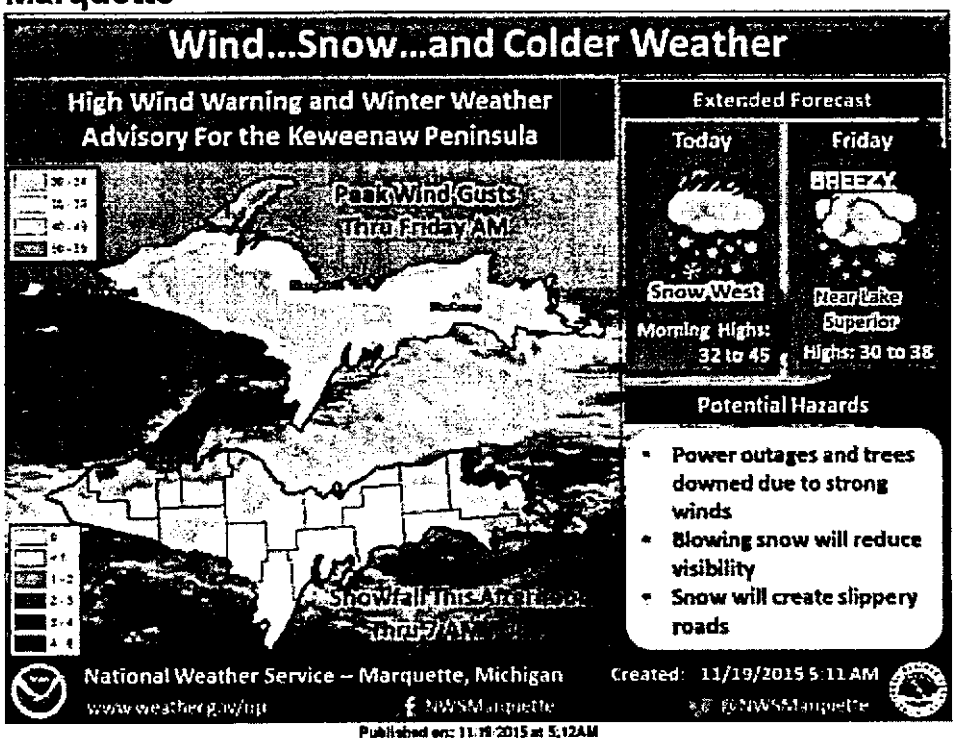
EAST LANSING (WJRT) - (11/18/15) - It's well beyond just the talk of the town.

It's the reason behind protests and the subject of mayoral debates, conversations in Lansing and now, hearings in Washington.

But ask a college student 50 miles away about Flint's water emergency and a lot of them will say they haven't heard about it.

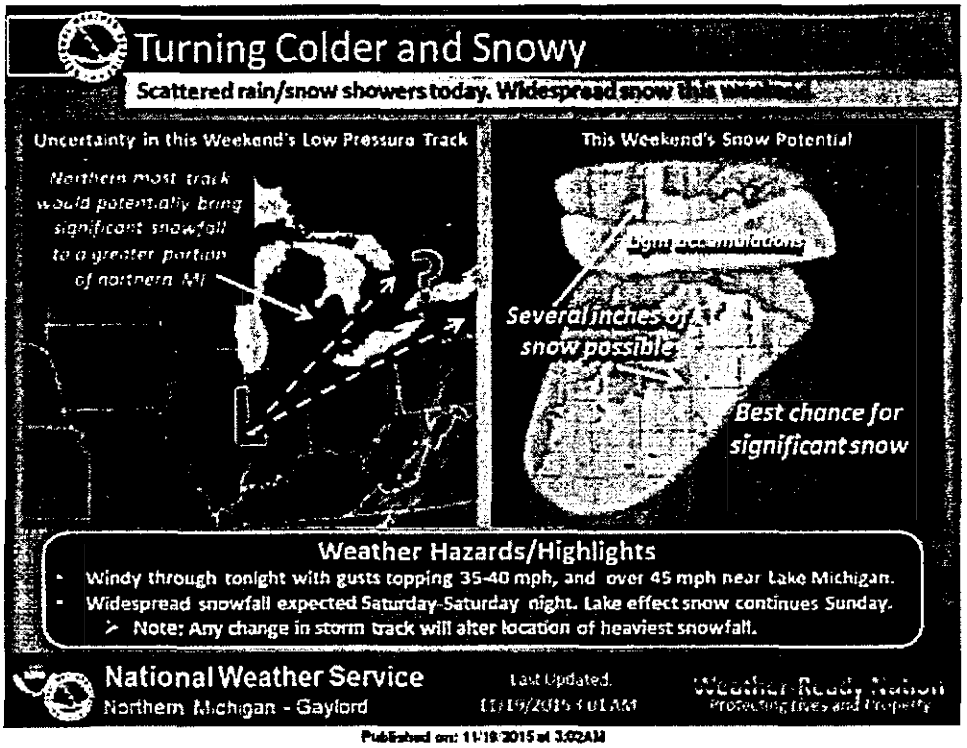
NATIONAL WEATHER SERVICE FORECASTS

Marquette



Gusty southwest winds will bring much colder air into the area today, along with lake effect snow this afternoon over the Keweenaw and tonight over the western U.P. The strong winds will lead to some power outages and when combined with the snow, visibilities will be greatly reduced over the Keweenaw Peninsula.

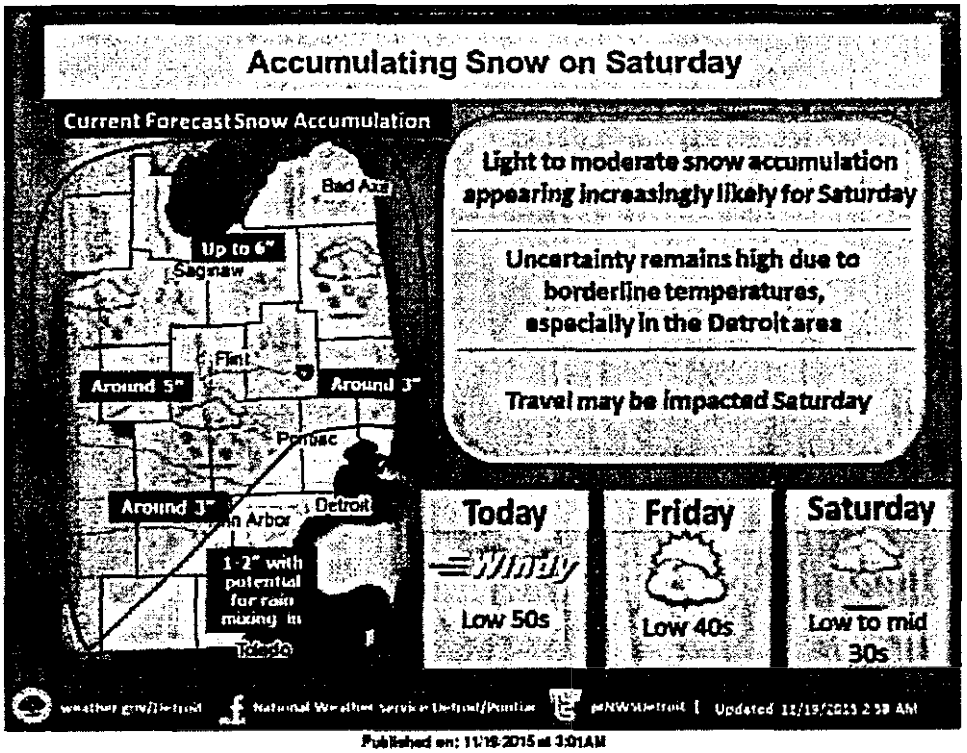
Gaylord



Published on: 11/18/2015 at 3:02AM

Scattered rain showers are expected to continue, mixing with snow on today. Potential is still for widespread snowfall across northern Michigan on Saturday with lake effect snow continuing Sunday.

Detroit



Published on: 11/18/2015 at 3:01AM

Gusty winds will be followed by falling temperatures this afternoon. A colder airmass in place for Friday will offset early day sunshine keeping highs near 40. Accumulating snow will move into the area during the day on Saturday. Uncertainty with regard to storm track and temperatures are still present, but

it appears that northwest portions of SE Michigan will see up to 6" of snow. Amounts will taper off further south, with the potential for warm temperatures to cause rain to mix in at times for Detroit.

Grand Rapids

Published on. 11/18/2015 at 8:28AM

It will be another windy day with gusts around 40 mph inland and 45 mph along the lakeshore. This could lead to some scattered power outages. The temperature will fall especially later this afternoon. There will also be some light showers around. Accumulating snow (about 3-6 inches) and inconvenient travel are expected on Saturday.

Northern Indiana

Windy conditions expected today for the region, with the strongest winds expected closer to Lake Michigan, especially in Berrien county. Sustained winds of 20 to 30 mph with gusts to 40 mph will be common. Locally higher gusts to 45 mph or more are possible in Berrien county, warranting a Wind Advisory. Of greater focus is the increasing likihood for accumulating snow across parts of the area late Friday night into Saturday. The majority of the snow will fall during the day Saturday, which may limit amounts as temperatures in the mid to upper 30s and warm ground temperatures cause some melting of the snow as it falls. In addition, the track of the system is still being fine tuned with the highest amounts potentially shifting north or south. Once this system passes, MUCH colder air will arrive with highs Sunday struggling to climb above freezing.

MEDIA MONITORING REPORT

12/4/2015

Issues:

- No issues to report.

Summary:

- Congressmen Dan Kildee spoke loud and clear to President Obama's cabinet, America's top corporate CEO's and other lawmakers about Flint's water emergency and infrastructure problems plaguing the city.
- The Department of Health and Human Services says of the nearly 1,000 children in Flint it tested since the beginning of October, 21 children still have elevated blood lead levels.
- Preliminary state data indicates that 30 of 1,361 adults and children tested in Flint since October 1 had elevated blood lead levels, according to a report issued today by the Michigan Department of Health and Human Services.
- Peter Bade, who served as city attorney throughout Mayor Dayne Walling's six years as mayor, has tendered his resignation.
- The professor whose research helped expose rising levels of lead in drinking water in Flint says it's still not safe to drink without a faucet filter.
- The head of Genesee County's homeland security, Jenifier Boyer, submitted her resignation Tuesday Dec. 1 just weeks after she filed a sex discrimination complaint against Genesee County Sheriff Robert Pickell.
- In light of the most recent mass shooting in California this week, public safety at Northern Michigan University says they are prepared to handle a similar situation.
- WLNS does a report on what to do if there is an active shooter situation at a workplace.
- Gwinnett County commissioners gave the Gwinnett County Fire and Emergency Services officials permission this week to accept 500 smoke alarms and a $10,000 stipend from the Michigan Public Health Institute to pay for education programs in elementary schools.
- Kalamazoo County emergency management officials say they've been training to respond to a mass shooting since before September 11.
- The suspects in the San Bernardino shootings used semiautomatic rifles that were legally obtained despite gun laws in California that were intended to ban assault weapons and are widely regarded as among the strictest in the country.
- The woman who helped carry out the shooting in San Bernardino, Calif., on Wednesday had pledged allegiance to the Islamic State in a Facebook posting, according to federal law enforcement officials.
- National Weather Service forecast updates.
- TV clips: Detroit Homeland Security Officials roll out emergency alert system; Self-defense in a shooting situation.

Analysis:

- Media coverage is neutral.
- Heavy coverage on San Bernardino shooting incident that occurred Wednesday, Dec. 2.
- Coverage continues on Flint water issues.

- The Department of Health and Human Services reports that nearly 1,000 children in Flint it tested since the beginning of October, 21 children still have elevated blood lead levels.
- Flint City attorney Peter Blade resigns; Flint Mayor Karen Weaver expects to replace blade despite questions about her authority to make appointments because of the state's oversight.
- Will continue to monitor situation.

Congressman Dan Kildee discusses Flint's water emergency in White House meeting

ABC 12, December 3, 2015

FLINT (WJRT)- (12/3/15) - Inside the White House Export Council meeting Thursday, Congressmen Dan Kildee spoke loud and clear to President Obama's cabinet, America's top corporate CEO's and other lawmakers about Flint's water emergency and infrastructure problems plaguing the city.

" It's a city of 100,000 people, that for fourteen months had lead levels in its water system that were so high that 7,000 children under the age of five, for fourteen months, were explose to lead in a way that will affect the trajectory of their lives permanently," Representative Kildee said.

New blood lead level results in from the state

ABC 12, December 3, 2015

FLINT (WJRT) - (12/03/15) - New blood lead level results are in from the state.

The Department of Health and Human Services says of the nearly 1,000 children in Flint it tested since the beginning of October, 21 children still have elevated blood lead levels.

Flint city attorney resigns; New mayor says she expects to name replacement

MLive, December 3, 2015

FLINT – Peter Bade, who served as city attorney throughout Mayor Dayne Walling's six years as mayor, has tendered his resignation.

Bade said today, Dec. 3, that he has accepted a position in the Office of General Counsel at Hurley Medical Center and will serve his last day as city attorney Jan. 1.

MDHHS releases latest data outlining blood lead levels in Flint; follow up care, case management resources continue for families

Michigan.gov, December 3, 2015

LANSING, Mich. – Preliminary data indicates that 30 of 1,361 adults and children tested in Flint since October 1 had elevated blood lead levels, according to a report issued today by the Michigan Department of Health and Human Services.

This marks the first summary report on lead testing called for in the state's action plan related to health concerns about Flint's water infrastructure.

Preliminary state data shows drop in rate of elevated lead levels in Flint

MLive, December 3, 2015

FLINT, MI – Preliminary data shows 30 of 1,361 adults and children tested since Oct. 1 in Flint had elevated blood lead levels, according to a new state report.

The 2.2 percent rate of elevated blood lead is below the 6 percent rate found in tests done between July and September, the state said.

Congressman Dan Kildee pushes action on Flint Water Crisis, infrastructure investments at White House meeting of President's export council

dankildee.house.gov, December 3, 2015

Congressman Dan Kildee (MI-05) today spoke at the White House about the Flint water crisis and the need for critical investments in our nation's older, industrial cities like Flint, Saginaw and Bay City, especially when it comes to improvements to our infrastructure and aging water systems.

Congressman Kildee's remarks came at a meeting of the President's Export Council, where he is one of only five members of the U.S. House of Representatives appointed to advisory board. The President's Export Council is the principal advisory council to the president on trade and manufacturing, made up of both government and private sector leaders. Since his appointment in January by former Speaker of the House John Boehner, Congressman Kildee has used his position on the council to push for policies that support American workers and American cities. It has also allowed him to advocate for economic policies that create jobs and boost U.S. manufacturing exports.

Flint water still unsafe without lead filters, professor says

MLive, December 3, 2015

FLINT, MI — The professor whose research helped expose rising levels of lead in drinking water in Flint says it's still not safe to drink without a faucet filter.

Professor Marc Edwards told doctors and others at Hurley Medical Center on Wednesday, Dec. 2, that researchers at Virginia Tech university are continuing to test water samples in Flint, and while lead levels are dropping, they remain above the federal limit for lead in some areas.

EMERGENCY MANAGEMENT AND HOMELAND SECURITY

County official who claims workplace sex discrimination resigns

MLive, December 3, 2015

GENESEEE COUNTY, MI – The head of Genesee County's homeland security, Jenifier Boyer, submitted her resignation Tuesday Dec. 1 just weeks after she filed a sex discrimination complaint against Genesee County Sheriff Robert Pickell.

Boyer filed a complaint against Pickell on Nov. 13 claiming sexual discrimination at the workplace.

Self-defense in a shooting situation

WILX, December 4, 2015

The first option you have in an active shooter situation is to run.

"Anytime you're out, whether you're at a mall, children in school, government building, movie theatre, you should always know your way out. you should always know the quickest exit," said Lt. Brody Boucher with Michigan State Police.

That starts with always being aware of your surroundings. Because if you can't run, the next option is to hide.

NMU officers talk about preparing for active shooters

Upper Michigan Source, December 3, 2015

MARQUETTE — In light of the most recent mass shooting in California this week, public safety at Northern Michigan University says they are prepared to handle a similar situation.

Public safety trains their officers to gather information, secure perimeters, and make contact with shooting suspects. They train year-round with city, county and state officers. In an active shooter situation, people should try to barricade the room they are in with chairs, tables and anything that will keep the shooter out.

Agencies talk emergency communications plans

Up North Live, December 3, 2015

WPBN/WGTU — With the events that happened on Wednesday in California, law enforcement in Northern Michigan said they are prepared to respond to a mass casualty or active shooter situation.

Law enforcement said they're constantly training and will regularly work with other agencies to make sure that they're on the same page.

What to do if an active shooter comes into your workplace

WLNS, December 3, 2015

LANSING, MI (WLNS)- The deadly shooting that happened yesterday is a stark reminder that similar violence could happen almost anywhere.

This begs the question, what plans can you have in place to keep this from happening in your workplace and respond quickly if it did?

Six news spoke to Michigan State Police and officials at MSU about how to plan for the unexpected.

Fire department joining Michigan-based fire safety education program

Gwinnett Daily Post, December 3, 2015

Does your child know what to do when a fire breaks out?

If they don't, Gwinnett County Fire and Emergency Services officials plan to make sure will learn soon enough. County commissioners gave the agency permission this week to accept 500 smoke alarms and a $10,000 stipend from the Michigan Public Health Institute to pay for education programs in elementary schools.

The money enables the department to join the institute's Sound Off with the Home Safety Patrol program as a "super site selection."

Kalamazoo county officials say W. Mich. is prepared for mass shooting event

WWMT, December 3, 2015

KALAMAZOO, Mich. (NEWSCHANNEL 3) - According to the Washington Post, there have been 355 mass shootings this year.

In fact, the shooting in San Bernardino was the second mass shooting on Wednesday alone.

Four people were shot, and one person was killed in Savannah, Georgia.

SAN BERNARDINO SHOOTING

'It was unspeakable': San Bernardino Officer says of shooting scene

NPR, December 4, 2015

Lt. Mike Madden of the San Bernardino police was on his way to lunch when a dispatcher sent out word of an active shooter at the Inland Regional Center.

Madden is a police administrator, and dispatch is one function he oversees. He could tell from the dispatcher's voice that "this was actually happening, a real event. ... We have an active shooter, and we have an active shooter going on in our city."

Couple kept tight lid on plans for San Bernardino shooting

New York Times, December 3, 2015

SAN BERNARDINO, Calif. — Syed Rizwan Farook and Tashfeen Malik met online and married two years ago, after he presented himself on a Muslim dating site as a devout young man who liked to fix cars and memorize the Quran. They registered at Target when Ms. Malik became pregnant, with a cheery newlyweds' catalog of wishes: a car seat, diapers and safety swabs.

But for all the outward signs of suburban normality, this couple, according to the police, used their comfortable home in a middle-class community near here to stockpile weapons and build pipe bombs. And on Wednesday morning, they left their 6-month-old daughter with her grandmother before heading to a holiday party with Mr. Farook's co-workers where, the police say, they killed 14 people and wounded 21 others. A few hours later, they died in a crush of bullets in a brutal face-off with the police.

Weapons in San Bernardino Shootings were legally obtained

New York Times, December 4, 2015

The suspects in the San Bernardino shootings used semiautomatic rifles that were legally obtained despite gun laws in California that were intended to ban assault weapons and are widely regarded as among the strictest in the country.

The rifles were variants of the popular AR-15, the semiautomatic civilian version of a military M-16. They are surprisingly easy to acquire in California, though they come with limitations aimed at curbing their ability to inflict mass damage. Semiautomatic rifles, for instance, cannot have magazines that hold more than 10 bullets or can be quickly removed.

San Bernardino gunwoman pledged allegiance to ISIS, officials say

New York Times, December 4, 2015

WASHINGTON — The woman who helped carry out the shooting in San Bernardino, Calif., on Wednesday had pledged allegiance to the Islamic State in a Facebook posting, according to federal law enforcement officials.

There's no evidence the group directed the woman, Tashfeen Malik, and her husband Syed Rizwan Farook, to launch the attacks, which killed 14 and wounded 21, said the officials, who spoke on the condition of anonymity because the investigation is continuing.

CBS News obtains photos of Calif. Shooters' bombs

CBS News, December 3, 2015

CBS News has obtained images of explosive devices found at a Southern California social services center and the home of Syed Rizwan Farook, 28, and his wife, Tashfeen Malik, 27.

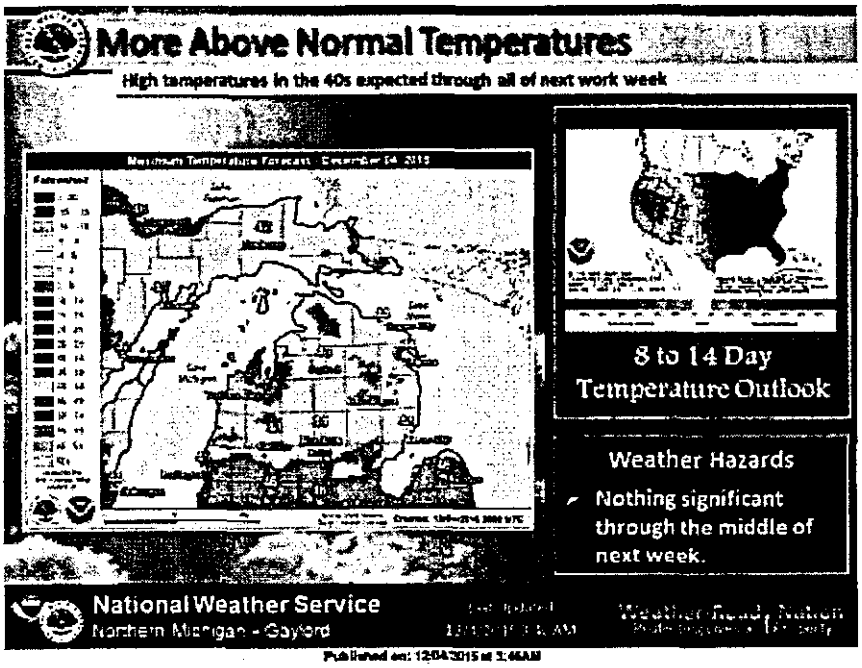
Below is a photograph of the explosive device found at the facility where the holiday party was held. It is a cell phone photograph taken of the screen of the robot used by bomb squad to evaluate the explosive device. The photo shows a yellow toy car with a remote device intended to be the ignition source and three pipes connected to it and wires.

NATIONAL WEATHER SERVICE FORECASTS

Marquette

It will be a mild and sunny December day today, with highs in the 40s. Expect temperatures tonight to bottom out in the mid 20s to low 30s, with the coolest readings over the interior central portions of Upper Michigan. Taking a look ahead to the start of the weekend, temperatures on Saturday should again be in the 40s. A few 50 degree readings will be possible along the Lake Superior shoreline. With warm days and cool nights, the potential exists for melting snow to re-freeze on sidewalks and roadways, causing black ice.

Gaylord

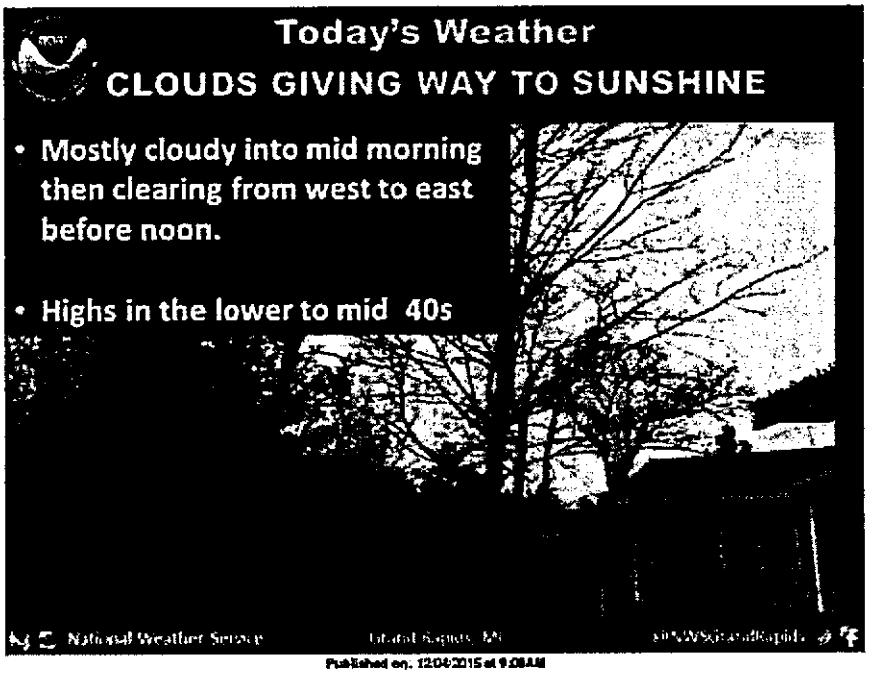


Morning clouds are expected to finally depart, leaving plenty of sun for the afternoon. Precipitation will be very hard to come by, while much warmer than normal temperatures are expected for quite a while. High temperatures through all of next work week will be in the 40s.

Detroit

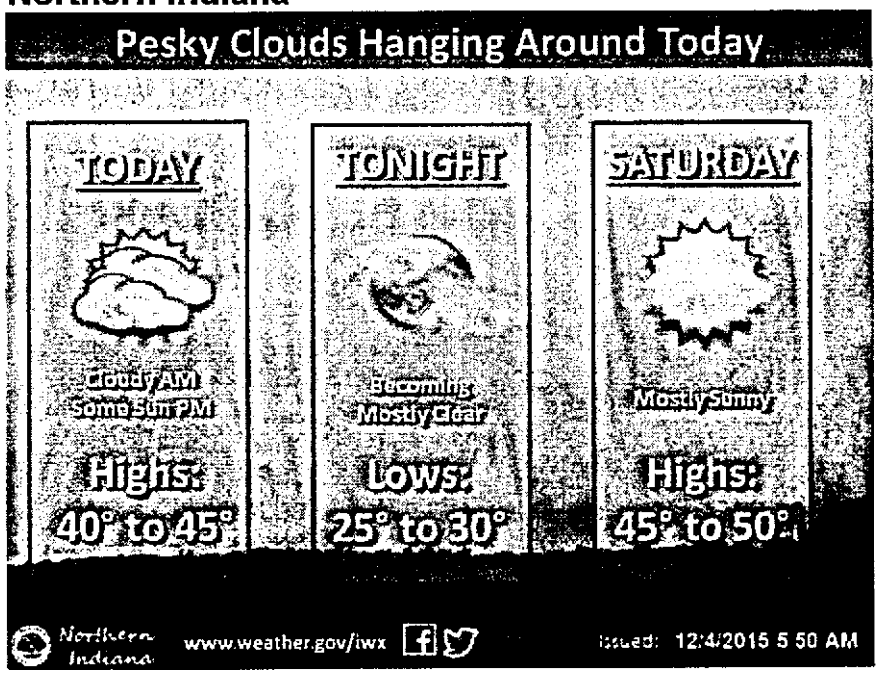
High pressure will influence the region for the next several days, maintaining dry conditions. Southwest flow circulating around this high will maintain an influx of relatively warm air across the region.

Grand Rapids



Decreasing clouds, becoming mostly sunny by noon. Unseasonably warm with highs in the lower to mid 40s.

Northern Indiana



Pesky clouds continue to hang across the area but some sun is expected by this afternoon. Mostly clear skies are expected tonight and Saturday. However...there is a chance that low clouds or even some fog could form once again tonight and spoil this forecast. Highs today will be in the lower 40s and lows tonight will be in the upper 20s.

MEDIA MONITORING REPORT

10/01/2015

Issues:

- Several Flint area media outlets are reporting that the Michigan Legislative Black Caucus is asking Gov. Rick Snyder to declare a "state of emergency" to open federal assistance for Flint's water issues. No local state of emergency has been declared by Genesee County.

Summary:

- Almost a week after news broke that more Flint kids have been lead poisoned, two weeks after state data confirmed that lead levels in Flint's water had spiked, more than a year after residents first noticed something was hinky with the water coming out of their taps, Gov. Rick Snyder has publicly acknowledged that Flint's water supply "appears" to have problems.
- The consequences of using the Flint River for the city's drinking water weren't "fully understood," Gov. Rick Snyder said Wednesday as he again pledged to take action later this week in response to significant levels of lead.
- Water is on the minds of every voter in the upcoming mayoral election in Flint.
- Fewer and fewer people are paying their water bills in Flint.
- Flint hasn't been using any corrosion-control method since it switched from Detroit's water system in April 2014. Corrosion-control treatment helps keep lead out of drinking water. Since the switch, more kids are showing up with elevated levels of lead in their blood.
- The Michigan Legislative Black Caucus is putting pressure on **Gov. Rick Snyder** to issue a state of emergency for the city of **Flint's water problems**.
- A long-time Flint tavern is offering free drinks, both alcoholic and non-alcoholic, for water donations.
- Donations have started to pour in -- some from across the state -- after the Flint School District requested bottled water for students **because of a local lead advisory**.
- If you have concerns about what may be in your city water, City of Flint officials want you to know you can get your water tested for free.
- Governors up and down the East Coast are warning residents to prepare for drenching storms as flooding killed one person Thursday in South Carolina.
- Disaster assistance would benefit from oversight through regular federal evaluation so Congress should consider creating an independent, external oversee of the American Red Cross, according to a new report by the Government Accountability Office (GAO).
- The Department of Homeland Security is demanding the return of a $32.4 FEMA grant awarded to a Houston hospital to repair damages from Hurricane Ike in 2008 after a new audit revealed most of the grant money had been misused.
- Weather across the state: Cool with highs in the 60s, rain possible this weekend.
- TV/Radio Reports: Flint water issues.

Analysis:

- Flint water issues continue to escalate. Members of the Michigan Legislative Black Cacus are asking for the Governor to declare a "state of emergency" for assistance.
- Social media chatter is mobilizing under the #flintwater and #waterworries hashtags on Twitter.

- We will continue to closely monitor the situation.

FLINT WATER

Kaffer: Snyder finally says lead in Flint water may be a problem

Detroit Free Press, Sept. 30, 2015

Almost a week after news broke that more Flint kids have been lead poisoned, two weeks after state data confirmed that lead levels in Flint's water had spiked, more than a year after residents first noticed something was hinky with the water coming out of their taps, Gov. Rick Snyder has publicly acknowledged that Flint's water supply "appears" to have problems.

Publicly, because despite his office's repeated efforts to downplay the severity of the situation, an anonymous water-filter distribution to Flint residents shepherded by Snyder's office earlier this month, suggests that privately, the governor may have understood that something was amiss in this impoverished town.

It's a welcome, if weak, concession from Snyder.

Gov. Rick Snyder: Consequences of using Flint River water weren't 'fully understood' in 2014

Associated Press, Sept. 30, 2015

FLINT, Michigan — The consequences of using the Flint River for the city's drinking water weren't "fully understood," Gov. Rick Snyder said Wednesday as he again pledged to take action later this week in response to significant levels of lead.

Separately, The Flint Journal reported that Snyder's office worked with a donor last month to arrange 1,500 water filters for Flint, which were distributed free to people by churches. The governor's involvement was never publicized, the newspaper reported, because pastors said they were told to stay quiet.

"If the water was OK, why would the governor work with someone to provide the filters?" the Rev. Alfred Harris told the newspaper. "I think the state working with the private donor is an admission the people needed some help."

City's water woes may play big role in upcoming mayoral election

WNEM-TV 5 (Saginaw), Oct. 1, 2015

FLINT, MI (WNEM) -

No doubt about it. Water is on the minds of every voter in the upcoming mayoral election in Flint.

"Flint's water problem is the number one issue that everyone is talking about," said Flint Mayor Dayne Walling.

Numerous problems with Flint River water have plagued the vehicle city since 2014. Now residents are living with high amounts of lead in their tap water.

Many of those people have pinned the blame on Walling including former emergency manager Darnell Early.

In a statement he said he was only implementing the plan laid out by the mayor and city council and said the decision to switch to Flint River water was made long before he became EFM.

Walling disagrees.

"The decision about the flint river was made by prior emergency managers. It was before the time of Darnell Early, he's accurate on that point. But city council and I were just simply not involved," Walling said.

Walling's opponent, Karen Weaver, paints a much different picture.

"He wants to say that it wasn't his decision to do that," Weaver said. "Well, if it wasn't, he sure never spoke out about it not being his decision. He was the one that said it was fine. He was the one that said we could stay with the flint water. He was the one that said brown water was OK to drink."

Fewer Flint water customers are paying their bills

Michigan Radio, Oct. 1, 2015

Fewer and fewer people are paying their water bills in Flint.

Flint's water bill collections are down by $1.75 million since a judge issued an injunction in August rolling back rates and ordering an end to disconnections.

Judge Archie Hayman ruled that Flint illegally raised rates by 35% in 2011.

In his order, the judge told the city to roll back the rate hike on future bills, stop disconnecting customers who are delinquent on the bills through August 2015, and stop placing liens on property owned by delinquent customers.

The water bills with the new rate schedule went out this month.

Flint mayor to state: Approve plan "as fast as humanly possible" to help keep lead out of water

Stateside with Cynthia Canty (Michigan Radio), Sept. 30, 2015

Flint hasn't been using any corrosion-control method since it switched from Detroit's water system in April 2014. Corrosion-control treatment helps keep lead out of drinking water. Since the switch, more kids are showing up with elevated levels of lead in their blood.

Flint Mayor Dayne Walling says he wants to put corrosion-control treatment back in place, but he needs state approval first. The state says it's going to take a little while to implement.

"One of my requests to (Michigan's) Department of Environmental Quality director is that (approval) be accelerated as fast as humanly possible," Walling said.

"Whatever decisions are coming next, we need that corrosion control in the water treatment process that we have now," he said.

Walling was a guest today on Stateside with Cynthia Canty.

Flint water woes seep into city, state politics

The Detroit News, Sept. 30, 2015

Flint — The questionable quality of the city's drinking water made headlines again this week, but not much of it has been news to Ashley Holt.

For almost a year, the water from her faucet has looked "like urine," smelled "like the sewer" and, if you're brave enough to sip it, hasn't tasted "normal," the 25-year-old Flint resident said. It's why she's limited for months how often her children — ages 5, 6 and 12 — come in contact with it.

But following last week's revelation that Flint children are showing higher amounts of lead in their blood, the situation has escalated for her cash-strapped family.

In a city where 41.5 percent of the population is below the poverty line, a lack of money is the reason Holt was walking instead of driving downtown this week to pick up her children from school. She scrambles to find enough to buy them bottled water.

"The only option I've got is just to not drink the water and stick with pop and juice," Holt said. "(I) go to the store and get a gallon of water a day, if I can afford it at the time."

The hardships experienced by residents here are having public health and political ripple effects that are being felt from city hall to the governor's office. Gov. Rick Snyder said Tuesday he could unveil "more action steps" as early as the end of this week.

Legislative Black Caucus urges state of emergency for Flint water

MLive, Sept. 30, 2015

FLINT, MI — The Michigan Legislative Black Caucus is putting pressure on **Gov. Rick Snyder** to issue a state of emergency for the city of **Flint's water problems**.

The organization announced in a Wednesday, Sept. 30, release that its members are concerned about the residents of Flint and lead exposure from the city's water.

The release cited blood samples from Genesee County children that show **lead levels have increased** since the city severed ties from the Detroit Water and Sewerage Department and began using water from the Flint River last year.

According to the release, state Rep. Sheldon Neeley, D-Flint, is working with local, state and federal officials to find solutions and resources.

"Issuing a health emergency is the most responsible thing to do," said Neeley, first vice chairman of the Legislative Black Caucus. "This is a public health crisis, and our children are most at risk. We urge Gov. Snyder to issue the state of emergency so the city of Flint can get immediate monetary relief."

If Snyder declares a state of emergency, the city could gain access to federal funding, the caucus said.

Flint tavern offering free drinks for water donations

MLive, Sept. 30, 2015

FLINT, MI -- A long-time Flint tavern is offering free drinks, both alcoholic and non-alcoholic, for water donations.

A Facebook post from the West Court Street bar reads as follows:

"Let's bring clean water to Flint Schools!

Starting today through Friday (Oct 2) - Bring in a case of water between 4 and 7pm, receive your favorite drink on the house*! All donations will be delivered to Durant Tuuri Mott Elementary School. Thank you for your support!

*Qualifying beverages include beer bottles, draft beer, wine, liquor (single pour) and all non-alcoholic beverages."

Chris Poulos, an owner at the West Court Street bar, said his daughter put up the post after they came up with the idea upon hearing about other donation drives taking place in the city.

"I hope to be able to deliver them 20, 25 cases next week," he said, with the business in the process of making some changes to their filtering system for everyday use.

Water donations start to pour in for Flint schools after lead advisory

MLive, Sept. 30, 2015

FLINT, MI – Donations have started to pour in – some from across the state – after the Flint School District requested bottled water for students **because of a local lead advisory**.

The city and county have **issued lead advisories** related to the city's drinking water. A recent **study by a Hurley Medical Center doctor** says infants and children are being found with elevated levels of lead in their blood since the city switched to using the Flint River as its water source.

On Monday, Superintendent Bilal Tawwab **asked for the community to donate** bottled water to aid the cash-strapped district, which has stopped using tap water in the buildings.

The Flint School District is in the midst of a $16.4 million deficit and all of its spending is guided through its deficit elimination plan.

On Wednesday, Sept. 30, the district received more than 4,000 bottles of water from the 1st Congregational United Church of Christ in Kalamazoo.

How to get your water tested in Flint

WJRT-TV 12 in Flint, Sept. 30, 2015

FLINT (WJRT) - (09/30/15) - If you have concerns about what may be in your city water, City of Flint officials want you to know you can get your water tested for free.

Mike Glasgow, utilities administrator for the City of Flint Water Plant, tells ABC12 more than 250 people have asked to get their water tested just in the past week.

If you're worried about Flint treating the water, this fact might give you some peace of mind.

"We don't do any of the testing here. We're kind of acting as a middle man just to pay and fill out the all the paperwork for the residents to get this testing done," Glasgow said.

EMERGENCY MANAGEMENT AND HOMELAND SECURITY

Hurricane Joaquin could add to rainy mess along East Coast

Associated Press, Oct. 1, 2015

RALEIGH, N.C. (AP) - Governors up and down the East Coast are warning residents to prepare for drenching storms as flooding killed one person Thursday in South Carolina.

The rains could cause power outages and close roads in a region already walloped by rain. Hurricane Joaquin's approach could intensify the damage, but rain is forecast across the region regardless of the storm's path.

"Our state has seen the damage that extreme weather can cause time and time again - and I am urging New Yorkers to take precautions for more heavy storms in the coming days," New York Gov. Andrew Cuomo said in a news release Wednesday.

Red Cross Targeted in Federal Oversight Legislation

The Nonprofit Times, Sept. 16, 2015

Disaster assistance would benefit from oversight through regular federal evaluation so Congress should consider creating an independent, external oversee of the American Red Cross, according to a new report by the Government Accountability Office (GAO).

The 57-page report released today was in response to a request by Rep. Bennie Thompson (D-Miss.), ranking member of the House Committee on Homeland Security, to examine the agency's involvement in disaster relief. The Washington, D.C.-based, federally-charted nonprofit has come under fire in recent months after stories by NPR and ProPublica have raised questions regarding its effectiveness in response to disasters such as the 2010 Haiti earthquake and Hurricane Sandy in 2012.

Evaluation of the Red Cross could be performed by a federal agency such as Department of Homeland Security (DHS), by an Inspector General (IG) office such as the DHS IG, or by a private research firm under contract to a federal agency, according to the report's recommendations.

Thompson also has introduced legislation today that would require audits at least once every three years by the Treasury Inspector General for Tax Administration (TIGTA), Homeland Security Inspector general, and USAID Inspector General; annual reports by DHS to Congress about its partnerships with the Red Cross; and the Red Cross to provide information on its website about how to contact the Office of the Ombudsman.

Houston hospital squandered $32.4M FEMA grant meant for rebuilding after hurricane: report

The Washington Times, Oct. 1, 2015

The Department of Homeland Security is demanding the return of a $32.4 FEMA grant awarded to a Houston hospital to repair damages from Hurricane Ike in 2008 after a new audit revealed most of the grant money had been misused.

Officials at Riverside General Hospital could not account for Federal Emergency Management Agency (FEMA) grant funds when it spent $17.6 million of the $32.4 million, according to the report from DHS' Office of Inspector General released Wednesday.

Hospital management used the money to pay for normal operating expenses, legal fees, federal taxes, insurance, gift cards, a new grant management system and fire alarm repairs — all unrelated to the 2008 hurricane damage, the audit said.

"This is an unconscionable misuse of Federal disaster resources. The entire amount of this grant should be recovered to protect these funds from further abuse," Inspector General John Roth wrote in a statemen

MICHIGAN EMERGENCY MANAGEMENT ASSISTANCE COMPACT (MEMAC)
ASSISTANCE REQUEST FORM

TO BE COMPLETED BY THE REQUESTING AGENCY
Type or print all information except signatures

Date: 3/5/2014	Time: 4:27 pm	From the Political Subdivision of: Marquette County	
Contact Person: Teresa Schwalbach		Telephone: (906) 475-1134	FAX: (906) 475-9927

Incident Requiring Assistance: Region 8 Freeze – Marquette County

General Description of the Damage Sustained:

Continued widespread and severe water and sewer freeze ups throughout the county.

Type of Assistance/Resources Needed:

Eight (8) 300-500 amp. welders w/leads with 2 technically trained operators for each unit to provide assistance in thawing public water lines within the cities of Ishpeming, Negaunee, and Marquette and the townships of Ishpeming, Republic, Forsyth, Ely, Skandia, and Powell for a period of 90 days; One (1) 1000 lb. backhoe mounted frost hammer; One (1) 55,000 lb. class John Deere G 225 (or equal) excavator to run the frost hammer w/5 technically trained operators to provide assistance in thawing public water lines within the city of Negaunee for a period of 90 days; Three (3) Hotsy 1075 SSE Steamers to provide assistance in thawing public water lines in Ishpeming Township, Forsyth Township and Richmond Township for a period of 90 days; Two (2) towable, engine driven 185cfm @100 psi air compressors w/4 technically trained operators to provide assistance in thawing public water lines within the city of Ishpeming and Forsyth Township for a period of 90 days; Two (2) utility trucks w/plows and utility box to provide assistance in thawing public water lines in the city of Negaunee for a period of 90 days; Two (2) Subsurface PL2000 line locators to provide assistance in locating broken lines within the city of Ishpeming Township and Forsyth Township for a period of 90 days. For further information regarding this event, please see MICIMS Damage Assessment for Marquette County. Please note all trained operators should have experience in Department of Public Works operations. There may be additional requests forthcoming as not everyone has responded. The above requested resources are the methods suggested and preferred by those jurisdictions involved and not that of any state or federal agencies.

Date & Time Resources Are Needed: Immediately

Incident Base Location: Various locations throughout Marquette County

Approximate Return Date/Time for Resources: 60 days

MEDIA MONITORING REPORT

10/05/2015

Issues:

- Flint water issues continue to simmer.
- WDIV-TV 4 in Detroit reported that the "state has declared a public health emergency." No known declaration has been made.

Summary:

- Nancy Kaffer opines in the Detroit Free Press about avoiding tap water has become a way of life in Flint.
- The Detroit Free Press looks at the Flint water issue in an editorial.
- The state is convening a technical panel this week that's supposed to come up with a plan to respond to the Flint drinking water emergency. The group is made up of state and federal environmental officials, as well as outside experts.
- After weeks, and in some cases months of worrying about their water, there was finally some relief Saturday for people living in Flint. More than 2,700 water filters were handed out to Flint residents.
- Michigan will spend $1 million to buy water filters and immediately test water in public schools in Flint after testing showed elevated levels of lead in the city's children, the governor said Friday, a day after local health officials declared a public health emergency.
- Donations continue to pour in to Flint Community Schools to help students and staff handle the 'Water Worries'.
- In Flint, lead levels in some children's blood have spiked dramatically, and scientists believe a new drinking water source is to blame. They're pointing to lapses in oversight from state regulators, who they say should've seen the problem coming.
- A U.S. Coast Guard official has more concern over Enbridge's Line 5 pipeline under the ground in the Upper Peninsula rather than the under the Straits of Mackinac.
- Bermuda was lashed Sunday by gusting winds and pelting rains from a weakening Hurricane Joaquin as its spinning center tracked just west of the wealthy financial haven and tourist destination after plowing through the Bahamas as a major storm.
- A student at Monroe Middle School has been diagnosed with viral meningitis.

Analysis:

- Flint water issue coverage has gone international.
- Advocacy groups continue to mobilize due to the Flint water issues.
- Will continue to monitor.

FLINT WATER

Nancy Kaffer: Avoiding tap water has become a way of life in Flint

Detroit Free Press, Oct. 3, 2015

Outside a taco shop on Flint's Fifth Street, Estella Walker balances a gallon jug of water on top of the stroller that holds her 3-month-old son, DeWayne. She's mixing bottles of formula for DeWayne and his 19-month-old sister Vanessa.

Nadene Strickland sits outside her home on the city's north side, watching her grandsons play basketball. She still drinks the water. She can't afford bottled.

Shopping at the local farmers market with five of her seven children, Tena Fransioli says she hasn't used tap water in a long time.

Across town, it's bath night for LeeAnne Walters' kids. She heats bottled water in the microwave and carries it to the bathroom, slowly filling the tub. In Melissa Mays' bathroom, there's a reminder taped to the wall: To brush your teeth, use the bottled water on the bathroom counter.

This is life in Flint, where you really should not drink the water.

And no one, not in this country in the year 2015, should have to live this way.

For more than a year, Flint residents have been screaming that their water wasn't OK, that it smelled bad, tasted bad, looked bad, and was making them sick.

Few listened. The state told them, again and again, that the water was safe — that contamination had been handled, and that the water was within acceptable levels.

It wasn't until last week that Gov. Rick Snyder finally acknowledged the profound problems with Flint's water. Lead, from aging water service pipes, is leaching into the water the city pumps from the Flint River, exacerbated by a local treatment plant's failure to add appropriate chemicals.

But he still won't call it an emergency.

Editorial: For Flint, vindication -- for Snyder, more questions

Detroit Free Press, Oct. 2, 2015

Lead flows through Flint's water system and out of taps in people's homes.

Children have been drinking that water, and suffering the consequences.

And controls that should have prevented this from happening were nonexistent or inadequate.

After months of denial, we finally heard Gov. Rick Snyder and members of his cabinet validate the mounting data that confirms beyond reasonable doubt what Flint residents have known for months: Their water is not safe to drink.

In April 2014 -- while under state oversight -- Flint began to draw its water from the Flint River, a temporary measure until a new regional water authority comprising Flint, Genesee, Sanilac and Lapeer counties is complete next year. For decades, the city had purchased its water from the Detroit Water and Sewerage Department.

By June last year, residents began to complain that their tap water was the wrong color, that it had a troubling odor and taste. Many reported rashes and other health problems, likely linked to a disinfectant added to the water after tests showed it contained coliform bacteria.

By the start of this year, some residents began to suspect the water also contained lead and other heavy metals, leached from Flint's aging infrastructure by more-corrosive Flint River water, exacerbated by an inadequate water treatment plan.

Friday, Snyder and his cabinet announced a plan to improve corrosion controls that should have prevented lead from contaminating drinking water. They'll dedicate $1 million in state funds to purchase water filters for Flint residents, and to pay for expanded water testing and additional health and community resources.

In the long term, Snyder must find state funds to help Flint replace its aging service lines.

For Flint families, it should be the first step toward some semblance of normalcy, to a basic standard of living all Americans take for granted -- that the water running from our taps is clean, and drinkable.

Repairing Flint's water system will be complicated and costly. But the difficulty of that task pales in comparison to the work that must be done to repair the public trust, in both the systems meant to safeguard our health, and in the governor who is meant to oversee those safeguards.

Snyder's acknowledgement comes after repeated assurances that Flint water was safe, even as evidence mounted that this could not be true. An MDEQ spokesman denounced tests performed by a Virginia Tech University researcher -- a MacArthur genius grant recipient -- who evaluated hundreds of water samples, writing to one reporter that "this group specializes in looking for high lead problems. They pull that rabbit out of that hat everywhere they go. Nobody should be surprised when the rabbit comes out of the hat, even if they can't figure out how it is done."

When a hospital researcher announced last week a growing number of Flint children had elevated blood-lead levels, the MDEQ disparaged the researcher's work, calling it not "irresponsible," but "unfortunate," and saying that Flint's water situation had reached "near-hysteria" -- despite state data that showed both increased amounts of lead in the water supply, and a greater number of children with elevated blood-lead levels. Lead poisoning is irreversible; children affected by it suffer from behavioral and developmental problems.

As late as Wednesday, Snyder spokesperson Sara Wurfel questioned the test data, insisting that the lead levels in Flint's water did not reach levels considered actionable by the U.S. Environmental Protection Agency.

The next day, Snyder admitted that in making the switch to Flint River water, that there were "probably things that weren't fully understood when the switch was made."

So we are left with questions that need answers. Not merely because this saga unfolded while Flint was under state oversight, a succession of emergency managers appointed by and answerable to Snyder, but also because the governor oversees the state agencies charged with preventing just this type of crisis.

What was the science that allowed the MDEQ to approve the switch to Flint River water? What was not "fully understood," and in the absence of that information, why did the switch proceed? MDEQ chief Dan Wyant referred to tests that indicated elevated lead levels -- when did were those tests performed?

We -- along, we're confident, with other news agencies in this state -- have filed requests to obtain information that will help answer these questions, through the state's Freedom of Information Act.

But we shouldn't even have to.

Snyder, as the state's chief executive, ought to be riding herd on the autopsy over the process that led to this public health crisis. And in addition to repairing what went wrong -- or defending the state's actions and oversight -- the governor needs to be up front with the public about what he finds.

This should never have happened to the people in Flint. Children, drinking tap water polluted by lead. It reads like something out of an impoverished, technologically deprived nation.

It's up to Snyder to assure that it never happens again.

Detroit men take water to Flint

WDIV-TV 4 in Detroit, Oct. 4, 2015

The Flint water problem has caused the state to declare a public health emergency.

While the state tries to find a permanent solution to the problem, two Detroit men are taking it upon themselves to help Flint families.

Anthony Scales was disturbed by the water crisis and he started collecting cases of bottled water and taking them to Potter Elementary School in Flint.

Tech panel to make recommendation on reconnecting Flint to Detroit

WMUK-FM 102.1, Oct. 5, 2015

The state is convening a technical panel this week that's supposed to come up with a plan to respond to the Flint drinking water emergency. The group is made up of state and federal environmental officials, as well as outside experts.

Dan Wyant directs the state Department of Environmental Quality. He says one of the first decisions is whether to reconnect Flint to the Detroit water system.

"The question is whether we'd be better if we want to Detroit water, and I'd like science to make that determination," Wyant says.

Flint Mayor Dane Walling says he'd ask the state to pick up the cost of one and a half to two million dollars a month if the city re-connects to the Detroit system.

The state is already distributing water filters to city residents, and has promised to step up testing of water in homes and schools.

Water filters given out to Flint residents

WJRT-TV 12 in Flint, Oct. 5, 2015

After weeks, and in some cases months of worrying about their water, there was finally some relief Saturday for people living in Flint.

More than 2,700 water filters were handed out to Flint residents.

The beginning of the day started with those most at risk for lead contamination.

Then the health department quickly opened it up to all city residents.

"I'm very happy I got here," said Sierra Booker, who has a one-year-old daughter.

After filter distribution, why some couldn't make it to get relief

WJRT-TV 12 in Flint, Oct. 4, 2015

2,700 hundred water filters were given out yesterday at U of M Flint's Recreation Center.

At first, only those most at risk were given filters - but by a couple hours in any Flint resident could come.

Still, there were 1,300 filters left at the end of the day, leading some to ask, why?

At River Park Apartments in Flint, a public housing complex, we found many people just didn't know the filter distribution was going on.

"Well we didn't hear about it until the last minute," said resident Natia Anderson.

"I didn't hear about it until a few minutes ago," said resident Lonnie Williams.

The Genesee County Health Department made the announcement late Friday morning, less than 24 hours before the actual event. Organizations like the United Way of Genesee County, and U of M Flint worked tirelessly with the Health Department, to make sure Saturday's giveaway went smoothly.

State and health officials address Flint water crisis, introduce plan of action

WXYZ-TV 7, Oct. 2, 2015

Michigan will spend $1 million to buy water filters and immediately test water in public schools in Flint after testing showed elevated levels of lead in the city's children, the governor said Friday, a day after local health officials declared a public health emergency.

A plan of action was outlined at a news conference, and includes:

*Testing in Flint public schools immediately to ensure that drinking water is safe, with testing also available at no cost to any other school in Flint.

Video: http://www.wxyz.com/news/watch-live-at-130-state-health-officials-address-flint-water-crisis

Water filter giveaway open to all Flint residents held at UM-Flint

MLive, Oct. 3, 2015

Local organizations came together Saturday to distribute 4,000 water filters to Flint residents worried about lead in their water.

The **filter giveaway was held at the University of Michigan-Flint** at the Recreation Center on Saturday, Oct. 3. Originally organizers were focusing on low-income families with children, pregnant women, and the elderly, but opened it up to all residents in the afternoon. The giveaway began at 10 a.m. and ends at 5 p.m.

The United Way, University of Michigan-Flint, city of Flint, and other local agencies and businesses partnered to help distribute the filters.

The 4,000 filters distributed Saturday is only a fraction of the 20,000 estimated filters needed for Flint residents.

Thousands of water filters handed out

WNEM-TV 5 in Saginaw, Oct. 5, 105

FLINT, MI (WNEM) - Following tests that show elevated levels of lead in the Flint water system, thousands of filters were given away over the weekend.

The filters, certified by the National Sanitation Foundation, were handed out Saturday at the University of Michigan-Flint.

People like Margret Brown stood in line to get one. "My daughter is pregnant, she needed a water filter."

That makes Brown's daughter a top priority to receive the help. That's because tests have shown children with elevated levels of lead.

The lead began showing up after Flint switched off the Detroit water system, and started taking water from the Flint River. That water is causing lead in old pipes to flow into homes.

On Friday the state said it will contribute at least $1 million to buy home water filters.

Water filter distribution to start for residents in Flint

Associated Press/WEYI-TV 25 in Flint, Oct. 3, 2015

FLINT — Officials are scheduled to start distributing filters to some Flint residents receiving water from the city's water system.

"It's not good for him to drink that growing up, his body's not fully developed," parent Maxine Gray said of her one month old son.

Tests have shown children with elevated levels of lead, months after Flint began drawing and treating water from the Flint River. The water is stirring up lead in old pipes in thousands of homes.

About 4,000 filters certified by the National Sanitation Foundation will be handed out Saturday morning at the University of Michigan-Flint.

"I'm very excited," said Takisha Moller who's soon expecting her first child. "Glad I'll get to drink healthy water."

Receiving priority will be pregnant women, families where infants are on formula or being breastfed, and Children Special Health Care Services households. Only one filter will be available per home.

The state said Friday it's chipping in at least $1 million to buy home water filters for Flint.

Water donations pour in for Flint Community Schools

WJRT-TV 12 in Flint, Oct. 5, 2015

FLINT (WJRT) - (10/05/15) - Donations continue to pour in to Flint Community Schools to help students and staff handle the 'Water Worries'.

Word has spread throughout the state about the problem with high lead levels in the Flint water system.

As a precaution, water fountains in the Flint schools have been turned off.

Monday morning, two large deliveries were made to the Flint Community Schools. Twenty-four thousand bottles of Aquafina water were donated by the owners of Auto City Service. The truck arrived at the Flint Schools Maintenance and Operations Building on East Court Street and the cases were unloaded.

Walgreens is also donating 4,000 bottles of water to Flint schools. A delivery truck loaded up with 150 cases from the store at Beecher and Ballenger.

The water will be distributed to the 11 active school buildings in the Flint district.

School officials have said the two high schools need extra water because of extra school activities and athletics.

"We really appreciate all the donations we received thus far. Currently, we're able to meet the needs of our students at this point and we're starting to have more conversations on a long-term plan moving forward...we still welcome all donations. You can deliver donations to our maintenance warehouse and also we're accepting donations on the school level," said Bilal Tawwab, Flint Schools superintendent.

Last Friday, the DEQ sampled water from all Flint schools. Results are not back yet.

Sorting out accountability in Flint water issues is "relatively complex"

Michigan Radio, Oct. 5, 2015

In Flint, lead levels in some children's blood have spiked dramatically, and scientists believe a new drinking water source is to blame. They're pointing to lapses in oversight from state regulators, who they say should've seen the problem coming.

Flint's water problems began about a year ago, not long after the city stopped drawing water from Detroit's system. To save money, Flint began getting its water from the Flint River.

But since the switch, doctors and researchers say cases of elevated blood levels in kids under five have doubled in some parts of the city. Lead can cause irreversible health damage, especially in young children.

"It was not my decision. I raised a number of concerns about it throughout the process," Flint Mayor Dayne Walling has said.

He was mayor when the city switched from Detroit's water system to the Flint River. But Mayor Walling wasn't in charge.

"The governor has a substantial responsibility here," he said.

Gov. Rick Snyder had appointed an emergency manager to run Flint.

By law, Michigan cities in danger of going bankrupt can get emergency managers--who have all kinds of power that elected leaders don't. In Flint, they decided the city couldn't afford Detroit's water bill anymore.

The city had been planning to join a new county system, which is under construction. State bean counters decided the Flint River could do until then.

Virginia Tech researcher Marc Edwards says Michigan's environmental regulators should have known Flint's new water source was much more corrosive than the water Detroit piped up from Lake Huron.

He says testing the water in the lab would've been a good start. Other consultants I spoke with said setting up a small scale, mock system inside Flint's water plant would have been a wise move. That would have given them a test period with the new water source before switching the whole system.

Edwards, who's been studying lead in water issues for decades, says Flint should also have had a corrosion control plan in place to treat the water, so that it didn't leach lead from old pipes.

"How on earth this was allowed to happen, or people believed it was ok for it to happen, I don't even know where to get started on that," Edwards said last week.

In February, officials at the U.S. Environmental Protection Agency found lead levels at one woman's home that were high enough to be considered toxic waste.

Edwards says that should've set off alarms for state regulators.

"Instead what they did is they took action after action to cover this problem up, and essentially leave Flint residents in harm's way. So at some point what might be attributed to an honest, perhaps innocent mistake...it changed into something completely different," Edwards said.

Emails show concerned federal officials asked the state if Flint was treating to control corrosion. State officials said yes. When the EPA asked what kind of treatment, there seemed to be a reversal. One email says plainly: "Flint is currently not practicing corrosion control treatment."

When asked if Flint broke federal rules by not having a corrosion control treatment plan, the U.S. EPA said the question was "relatively complex." Emails show at least one EPA employee believes Flint was required to treat the water to help prevent lead corrosion. But EPA spokespeople haven't been willing to say, plainly, that Flint broke federal rules.

Here's the written response from EPA Region 5 Administrator Susan Hedman:

"Actions that the State of Michigan and the City of Flint announced (Friday) are important steps to protect public health. The immediate steps being taken to implement corrosion control will reduce lead in drinking water, as required by the Safe Drinking Water Act. US EPA will continue to provide technical assistance to the State of Michigan and the City of Flint to support their joint effort."

On Friday afternoon, protestors lined up outside a university building, where city and state officials announced their latest plan to fix Flint's water.

"We survived bacteria. We've had boil-water advisories as a result. They put too much chloride in the water. And it's just been one disaster after another," Flint resident Claire McClinton said.

Elizabeth Taylor, another Flint resident, places blame on Gov. Snyder. Why?

"Well, because he put us in this emergency manager situation. They just do whatever he tells them to do," Taylor said.

Taylor is disappointed no officials have been willing to "man up and apologize."

"These men, they're just like...excuse me, but it's like their genitalia have fallen off. They have nothing left in their brains. And you can't run a city or a state like that. They have to be more responsible," she said.

Inside the building, state officials made yet another reversal, telling reporters that, actually, Flint *has* been treating the water for lead.

"State government, and the federal government for that matter, or any government, can only make decisions on the information we've got," Michigan Department of Environmental Quality spokesman Brad Wurfel said.

"We'll also concede that we've been learning as we go. So as we've learned more, we've changed paths here," Wurfel said.

Now state officials say they'll start a new corrosion control treatment plan for Flint by next month.

Until then, they've budgeted $1 million to give people free lead filters for their homes.

EMERGENCY MANAGEMENT AND HOMELAND SECURITY

Great Lakes face threat from another Enbridge line

Detroit Free Press, Oct. 4, 2015

The 62-year-old segment of Canadian oil transport giant Enbridge's Line 5 pipeline underwater, at the bottom of the Straits of Mackinac, has been generating the most buzz and concern lately over how a spill from it would harm the Great Lakes.

But it's another segment of that same pipeline, out of the water and running through the Upper Peninsula along U.S.-2 highway for nearly 90 miles between Manistique and St. Ignace, that poses a more immediate — and just as dire — threat to the lakes, according to a U.S. Coast Guard oil spill contingency specialist. The 30-inch-diameter transmission line runs under at least 20 rivers and creeks that feed into northern Lake Michigan, and at points is within a half-mile of the lake.

"Quite frankly, we see a spill in the straits as a very low probability," said Steven Keck, who's based at the Coast Guard's Sault Ste. Marie station. "But that corridor along U.S.-2 we see as a much higher probability.

"We don't seem to get a lot of attention on that stretch between Manistique and St. Ignace, but it's still the Great Lakes."

A joint team of the Coast Guard; other federal, state, and local agencies; Enbridge officials, and representatives of Marine Pollution Control, an oil spill response contractor for Enbridge, conducted a walking line survey of Line 5 where it crosses streams, creeks and rivers along the U.S.-2 corridor earlier this year.

Bermuda whipped by weakening Hurricane Joaquin

Associated Press, Oct. 5, 2015

HAMILTON, Bermuda (AP) - Bermuda was lashed Sunday by gusting winds and pelting rains from a weakening Hurricane Joaquin as its spinning center tracked just west of the wealthy financial haven and tourist destination after plowing through the Bahamas as a major storm.

Residents of the mid-Atlantic British dependency mostly hunkered down at home after securing patio furniture and stocking up on gas and batteries as the hurricane whipped the mid-Atlantic British territory. All flights to L.F. Wade International Airport were cancelled and ferry service was closed due to rough seas. Emergency service agencies were placed on alert and there were scattered power outages by early evening.

"I think it's going to be bad, and last year I lost a lot of stuff to the storms," said retiree Susan DeSilva, whose son-in-law helped her secure her windows and doors as the storm approached.

Others were far less worried in the tiny territory accustomed to rough weather. At least one bar in the capital of Hamilton was packed with people riding out the hurricane with drinks and friends.

"I can think of worse places to be," said Derrick Tucker in the crowded Robin Hood Pub and Restaurant as the wind whistled outside.

Case of viral meningitis reported in Montrose School District

MLive, Oct. 5, 2015

MONTROSE, MI – Another student at a Genesee County school has contracted meningitis.

A student at a Montrose middle school has been diagnosed with viral meningitis, according to a **letter** the district sent to parents Monday morning, Oct. 5.

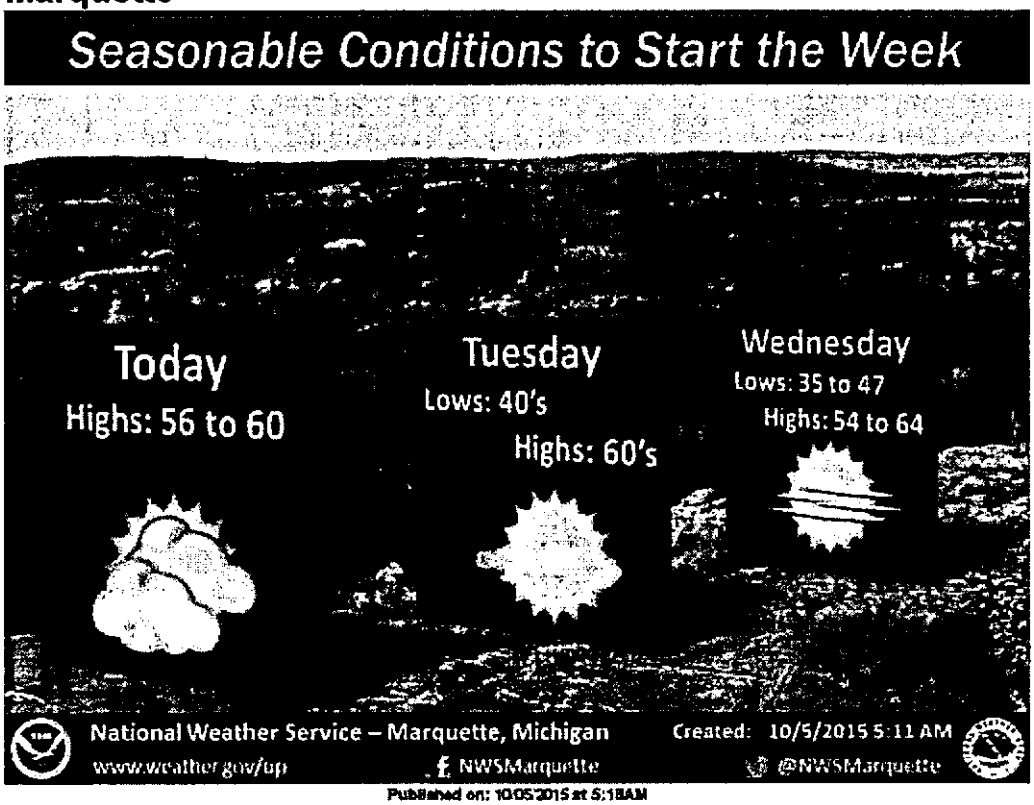
Common areas at Keuhn-Haven Middle School were disinfected over the weekend, and additional staff will be brought in to help regularly disinfect surfaces in all the district's buildings, according to Superintendent Edward Graham's letter.

Meningitis is an infection of the lining of the brain and spinal cord.

"As we begin the new week, in addition to our normal cleaning routine, we will be bringing in additional help to assist in the regular disinfecting of surfaces in all buildings," the letter reads.

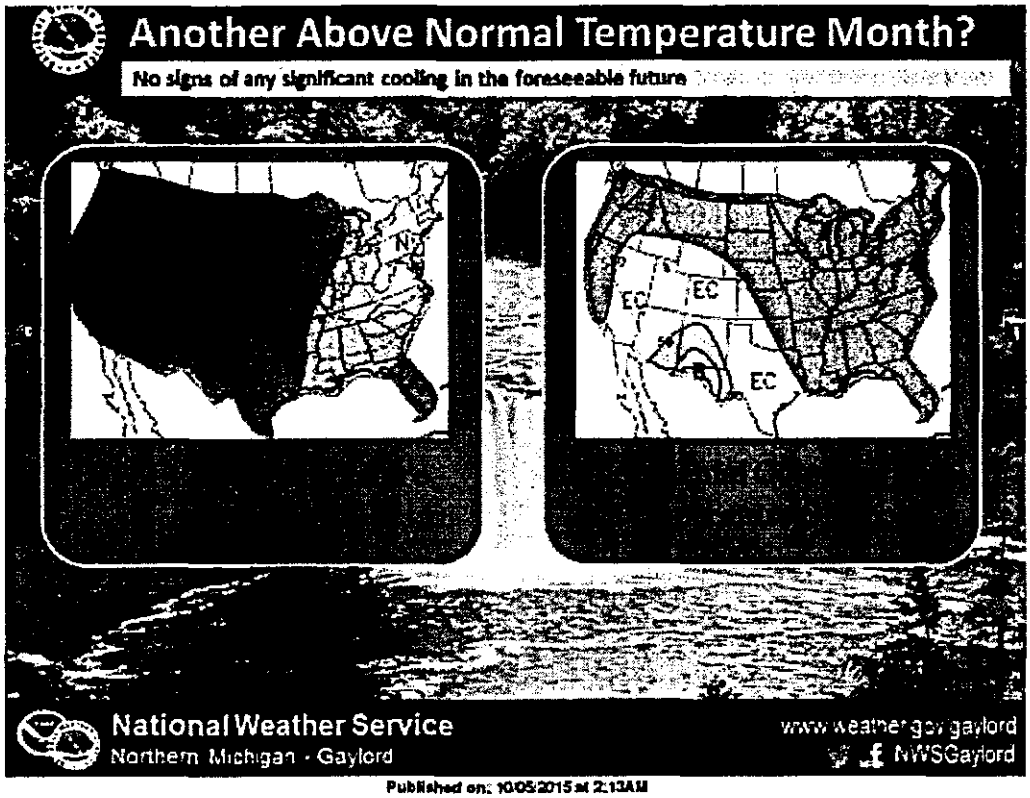
NATIONAL WEATHER SERVICE FORECASTS

Marquette



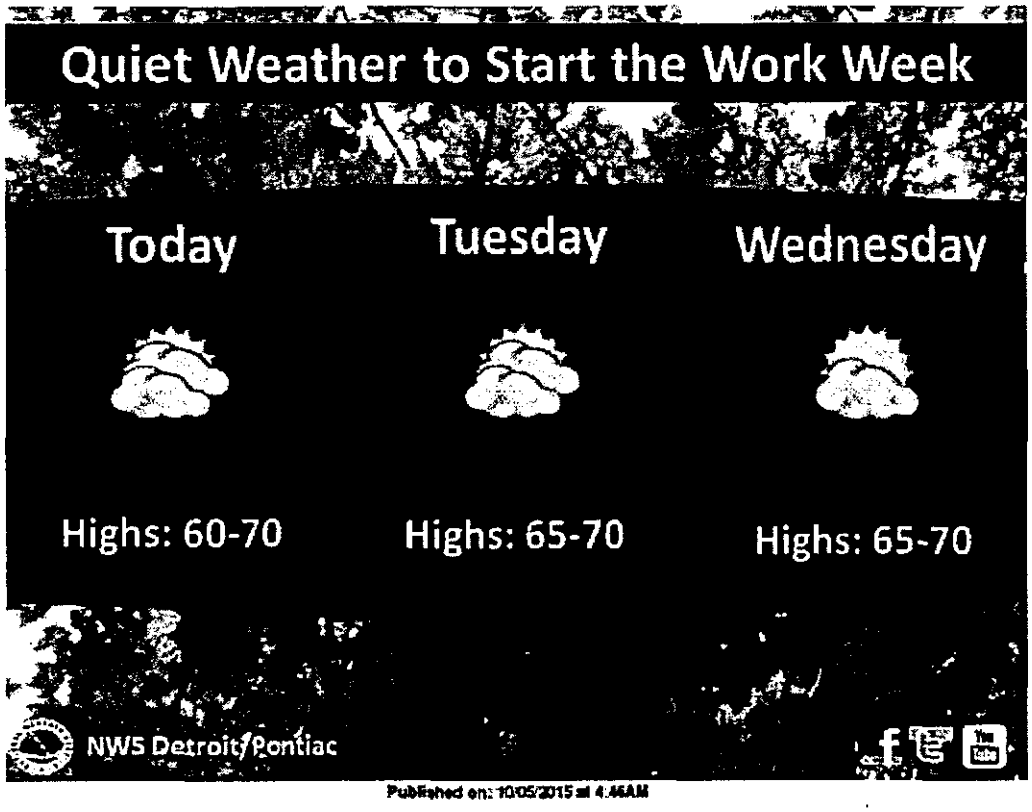
Despite a cold front moving through the area late tonight and Tuesday, conditions will remain dry into midweek with temperatures at or above normal for early October.

Gaylord



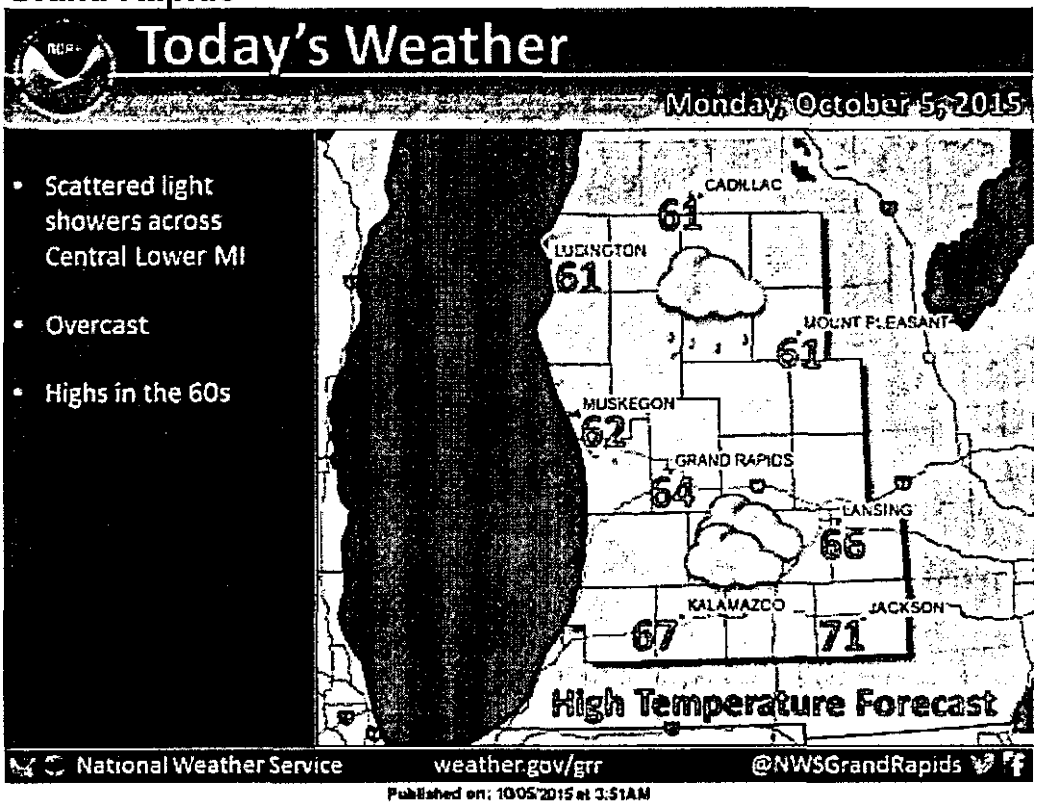
Pattern continues to favor lack of any sustained cold air, with odds favoring a warmer than normal October. Plenty of time for things to change of course.

Detroit



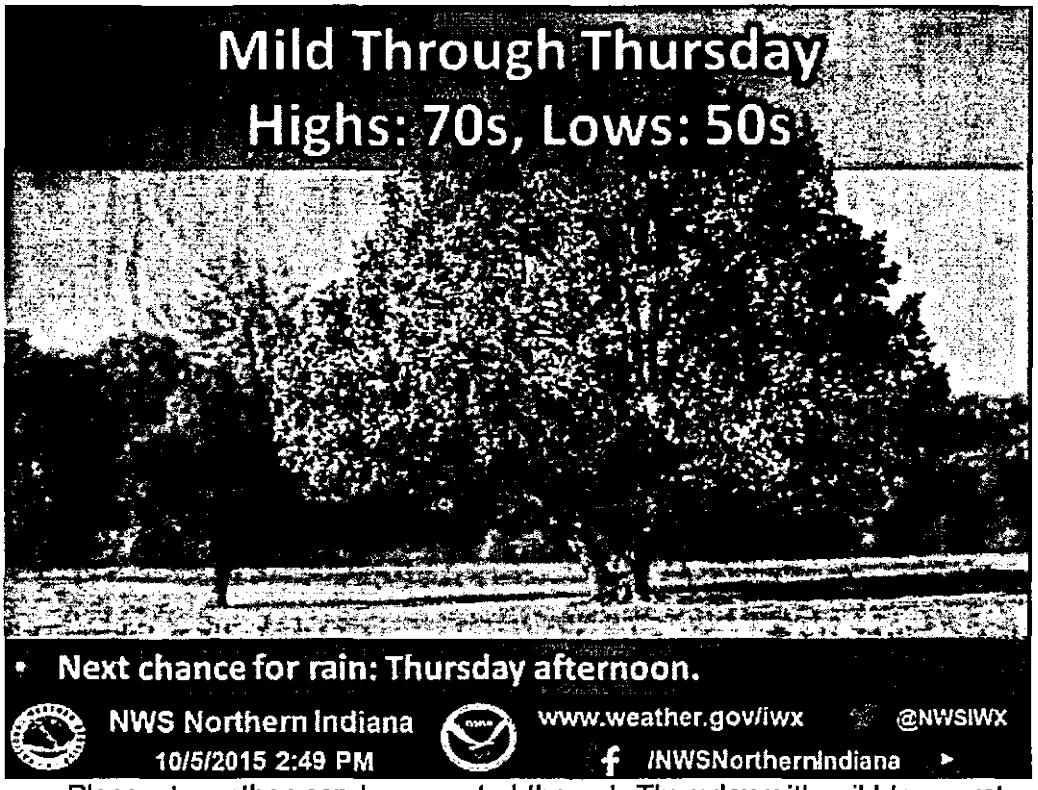
High pressure will slowly expand into the area through the middle of the week, providing quiet weather for Southeast Michigan. A few showers will be possible today along and north of the I-69 corridor, but otherwise, dry weather is expected.

Grand Rapids



A band of scattered, very light showers continues to track northeast across Central Lower Michigan this morning. Any light rain should be out of the area by early afternoon. It will be a dreary day with overcast skies.

Northern Indiana



Pleasant weather can be expected through Thursday with mild temperatures. Highs will be around 70 to the upper 70s. Lows should be in the low to mid 50s. The next chance for rain is Thursday afternoon.

Turn around, don't drown! We've all heard it before, and despite the obvious flood waters, this driver chose to risk his life. This happened in Columbia, South Carolina. He was eventually pulled to safety by rescue crews. *No one was injured in this incident*

More than 2700 water filters were passed out to Flint residents on Saturday. The Genesee County Health Department will announce this week their plan for distributing the remaining filters. My top priority remains to work for an aggressive, comprehensive solution for Flint families to gain access to the safe drinking water they desperately need and deserve. #FlintWater

The Flint water quality issue is getting national attention. Since Flint switched to getting their water from the Flint river lead levels have spiked in tap water and more than doubled in children. Any lead in children's water is a health concern. We are hoping for a swift solution that goes beyond handing out filters & bottled water. http://n.pr/1OSUVVc#Flintwater should be #safewater

This is the United States of America... and European newspapers are reporting about how charities are providing water filters to households. This is a USEPA failure first... a Flint problem second! This is a damn shame!!! Office of Drinking Water shame on the sham you are!!! Sit in your ivory towers... with your thumbs up your asses.

While I do not make blanket recommendations... ever... this is the recommendation I made for Flint almost 8 months ago. I am a "less is more" when it comes to adding chemical to Drinking Water... but the Flint system used one water quality for decades before switch to another... and a corrosion control chemical is really their best alternative. (They can turn off the ammonia feed and the fluoride feed - immediately) The chemical cost may range from less than 1 cent to 10 cents per thousand gallons of water treated depending upon the systems water quality.

The damage caused by corrosion within Drinking Water distribution systems is one of the largest problems for the water utility industry. The effects on the safety and health throughout a community, as well as the associated costs resulting from corrosion, are indeed a major concern for water quality managers.

The byproducts of corrosion in the distribution system can protect, harbor and support bacteria, yeasts and other microorganisms by forming a glycocalyx. Over time a depressed pH forms, due to anaerobic conditions, beneath this glycocalyx causing increased corrosion in the form of pin hole leaks. Additional problems can also result causing odor, bad tastes and slime.

All of these corrosion caused problems add to the cost of water treatment thru increased pumping costs, loss of water or water pressure, and the need for the replacement of water heaters. Typically, an increase in customer complaints due to colored water, bad taste or staining also adds to the overall expense of a drinking water district.

All waters are corrosive to some degree. Chloramine make water much more corrosive... while the disinfection is weaker, the ammonia breaks free and feeds the biofilm growth (nitrification) which make every year a system continues to use chloramine a compounding problem. Most utilities conduct free chlorine "burnouts"... which just makes the situation that much worse.

The corrosivity of the water affects the infrastructure of a distribution system by attacking the piping, concrete and pumps which are often very difficult to budget for a municipality. Factors that affect the corrosive nature of water are: pH, oxygen content, total hardness, total dissolved solids, temperature and alkalinity. The selection of the proper corrosion inhibitor is critical to resolve the corrosion tendency of a water system.

There are numerous corrosion inhibitors that have been used in water over the years, such as: zinc, molybdates, nitrite-borate blends, silicates and phosphates. From a Drinking Water standpoint only two of the above mentioned inhibitors are used, sodium silicates and inorganic phosphates, and usually phosphates are the obvious choice due to treatment costs. Silicates are used at a significantly higher treatment levels whereas a blend of phosphates can typically result in treatment levels as low as 1.0 ppm.

The consistent feed of the corrosion is essential to the success of a corrosion control program. Interruptions if chemical feed can result in the loss of the protective film established on the system piping. Finally, the flow rates of a system are critical in a reliable corrosion control program to provide continuously transport the inhibitor to all areas of the system metallurgy; otherwise an effective protective film will not be established on the metal surfaces of the piping.

Blended phosphate technology has proven to be the most cost effective means of treating Drinking Water systems. The treatment levels for a successful treatment program are usually fed within a 1.0 to 2.0 ppm range. This technology provides a tenacious protective coating at the cathodic and anodic sites. This film forming action develops through a controlled deposition process via a "threshold treatment concept".

This controlled deposition process is a result of the water chemistry combining with the orthophosphate in the product formulation. The key in controlling this deposition is in blending in a variety of polyphosphate compounds. These polyphosphates provide a scrubbing action on the metal surfaces

which limits the amount of protective coating being laid down. This is a terrific method of providing a strong protective film while scrubbing away old deposits and biofilm formations.

Some municipalities have tried to feed orthophosphate alone, in the form of phosphoric acid. The phosphoric acid typically has to be fed at a much higher concentration to achieve the same corrosion inhibition results of a blended phosphate program. In addition to this, there is no means of controlling the amount of deposition that will occur often resulting into an adverse effect on "C" factors or possibly increasing the potential for biofilm development. Blended phosphate technology eliminates the concern over these possible problems.

In addition to providing corrosion control of systems metallurgy, blended phosphate products also have the ability to sequester hardness salts, iron and manganese. The damage that can result from hardness, iron and manganese has been well documented over the years and is significant in terms of revenue while certainly adding to the frustration of a community. The proper sequestration of iron and manganese tremendously improves the appearance of the water preventing these metals from oxidizing and depositing/staining on fixtures and clothing. This ability of ortho and polyphosphates working together, results in stabilized water quality while minimizing color, scale, deposits, corrosion and chlorine demand in drinking water systems.

Benefits of Blended Phosphate Technology

1. Inhibits corrosion of metallurgy within a distribution piping system.
2. Decreases iron tuberculation within a distribution system.
3. Reduces lead and copper levels in the drinking water to meet the 1991 Lead and Copper rule, allowing municipalities to maintain levels of lead < 15 ppb and copper < 1.3 ppm.
4. Decreases biofilm development thereby increasing system life thru reduced MIC.
5. Decreases chlorine demand which improves overall disinfection.
6. Reduces discoloration, staining and mineral build-up on customer fixtures and clothing, resulting in fewer customer complaints.
7. Decreases calcium scale deposits usually seen in hot water heaters.
8. Municipality saves revenue thru reduced corrosion and scale which reduces system failures in terms of leaks and ruptures while also conserving water via reduced hydrant directional flushing.

Blended phosphate technology has been used for over 60 years within the drinking water industry. It remains one of the most cost effective means of controlling corrosion due to the low chemical feedrate required. With this low dosage rate the actual chemical cost may range from less than 1 cent to 10 cents per thousand gallons of water treated depending upon the systems water quality. These blended phosphate cost are offset by the operational and maintenance savings to the utility and consumer.

This is a very different area of the City that was on notice a few weeks ago and is a large part of the City. Yes, this is something that routinely happens in the city as they have old water infrastructure. More common are water main breaks and recently a sink hole or two.

I usually hear of these incidents through the news.

Regional Warning
Relevant Area: North America, United States, MI, Genesee County

Launch Impact Summary

Description:

Media reports indicate that the section of Flint under a boil water advisory has been expanded. The advisory is due to high bacteria levels in the water supply. The new boundaries are Stewart Ave on the north side, to Saginaw St, to Hamilton Ave, to Clio Rd. Residents are advised to bring water to a rolling boil before use.

MEDIA MONITORING REPORT

01/23/2015

Issues:

- No issues to report.

Summary:

- Assuring accountability at the Board of Water & Light may require scrapping the city-owned utility's Board of Commissioners, Mayor Virg Bernero said Wednesday, and having the G.M. of BWL report directly to him.
- Flint's newest threat pours from kitchen spigots and showerheads with handling the city's water quality issue.
- To help resolve the water quality issue, Flint Mayor Dayne Walling is asking for help from Lansing to help fix the water problem.
- A spokesman for the Michigan Treasury Department says the state is already "working diligently" to be sure Flint's drinking water is clean and safe, but isn't commenting on specifics in a request for help from Mayor Dayne Walling.
- The Michigan State Police have started their "If you see something, say something" campaign to bring public awareness to the signs of suspicious activity.
- The house of the Sandy Hook Elementary School killer will be torn down and its 2-acre parcel kept as open space, the Newtown Legislative Council decided Wednesday night.
- When Steve Matthews, superintendent of Novi Community School District, made the call to keep his buildings open during a bitter cold snap earlier this month, his decision resonated up and down the jungle drums of social media.
- Following multiple threats made against Rockford Public Schools since late October of 2014, the district's superintendent took to YouTube Thursday to address parents, students and staff about the ongoing investigation.
- When winter rolls around, it's important for pet owners to take special care of their animals in freezing temperatures.
- The work environment has improved at Palisades Nuclear Plant in Southwest Michigan following concerns that drew attention last year, federal regulators said.
- Even as the medical community is bemoaning the ineffectiveness of this year's flu shot, Michigan public health officials are urging people to get the shot – including people who have already had the flu this year.
- TV/Radio Clips: Detroit People Mover back open this morning after derailing

Analysis:

- Media coverage is neutral.

BOARD OF WATER & LIGHT

Bernero ready to dismantle BWL Board of Commissioners: Mayor would have utility's G.M. to report to him

Lansing State Journal, January 22, 2015

LANSING – Assuring accountability at the Board of Water & Light may require scrapping the city-owned utility's Board of Commissioners, Mayor Virg Bernero said Wednesday.

"I don't want to continue this," Bernero said after the dismissal of General Manager J. Peter Lark on Jan. 13 capped more than a decade of BWL leadership firings.

"It's the definition of insanity," Bernero said. "You keep doing the same thing but you expect different results. I intend to propose something different."

Specifically, he called for a community discussion about changing the City Charter to give himself and his successors direct control over BWL, which he described as the city's most valuable asset.

He envisioned BWL's general manager serving as a department head in his cabinet, a vision not shared by all of BWL's stakeholders.

Under the charter, the BWL is "public but it's arms' length from city government," Bernero said. "Some people say it was designed that way and there's a purpose for that.

"I'm just saying, OK, but it ain't working. When you keep having the same problems, it's time to dig in and explore the options."

Finding options that provide accountability will require looking beyond current personalities at the board, mayoral and general manager levels, he said.

"There's a deeper issue of structure ... and it is time to dig into that, to attack that," he said. "Who should the general manager answer to? How do you get accountability?

"This is the issue we've skirted around for decades."

BWL's commissioners operate within the city's most autonomous board and with powers far beyond advisory.

The charter is explicit in saying the board appoints BWL directors, each of whom serves "at the board's pleasure."

Commissioners terminated General Managers Sanford Novick in 2006 and Joseph Pandy Jr. in 2002. Each collected hundreds of thousands of dollars in severance.

Lark is in line for a payout of from $130,000 to $900,000.

In light of failures in the handling of a widespread power outage that followed the December 2013 ice storm, a community review team called on BWL's board to assert greater control over the utility's short-term agenda, objectives and direction.

The recommendations, which were affirmed by the Michigan Public Service Commission in May, served to encourage the board to end its longstanding deference to management.

A month later, commissioners rated Lark's job performance "commendable" and in July they voted 7-1 to reappoint him for another year.

The CRT report also recommended BWL add commissioners from among the communities BWL serves outside of Lansing but which were prohibited by the charter from serving on the board.

Subsequent charter changes proposed by Bernero won overwhelming approval of Lansing voters in November, resulting in the addition of three nonvoting suburban representatives.

Now, Bernero appears prepared to call for elimination of the board before the new commissioners take their seats on July 1.

Ken Fletcher, supervisor of one of the townships slated to gain a board seat, said Wednesday he fears BWL would be less transparent if its general manager is part of Bernero's cabinet.

"You need to have management that can do the job and run things and not worry about the mayor and his moods on any given day," said Fletcher, of Delta Township.

East Lansing Mayor Nathan Triplett questioned what representation outlying communities would have if BWL's general manager becomes part of Bernero's cabinet.

Lansing City Councilmember Carol Wood said Bernero bears considerable responsibility for recent BWL board performance.

"Remember that the people serving on that board were recommended by the mayor," she said. "If he has an issue with board members not being accountable, why did he put them up for reappointment?" she asked. "How long does it take to figure these things out?"

But generations of City Council members also bear partial responsibility. Mayoral recommendations to the BWL board require council approval and the process usually includes interviews of nominees.

"By virtue of my service, I do think there's value" in having a board, said Cynthia Ward, the only commissioner to vote against Lark's reappointment last July and one of five who voted to fire him last week.

In many ways, accountability is determined by the strength of the board, she said Wednesday.

"It's not enough to have one or two strong board members," she said. "You need a voting majority. ... You have to have people who are willing to stand up for what they believe is right, who constantly keep the interest of the utility and the city that owns it at the forefront of their thinking."

On Monday, officials of the Lansing Regional Chamber of Commerce said it was time to consider the financial benefit Lansing and the region would receive from the sale of BWL.

"The City of Lansing is faced with financial challenges including more than $600 million in unfunded liabilities," said John Brown, chair of the chamber's board. "Everything should be on the table for public discussion."

Bernero described the idea of BWL general managers answering "to eight part-time well-intentioned citizens" as possibly "an antiquated concept" that invites problems.

"The flaws in the charter set up the conflicts that have arisen," he said. "I am fed up with this current system. I think we can do better."

He said he will raise the issue on Jan. 29 in his State of the City address.

"We're beginning a process here," he said. "Some people will say — the chamber already said — we should look at selling the Board of Water & Light. I think that's premature.

"But we've got to get it under control. We can't have it spinning out of control."

FLINT'S WATER SUPPLY

Who want to drink Flint's water?

Detroit Free Press, January 22, 2015

In a city where residents have felt under siege for years — from crime, bad press and an emergency manager some feel forced upon them — the newest threat pours from kitchen spigots and showerheads.

It's the reason behind mysterious rashes on local children, parents say. Unexplained illnesses. Even sick pets.

Bethany Hazard said it's the reason for the brown rust circles that began appearing just months ago around her drains and the oily film in her bathwater in her longtime east-side home.

On the west side of Flint, Corodon Maynard said it's the reason he was bent retching violently over the toilet this month — just hours after chugging two glasses of water at bedtime.

"I was throwing up like bleach water. It came up through my nose burning," said the 20-year-old.

The water from the city system is so corrosive, according to General Motors officials, that the automaker's Flint Engine Operations pulled off the city water system, connecting instead into a water system operated by nearby Flint Township.

So what's in Flint's water and just how dangerous is it?

It depends on who you ask and what tests you're referring to.

State tests suggest the water is clear of coliform bacteria, which can suggest the presence of other disease-carrying pathogens.

But as a result of treating the water to kill any dangerous microorganisms, the water now carries low levels of Total Trihalomethane, or TTHM, a by-product of the disinfectants. Years of exposure may cause liver, kidney or central nervous system problems and an increased risk of cancer, according to the U.S. Environmental Protection Agency.

The city maintains the water — pulled from the Flint River rather than the Detroit water system that had served the city for years — is safe.

Mayor Dayne Walling who was born and raised in Flint, said he drinks it.

The river, long known for the toxins left from Flint's industrial years, is cleaner than it has been in years, "but that perception persists," Walling said.

That the possibility of bacteria and the TTHM levels were detected and then diminished, he said, is proof that the system works.

But the system is in desperate need of infrastructure improvements and experienced water treatment staff, Walling said.

Earlier this week, he asked for help from Gov. Rick Snyder to implement a new plan that called for those things.

"There is nothing more important in Flint right now than fixing the water problems," he wrote.

And communication is key, he added.

Experts talk

In a city hall meeting Wednesday, the city invited experts to talk to residents. They included representatives from the Michigan Department of Environmental Quality, the EPA, and a Michigan State University microbiologist whose life work has been in studying water safety.

In an immediate sense, the water is safe to drink, they assured the crowd.

Discoloration is most likely iron and calcium being sloughed off old city pipes as new water is being pushed into the system.

But while scientists talked in terms of parts-per-billion and testing and chemical reactions and future monitoring, residents held onto jugs of discolored water — water they said tasted funny and smelled terrible.

That's where it gets tricky, said Joan Rose, the MSU microbiologist.

When it comes to a life-giving liquid we turn to countless times a day for survival, appearance and smell is important as well as keeping it clean of pathogens and toxins, she said.

"You're so intimate with water. You drink it. You wash with it. You bathe in it," she said. "You can't blame anyone for the frustration. Everyone wants safe and wholesome water."

This much can be agreed upon: The city's water problems have worn residents raw with anger.

Some claim city officials are trying to cover up missteps and even political shenanigans. Some have accused city leadership of outright poisoning them.

"I've taken to calling it 'poop water,' " said Nayyirah Shariff, a community activist for the grassroots group Democracy Defense League.

Many said they are ready to abandon longtime homes.

"What we have is a full-blown crisis," said GM retiree Claire McClinton who had bundled up against the snow earlier this week to run into El Potrero Mexican restaurant for a late lunch.

But she reconsidered at the last minute and walked out instead, worried about eating at restaurants that rely on city water in their kitchens.

She's not the only customer who is concerned.

Business overall has been hit "probably 20 to 30%," said manager Jorge Alcazar.

The restaurant's lifeblood is in customers seeking a quick, affordable lunch, often with a glass of ice water.

Unwilling to drink the tap water, customers also don't want to pay $2 or more for a pop or buy a bottled water.

Worse for waitress Ashley Trujillo, customers have argued with staff. One customer left three pennies as a tip after fuming about having to pay for water. Others have left nothing.

"Like we have something to do with it," Trujillo said.

All of this — the frustration, the slump in El Potrero's business, the jam-packed meetings with residents toting jugs of brown water and claims they are being poisoned — are the latest blows to a city that has felt swatted around for too long.

"People think all the crime happens in Flint and everyone is poor in Flint, so there's this stigma. Now we're fighting against dirty water. Really?" said radiology coder Cindy Marshall, who joined about two dozen protesters earlier this week.

"Are you trying to kill us?" read one sign. "No more poison," read another.

McClinton echoed Marshall's sentiments: "We've lost confidence in the city."

Soaring bills

For years, residents in this city bleeding jobs and soaked in red ink have been facing growing water bills. Some have climbed as high as several hundred dollars a month.

"We have residents choosing between water and groceries and other bills," said Hazard, whose own bill is about $100 a month for a single person.

"I feel like I'm going under," said Hazard, who survived cancer twice and who was forced into early retirement and limited income.

The city eventually decided to dump the Detroit system in favor of the Karegnondi Water Authority, which is building a system to supply Genesee County with water pulled from Lake Huron. In the long run, this will mean lower water costs, officials have said.

Under the plan, Flint is temporarily pulling water from the Flint River until the water authority's system comes online, expected in 2016.

In August and September, however, the city issued three advisories to boil the water after detecting coliform bacteria.

Just before Christmas, residents received notices that state tests indicated higher-than-acceptable levels of trihalomethane, the disinfectant by-product.

Hazard's cats have been sick. So has she and several neighbors. Even her houseplant began to die.

Maynard threw up. Residents complained of rashes and mysterious illnesses.

"We just want safe water. How hard is that?" Hazard asked.

But assurances come with qualifiers.

The chlorine did its job and cleaned the water of microbial pathogens that can cause disease within days. That means the water is safe for healthy people to drink for a short time, said Michael Prysby, a district engineer in the state's Office of Drinking Water and Municipal Assistance.

But the trade-off was TTMH — possibly a danger for the very young, the very old, or the very sick if they ingest it long-term, he added.

"But we're talking decades," he said, adding that those who are worried should talk to their doctors.

"We don't want to make a blanket statement to say water is safe or unsafe. It's misleading both ways."

That's the kind of answer that infuriates Marshall, the protester and mother of a 5-year-old.

"They said it's safe, but it's brown water," said Marshall, also a radiology coder, after the meeting. "Why do we have to drink brown water? No one else has to drink brown water."

Flint Mayor asking Lansing for help resolving water quality issue

MI NBC News , January 21, 2015

FLINT -- Long time Flint resident Darren Barry has drank the water in the city for 40 years. He says there isn't anything wrong with it.

"I make my coffee with it every morning. I have no problems. I'm going to get old here, and I'm going to keep on drinking the water," Barry says.

But other residents aren't so confident in the city's water supply being safe to drink. City officials sent a letter to residents last month that one of the city's 8 water districts, failed a quality test. Flint Public Works Director Howard Croft says overall the water is safe to drink.

"All of the standards we use are set by the Environmental Protection Agency. All of those standards are being met except for that one area," Croft explains.

To help resolve the water quality issue, the Flint Emergency Manager sent out a request to hire an outside consultant to help the Public Works Department solve the problem.

"it will give us another set of eyes to look at the plan we have in place. And offer any advice on how we can improve. But our water is safe to drink," Croft says.

Flint City Councilman Eric Mays says he's still concerned about the quality of water for the residents in his district. He says he wants the city to reconsider hooking up to Detroit water while the problem is being fixed.

"I need to look at the numbers and see if it's $1 million more than what we're paying now. Or would the actual cost be much cheaper. We need this fixed now. Not in the short term, long term, it's all one term to me. I'm concerned, and I want it fixed," Mays explains.

Now Mayor Dayne Walling is asking for help from Lansing to help fix the water problem.

"It is essential there is city, state, and federal cooperation to address the challenges here and to meet the needs of vulnerable populations," Walling said in his request.

We did not receive a response from the Governor's office regarding any action Lansing might take to help resolve the issue.

State says it's already 'working diligently' on Flint's water problems

MLive, January 21, 2015

FLINT, MI – A spokesman for the Treasury Department says the state is already "working diligently" to be sure Flint's drinking water is clean and safe, but isn't commenting on specifics in a request for help from Mayor Dayne Walling.

"(Emergency manager) Jerry Ambrose and his management team are working diligently to ensure Flint residents have access to clean, safe water," spokesman Terry Stanton said in an email to The Flint Journal-MLive.

Stanton responded to a request from The Journal for comment from Gov. Rick Snyder to the mayor's request.

In a Jan. 18 letter, Walling asked Snyder to support a proposed Flint Water Improvement Plan, which includes forgiveness of payments by the city to the state Drinking Water Revolving Loan Fund due to Flint's status as a distressed community.

Stanton said to help ensure safe, clean water in Flint, "a consultant is being brought in to advise the city on appropriate next steps."

Former emergency manager Darnell Earley announced plans to hire the consultant before leaving his position here to lead the Detroit Public Schools.

"The city continues to work closely with staff from the Department of Environmental Quality to ensure water meets safety guidelines, that water operations are managed properly, and all regulations are met," Stanton's statement says.

"Treasury staff is also in regular contact with both the city and DEQ and will be providing support as appropriate."

Walling's letter to Snyder asked the governor for state help in dealing with what he called the most important issue facing the city today and included proposals focused in five areas: safety, quality, access, investment and
education.

Since switching its water source from Lake Huron to the Flint River nine months ago, citizens have complained about the color and smell of city water, there have been several boil water advisories because of bacteria in the water system, and the DEQ found the city in violation of the Safe Drinking Water Act because of excessive total trihalomethane in the water supply.

"The governor has a particular responsibility due to Public Act 436," Walling has said about the state's emergency manager law.

Flint has been under state financial management since 2011, and Walling and the Flint City Council have had limited involvement in City Hall decision-making since.

Although a Transition Advisory Board is expected to be put in place here, emergency manager Jerry Ambrose told the City Council Wednesday, Jan. 21, that his goal remains to begin the transition from state to local control in April.

EMERGENCY MANAGEMENT AND HOMELAND SECURITY

If you see something, say something

Upper Michigan Source, January 22, 2015

NEGAUNEE – Recent terrorist attacks in other parts of the world have begged the question, are we prepared to deal with such an event if one were to occur and how could they be prevented?

The Michigan State Police have started their "If you see something, say something" campaign to bring public awareness to the signs of suspicious activity. While police say they want to remind people there is no

current threat of a terrorist attack in the Upper Peninsula, community awareness of possible signs is crucial in keeping everyone safe.

"When police are around, people tend not to act the same way as they would do when we're gone," said Trooper Stacey Rasanen of the Michigan State Police. "So to protect our citizens,we need people to stand up and give us a call and let us know what's going on."

Police say you should alert them if you notice any suspicious, no matter how small.

In the case of an emergency, immediately call 911 if you see something suspicious.

For non-emergencies, you can report suspicious activity to the Michigan Intelligence Operations Center by calling (855) 642-4847 or clicking here.

For more information on tips to recognize suspicious activities, visit their website.

Sandy Hook killer's home to be demolished

Detroit Free Press, January 22, 2015

The house of the Sandy Hook Elementary School killer will be torn down and its 2-acre parcel kept as open space, the Newtown Legislative Council decided Wednesday night.

The council voted, 10-0, to approve the recommendation by the board of selectmen to demolish the two-story, 3,100-square-foot colonial where Adam Lanza lived with his mother, Nancy. The Connecticut town acquired the property in December from a bank at no cost.

Town officials indicated demolition would likely happen when winter ends.

The now-infamous house has sat empty since Dec. 14, 2012, when the 20-year-old Lanza killed his mother in her sleep and then massacred 20 children and six adults at a nearby elementary school before committing suicide. To prevent souvenir hunters, the contents of the house were burned.

Most victims' families and neighbors wanted 36 Yogananda St. torn down. One called it "a constant reminder of the evil that resided there." Others said it attracts a steady stream of gawkers.

Before the vote, council President Mary Ann Jacob, who was a Sandy Hook library aide the day of Lanza's slaughter, said there was "not a lot of controversy about it, so I think it will be a pretty quick discussion and vote."

There was no public comment or council discussion before the vote, the Danbury News-Times reported.

Though the council intends to keep the land undeveloped, it will seek to keep the town from profiting from any future sale or development. Any proceeds would go victims. The land, which abuts town-owned woods, was appraised in 2012 at $146,280.

Ryan Lanza, Adam's father and heir to his ex-wife's estate, authorized deeding the property to the town.

Love him or hate him, here's how one school superintendent calls snow days

BridgeMi.com , January 22, 2015

Normally the interest in snow-day school cancellations is confined to students and staff in a given district. But when Steve Matthews, superintendent of Novi Community School District, made the call to keep his buildings open during a bitter cold snap earlier this month, his decision resonated up and down the jungle drums of social media. Students tweeted and texted their dissatisfaction, sometimes in salty language, which led to a blog entry by Matthews about the difficulty of both making tough decisions and living with them when you might disagree. And that led to a column by Detroit News columnist Laura Berman on the same topic. As Bridge has written about the issues of snow days and instruction time, we thought we'd look Matthews up and ask how he reaches these decisions and defends them to parents and students.

Bridge: Can you describe what your process is in making the determination to call a snow day?

During the winter months, superintendents and others continually monitor weather reports. I have two weather apps on my phone. I look at the forecast all the time.

When we see a weather pattern starting to develop or hear a weather alert we begin to map out exactly when it will impact our area.

On the mornings when we have to make a call, I begin talking to my assistant superintendent of business and operations between 3:30 and 4 a.m. We try to get a sense of what the conditions are. My assistant superintendent lives in the district, so he will go out and drive the roads if there has been snow.

Between 4 and 4:30 a.m. my assistant superintendent and I get on a conference call with other superintendents in Oakland County. There are anywhere from 15-20 other superintendents on the line with us, along with a meteorologist from Accuweather.

The weatherman briefs us on current conditions and what the next several hours will look like. We want to know if snow will accumulate, if the winds will pick up, if the temperature will drop, if conditions will improve or deteriorate.

The superintendents ask questions and then he leaves the conversation. My assistant superintendent moderates the ensuing discussion. What are people thinking? Is anyone closing? Is anyone concerned about opening?

Because we have a variety of districts in the county sometimes our decision is not unanimous, but we typically try to make a decision all of us can live with. Some districts have dirt roads, some have communities that don't plow as well as others, etc.

We are guided by several factors. Will staff be safe driving to school? Can staff get there on time? Will buses be able to travel easily? Is it too cold for students to wait for buses? How many snow days have we used? Will buses be delayed but ultimately safe on the roads? Will we get at least 75 percent of the students to school? (The state won't pay for a day unless at least 75 percent of the students in the school are in attendance.)

We want students to be safe. We also want students in school. The disruption, especially in a winter like we had in 2014, can be pretty dramatic.

At the end of the conversation, usually by 4:45 a.m., each superintendent makes the decision for their district. As I said, we try to remain united, but sometimes we have to make a decision based on local conditions.

Bridge: Why did you decide to keep school open on that particular day, Jan. 8? It wasn't snowing, but it was very cold and windy.

We made the decision to remain open for several reasons. First, we consult the National Weather Service wind chill chart. We are conscious of any weather conditions that would place our students at risk within 30 minutes. We do not have any students who walk or who have to wait for a bus longer than that. If the wind chill or temperature would create conditions where frostbite could occur within 30 minutes we will call school. That would be temperatures or wind chills anywhere above 20 below zero.

What is the difference between -15 and -20? Probably not a lot. Cold is cold. But we have to draw a line somewhere so we look for that 30-minute mark.

On Jan. 8 the morning wind chills were between -15 and -20. The air temperature did not get quite as cold so the wind chill was not quite as bad.

As I said, the difference between -15 and -20 wind chill is hard to calculate. Cold is cold. But we felt confident our students could remain safe walking or waiting for a bus.

And the roads were clear and dry, so buses would probably not be delayed.

Third, we live in a community where the vast majority of our students have gloves, hats, scarves, boots, coats and snow pants. The frostbite conditions discussed by the National Weather Service are on exposed skin.

Taking all those factors into consideration I felt we could safely open.

Bridge: We live in a cold climate. When is it ever too cold to go to school?

I would suggest that if wind chill or temperatures are at such an extreme that frostbite is a danger in less than 30 minutes we will consider closing school. If a bus had an accident, ran out of gas or had a mechanical problem we do not want to place students at risk. In our district if that happened we feel confident that we could get to them and get them to safety in less than 30 minutes.

In Michigan in winter, dressing for the weather is important. As I said, in our community the vast majority of our students can. So we have more flexibility than some communities might have because our parents and students can dress appropriately.

Bridge: Do these things (the shortening of the school year because of snow, etc.) affect your thinking?

In Novi we have 179 days of instruction for students. That is more than some districts but less than many other countries. I believe that being in school is important. I stress with my administrative staff and the teachers that every day should mean something.

We had just come off of a two-week break for the holidays. We had only been in school for three days. Interrupting school again is a concern. But if needed, I would have closed. I just did not believe that our students could not get to school safely.

Bridge: So you made your call, and the students weren't happy about it. Did the reaction surprise you at all? What's the lesson in that for Novi students?

I knew that students would not be happy. All through Wednesday night high school students had been sending me tweets begging me to call a snow day. When some neighboring districts did I knew it would ratchet up the pressure. But I did not believe conditions warranted closing.

I was surprised some of the tweets trended toward the offensive. I liked the clever ones. There was one tweet that read: Plot twist. Dr. Matthews car freezes to the road. He has to walk home.

That was fun. The messages that used profanity and anger were less fun.

I was not surprised by the reaction. Students are passionate.

The lesson is that all of us need to learn to communicate clearly and passionately but in a respectful manner. I was not offended. I enjoyed the banter.

Bridge: When you're up at 4:30 a.m., making these decisions, what job do you wish you had?

That is a great question. I am not a huge fan of getting up so early. But every job has an upside and a downside. Making these calls at 4:30 a.m. is definitely one of the downsides. What other job do I wish I had? If I could hit the curveball I would probably like to be ball player. Summer, sun, green grass. That sounds good.

we did have that rise, so if they do go down, we should be back to average," Schropp said.

'I want you to know your schools are safe:' Rockford supt. addresses recent threats in YouTube video

Fox 17, January 22, 2014

ROCKFORD, Mich. — Following multiple threats made against Rockford Public Schools since late October of 2014, the district's superintendent took to YouTube Thursday to address parents, students and staff about the ongoing investigation.

The nearly six and a half minute address from Supt. Mark Shibler posted to YouTube Thursday, and provided to students at the Freshman Center and Rockford High School, comes on the same day Shibler tells FOX 17 he met with numerous law enforcement agencies, including Michigan State Police, Kent County Sheriff's Department, Rockford police and even the FBI.

"There are assigned detectives from their organizations who are working on this on a regular basis," Shibler said in the video. "I want you to know this is something that doesn't just happen and we move on to the next incident. We take these threats very seriously."

Shibler told FOX 17 he's felt it imperative to keep parents, students and staff informed of the progress and called Thursday's meeting with law enforcement "very productive."

"What is making this more complicated in the technology that's involved, where a threat might be given through Skype or email that makes it really difficult to trace," Shibler said in his YouTube message.

"But we are tracing them. I want you to know your schools are safe."

Of every district in Kent County, the only one with more security personnel than Rockford is Grand Rapids Public Schools, Shibler said in the video.

The YouTube update comes after the most recent threat made against the district's freshman campus Jan. 16. Just one day prior, nearly 2,000 high school students were forced to wait in the gym for more than two hours after a threat was phoned into the school involving a propane tank being placed in the building.

"It makes me frightened for my children and it's scary," said Shelley Volkert, a parent of Rockford High School students.

"The world they have to grow up in today is not the same world we had to grow up in, and it makes me sad we even have to have these things happen."

Volkert said the false alarms have begun to take a toll on her kids.

"I think it's come to the point with this last one, it was frightening for them, they came home and slept for a couple hours," she said. "I think it's mentally draining."

While the threats have brought a feeling of uneasiness for parent Mike Richard, he said he at least appreciates the effort the district is making to keep parents informed.

"You know, I don't expect them to snap their fingers and make it go away but just to know they're doing something to work toward a resolution is really all we can ask for," Richard said.

The problem isn't unique to Rockford either. Several other Kent County schools have dealt with similar false threats in recent months.

In cooperation with the Kent County Sheriff's Department and the Rockford Public Schools, the reward has been increased to $10,000 for information leading to the arrest of the person or persons responsible for making anonymous phone or email threats to the Rockford Public Schools.

Anyone with information about this crime is encouraged to call Silent Observer at 616-774-2345 or go to www.silentobserver.org for more information.

Pet safety this winter in the D

WDIV, January 22, 2014

There's nothing that makes me happier than puppies, and there's nothing that makes me sadder than puppies in danger. That's why when winter rolls around, it's so important for pet owners to take special care of their animals in freezing temperatures.

How many times have you driven down a street in the dead of winter and seen a dog sitting outside in the snow either chained up, or worse, just wandering about? Both are heartbreaking visuals, and if you're a pet owner, you need to be smart about taking care of your best buddy in the coming months.

If you need a shocking statistic to wake yourself up, here's one: the Michigan Humane Society Cruelty Investigation and Rescue Departments are inundated with calls during the winter months, and it is not uncommon for the teams to respond to over 40 calls in a single day.

Ryan McTigue, Public Relations Coordinator for the Michigan Humane Society, said that upon receiving a call, the investigators go and check on the animal to see if it is healthy or in immediate danger.

"They make a determination at that point if they need to remove the animal or educate the owner on how to be compliant with the law or how to work on behavior so that the dog can live indoors," McTigue said. "They will always check back on animals that they have received complaints on to ensure that they are safe."

If someone fails to provide proper shelter for their pet, the owner may face misdemeanor animal cruelty violations, which can result in up to 93 days in jail, up to a $1,000 fine, community service, and loss of pet ownership for a period of time.

McTigue urges owners to bring their pets inside, as it is the best and safest place for animals.

"If it's too cold for you to be outside, it's too cold for your pets. Limit your dog's time outside and do not leave them unsupervised for long periods of time," McTigue said.

The Michigan Humane Society offers free straw for pet owners at the Detroit Center for Animal Care, 7401 Chrysler Dr., Detroit, on Mondays through Saturdays and at the Rochester Hills Center for Animal Care, 3600 W. Auburn Rd., Rochester Hills, on the same days.

Daniel "Hush" Carlisle, Co-Founder and Executive Director of Detroit Dog Rescue, has seen firsthand the damage harsh weather can do to pets and homeless animals of the Detroit area.

While the organization does not advocate for keeping dogs outside during the winter, he noted that owners that choose to do so must take every necessary precaution to keep their pets safe, including proper shelter with insulation and enough room for the dog to move around. A consistently replenished supply of fresh water and food is also of utmost importance.

Throughout the winter months, the Detroit Dog Rescue receives a staggering number of calls asking for food. The organization can often be found on the streets passing out dog food, igloos and hay for insulation, thanks to donations through partnerships with Detroit Canine and Home Depot.

"During community outreach, we're constantly advocating for responsible ownership," Hush said.

Responsible pet ownership includes keeping your dog safe when going for a walk. Even indoor dogs need to get outside and release their energy during the winter months, and that's what pet sweaters are for, said Hush.

"I would say just following that list (will ensure your pet's safety during winter). An insulated dog house, hay, fresh food and fresh water," Hush said. "Every day, you need to make sure you have that every day."

When insulating your dog's house or igloo, don't forget to place the hay around the outside of it, too, not just the inside!

Stephanie Amado, Licensed Veterinary Technician at East Detroit Animal Hospital, pointed out that in below freezing temperatures, which are very common in Michigan winters, dogs are prone to frostbite.

"Keeping (your pets) warm and dry is the most important thing," Amado said. "I have seen cases of frostbite before. With Michigan's extreme weather, it can happen."

It's best to bring your dog inside to avoid this scenario entirely, but what about when you're being a good pet owner and taking your pup for a walk? Amado suggests rubber boots that look like balloons to put over the paw pads.

"The paw pads, if they stay wet, could grow an infection between the toes of the paws. If the pet doesn't allow you to dress them (in the boots), then after coming back inside from the snow, just be sure to dry their paws off," she said.

Sometimes the hospital receives calls about dogs left out in the cold, and when that happens, microchipping can be a huge help in reuniting the animal with their owner.

Sandra Boulton, PR Director for Friends for the Dearborn Animal Shelter, said that keeping pets indoors comes first, but having your pet microchipped is the second best thing you can do for your furry friend during winter.

"This is the best opportunity for your pet family member to be returned if they get out and become lost. In the frigid temperatures of winter, dogs can (lose) their keen sense of scent and can readily lose their way home," Boulton explained.

She also pointed out an incredibly toxic winter hazard: keep an eye out for antifreeze on the ground, as it is poisonous to animals and has a sweet taste, so they will find it attractive. For your own use, be sure to find a pet-friendly antifreeze option on the market.

When the shelter receives a call about a stray or abandoned animal, animal control is immediately dispatched to the location, which Boulton said is very responsive during the dangerous cold months. The pets are then brought to the shelter where they are cared for, assessed, and reunited with their families or adopted.

"Each of us pet owners can be ambassadors for companion animals with those around us, and a gentle reminder about pet safety in the winter could save a life," Boulton said. "Second, always report a stray animal to your local police department or animal control, there is no way to know how long they have been outdoors and they could be at risk."

As a pet owner, I personally know how much love and joy my pup brings into my life, and because of that, I will always do what is best for her. I think it's safe to say that no matter what breed of dog or cat you own, all of us in the D can agree that owning a pet is a serious responsibility with a fantastic reward: unconditional love. For more information on how to care for your family pet during the winter months, read these tips, courtesy of ASPCA.

MICHIGAN NUCLEAR

Palisades plant work environment improves, regulators say

CrainsDetroit, January 22, 2014

COVERT TOWNSHIP — The work environment has improved at Palisades Nuclear Plant in Southwest Michigan following concerns that drew attention last year, federal regulators said.

In a report issued Wednesday, the Nuclear Regulatory Commission said its inspectors in December found there is no longer a "chilled work environment" in the security department at the plant along Lake Michigan in Van Buren County's Covert Township.

"The inspectors determined that a chilled work environment currently does not exist and there has been improvement in the overall security department work environment," the report states. "All of the individuals interviewed were willing to raise safety concerns and the vast majority of individuals were willing to do so without fear of retaliation.

"In addition, individuals were not being discouraged from raising safety issues," it says.

An inspection also took place in May, and the commission said the work environment has improved since then.

Still, the Nuclear Regulatory Commission said some security workers continue to have concerns about the work environment and morale. Regulators have said they want to make sure workers feel comfortable reporting possible problems.

"The NRC will continue to monitor for safety conscious work environment issues to assess the sustainability of improvements seen to date through regular inspections by resident inspectors at the plant and specialist inspectors performing focused inspections," NRC spokeswoman Viktoria Mitlyng said in an email.

The plant is owned by New Orleans-based Entergy Corp. Spokeswoman Lindsay Rose told the Kalamazoo Gazette that Entergy expects all employees to be able to raise safety concerns. She told the Holland Sentinel that efforts will continue to improve trust with workers.

"This is not an issue that we're going to drop and wash our hands of it and say we're done with it," Rose said. "We need, with all of our workers, to continue to engage with them and make sure they all understand their responsibility for raising concerns."

HEALTH

Flu shot not as effective this year but get it anyway, Michigan health officials urge

MLive, January 23, 2015

KALAMAZOO, MI — Even as the medical community is bemoaning the ineffectiveness of this year's flu shot, Michigan public health officials are urging people to get the shot -- including people who have already had the flu this year.

The effectiveness of the shot to protect against one of the prevalent flu strains is a disappointing 23 percent, according to the Centers for Disease Control and Prevention.

But getting the flu shot still could mean the difference between a mild case of the flu and a case that lands someone in the hospital, said Dr. Eden Wells, director of the preventive medicine residency at University of Michigan. It also protects well against two or three other strains of the disease that are circulating -- getting sick with one strain does not protect against getting others.

Finally, getting the flu shot lowers the risk of transmitting the disease to others, especially important to people vulnerable to complications of influenza such as children under 5, adults 65 and older, pregnant women and people with underlying health conditions such as asthma or cancer.

"We know that flu immunization is the No. 1 weapon in our armory for protection against influenza," Wells said. "Even partial protection remains the most important step to prevent flu. And the likelihood of complications will be markedly reduced, even though it is not the best" vaccine.

"It's still highly recommended, yes -- get the vaccine," she said.

A hard sell

MLive.com conducted an investigation of other vaccination rates in Michigan and found that the state has among the highest rate of waivers for required childhood vaccines, which experts say is putting the public at risk for outbreaks of some vaccine-preventable illnesses. **Read the entire series here.**

Trying to convince people to get a flu shot, which is not required for school attendance, underscores the challenges in fighting influenza, one of the nation's most pervasive contagious diseases.

Michigan's **current flu outbreak** may end up being the worst in recent years, with patients right now crowding doctors' offices and hospital intensive care units. As of Jan. 20, one Michigan child has already died, and hospitals are breaking out regional response plans and toughened visiting rules, not sure it won't get worse.

Numbers from the Centers for Disease Control suggest that seasonal influenza remains the most deadly of vaccine-preventable illnesses, responsible for thousands of deaths a year nationwide.

"I think it definitely is a big deal" to do everything possible to try to prevent the spread of the flu, said Dr. Richard Van Enk, director of infection control at Bronson Methodist Hospital in Kalamazoo. "The economic costs of influenza are huge in the U.S. and that alone would be a good reason to immunize."

So why don't people get the flu shot?

Michigan's lackluster 46 percent rate of flu shot vaccination is below the national average, and far, far below vaccination rates for childhood illness such as measles, mumps and rubella, which has a national use rate of 95 percent.

One reason is that the flu vaccine is a new and different shot every year, not a one-shot-for-lifetime-protection like many other vaccines.

Influenza immunity, whether from a shot or from having the flu, does not extend from one season to the next.

Convincing people to get a shot every year can be a problem, doctors say.

"The annual thing produces a challenge," Van Enk said.

"We need our patients to have an encounter with a medical provider of some type annually to get immunized. For many people it means they need to have another encounter, that is outside their normal routine visits, and it takes time to do that," he said. "It's helped to have immunizations available at pharmacies, but it is still an extra encounter."

Another problem is that people may not take flu as seriously as other diseases, perhaps with good reason if they are young and healthy.

While flu can be deadly to the very young, the elderly and those with underlying medical conditions, in most years it does not cause lasting harm to most people.

"Other vaccine-preventable illness can cause brain damage, or damage to different organs, that you can have for the rest of your life. Flu doesn't do that," Van Enk said, "so that creates a different kind of approach when you are trying to motivate people to be vaccinated. "

Shot's effectiveness

Some don't bother with the shot because they don't believe the shot works.

Since CDC began conducting annual flu vaccine effectiveness studies in 2004-05, overall estimates for each season have ranged from 10 percent to 60 percent effectiveness in preventing medical visits associated with seasonal influenza illness.

Every February the CDC and the World Health Organization look at influenza strains circulating around the world at that time and then make recommendations about the formulation of the next flu vaccine.

But of the three or four strains they select, one or more could be subtly different by the time vaccine is produced.

"A virus can change very subtlety," Wells said. "Those subtle differences could be enough to mean that by the time the vaccine is produced, it is no longer a perfect match."

That happened this year with H3N2, one of the dominant flu strains appearing this year, Wells said.

But "the other strains, the H1N1 and B strains, are pretty good matches (with the vaccine), so vaccinated people will likely still be protected from other strains," Wells said.

Plus, she said, the vaccine will provide "moderate protection" from H3N2, "a very important consideration, especially for those who suffer from other medical conditions" that make them vulnerable to illness.

Even if individuals aren't worried about themselves, Wells said, they should consider a flu shot to protect the people around them.

She used that argument in urging her brothers to get a flu shot before visiting their parents.

"My parents are vaccinated but no vaccine is 100 percent effective," Wells said, and making sure she and her brothers are vaccinated helps reduce the risk.

"By making sure myself and my brothers are immunized we can cut down on transmission and protect our loved ones," she said.

Prevention

Given the shortcomings of the vaccine itself in some years, including this one, it actually becomes more important that those who can do get the vaccine, health officials said.

"The goal in public health is to see the maximum number possible vaccinated," Wells said, to help prevent the spread of the disease.

Nationally, public health authorities aspire to a vaccination rate of 70 percent for those in the general population, and 90 for those with underlying medical conditions.

"We are clearly not being effective now because influenza transmits so easily throughout our community each flu season," Wells said.

"Children die needlessly each year, young healthy adults are ending up in the hospital with flu every flu season," she said.

There are important non-pharmaceutical recommendations, too, health authorities said.

"Washing your hands and covering your mouth worked in 1918 even before they knew what the virus was," Wells said.

So did quarantines and social isolation.

"If you are feeling sick, it is good not to go visit elderly relatives, especially if you have little children in your household," she said "Studies showing what grandma always told us works to limit person-to-person spread.

Is it likely there will ever be a single vaccine for all influenza types, and one that will last from year to year as the strains drift?

"That would be the holy Grail of vaccines," Wells said, "one we would not have to be updating each year. We are not there yet, but we are feeling more optimistic given advances in science of immunology.

Given those advances, will vaccination someday stamp out influenza, as has been the case with small pox?

Not likely, Van Enk said.

"If you hoped influenza will go away I'm going to tell you it will never happen," he said.

"There's a simple reason for that: The vaccine preventable diseases that can be eradicated are those in which humans are the only reservoir. That's not true for influenza," he said.

Birds and pigs get influenza too, and the virus is widely distributed in nature.

"There will always be influenza, we cannot possibly eliminate it from all reservoirs," VanEnk said. "That means there will always a need to immunize, to protect ourselves from it."

This is a good year to ponder the public health outlook, weigh options, consider advice, and be aggressive about avoiding the flu.

"In every way that we measure influenza seasons, this is a heavier year than average," Van Enk said. "Presentation of influenza-like illnesses, Emergency Department visits, prescriptions for anti-virals, admissions to ICU, deaths — there are many, many ways but by the end of the season we will see that this season is worse than the average season we have had in last 10 years."

"The flu season can last until May, so it's too early to say with certainty what kind of year it's going to be overall, or whether or not the season has peaked yet, " the state health department spokesperson Jennifer Smith said, "but we do know it's not too late to get vaccinated."

BOARD OF WATER & LIGHT

Bernero ready to dismantle BWL Board of Commissioners: Mayor would have utility's G.M. to report to him

Lansing State Journal, January 22, 2015

LANSING – Assuring accountability at the Board of Water & Light may require scrapping the city-owned utility's Board of Commissioners, Mayor Virg Bernero said Wednesday.

"I don't want to continue this," Bernero said after the dismissal of General Manager J. Peter Lark on Jan. 13 capped more than a decade of BWL leadership firings.

"It's the definition of insanity," Bernero said. "You keep doing the same thing but you expect different results. I intend to propose something different."

Specifically, he called for a community discussion about changing the City Charter to give himself and his successors direct control over BWL, which he described as the city's most valuable asset.

He envisioned BWL's general manager serving as a department head in his cabinet, a vision not shared by all of BWL's stakeholders.

Under the charter, the BWL is "public but it's arms' length from city government," Bernero said. "Some people say it was designed that way and there's a purpose for that.

"I'm just saying, OK, but it ain't working. When you keep having the same problems, it's time to dig in and explore the options."

Finding options that provide accountability will require looking beyond current personalities at the board, mayoral and general manager levels, he said.

"There's a deeper issue of structure ... and it is time to dig into that, to attack that," he said. "Who should the general manager answer to? How do you get accountability?

"This is the issue we've skirted around for decades."

BWL's commissioners operate within the city's most autonomous board and with powers far beyond advisory.

The charter is explicit in saying the board appoints BWL directors, each of whom serves "at the board's pleasure."

Commissioners terminated General Managers Sanford Novick in 2006 and Joseph Pandy Jr. in 2002. Each collected hundreds of thousands of dollars in severance.

Lark is in line for a payout of from $130,000 to $900,000.

In light of failures in the handling of a widespread power outage that followed the December 2013 ice storm, a community review team called on BWL's board to assert greater control over the utility's short-term agenda, objectives and direction.

The recommendations, which were affirmed by the Michigan Public Service Commission in May, served to encourage the board to end its longstanding deference to management.

A month later, commissioners rated Lark's job performance "commendable" and in July they voted 7-1 to reappoint him for another year.

The CRT report also recommended BWL add commissioners from among the communities BWL serves outside of Lansing but which were prohibited by the charter from serving on the board.

Subsequent charter changes proposed by Bernero won overwhelming approval of Lansing voters in November, resulting in the addition of three nonvoting suburban representatives.

Now, Bernero appears prepared to call for elimination of the board before the new commissioners take their seats on July 1.

Ken Fletcher, supervisor of one of the townships slated to gain a board seat, said Wednesday he fears BWL would be less transparent if its general manager is part of Bernero's cabinet.

"You need to have management that can do the job and run things and not worry about the mayor and his moods on any given day," said Fletcher, of Delta Township.

East Lansing Mayor Nathan Triplett questioned what representation outlying communities would have if BWL's general manager becomes part of Bernero's cabinet.

Lansing City Councilmember Carol Wood said Bernero bears considerable responsibility for recent BWL board performance.

"Remember that the people serving on that board were recommended by the mayor," she said. "If he has an issue with board members not being accountable, why did he put them up for reappointment?" she asked. "How long does it take to figure these things out?"

But generations of City Council members also bear partial responsibility. Mayoral recommendations to the BWL board require council approval and the process usually includes interviews of nominees.

"By virtue of my service, I do think there's value" in having a board, said Cynthia Ward, the only commissioner to vote against Lark's reappointment last July and one of five who voted to fire him last week.

In many ways, accountability is determined by the strength of the board, she said Wednesday.

"It's not enough to have one or two strong board members," she said. "You need a voting majority. ... You have to have people who are willing to stand up for what they believe is right, who constantly keep the interest of the utility and the city that owns it at the forefront of their thinking."

On Monday, officials of the Lansing Regional Chamber of Commerce said it was time to consider the financial benefit Lansing and the region would receive from the sale of BWL.

"The City of Lansing is faced with financial challenges including more than $600 million in unfunded liabilities," said John Brown, chair of the chamber's board. "Everything should be on the table for public discussion."

Bernero described the idea of BWL general managers answering "to eight part-time well-intentioned citizens" as possibly "an antiquated concept" that invites problems.

"The flaws in the charter set up the conflicts that have arisen," he said. "I am fed up with this current system. I think we can do better."

He said he will raise the issue on Jan. 29 in his State of the City address.

"We're beginning a process here," he said. "Some people will say — the chamber already said — we should look at selling the Board of Water & Light. I think that's premature.

"But we've got to get it under control. We can't have it spinning out of control."

FLINT'S WATER SUPPLY

Who want to drink Flint's water?

Detroit Free Press, January 22, 2015

In a city where residents have felt under siege for years — from crime, bad press and an emergency manager some feel forced upon them — the newest threat pours from kitchen spigots and showerheads.

It's the reason behind mysterious rashes on local children, parents say. Unexplained illnesses. Even sick pets.

Bethany Hazard said it's the reason for the brown rust circles that began appearing just months ago around her drains and the oily film in her bathwater in her longtime east-side home.

On the west side of Flint, Corodon Maynard said it's the reason he was bent retching violently over the toilet this month — just hours after chugging two glasses of water at bedtime.

"I was throwing up like bleach water. It came up through my nose burning," said the 20-year-old.

The water from the city system is so corrosive, according to General Motors officials, that the automaker's Flint Engine Operations pulled off the city water system, connecting instead into a water system operated by nearby Flint Township.

So what's in Flint's water and just how dangerous is it?

It depends on who you ask and what tests you're referring to.

State tests suggest the water is clear of coliform bacteria, which can suggest the presence of other disease-carrying pathogens.

But as a result of treating the water to kill any dangerous microorganisms, the water now carries low levels of Total Trihalomethane, or TTHM, a by-product of the disinfectants. Years of exposure may cause liver, kidney or central nervous system problems and an increased risk of cancer, according to the U.S. Environmental Protection Agency.

The city maintains the water — pulled from the Flint River rather than the Detroit water system that had served the city for years — is safe.

Mayor Dayne Walling who was born and raised in Flint, said he drinks it.

The river, long known for the toxins left from Flint's industrial years, is cleaner than it has been in years, "but that perception persists," Walling said.

That the possibility of bacteria and the TTHM levels were detected and then diminished, he said, is proof that the system works.

But the system is in desperate need of infrastructure improvements and experienced water treatment staff, Walling said.

Earlier this week, he asked for help from Gov. Rick Snyder to implement a new plan that called for those things.

"There is nothing more important in Flint right now than fixing the water problems," he wrote.

And communication is key, he added.

Experts talk

In a city hall meeting Wednesday, the city invited experts to talk to residents. They included representatives from the Michigan Department of Environmental Quality, the EPA, and a Michigan State University microbiologist whose life work has been in studying water safety.

In an immediate sense, the water is safe to drink, they assured the crowd.

Discoloration is most likely iron and calcium being sloughed off old city pipes as new water is being pushed into the system.

But while scientists talked in terms of parts-per-billion and testing and chemical reactions and future monitoring, residents held onto jugs of discolored water — water they said tasted funny and smelled terrible.

That's where it gets tricky, said Joan Rose, the MSU microbiologist.

When it comes to a life-giving liquid we turn to countless times a day for survival, appearance and smell is important as well as keeping it clean of pathogens and toxins, she said.

"You're so intimate with water. You drink it. You wash with it. You bathe in it," she said. "You can't blame anyone for the frustration. Everyone wants safe and wholesome water."

This much can be agreed upon: The city's water problems have worn residents raw with anger.

Some claim city officials are trying to cover up missteps and even political shenanigans. Some have accused city leadership of outright poisoning them.

"I've taken to calling it 'poop water,' " said Nayyirah Shariff, a community activist for the grassroots group Democracy Defense League.

Many said they are ready to abandon longtime homes.

"What we have is a full-blown crisis," said GM retiree Claire McClinton who had bundled up against the snow earlier this week to run into El Potrero Mexican restaurant for a late lunch.

But she reconsidered at the last minute and walked out instead, worried about eating at restaurants that rely on city water in their kitchens.

She's not the only customer who is concerned.

Business overall has been hit "probably 20 to 30%," said manager Jorge Alcazar.

The restaurant's lifeblood is in customers seeking a quick, affordable lunch, often with a glass of ice water.

Unwilling to drink the tap water, customers also don't want to pay $2 or more for a pop or buy a bottled water.

Worse for waitress Ashley Trujillo, customers have argued with staff. One customer left three pennies as a tip after fuming about having to pay for water. Others have left nothing.

"Like we have something to do with it," Trujillo said.

All of this — the frustration, the slump in El Potrero's business, the jam-packed meetings with residents toting jugs of brown water and claims they are being poisoned — are the latest blows to a city that has felt swatted around for too long.

"People think all the crime happens in Flint and everyone is poor in Flint, so there's this stigma. Now we're fighting against dirty water. Really?" said radiology coder Cindy Marshall, who joined about two dozen protesters earlier this week.

"Are you trying to kill us?" read one sign. "No more poison," read another.

McClinton echoed Marshall's sentiments: "We've lost confidence in the city."

Soaring bills

For years, residents in this city bleeding jobs and soaked in red ink have been facing growing water bills. Some have climbed as high as several hundred dollars a month.

"We have residents choosing between water and groceries and other bills," said Hazard, whose own bill is about $100 a month for a single person.

"I feel like I'm going under," said Hazard, who survived cancer twice and who was forced into early retirement and limited income.

The city eventually decided to dump the Detroit system in favor of the Karegnondi Water Authority, which is building a system to supply Genesee County with water pulled from Lake Huron. In the long run, this will mean lower water costs, officials have said.

Under the plan, Flint is temporarily pulling water from the Flint River until the water authority's system comes online, expected in 2016.

In August and September, however, the city issued three advisories to boil the water after detecting coliform bacteria.

Just before Christmas, residents received notices that state tests indicated higher-than-acceptable levels of trihalomethane, the disinfectant by-product.

Hazard's cats have been sick. So has she and several neighbors. Even her houseplant began to die.

Maynard threw up. Residents complained of rashes and mysterious illnesses.

"We just want safe water. How hard is that?" Hazard asked.

But assurances come with qualifiers.

The chlorine did its job and cleaned the water of microbial pathogens that can cause disease within days. That means the water is safe for healthy people to drink for a short time, said Michael Prysby, a district engineer in the state's Office of Drinking Water and Municipal Assistance.

But the trade-off was TTMH — possibly a danger for the very young, the very old, or the very sick if they ingest it long-term, he added.

"But we're talking decades," he said, adding that those who are worried should talk to their doctors.

"We don't want to make a blanket statement to say water is safe or unsafe. It's misleading both ways."

That's the kind of answer that infuriates Marshall, the protester and mother of a 5-year-old.

"They said it's safe, but it's brown water," said Marshall, also a radiology coder, after the meeting. "Why do we have to drink brown water? No one else has to drink brown water."

Flint Mayor asking Lansing for help resolving water quality issue

MI NBC News , January 21, 2015

FLINT – Long time Flint resident Darren Barry has drank the water in the city for 40 years. He says there isn't anything wrong with it.

"I make my coffee with it every morning. I have no problems. I'm going to get old here, and I'm going to keep on drinking the water," Barry says.

But other residents aren't so confident in the city's water supply being safe to drink. City officials sent a letter to residents last month that one of the city's 8 water districts, failed a quality test. Flint Public Works Director Howard Croft says overall the water is safe to drink.

"All of the standards we use are set by the Environmental Protection Agency. All of those standards are being met except for that one area," Croft explains.

To help resolve the water quality issue, the Flint Emergency Manager sent out a request to hire an outside consultant to help the Public Works Department solve the problem.

"it will give us another set of eyes to look at the plan we have in place. And offer any advice on how we can improve. But our water is safe to drink," Croft says.

Flint City Councilman Eric Mays says he's still concerned about the quality of water for the residents in his district. He says he wants the city to reconsider hooking up to Detroit water while the problem is being fixed.

"I need to look at the numbers and see if it's $1 million more than what we're paying now. Or would the actual cost be much cheaper. We need this fixed now. Not in the short term, long term, it's all one term to me. I'm concerned, and I want it fixed," Mays explains.

Now Mayor Dayne Walling is asking for help from Lansing to help fix the water problem.

"It is essential there is city, state, and federal cooperation to address the challenges here and to meet the needs of vulnerable populations," Walling said in his request.

We did not receive a response from the Governor's office regarding any action Lansing might take to help resolve the issue.

State says it's already 'working diligently' on Flint's water problems

MLive, January 21, 2015

FLINT, MI -- A spokesman for the Treasury Department says the state is already "working diligently" to be sure Flint's drinking water is clean and safe, but isn't commenting on specifics in a request for help from Mayor Dayne Walling.

"(Emergency manager) Jerry Ambrose and his management team are working diligently to ensure Flint residents have access to clean, safe water," spokesman Terry Stanton said in an email to The Flint Journal-MLive.

Stanton responded to a request from The Journal for comment from Gov. Rick Snyder to the mayor's request.

In a Jan. 18 letter, Walling asked Snyder to support a proposed Flint Water Improvement Plan, which includes forgiveness of payments by the city to the state Drinking Water Revolving Loan Fund due to Flint's status as a distressed community.

Stanton said to help ensure safe, clean water in Flint, "a consultant is being brought in to advise the city on appropriate next steps."

Former emergency manager Darnell Earley announced plans to hire the consultant before leaving his position here to lead the Detroit Public Schools.

"The city continues to work closely with staff from the Department of Environmental Quality to ensure water meets safety guidelines, that water operations are managed properly, and all regulations are met," Stanton's statement says.

"Treasury staff is also in regular contact with both the city and DEQ and will be providing support as appropriate."

Walling's letter to Snyder asked the governor for state help in dealing with what he called the most important issue facing the city today and included proposals focused in five areas: safety, quality, access, investment and education.

Since switching its water source from Lake Huron to the Flint River nine months ago, citizens have complained about the color and smell of city water, there have been several boil water advisories because of bacteria in the water system, and the DEQ found the city in violation of the Safe Drinking Water Act because of excessive total trihalomethane in the water supply.

"The governor has a particular responsibility due to Public Act 436," Walling has said about the state's emergency manager law.

Flint has been under state financial management since 2011, and Walling and the Flint City Council have had limited involvement in City Hall decision-making since.

Although a Transition Advisory Board is expected to be put in place here, emergency manager Jerry Ambrose told the City Council Wednesday, Jan. 21, that his goal remains to begin the transition from state to local control in April.

EMERGENCY MANAGEMENT AND HOMELAND SECURITY

If you see something, say something

Upper Michigan Source, January 22, 2015

NEGAUNEE – Recent terrorist attacks in other parts of the world have begged the question, are we prepared to deal with such an event if one were to occur and how could they be prevented?

The Michigan State Police have started their "If you see something, say something" campaign to bring public awareness to the signs of suspicious activity. While police say they want to remind people there is no current threat of a terrorist attack in the Upper Peninsula, community awareness of possible signs is crucial in keeping everyone safe.

"When police are around, people tend not to act the same way as they would do when we're gone," said Trooper Stacey Rasanen of the Michigan State Police. "So to protect our citizens,we need people to stand up and give us a call and let us know what's going on."

Police say you should alert them if you notice any suspicious, no matter how small.

In the case of an emergency, immediately call 911 if you see something suspicious.

For non-emergencies, you can report suspicious activity to the Michigan Intelligence Operations Center by calling (855) 642-4847 or clicking here.

For more information on tips to recognize suspicious activities, visit their website.

Sandy Hook killer's home to be demolished

Detroit Free Press, January 22, 2015

The house of the Sandy Hook Elementary School killer will be torn down and its 2-acre parcel kept as open space, the Newtown Legislative Council decided Wednesday night.

The council voted, 10-0, to approve the recommendation by the board of selectmen to demolish the two-story, 3,100-square-foot colonial where Adam Lanza lived with his mother, Nancy. The Connecticut town acquired the property in December from a bank at no cost.

Town officials indicated demolition would likely happen when winter ends.

The now-infamous house has sat empty since Dec. 14, 2012, when the 20-year-old Lanza killed his mother in her sleep and then massacred 20 children and six adults at a nearby elementary school before committing suicide. To prevent souvenir hunters, the contents of the house were burned.

Most victims' families and neighbors wanted 36 Yogananda St. torn down. One called it "a constant reminder of the evil that resided there." Others said it attracts a steady stream of gawkers.

Before the vote, council President Mary Ann Jacob, who was a Sandy Hook library aide the day of Lanza's slaughter, said there was "not a lot of controversy about it, so I think it will be a pretty quick discussion and vote."

There was no public comment or council discussion before the vote, the Danbury News-Times reported.

Though the council intends to keep the land undeveloped, it will seek to keep the town from profiting from any future sale or development. Any proceeds would go victims. The land, which abuts town-owned woods, was appraised in 2012 at $146,280.

Ryan Lanza, Adam's father and heir to his ex-wife's estate, authorized deeding the property to the town.

Love him or hate him, here's how one school superintendent calls snow days

BridgeMi.com , January 22, 2015

Normally the interest in snow-day school cancellations is confined to students and staff in a given district. But when Steve Matthews, superintendent of Novi Community School District, made the call to keep his buildings open during a bitter cold snap earlier this month, his decision resonated up and down the jungle drums of social media. Students tweeted and texted their dissatisfaction, sometimes in salty language, which led to a blog entry by Matthews about the difficulty of both making tough decisions and living with them when you might disagree. And that led to a column by Detroit News columnist Laura Berman on the same topic. As Bridge has written about the issues of snow days and instruction time, we thought we'd look Matthews up and ask how he reaches these decisions and defends them to parents and students.

Bridge: Can you describe what your process is in making the determination to call a snow day?

During the winter months, superintendents and others continually monitor weather reports. I have two weather apps on my phone. I look at the forecast all the time.

When we see a weather pattern starting to develop or hear a weather alert we begin to map out exactly when it will impact our area.

On the mornings when we have to make a call, I begin talking to my assistant superintendent of business and operations between 3:30 and 4 a.m. We try to get a sense of what the conditions are. My assistant superintendent lives in the district, so he will go out and drive the roads if there has been snow.

Between 4 and 4:30 a.m. my assistant superintendent and I get on a conference call with other superintendents in Oakland County. There are anywhere from 15-20 other superintendents on the line with us, along with a meteorologist from Accuweather.

The weatherman briefs us on current conditions and what the next several hours will look like. We want to know if snow will accumulate, if the winds will pick up, if the temperature will drop, if conditions will improve or deteriorate.

The superintendents ask questions and then he leaves the conversation. My assistant superintendent moderates the ensuing discussion. What are people thinking? Is anyone closing? Is anyone concerned about opening?

Because we have a variety of districts in the county sometimes our decision is not unanimous, but we typically try to make a decision all of us can live with. Some districts have dirt roads, some have communities that don't plow as well as others, etc.

We are guided by several factors. Will staff be safe driving to school? Can staff get there on time? Will buses be able to travel easily? Is it too cold for students to wait for buses? How many snow days have we used? Will buses be delayed but ultimately safe on the roads? Will we get at least 75 percent of the students to school? (The state won't pay for a day unless at least 75 percent of the students in the school are in attendance.)

We want students to be safe. We also want students in school. The disruption, especially in a winter like we had in 2014, can be pretty dramatic.

At the end of the conversation, usually by 4:45 a.m., each superintendent makes the decision for their district. As I said, we try to remain united, but sometimes we have to make a decision based on local conditions.

Bridge: Why did you decide to keep school open on that particular day, Jan. 8? It wasn't snowing, but it was very cold and windy.

We made the decision to remain open for several reasons. First, we consult the National Weather Service wind chill chart. We are conscious of any weather conditions that would place our students at risk

within 30 minutes. We do not have any students who walk or who have to wait for a bus longer than that. If the wind chill or temperature would create conditions where frostbite could occur within 30 minutes we will call school. That would be temperatures or wind chills anywhere above 20 below zero.

What is the difference between -15 and -20? Probably not a lot. Cold is cold. But we have to draw a line somewhere so we look for that 30-minute mark.

On Jan. 8 the morning wind chills were between -15 and -20. The air temperature did not get quite as cold so the wind chill was not quite as bad.

As I said, the difference between -15 and -20 wind chill is hard to calculate. Cold is cold. But we felt confident our students could remain safe walking or waiting for a bus.

And the roads were clear and dry, so buses would probably not be delayed.

Third, we live in a community where the vast majority of our students have gloves, hats, scarves, boots, coats and snow pants. The frostbite conditions discussed by the National Weather Service are on exposed skin.

Taking all those factors into consideration I felt we could safely open.

Bridge: We live in a cold climate. When is it ever too cold to go to school?

I would suggest that if wind chill or temperatures are at such an extreme that frostbite is a danger in less than 30 minutes we will consider closing school. If a bus had an accident, ran out of gas or had a mechanical problem we do not want to place students at risk. In our district if that happened we feel confident that we could get to them and get them to safety in less than 30 minutes.

In Michigan in winter, dressing for the weather is important. As I said, in our community the vast majority of our students can. So we have more flexibility than some communities might have because our parents and students can dress appropriately.

Bridge: Do these things (the shortening of the school year because of snow, etc.) affect your thinking?

In Novi we have 179 days of instruction for students. That is more than some districts but less than many other countries. I believe that being in school is important. I stress with my administrative staff and the teachers that every day should mean something.

We had just come off of a two-week break for the holidays. We had only been in school for three days. Interrupting school again is a concern. But if needed, I would have closed. I just did not believe that our students could not get to school safely.

Bridge: So you made your call, and the students weren't happy about it. Did the reaction surprise you at all? What's the lesson in that for Novi students?

I knew that students would not be happy. All through Wednesday night high school students had been sending me tweets begging me to call a snow day. When some neighboring districts did I knew it would ratchet up the pressure. But I did not believe conditions warranted closing.

I was surprised some of the tweets trended toward the offensive. I liked the clever ones. There was one tweet that read: Plot twist. Dr. Matthews car freezes to the road. He has to walk home.

That was fun. The messages that used profanity and anger were less fun.

I was not surprised by the reaction. Students are passionate.

The lesson is that all of us need to learn to communicate clearly and passionately but in a respectful manner. I was not offended. I enjoyed the banter.

Bridge: When you're up at 4:30 a.m., making these decisions, what job do you wish you had?

That is a great question. I am not a huge fan of getting up so early. But every job has an upside and a downside. Making these calls at 4:30 a.m. is definitely one of the downsides. What other job do I wish I had? If I could hit the curveball I would probably like to be ball player. Summer, sun, green grass. That sounds good.

we did have that rise, so if they do go down, we should be back to average," Schropp said.

'I want you to know your schools are safe:' Rockford supt. addresses recent threats in YouTube video

Fox 17, January 22, 2014

ROCKFORD, Mich. — Following multiple threats made against Rockford Public Schools since late October of 2014, the district's superintendent took to YouTube Thursday to address parents, students and staff about the ongoing investigation.

The nearly six and a half minute address from Supt. Mark Shibler posted to YouTube Thursday, and provided to students at the Freshman Center and Rockford High School, comes on the same day Shibler tells FOX 17 he met with numerous law enforcement agencies, including Michigan State Police, Kent County Sheriff's Department, Rockford police and even the FBI.

"There are assigned detectives from their organizations who are working on this on a regular basis," Shibler said in the video. "I want you to know this is something that doesn't just happen and we move on to the next incident. We take these threats very seriously."

Shibler told FOX 17 he's felt it imperative to keep parents, students and staff informed of the progress and called Thursday's meeting with law enforcement "very productive."

"What is making this more complicated in the technology that's involved, where a threat might be given through Skype or email that makes it really difficult to trace," Shibler said in his YouTube message.

"But we are tracing them. I want you to know your schools are safe."

Of every district in Kent County, the only one with more security personnel than Rockford is Grand Rapids Public Schools, Shibler said in the video.

The YouTube update comes after the most recent threat made against the district's freshman campus Jan. 16. Just one day prior, nearly 2,000 high school students were forced to wait in the gym for more than two hours after a threat was phoned into the school involving a propane tank being placed in the building.

"It makes me frightened for my children and it's scary," said Shelley Volkert, a parent of Rockford High School students.

"The world they have to grow up in today is not the same world we had to grow up in, and it makes me sad we even have to have these things happen."

Volkert said the false alarms have begun to take a toll on her kids.

"I think it's come to the point with this last one, it was frightening for them, they came home and slept for a couple hours," she said. "I think it's mentally draining."

While the threats have brought a feeling of uneasiness for parent Mike Richard, he said he at least appreciates the effort the district is making to keep parents informed.

"You know, I don't expect them to snap their fingers and make it go away but just to know they're doing something to work toward a resolution is really all we can ask for," Richard said.

The problem isn't unique to Rockford either. Several other Kent County schools have dealt with similar false threats in recent months.

In cooperation with the Kent County Sheriff's Department and the Rockford Public Schools, the reward has been increased to $10,000 for information leading to the arrest of the person or persons responsible for making anonymous phone or email threats to the Rockford Public Schools.

Anyone with information about this crime is encouraged to call Silent Observer at 616-774-2345 or go to www.silentobserver.org for more information.

Pet safety this winter in the D

WDIV, January 22, 2014

There's nothing that makes me happier than puppies, and there's nothing that makes me sadder than puppies in danger. That's why when winter rolls around, it's so important for pet owners to take special care of their animals in freezing temperatures.

How many times have you driven down a street in the dead of winter and seen a dog sitting outside in the snow either chained up, or worse, just wandering about? Both are heartbreaking visuals, and if you're a pet owner, you need to be smart about taking care of your best buddy in the coming months.

If you need a shocking statistic to wake yourself up, here's one: the Michigan Humane Society Cruelty Investigation and Rescue Departments are inundated with calls during the winter months, and it is not uncommon for the teams to respond to over 40 calls in a single day.

Ryan McTigue, Public Relations Coordinator for the Michigan Humane Society, said that upon receiving a call, the investigators go and check on the animal to see if it is healthy or in immediate danger.

"They make a determination at that point if they need to remove the animal or educate the owner on how to be compliant with the law or how to work on behavior so that the dog can live indoors," McTigue said. "They will always check back on animals that they have received complaints on to ensure that they are safe."

If someone fails to provide proper shelter for their pet, the owner may face misdemeanor animal cruelty violations, which can result in up to 93 days in jail, up to a $1,000 fine, community service, and loss of pet ownership for a period of time.

McTigue urges owners to bring their pets inside, as it is the best and safest place for animals.

"If it's too cold for you to be outside, it's too cold for your pets. Limit your dog's time outside and do not leave them unsupervised for long periods of time," McTigue said.

The Michigan Humane Society offers free straw for pet owners at the Detroit Center for Animal Care, 7401 Chrysler Dr., Detroit, on Mondays through Saturdays and at the Rochester Hills Center for Animal Care, 3600 W. Auburn Rd., Rochester Hills, on the same days.

Daniel "Hush" Carlisle, Co-Founder and Executive Director of Detroit Dog Rescue, has seen firsthand the damage harsh weather can do to pets and homeless animals of the Detroit area.

While the organization does not advocate for keeping dogs outside during the winter, he noted that owners that choose to do so must take every necessary precaution to keep their pets safe, including proper shelter with insulation and enough room for the dog to move around. A consistently replenished supply of fresh water and food is also of utmost importance.

Throughout the winter months, the Detroit Dog Rescue receives a staggering number of calls asking for food. The organization can often be found on the streets passing out dog food, igloos and hay for insulation, thanks to donations through partnerships with Detroit Canine and Home Depot.

"During community outreach, we're constantly advocating for responsible ownership," Hush said.

Responsible pet ownership includes keeping your dog safe when going for a walk. Even indoor dogs need to get outside and release their energy during the winter months, and that's what pet sweaters are for, said Hush.

"I would say just following that list (will ensure your pet's safety during winter). An insulated dog house, hay, fresh food and fresh water," Hush said. "Every day, you need to make sure you have that every day."

When insulating your dog's house or igloo, don't forget to place the hay around the outside of it, too, not just the inside!

Stephanie Amado, Licensed Veterinary Technician at East Detroit Animal Hospital, pointed out that in below freezing temperatures, which are very common in Michigan winters, dogs are prone to frostbite.

"Keeping (your pets) warm and dry is the most important thing," Amado said. "I have seen cases of frostbite before. With Michigan's extreme weather, it can happen."

It's best to bring your dog inside to avoid this scenario entirely, but what about when you're being a good pet owner and taking your pup for a walk? Amado suggests rubber boots that look like balloons to put over the paw pads.

"The paw pads, if they stay wet, could grow an infection between the toes of the paws. If the pet doesn't allow you to dress them (in the boots), then after coming back inside from the snow, just be sure to dry their paws off," she said.

Sometimes the hospital receives calls about dogs left out in the cold, and when that happens, microchipping can be a huge help in reuniting the animal with their owner.

Sandra Boulton, PR Director for Friends for the Dearborn Animal Shelter, said that keeping pets indoors comes first, but having your pet microchipped is the second best thing you can do for your furry friend during winter.

"This is the best opportunity for your pet family member to be returned if they get out and become lost. In the frigid temperatures of winter, dogs can (lose) their keen sense of scent and can readily lose their way home," Boulton explained.

She also pointed out an incredibly toxic winter hazard: keep an eye out for antifreeze on the ground, as it is poisonous to animals and has a sweet taste, so they will find it attractive. For your own use, be sure to find a pet-friendly antifreeze option on the market.

When the shelter receives a call about a stray or abandoned animal, animal control is immediately dispatched to the location, which Boulton said is very responsive during the dangerous cold months. The pets are then brought to the shelter where they are cared for, assessed, and reunited with their families or adopted.

"Each of us pet owners can be ambassadors for companion animals with those around us, and a gentle reminder about pet safety in the winter could save a life," Boulton said. "Second, always report a stray animal to your local police department or animal control, there is no way to know how long they have been outdoors and they could be at risk."

As a pet owner, I personally know how much love and joy my pup brings into my life, and because of that, I will always do what is best for her. I think it's safe to say that no matter what breed of dog or cat you own, all of us in the D can agree that owning a pet is a serious responsibility with a fantastic reward: unconditional love. For more information on how to care for your family pet during the winter months, read these tips, courtesy of ASPCA.

MICHIGAN NUCLEAR

Palisades plant work environment improves, regulators say

CrainsDetroit, January 22, 2014

COVERT TOWNSHIP — The work environment has improved at Palisades Nuclear Plant in Southwest Michigan following concerns that drew attention last year, federal regulators said.

In a report issued Wednesday, the Nuclear Regulatory Commission said its inspectors in December found there is no longer a "chilled work environment" in the security department at the plant along Lake Michigan in Van Buren County's Covert Township.

"The inspectors determined that a chilled work environment currently does not exist and there has been improvement in the overall security department work environment," the report states. "All of the individuals interviewed were willing to raise safety concerns and the vast majority of individuals were willing to do so without fear of retaliation.

"In addition, individuals were not being discouraged from raising safety issues," it says.

An inspection also took place in May, and the commission said the work environment has improved since then.

Still, the Nuclear Regulatory Commission said some security workers continue to have concerns about the work environment and morale. Regulators have said they want to make sure workers feel comfortable reporting possible problems.

"The NRC will continue to monitor for safety conscious work environment issues to assess the sustainability of improvements seen to date through regular inspections by resident inspectors at the plant and specialist inspectors performing focused inspections," NRC spokeswoman Viktoria Mitlyng said in an email.

The plant is owned by New Orleans-based Entergy Corp. Spokeswoman Lindsay Rose told the Kalamazoo Gazette that Entergy expects all employees to be able to raise safety concerns. She told the Holland Sentinel that efforts will continue to improve trust with workers.

"This is not an issue that we're going to drop and wash our hands of it and say we're done with it," Rose said. "We need, with all of our workers, to continue to engage with them and make sure they all understand their responsibility for raising concerns."

HEALTH

Flu shot not as effective this year but get it anyway, Michigan health officials urge

MLive, January 23, 2015

KALAMAZOO, MI — Even as the medical community is bemoaning the ineffectiveness of this year's flu shot, Michigan public health officials are urging people to get the shot -- including people who have already had the flu this year.

The effectiveness of the shot to protect against one of the prevalent flu strains is a disappointing 23 percent, according to the Centers for Disease Control and Prevention.

But getting the flu shot still could mean the difference between a mild case of the flu and a case that lands someone in the hospital, said Dr. Eden Wells, director of the preventive medicine residency at University of Michigan. It also protects well against two or three other strains of the disease that are circulating -- getting sick with one strain does not protect against getting others.

Finally, getting the flu shot lowers the risk of transmitting the disease to others, especially important to people vulnerable to complications of influenza such as children under 5, adults 65 and older, pregnant women and people with underlying health conditions such as asthma or cancer.
